Under the AFDC program's current rules, and the Adult Assistance programs as well, States are free to hire bilingual staff and print forms, etc., in as many languages as the State deems necessary with costs matched by the Federal government. Many States have adopted this procedure. The Family Support Administration does not believe it would be cost effective to require the use of bilingual staff and printed materials as States should have maximum flexibility in this area to adapt their own programs to meet the needs of their recipient populations. As to the comment on substituting a multilingual label in the Food Stamp Program, the Act requires that materials be available in other languages if appropriate, not just an indication that a translation is available.

Timely Reporting of Changes for AFDC and Adult Assistance

Severly commenters recommended that the two programs adopt uniform requirements for reporting changes which would affect eligibility or the amount of assistance. Although the Food Stamp Program regulations require such changes to be reported within 10 days, neither AFDC nor Adult Assistance regulations establish a time limit. States are therefore free to set their own standards for reporting changes and may adopt standards for AFDC and Adult Assistance which are consistent with those required for the Food Stamp Program.

Regulatory Changes

The following sections set forth what changes are being proposed for the AFDC, Adult Assistance and Food Stamp programs. The proposed food stamp changes are discussed first in their entirety because they appear first in the Code of Federal Regulations (Part 7 versus Part 45). A discussion of the AFDC and Adult Assistance changes follows immediately thereafter. In some cases the proposed rule results in the same requirements for all the programs. Even in these cases separate discussions are maintained (although the Adult Assistance Programs are generally included in the discussions of the AFDC changes) in order to establish a rationale within each program's framework.

Food Stamp Program

Application Processing/Scheduled Interviews-§ 273.2(e)(3)

The Notice of Intent specifically requested comments on the Food Stamp Program's current policy on second interviews contained in 7 CFR 273.2(e)(3). The current rule requires the State agency to attempt to schedule a second interview if the household fails to appear for the first interview. Further, the State agency can only deny the case if the household misses two interviews and the 30-day processing time from the date of application has elasped. Federal policy for the AFDC and Adult Assistance Programs does not require an interview. However, if the State under its policy requires one, it is not mandated to reschedule a missed interview, and the State agency may deny the application immediately after the applicant fails to appear for the initial interview. The large majority of the comments received on second interviews recommended the use of the AFDC Program's policy. While food stamps cannot delete the interview requirement because of the Food Stamp Act, the Department of Agriculture is proposing to delete the requirement to schedule a second interview if the household failed to appear for the first scheduled interview. The State agency would also have the option of either immediately denying the household when it misses the first interview scheduled or denying the application on the 30th day following the initial application. Whichever option is chosen, the entire caseload for the State must be handled in the same way. The State agency would be required to inform the household prior to the first scheduled interview of the consequences of missing that interview; i.e., it is the household's reponsibility to schedule another interview as the State agency would not be rescheduling the missed interview and whether the State agency has opted to immediately deny the application. This information must be provided in writing, either with the application form or when the household is given its interview time.

States which choose to immediately deny the household after missing a scheduled interview must provide a notice of denial at the time of the missed interview to inform the household that it must reapply if it wishes to receive food stamps. The State agency may develop a system to permit the household to reapply using only Part 1 of the FNS–385, Application for Food Stamps, (the "tear-off" sheet) to avoid completion of an additional multi-page application form. Any changes from the original information on the application would be updated and initialed by the applicant or the authorized representative. For quality control (QC) purposes, the State agency must clearly differentiate between the original denied application and the reapplication made after the household misses the initial interview. If the State agency does not opt to immediately deny the household after missing the initial interview, the notice of denial would be sent at the end of the 30-day processing time for households which have not contacted the State agency to reschedule an interview. At its option, the State agency may send a reminder to the household after it misses its scheduled interview, again explaining the consequences of missing the scheduled interview.

The Department is further proposing to allow the State agency to immediately deny an application after the household misses a recertification interview provided the interview was scheduled after the household had timely filed the application. However, if the household failed or refused to appear for an interview prior to submission of a timely application, the State agency is required to attempt to reschedule another interview. If the household fails to appear for the second scheduled interview, the State agency may immediately deny the application.

Application Processing-§ 273.2(g) and (h)

The AFDC regulations, at 45 CFR 206.10(a)(3), require that a decision of eligibility shall be made "not in excess of 45 days" from the date of application while for disability under APTD and AABD the limit is 60 days. Section 11(e)(3) of the Food Stamp Act, as amended, provides that the State agency complete certification and provide an allotment not later than 30 days following the filing of an application. In addition, Food Stamp Program regulations at 7 CFR 273.2(h) provide that if the State cannot take any further action on the application due to the fault of the household, the State agency must give the household an additional 30 days to take the required action. If verification is lacking, the State may hold the application pending for 30 days following the date of the initial request for the missing verification. Currenty, the State has the option to either send a household a notice of denial or a notice of pending status if verification is lacking and a decision of eligibility cannot be made by the 30th day after application. However, elsewhere in this regulation, a proposal is made to modify the notification requirements.

Several comment letters addressed the application processing timeframes of the two programs. Most of the commenters recommended that the Food Stamp Program adopt the AFDC Program's timeframes which recommendation cannot be followed due to statutory restrictions. This proposed rule retains the statutorily mandated 30-day food stamp processing standard, but deletes the 30-day pending status in § 273.2(h) to be more compatible with the AFDC Program by at least eliminating the pending period which the AFDC Program does not have. The Department of Agriculture believes that households in need of assistance should take responsibility for promptly meeting all application processing requirements. However, no program can deny assistance at the end of the mandated processing time solely because the time limit for processing the application has lapsed. Therefore, the food stamp requirements in § 273.2(h)(3) on continuing to process an application when the State agency causes the delay is retained in the revised § 273.2(h). It should be noted that State agencies are not precluded from using a 30-day processing standard for their PA caseload to conform with that of the Food Stamp Program.

Residue—§ 273.3

The regulations of the Food Stamp Program at 7 CFR 273.3 require that a household reside in the project area in which it files an application for participation. A project area is a subdivision of the State, normally a county or independent city. However, some States have a Statewide project area. The AFDC and Adult Assistance programs require that the individual be a resident of the State. Commenters asked that the Food Stamp Program adopt the AFDC residence policy. This rulemaking changes 7 CFR 273.3 to permit States to allow Statewide residency. The State agencies could still designate limited project areas and could restrict where a given household could apply. This change will assist in reduction of quality control errors caused by a household participating in the wrong project area.

Work Registration Exemptions—§ 273.7(b)

A number of commenters suggested that the exemptions from AFDC's work incentive (WIN) program and food stamp's work registration be brought into closer alignment. Most of the current exemptions are specified by statute and are unalterable thus precluding total consistency. As a result of DEFRA, women in their third trimester of pregnancy are now exempt

VOL 52 ISS 188 SE 29 1987 UMI

(see 42 U.S.C. 602(a)(19)). For consistency, the Food Stamp Program proposes to also exempt these women from work registration under the authority of 7 U.S.C. 2013(c) and 2015(d). Since publication of the Notice of Intent, the Department has made efforts to bring requirements of the AFDC and Food Stamp Program into closer conformity in the area of work programs. For example, DEFRA excused from work requirements all individuals actually employed under a Work Supplementation Program (WSP). Through WSP, the AFDC Program diverts the grant to an employer in order to subsidize wages. Under this program, AFDC recipients may choose, on a voluntary basis, to accept an offer of work which is subsidized with State and Federal funds. Prior to December 31, 1986 regulations at 7 CFR 273.7(b) provided a work registration exemption for persons "subject to and participating in the WIN program under title IV." The Department recognized that this language precluded work registration exemptions for persons participating in title IV work programs other than WIN. It was not the intent of the Food Stamp Program to exempt those participating in WIN (title IV–C) from work registration while requiring registration of individuals participating in title IV–A work programs (including CWEP, job search and WSP). Therefore, a change was made in the final rule, entitled Employment and Training Requirements, published at 51 FR 47378, December 31, 1986. Now household members subject to and participating in any work program under title IV–A of the Social Security Act, as amended, are also exempt from food stamp work registration requirements.

Jointly Held Resources—§ 273.8(d)

Some comments were received on the Food Stamp Program's policy at 7 CFR 273.8(d) which requires counting as available to each household any jointly held resource, unless it is proven inaccessible. Under the AFDC and Adult Assistance programs, States establish criteria consistent with State law for determining the availability of jointly held resources.

To more closely conform the Food Stamp Program's and the PA policy, this proposal would exclude as a resource any jointly held available resource which State law prohibits noncontributory signatories from withdrawing or liquidating for their own benefit. Existing regulations cover jointly held unavailable resources in that they are considered inaccessible if the household's access to them depends on agreement of a joint owner who will not comply. The AFDC and Adult Assistance programs are also amending their regulations in this area.

Funeral and Burial Agreements—§ 273.8(e)

Both the AFDC and Food Stamp Programs exclude one burial plot per member of the food stamp household and the assistance unit for AFDC from being considered an available resource. In addition, the regulations of the AFDC Program exclude for resource purposes the value, up to $1500 in equity value per member of the assistance unit, of a bona fide funeral/burial agreement. The $1500 limit was taken from the SSI program. The Food Stamp Program, by an indexed policy memorandum (Policy Memorandum 82–3, October 8, 1981) issued under the Policy Interpretation Response System, extends the regulatory exclusion (now statutory) for burial plots to funeral/burial agreements. The policy memorandum advised that no exclusion could be provided unless such funds are inaccessible or must be repaid, if withdrawn, according to a contractual agreement. However, no limit is now placed on the amount of the agreement.

Commenters requested consistency in this area, the majority preferring that the Food Stamp Program adopt the AFDC Program's policy. Therefore, it is proposed that 7 CFR 273.8(e)(2) be amended to exclude as a resource the value of a formal funeral/burial agreement up to $1500 in equity value per household member. Examples of formal agreements are those which are either completely inaccessible or for which there is a contractual obligation to repay any withdrawals. By placing a limit on the amount of the agreement, the Food Stamp Program is not only becoming consistent with the AFDC Program but is lessening the likelihood of abuse of the exemption.

Interest Income—§ 273.10(c)

Commenters requested that the Food Stamp Program adopt their understanding of the AFDC policy on interest income. The commenters believed, incorrectly, that the AFDC program counted interest as a resource. However, both programs now count interest as income in the month received. Determining and verifying each month's interest amount can be very difficult, given the normally minimal amount involved and the fact that statements may not be available on a monthly basis. Therefore the programs are proposing that States agencies be given the option of projecting monthly interest income by periodically averaging monthly interest.

The eligibility worker would take a series of monthly figures, divide that total by the number of months involved, and project that average as the monthly figure taking into account any evidence that this average would no longer be expected to continue as a reliable average. This is different from taking an amount paid quarterly or semi-annually and prorating it over the period the payment covered, which can currently be done. The State agency would have the option of having the household report the monthly amount each month or only reporting each month's payment at recertification. These options should assist States by easing their administrative burden while still capturing a source of income to the household.

Notices—§ 273.10(g) and 273.13

A number of comments were received on the notices the programs provide to recipients. As a result, changes are being proposed to the programs' notice provisions. For the Food Stamp Program, the notices of adverse action, eligibility and denial are being changed. Use of the notice of pending status will be limited to State agency-caused delays. A discussion of the proposed revisions and why other requested changes were not made follows here.

Notices of eligibility, denial and pending status—§ 273.10(g)

While the large majority of comments on notices used by the Food Stamp Program dealt with the notice of adverse action, this proposal affords FNS the opportunity to bring the initial notices of eligibility, denial and pending status into closer consistency with notices provided in the AFDC and the Adult Assistance programs. In addition, the material included in these notices would be streamlined. However because certain information is needed for the Food Stamp Program (such as for variable benefits) that might not be needed for the PA programs and vice versa, there are some areas where notices must remain different. The notice of eligibility provisions would no longer require the form to contain information about legal aid availability or about how to contact the food stamp office. In addition, the optional reminder to the household to report changes or provide other useful information would no longer be specified. This information is given to the household at certification. The AFDC and Adult Assistance programs do not have such requirements. Households should know how to contact their local offices and should feel free to inquire about legal aid availability.

Also, households are told to report changes either on the monthly report or otherwise.

Further, the State agency may still provide such information or any other information it feels is useful. It is not necessary to provide such detail as to how a State must design its notices. Also, because many Statewide systems are in place and more may be established, given the change in the residency requirements in this docket, it may be difficult to provide such information about individual communities.

The notice of denial is also being redesigned. In addition to deletion of information on legal aid availability and how to contact the local office as discussed above, the notice of denial would be sent to households whose applications were not processed at the end of 30 days after application unless the State agency is at fault. The State agency will no longer have the option to send a notice of pending status. The notice of pending status must still be used for delays caused by the State agency.

Notice of Adverse Action—§ 273.13

Many commenters asked that the definitions for an adequate and timely notice be the same for all programs. For consistency, this proposal would remove the requirement at 7 CFR 273.13(a)(2) about a contact person and on legal aid availability and would add a requirement that the notice of adverse action include the specific regulations or law supporting the action taken. For the purposes of the notice, the regulation may either be the Federal or State regulatory citation or the State manual or handbook citation. For clarification, this proposal adds a statement that for monthly reporting households, adequate notice is defined elsewhere. Also, it clarifies that the household would have a right to continued benefits if it requests a fair hearing within 10 days after the notice was mailed.

As to the exemptions, this proposal would add an exemption from sending a notice of adverse action if agency mail is returned with no known forwarding address but requires provision of benefits if the household's whereabouts becomes known in the issuance month. In addition, the exemption section is being revised to make a distinction among the time when: (1) A timely and adequate notice must be given; (2) no notice of any kind is given; (3) an adequate notice is given; or (4) when another type of notification is given.

Several commenters asked that the Food Stamp Program adopt the AFDC Program's voluntary waiver to a notice of adverse action and the right to continued benefits pending a hearing if an overissuance would result. This recommendation is not adopted as there are already adequate ways for the household to avoid an overissuance, such as not transacting its authorization card or returning its coupons.

Disallowed Costs of Producing Self-employment Income—§ 273.11(a)(4)

A number of commenters suggested that the items which are disallowed as costs of doing business when calculating self-employment income be made the same. Currently, self-employment income, or profit, is derived from subtracting certain business expenses from the gross receipts. Business expenses must be directly related to producing the goods or services. Certain items are excluded by each program from allowable business expenses. This rule conforms the list of items excluded by each program.

Boarders § 273.11(b)

A number of commenters recommended that the Food Stamp Program count income received from boarders when the household does not own and operate a commercial boardinghouse in the same manner as does the AFDC program. The AFDC and Adult Assistance programs treat boarder-generated income the same as all other self-employment income, and do not differentiate between income received by households which own and operate a boardinghouse and those which do not. The Food Stamp Program does differentiate between these two types of boarder income, treating income to households which own and operate a commercial boardinghouse the same as all other self-employment income. Income received from boarders in cases where the household does not own a commercial boardinghouse is calculated differently.

Current Food Stamp Program regulations at 7 CFR 273.11(b)(1) provide that States must use the Thrifty Food Plan as a basis of establishing the cost of doing business for income received from boarders if the household does not own and operate a commercial boardinghouse. The rules provide that the cost of doing business is either: (1) The cost of the Thrifty Food Plan for a household size equal to the number of boarders; or (2) the actual documented cost of providing room and meals, if that cost exceeds the Thrifty Food Plan. The majority of comment letters received on this subject recommended that the policy be more flexible, and patterned after the AFDC policy. Although its policy is not currently found in regulation, the AFDC and Adult Assistance programs permit States to designate a flat percentage or a flat amount as the cost of doing business provided there is an objective and justifiable basis. If it can be shown that the actual expenses are higher than those resulting from application of the State's method, the State must use the higher amount. In this proposed rule, the Food Stamp Program is adopting the PA method, and the AFDC and Adult Assistance programs are putting their policy into regulation. This proposal establishes a ceiling of 75 percent of boarder-generated income as the cost of doing business. The figure of 75 percent was arrived at using 1982 data from the *Statistics of Income Bulletin, Summer 1984* issued by the Internal Revenue Service. This data showed for rooming and boarding houses (no data is available for individual roomers and boarders) that 72 percent of business gross income is for allowable expenses which excludes depreciation. We have rounded this figure up to 75 percent. For the Food Stamp Program, income received from boarders in a commercial boardinghouse will continue to be regarded as self-employment income. FNS encourages comments on the different treatment of boarder-generated income between households which own a commercial boardinghouse and those which do not.

Change Reporting Requirements for Non-Monthly Reporting Households § 273.12(a)

On January 16, 1981, the Department of Agriculture published a proposed rulemaking (46 FR 6310) which included a provision to revise the current policy on when certified households should report changes in income. Currently households are required to report changes in the source of income and gross monthly income changes exceeding $25, with some exceptions. While this requirement causes no confusion in those instances when income either does not change or changes in a way which can be anticipated, the requirement is not clear with regard to fluctuating income. There are a number of interpretations of how to apply the change reporting requirements to fluctuating income and a number of options were considered when the original proposal was prepared. Please refer to the January 16, 1981, proposed rulemaking for a further discussion of the background of this issue.

The proposed revision to the change reporting policy was not adopted as a final rule because the Department felt,

VOL
52
ISS
188
SE
29
1987
UMI

at that time, monthly reporting would solve the problem of what changes recipients must report. Monthly reporting has now been in effect for a while but has not provided the complete solution the Department thought it would. A number of households are not subject to monthly reporting, either because of a statutory exclusion or because a waiver was granted for various categories of households for which monthly reporting is not cost-effective. For households exempt from monthly reporting but which have fluctuating income, the reporting of non-status (e.g., temporary overtime or loss of a few hours pay) changes is inconvenient and is difficult for States to administer. Also reporting changes in fluctuating income makes it difficult to calculate an accurate method of review for QC purposes. The AFDC Program does not specify by regulation how its recipients are to report changes. Each State agency decides how non-monthly reporters should report changes. A number of States define changes in circumstances as outlined in the AFDC QC manual. The AFDC QC manual (section 3 subsection 3050(B)) defines a change in circumstance as any employment status change which results in either increased or decreased income, for example, part-time to full-time, loss of job or change in hourly rate. Therefore, in the interest of consistency with the AFDC Program and to reopen comment on the issue of how to report changes in fluctuating income, the Department is reproposing an amendment to 7 CFR 273.12(a) on how changes are to be reported.

The Department proposes to require households with fluctuating income to report changes in the source of income, in the wage rate of fluctuating income, and ongoing changes in the number of hours worked—rather than changes of more than $25 a month found in the current regulations. (There would be no change in the reporting requirements for households who do not have fluctuating incomes). Errors in household income are more frequently attributable to changes in basic employment status, such as converting from unemployed to employed status or from part-time to full-time employment, rather than fluctuations in the hours worked. The reporting of more permanent changes in wage rates would allow State agencies to more exactly match benefits to households' long term circumstances.

Under this proposal, households would report permanent changes in their circumstances. These would be changes that would affect future months' income and not sporadic changes. Because only permanent changes would be reported, the handling of changes by clients and caseworkers would be less susceptible to error and the household would have a better understanding of what would have to be reported. Finally, this proposal would be easier for State agencies to monitor and would set a uniform method to be followed in QC reviews.

The Department recognizes that this proposal poses some issues of its own, such as the need to have a different set of income reporting requirements for households with fluctuating income than for other households. The Department would appreciate comments, especially on how State agencies are currently handling changes in fluctuating income.

Current regulations do not provide for the reporting of changes by households which have filed food stamp applications but have not yet been certified. Both section 6(c) of the Food Stamp Act of 1977 and § 273.12(a)(1) of the current regulations require only participating or certified households to report. The Department proposes to correct this omission by requiring applying households to report changes which have occurred since the filing of the application at the food stamp interview. Applicants and eligibility workers would discuss such changes when attempting to anticipate future circumstances. The Department further proposes that households report changes that occur between the food stamp interview an the eligibility determination within ten days after being certified as eligible. This procedure will avoid imposing an unnecessary burden on households not yet participating in the program, yet will not allow important changes to go unreported. Allowing such households ten days after being certified to report is consistent with current reporting requirements.

Fair Hearing Appeals—§ 273.15(q)

The PA regulations at 45 CFR 205.10(a) permit State agencies to establish a hearing appeals system which would provide recipients either a hearing before the State agency or an evidentiary hearing at the local level with a right of appeal to a State agency hearing. In the latter, a two-tier system, the second hearing can be either a "review hearing"of the prior evidence (if the recipient does not request another new hearing (a "de novo" hearing)) or it can be a "de novo" hearing.

The Food Stamp Program regulations at 7 CFR 273.15(q) provide that after a local level hearing which upholds the State agency action the household shall be notified of its right to request a completely new ("de novo") State agency level hearing. If a new hearing would pose an inconvenience to the household, a State level review of the local hearing may be requested instead of a new hearing. If the household indicates that it wishes to appeal, but does not select the method, the State agency shall proceed with a new State level hearing.

No comments were received on this subject but in the interest of conformity a change is proposed to adopt the PA policy. This proposal would allow State agencies the option of offering either a "de novo" or review hearing as the second tier in a two-tier system if the recipient does not specify a "de novo" hearing.

Time Limits for Taking Collection Action—§ 273.18(d)(3)

Comments were received on bringing the programs' policies and procedures on recipient claims closer together. While many of the Food Stamp Program's requirements on recipient claims are statutory, those of the AFDC Program are not. The AFDC statute requires the collection of all overpayments except that States may elect not to take action to recover overpayments of less than $35 from individuals no longer receiving assistance. Within this framework the basic AFDC policy is that States develop policies for recovering overpayments and take all reasonable steps to promptly recover overpayments in a timely manner. Therefore, State agencies now have flexibility to conform the procedures of the AFDC Program to those of the Food Stamp Program.

There is, however a specific regulatory requirement in the AFDC Program establishing a time limit for the State agency to take action once a claim/overpayment has been identified. There is no similar provision in the Food Stamp Program. In this proposal, the Food Stamp Program will adopt the AFDC Program's requirement because it will enhance consistency as well as improve the efficiency of claims/overpayment collection efforts. This new provision would require the State agency to take one of the following actions by the end of the quarter following the quarter in which the need for a claim is first identified: (1) Recover the claim, (2) initiate action to locate and/or recover the claim from a non-recipient, (3) execute a repayment agreement or, if applicable, reduce the household's benefits, or (4) initiate action to recover the claim from a recipient who is not subject to benefit reduction. Where compliance with the

above is not possible, the extenuating circumstances must be documented. For example, if collection of the claim would prejudice a potential fraud case or if there are problems with obtaining information needed to establish the claim, the State agency should document the appropriate details.

AFDC and Adult Assistance

Notice of Adverse Action § 205.10(a)(4)

Many commenters asked that the definitions for an adequate and timely notice be the same for both the AFDC and Food Stamp Programs. The AFDC and Adult Assistance programs' regulations at 45 CFR 205.10(a)(4)(i) (A) and (B), which define adequate and timely respectively, provide considerable flexibility for States to design notices and adopt policies which would accommodate the notice requirements of food stamps. Therefore, for the most part, proposed regulations represent adoption of a common, or at least similar, terminology with the Food Stamp Program rather than a change in current AFDC and Adult Assistance requirements.

There is, however, one policy change in the notice requirement proposed for the AFDC and Adult Assistance programs. This is addressed at § 205.10(a)(4)(ii)(B) of this rule which exempts from timely notice any termination of assistance resulting from a recipient's volunary oral request for termination in the presence of an eligibility worker. This change will permit States to terminate assistance at the oral request of the recipient without advance notice as is currently permitted by the Food Stamp Program. As for any case where action is taken without timely notice, agencies are required to send adequate notice of adverse action no later than the date of action; and, if the recipient requests a hearing within 10 days of the mailing of that notice, the State agency must reinstate assistance until a decision is rendered after the hearing. Thus, the recipient is protected in case there is a misunderstanding.

Subparagraphs in paragraph (ii) of § 205.10(a)(4) have also been reordered to be more like the order of regulations of the Food Stamp Program.

Fair Hearings § 205.10(a) (7) and (13)

From the comments received and from analysis conducted in conjunction with development of this proposal, one change has been identified that would make the AFDC and Adult Assistance programs' fair hearings requirements more consistent with those in the Food Stamp Program. This proposal would amend 45 CFR 205.10(a)(7) to permit, at State option, reinstatement of assistance pending a hearing if the recipient has good cause for failing to request a hearing with the 10 days after the date of the action. Good cause is limited to circumstances beyond the recipient's control, e.g., hospitalization, death in the family. The current regulation already permits reinstatement if the recipient requests a hearing up to 10 days after the date of the action.

In addition to the change described above, this proposal also would add headings to a number of paragraphs in this section in order to make the regulations easier to read.

Some of the comments received requested regulatory changes which are unnecessary because States currently have the flexibility to modify their AFDC and Adult Assistance programs' fair hearing requirements in these areas to conform with those for the Food Stamp Program. For instance, a commenter requested that the AFDC Program adopt the Food Stamp Program provision that permits a participant to waive continuation of benefits pending a hearing decision. Section 205.10(a)(6)(i)(c) of a Final Rule published on March 18, 1986, in the **Federal Register** (Vol. 51, No. 52, p. 9203), makes it explicit that States may permit recipients to waive continuation of benefits.

Another area in which States have the option of establishing consistency is requests for hearings. Although the Food Stamp Program requires States to accept both oral and written requests, the AFDC and Adult Assistance regulation at 45 CFR 205.10(a)(5)(i) permits States to accept oral requests or to require that requests be in written form. Since some comments favored requiring acceptance of oral requests while others favored allowing States to accept written requests only, States will continue to have maximum flexibility in this area.

One commenter suggested that the AFDC regulation be amended to adopt the Food Stamp Program requirement that assistance must be continued pending a hearing if the timely notice period ends on a weekend or holiday and the hearing request is received the next day. Since the regulation at 45 CFR 205.10(a)(7) permits reinstatement of assistance if the request is received up to 10 days after the date of the action, States may institute such a provision without a change to the regulation.

Another recommendation would expand the AFDC regulation at § 205.10(a)(8) to match the detailed and specific Food Stamp Program requirements regarding the time, date, and place of the hearing and the content of the advance notification to the applicant or recipient. Since the existing regulation already permits States to have the same requirements and many, in fact, do, DHHS does not believe that it is necessary to amend the regulation to require the adoption of identical provisions.

One suggestion called for the AFDC Program to adopt a Food Stamp Program requirement with respect to the reinstatement and continuation of benefits pending a hearing decision. The Food Stamp Program's regulations at 7 CFR 273.12(e) require that, when benefits are automatically reduced or terminated because of a mass change, the benefits cannot be reinstated and continued pending the hearing unless the issue being contested is one of improper computation of benefits or misapplication or misinterpretation of Federal law or regulation. The corresponding AFDC and Adult Assistance programs' regulation at 45 CFR 205.10(a)(5) provides that, "A hearing need not be granted when either State or Federal law requires automatic grant adjustments for classes of recipients unless the reason for an individual appeal is incorrect grant computation." Since this provision permits a State to not grant a hearing when the sole issue being contested is the State or Federal law itself, it is broad enough to permit a State to grant a hearing if the issue is one of misapplication or misinterpretation of the law. Therefore, in actuality, a State could follow food stamp policy on this point.

Social Security Numbers § 205.52

A number of commenters requested that similar policies with respect to Social Security Numbers (SSN) be adopted by both the AFDC and Food Stamp Programs. Most differences were addressed in the final Income and Eligibility Verification System (IEVS) Rule on section 1137 of the Social Security Act published in the **Federal Register** on February 28, 1986, (Vol. 51, No. 40 p. 7271). However, the final Food Stamp Program IEVS rule changes § 273.6 to permit continued participation when there is good cause for failure to complete an application for an SSN but the final AFDC and Adult Assistance IEVS rule at § 205.52 does not.

Current AFDC regulations provide for two procedures when an AFDC applicant/recipient is unable to furnish an SSN. First, States may execute agreements with the Social Security Administration whereby the State agency will complete an SSN application for the AFDC applicant/recipient. If the individual is otherwise

VOL

SE
29
1987
UMI

eligible, financial assistance is provided without undue delay. Secondly, in the non-agreement States, the regulations require that the AFDC applicant/recipient must apply directly to the Social Security office for an SSN. In this instance, the requirement "to apply" is very strictly interpreted. For example, the individual who actually applies at the Social Security office for an SSN and is told that the application cannot be completed because of the lack of necessary evidentiary documentation, is not considered, under current policy, to have met the requirement "to apply for an SSN." The trip(s) to the Social Security office, and the need to secure the required documentation (which is not always immediately available) contribute to the delay or denial of financial assistance under these circumstances.

In addition to moving towards consistency with food stamp policy, the proposed rule will remove a major obstacle to providing assistance payments to needy individuals. It will permit continued AFDC and Adult Assistance if the State agency has determined good cause exists for failing to complete the application for an SSN, e.g., the individual provides documentation that he or she has sent for and is awaiting receipt of a birth certificate from another State. If the State agency determines that good cause exists, and the applicant is otherwise eligible, the individual will be eligible for assistance for a period of no longer than four months. If the applicant has been unable to obtain the documents required to complete the SSN application, the State agency's eligibility worker should make every effort to assist the individual in obtaining these documents. Good cause for failure to apply must be shown monthly during the four-month period in order for the individual to continue to receive assistance. The State agency must maintain documentation of the good cause determination in the case file. Good cause will not exist when delays are due to factors such as illness, lack of transportation or temporary absence because the Social Security Administration makes provision for mail-in applications in lieu of applying in person.

Jointly Held Resources—§ 233.20(a)(3)(ii)(D)

Some commenters suggested that changes be made which would permit consistency when resources are jointly owned by a member of the assistance unit (household) and a non-member. AFDC and Adult Assistance regulations at 45 CFR 233.20(a)(3)(ii)(D) require States to consider resources available for current use and further provide that resources are considered available when actually available, and when the applicant/recipient has a legal interest in a liquidated sum and has the legal ability to make such sum available for support and maintenance. An Action Transmittal, AT–82–27, dated November 1, 1982, interpreted this to mean that whether or not a jointly owned resource is considered available in its entirety to an applicant/recipient owner must be determined in accordance with applicable State law. An exception is made for resources jointly held by SSI and AFDC recipients. In those cases, the value of the jointly held resources are prorated among the owners.

Section 5(g) of the Food Stamp Act requires that the Secretary prescribe allowable amounts of liquid and nonliquid resources. Federal regulations at 7 CFR 273.8(d) specify that resources owned jointly shall be considered in their entirety to each owner unless the applicant/recipient can establish that such resources are inaccessible.

The programs are amended their regulations to provide that States must consider any jointly held available resource in its entirety to each owner unless State law prohibits noncontributory signatories from withdrawing joint account funds or liquidating resources for their own benefit. This proposal would also specify that this policy applies to resources jointly held by SSI and AFDC recipients. This change is consistent with section 402(a)(24) of the Social Security Act, as amended, which precludes States from counting an SSI recipient's income and resources in determining eligibility for AFDC and payment amounts. When State law permits unrestricted access to either individual, the resource belongs in its entirety to each individual even though it may be jointly held. The proposal therefore reflects the reality of what resources the individual has access to.

Proration of Contractual and Self-Employment Income—§ 233.20(a)(3)(iii)

Current AFDC and Adult Assistance programs' regulations permit States to average or prorate income received by individuals paid on a contractual basis over the period of the contract and income received by farmers or self-employed individuals over the period covered by the income. On the other hand, Food Stamp Program regulations at 7 CFR 273.10(c)(3)(iii) and 273.11(a)(1) require State agencies to prorate income over twelve months for self-employed households and those under contract which derive annual income in periods less than one year.

The AFDC and Adult Assistance programs' regulations at 45 CFR 233.20(a)(3)(iii) would be revised to permit States to adopt the Food Stamp Program's policy and prorate an individual's annual income over a 12-month period. For example, school teachers who receive annual income in only nine months of the year would have their income prorated over twelve months, even if they only have a nine-month contract, as long as there is no evidence that they will not be rehired following the summer break.

Averaging of Interest Income—§ 233.20(a)(3)(iii)

Commenters requested that the Food Stamp Program adopt AFDC policy on interest income. However, this request was based on the commenters' misconception that the AFDC Program requires that interest income be counted as a resource. Current regulations of all the programs require that under retrospective budgeting interest be counted as income in the budget month in which it is received. It is difficult and time consuming to determine and verify interest income monthly. Therefore, because there is usually a small amount involved and statements may not be available on a monthly basis, the Programs propose to amend their regulations to permit States to project monthly interest income by periodically averaging monthly interest income. This will ease their administrative burden while accurately reflecting what income is available.

Self-Employment Income—§ 233.20(a)(6)(v)(B)

Commenters suggested that the same business expense deductions from gross self-employment income be used for each program. Although the current AFDC regulation at 45 CFR 233.20(a)(6)(v)(B) limits deductions only to those expenses ". . . without which the goods or services could not be produced," it does not identify the same specific prohibitions contained in the Food Stamp Program's regulations at 7 CFR 273.11(a)(4)(ii). This proposal only applies to AFDC and would amend the regulation at 45 CFR 233.20(a) to specifically exclude the following additional items from business expenses: Net losses from prior periods; money set aside for retirement purposes; the purchase price or payments on the principal of loans for equipment or machinery; and Federal, State or local personal income taxes.

A number of commenters requested that the Food Stamp Program adopt the AFDC Program's policies on determining the business expenses associated with income produced by providing room and board. This proposed rule codifies what has been a longstanding AFDC and Adult Assistance Program's policy by adding a new paragraph (C) to 45 CFR 233.20(a)(6)(v) to expressly permit States, in lieu of actual expenses, to use a flat amount or fixed percentage of broader-generated gross income to determine business expenses. The maximum deduction, whether a flat amount or fixed percentage, can be no more than 75 percent as long as the method used has an objective and justifiable basis. (Rationale is provided for the 75 percent in the food stamp discussion of this issue.) In any case, actual expenses must be used if the applicant or recipient can demonstrate that the actual expenses are higher than those which result from use of the State's method.

Conversion to Monthly Income—§ 233.31(b)

Several commenters proposed that the AFDC Program amend regulations to permit States to use conversion factors for weekly and bi-weekly income as is currently permitted under the Food Stamp Program's regulations at 7 CFR 273.10(d)(2). The definition of prospective budgeting would be amended at 45 CFR 233.31(b) to state that a best estimate may be derived by multiplying weekly amounts by 4.3 and bi-weekly amounts by 2.15. This would not, however, relieve States from adjusting for any overpayments and underpayments which result when the best estimate does not reflect actual income. Conversion may not be used to adjust a payment budgeted retrospectively. Using conversion factors is already permissible for the Adult Assistance Programs.

Regulatory Changes Which Will Not Be Made

A number of commenters suggested changes to provisions which were not adopted because of policy considerations or statutory requirements. This section discusses these issues.

Policy Issues

Face-to-Face Interviews for AFDC and Adult Assistance

Several commenters suggested that the AFDC and Food Stamp Programs have consistent policy requirements for face-to-face interviews. Another commenter asked that the AFDC Program permit States to waive face-to-face interviews under circumstances that parallel those in the Food Stamp Program. Another commenter proposed that the Food Stamp Program should only require face-to-face interviews at certification and every 12 months thereafter.

Final rules for AFDC at § 206.10(a)(9)(iii) published in the **Federal Register** March 18, 1986 (Vol. 51, No. 52, p. 9203) require that at least one AFDC redetermination for each individual case every 12 months must be face-to-face. The regulation does not specify where it must take place. However, the Adult Assistance Program's regulations currently in effect do not require face-to-face interviews either at application or redetermination. On the other hand, the Food Stamp Program's regulations at 7 CFR 273.2(e) and 272.7(g) require that a face-to-face interview be held in a food stamp office or other certification site prior to initial certification and all recertifications. The State agency may waive the office interview in very limited circumstances and, instead, schedule a home interview or, in very limited circumstances, conduct the interview by telephone.

The AFDC Program's regulations are not being changed to permit waivers of face-to-face interviews. Inasmuch as the waiver would apply for AFDC in only very limited circumstances, it does not justify a regulatory change. Personal contact is essential to identify inconsistencies in information provided by the family. Since AFDC interviews may be scheduled in the home or office, where most of the Food Stamp interviews take place, and is only required every 12 months, conflict between the two programs' requirements should be rare and the administrative burden minimal.

Use of Authorized Representatives

Commenters requested that States be required to permit the use of authorized representatives in the AFDC Program. The existing regulation at 45 CFR 206.10(a)(1)(ii) now provides for the use of authorized representatives in the application process, in that it requires a written application "from the applicant himself, or his authorized representative. . . ." Similarly 45 CFR 205.10(a)(3)(iii) provides for an authorized representative in the hearing process. This proposal will not, however, expand the AFDC or the Adult Assistance Programs' regulations to require the use of authorized representatives to the same extent as in the Food Stamp Program. To do so would require permitting an authorized representative to substitute for a recipient in redeterminations and for AFDC would conflict with the philosophy of the Final Rule at 45 CFR 206.10(a)(9) published March 18, 1986 which requires face-to-face redeterminations at least once every 12 months. The importance of the face-to-face redetermination in reducing erroneous payments is sufficient to preclude any expansion of the AFDC Program's authorized representative provisions.

Accessory Value of Vehicles

The recommendation that the AFDC Program exclude the value of accessories and optional features in determining the value of a vehicle is not being adopted. The Food Stamp Program, for the most part, uses the fair market value of licensed vehicles and only counts that value as a resource to the extent that it exceeds $4,500. On the other hand, AFDC regulations at 45 CFR 233.20(a)(3)(i)(B)(2) permit States to exclude from consideration as a resource the equity value of a car up to $1,500 and apply any excess to the $1,000 resource limit. AFDC, therefore, counts the value of accessories, except for special equipment for the handicapped, because it values this car in the same way as it values other resources, i.e., the amount that would be received if the item were sold. The accessory value of vehicles would not affect households categorically eligible for food stamps as these households would have the AFDC policy applied. However, under 45 CFR 233.20(a)(3)(i)(A), the Adult Assistance programs permit States to exclude the full value of an automobile including accessories.

Earned Income In-Kind

Some commenters proposed that the AFDC Program adopt the Food Stamp Program's regulations at 7 CFR 273.9(c)(1) which preclude States from counting earned income received in-kind. Alternatively, another commenter suggested that the Food Stamp Program adopt the AFDC Program's regulations at 45 CFR 233.20(a)(6)(iii) which provide that earned income includes earned income received in-kind and must be counted. However, the Food Stamp Program is precluded by statute from counting any in-kind income. We propose not to change AFDC or Adult Assistance regulations. It is appropriate to treat earned income received in-kind differently by both programs because of each program's focus. Generally the most common example of earned income received in-kind is shelter. AFDC and Adult Assistance payments

are made to meet basic needs which include shelter; therefore, if the employer provides shelter rather than cash, it is appropriate to count it.

Irregular/Infrequent (Casual/ Inconsequential) Income

Several commenters suggested that the AFDC Program adopt the Food Stamp Program's policy on irregular and infrequent income. Food Stamp Program regulations at 7 CFR 273.9(c)(2) implementing section 5(d)(2) of the Food Stamp Act of 1977, as amended, require that States disregard any income in the certification period which is received too infrequently or irregularly to be reasonably anticipated but not in excess of $30 in a quarter. The AFDC Program is not adopting the Food Stamp Program's policy because it wishes to see the impact of final AFDC regulations at § 233.20(a)(3)(iv) recently published in the **Federal Register** on March 18, 1986 (Vol. 51, No. 52, p. 9205) which provide that States may exclude only gifts which represent reasonable, nominal amounts not to exceed $30 for any recipient for any quarter, e.g., Christmas, graduation, and birthday gifts. We propose no change in Adult Assistance regulations which currently permit States to conform to food stamp policy.

Vendor Payments

Some commenters proposed that the AFDC Program adopt the Food Stamp Program's policy at 7 CFR 273.9 which follows section 5(d) of the Food Stamp Act and excludes certain vendor payments (third-party payments) from income.

The AFDC Program's regulations do not address the treatment of vendor payments as unearned income. However, longstanding AFDC and Adult Assistance policy permits States to disregard the value of vendor payments as in-kind income. No changes are being proposed at this time in the treatment of vendor payments.

Educational Grants, Loans and Scholarships and Non-educational Loans—§ 233.20(a)(3)(iv)

Some commenters suggested that the AFDC and Food Stamp Program policies on educational grants and loans be made the same, while others requested that the AFDC Program adopt the Food Stamp Program policy of excluding non-educational loans from consideration as income.

The current AFDC and Adult Assistance regulation at 45 CFR 233.20(a)(3)(kv)(B) requires the exclusion of "* * * loans and grants, such as scholarships, obtained and used under conditions that preclude their use for current living costs." An exception to the AFDC and Adult Assistance regulation, however, established by Pub. L. 90–575 (the Higher Education Act), mandates that the AFDC and Adult Assistance programs totally exclude all loans and grants made under the auspices of the Department of Education. The Food Stamp Program's statutory requirement is that deferred-payment educational loans, grants and like must be excluded to the extent they are used for tuition, mandatory school fees and certain other educational expenses at an institution of post secondary education or school for the handicapped. The programs, while similar in the treatment of educational loans, differ considerably in the treatment of non-educational loans. In the Food Stamp Program, it is a statutory requirement to exclude non-educational loans from consideration as income. In the AFDC and Adult Assistance programs, non-educational loans have been considered under the same criteria as educational loans, i.e., they are excluded if they are "* * * obtained and used under conditions that preclude their use for current living costs." However, the AFDC Program is not adopting the Food Stamp Program's policy at this time pending further review.

Fair Hearings

Two issues were raised by commenters on fair hearings. One was to make the time periods for the State agency to complete action on a fair hearing request the same and the other was to make the limits for applicants and recipients to request fair hearings the same. The AFDC program gives the State agency 90 days after the applicant's or recipient's request for a fair hearing to take final administrative action. The Food Stamp Program allows 60 days. At this time, no changes are being proposed to the fair hearing time frames because of differences in what must be accomplished in each program within the specified time frame and because the House Committee Report regarding the 1977 Food Stamp Act (H.R. Rep. No. 95–464) urges the program to use 60 days.

The second issue was whether food stamps should conform to the AFDC Program's 90-day time limit for an applicant or recipient to request a fair hearing. Under Food Stamp regulations, a household may request a fair hearing within 90 days of the action of which it is aggrieved or at any time during the certification period. About half of the persons or groups that commented on this issue wanted the Food Stamp Program to delete the requirement that a household could request a fair hearing at any time during its certification period. The Department of Agriculture has decided not to revise the current provision because the Department feels that a household should have the right to a fair hearing to correct any action which occurs at any time during its certification period.

Statutory Issues

Commenters suggested many changes which cannot be made through regulation because the requirements are established by the statutes governing the AFDC and Food Stamp Programs. Both Departments are exploring a number of these suggestions for upcoming legislative initiatives. Those policy areas where commenters suggested changes which are precluded from conformity by statute are:

STATUTORY PROVISIONS

Policy	AFDC program	Food stamp program
Lump Sums [1]	Counts as income	Counts as a resource.
Child Support Exclusion for Title IV–D Payments [1].	Disregards first $50 in child support collected each month.	Permits States to disregard first $50 as does AFDC *if* the State reimburses USDA.
Earnings of Students under 18 [1]	State has option to disregard any earnings of a dependent child who is a full-time student in the determination of eligibility for up to six months per calendar year. (This disregard is applicable to both applicants and recipients).	Excludes as income.

STATUTORY PROVISIONS—Continued

Policy	AFDC program	Food stamp program
	Disregards earnings of a dependent child who is a full-time student or is a part-time student who is not employed full-time in the determination of need and the amount of payment. (This disregard is applicable to recipients only).	
	Applies the general earned income deductions to other students 18 years old or under.	
Earnings of 18-year-old High School Students [1].	Same as above	Counts as earned income.
Earned Income Deductions	Disregards: $75 standardized work expense deduction.	Disregards 20% of total gross household earnings.
	Actual costs up $160 per month per dependent child or incapacitated adult living in the same home and receiving AFDC when employment is full time. A lesser amount is set by the State for part-time employment.	Actual costs up to $160 per month per household when care for a dependent or an incapacitated adult is needed to accept or continue full or part-time employment or to conduct job search.
	$30 and one-third of remainder in four consecutive months; then $30 is available in eight additional consecutive months. The disregard is not applied again until the person has been off the AFDC rolls for a period of 12 consecutive months.	
Earnings Under JTPA State Training Programs [1].	State has option to disregard income of any dependent child. Earned income may be disregarded for up to six months per calendar year. (Unearned income may be disregarded indefinitely.).	Included as earned income except for dependents under 19.
	Earnings of other JTPA program participants are disregarded under the general AFDC earned income deductions.	
	State has option to disregard unearned income of other IV-A program participants to the extent permitted under the complementary program relationship regulatory provision.	
Dependent Care Deduction	Actual costs up to $160 per month per dependent child or incapacitated adult living in the same home and receiving AFDC when employment is full time. A lesser amount is set by State for part-time employment.	Actual costs up to $160 per month per household when care is needed for dependent child or incapacited adult in order to accept or continue full or part-time employment to do job search and for certain students.
Definition of Proper Payments for Recoupment	Changes in circumstances that affect eligibility or payments in the month in which the change occurs is either an overpayment or underpayment for that month.	Changes in circumstances reported as required do not affect benefits in the month the change occurs.
Cash Surrender Value of Life Insurance [1]	Counts as a resource	Excludes as a resource.
Income-Producing Real Property [1]	Same as other real property: counts as a resource except allows conditional AFDC payments for up to 9 months if trying to sell real property other than house.	Excludes as a resource if producing income consistent with fair market value but counts income.
Vehicles [1]	Excludes equity value prescribed by Secretary—first $1500 of (including accessories) and counts remainder as available resource. State may set lower limit.	Counts market value in excess of $4,500 (excluding accessories) with amount over $4,500 counted counts equity value of excess vehicles.
Resource Limits [1]	Allows $1,000 per assistance unit. State may set lower limit.	Allows $2,000 per household or $3,000 for households with an elderly member(s).
Strikers	Assistance unit is ineligible if either parent is on strike last day of month; otherwise only non-parent ineligible if on strike last day of the month.	Household ineligible if any member is on strike unless household was eligible prior to strike or member is exempt from work registration.
Frequency of Work Registration	Nonexempt individual must register for work once and registration continues with eligibility.	Nonexempt household member must register at certification and once every 12 months thereafter.
Collections of Claims/Overpayments by Recovery from Grant or Allotment.	Mandatory for all types of overpayments including State agency error.	Mandatory for fraud claims and household errors; voluntary for State agency errors.
Special Needs	Includes in States need standard	Includes as income as statute does not list as specific exclusion.
Potential Sources of Income	Requires that AFDC applicants explore and, if potentially eligible, apply for benefits from other programs.	Statute does not permit approval for food stamps to be conditioned upon application for any other program.

VOL 52 ISS 188 SE 29 1987 UMI

[1] Because of categorical eligibility for households with all members receiving or authorized to receive PA and/or SSI benefits, food stamp eligibility is determined solely on the basis of the household's PA/SSI status. In this sense, the PA resource and income definitions are used to determine food stamp eligibility.

Implementation

The proposed implementation schedule would be that the revised regulatory requirements would be implemented for all AFDC and Adult Assistance cases and for new food stamp cases 90 days from the first of the month following publication. For other food stamp cases, conversion would be at recertification or when other changes are being processed, including monthly reports occurring after 90 days from the first month following publication. As for State agency options, these could be adopted at any time, as long as implementation is done uniformly. Changes to notices for conformity purposes would be done within 180 days from the first of the month following the month of publication.

List of Subjects

7 CFR Part 273

Administrative practice and procedure, Aliens, Food stamps, Fraud, Grant programs-social programs, Penalties, Reporting and recordkeeping requirements, Social security, Students.

45 CFR Part 205

Administrative practice and procedure, Aid to families with dependent children, Family assistance, Grant programs-social programs, Public assistance programs, Reporting requirements.

45 CFR Port 233

Aid to families with dependent children, Aliens, Family assistance, Grant programs-social programs, Public assistance programs, Reporting requirements.

Accordingly, 7 CFR Part 273 and 45 CFR Parts 205 and 233 are proposed to be amended as follows:

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

1. The authority citation for 7 CFR Part 273 continues to read as follows:

Authority: 7 U.S.C. 2011–2029.

2. In § 273.2:

a. Paragraph (e) is amended by revising paragraph (e)(3) in its entirety.

b. In paragraph (g)(3), the second and third sentences are revised.

c. The text of paragraph (h)(1) is revised in its entirety.

d. Paragraph (h)(2) is removed and paragraphs (h)(3) and (h)(4) are redesignated (h)(2) and (h)(3) respectively.

e. In the newly redesignated paragraph (h)(3):

1. Sentences 3 and 4 in (h)(3)(i) are removed;

2. The last sentence of (h)(3)(ii) is removed; and

3. Paragraph (h)(3)(iii) is removed.

The additions and revisions read as follows:

§ 273.2 Application processing.

* * * * *

(e) *Interviews.* * * *

(3) The State agency shall schedule all interviews as promptly as possible to ensure that eligible households receive an opportunity to participate within 30 days after the application is filed. If the household fails to appear for the first scheduled interview, the State agency is not required to initiate any further action to reschedule a second interview. While the State agency may initiate efforts to schedule a second interview, it is the household's responsibility to schedule the interview. The State agency may either immediately deny the household after it misses the interview or may deny the household 30 days after the application was filed.

(i) State agencies which deny households immediately after the household misses the first scheduled interview must so advise the household in writing on the application materials or on a separate information sheet provided to the household at the time the household receives an application or schedules its initial interview. Such agencies must also advise the household in the manner stated above that the household will have to reapply if it misses the scheduled interview. Denial notices shall be sent immediately after the scheduled interview is missed.

(ii) State agencies which deny households when the 30-day processing time has elapsed after the household misses the first scheduled interview and no other interview was conducted, must advise the household in the same manner as in paragraph (e)(3)(i) of this section that if the household misses that first interview the household will be denied unless an interview is conducted within the 30-day processing time period. Denial notices must be sent on the 30th day following the date of application as provided in § 273.2(g)(3).

* * * * *

(g) *Normal processing standard.* * * * (3) *Denying the application.* * * * The State agency may either send the notice of denial immediately after the household misses one scheduled interview or send the notice of denial on the 30th day following the date of application. If a notice of denial is sent immediately after the first interview is missed or on the 30th day, it shall explain to the household that it must file a new application if it wishes to participate in the Program.

(h) *Delays in processing.* * * *

(1) *Determining cause.* The State agency shall first determine whether the cause of the delay is the household or the State agency. If it is the household's fault, the State agency shall deny the household. If the delay is caused by the State agency, the procedure in paragraphs (h)(2) and (h)(3) of this section shall be followed.

* * * * *

3. In § 273.3, the first sentence is removed and three new sentences added in its place to read as follows:

§ 273.3 Residency.

Households must be living in the State in which they file applications for participation. Within the State, the State agency may establish project areas as defined in § 271.2. The State agency may also require households to file applications for participation in specified project areas or offices. * * *

4. In § 273.7, paragraph (b)(1)(ix) is added.

The addition reads as follows:

§ 273.7 Work registration requirements.

* * * * *

(b) *Exemptions from work registration.*

(1) * * *

(ix) A pregnant woman when it is verified, on the basis of medical evidence, that the child is expected to be born in the month that registration otherwise would be required or within the next 3 months.

* * * * *

5. In § 273.8:

a. Paragraph (d) is amended by redesignating paragraphs (d)(1) and (d)(2) as paragraphs (d)(2)(i) and (d)(2)(ii), respectively, designating the first three sentences of introductory paragraph (d) as paragraph (d)(1), designating the last two sentences of introductory paragraph (d) as paragraph (d)(2) introductory text and a new sentence is added at the end of newly designated paragraph (d)(1).

b. The first sentence of (e)(2) is revised and a new sentence is added immediately following that sentence.

The revisions and additions read as follows:

§ 273.8 Resource eligibility standards.

* * * * *

(d) *Jointly owned resources.* (1) * * * In addition, jointly-held available resources, such as accounts in financial institutions, shall not be counted as a resource for each household if State law prohibits noncontributory signatories from withdrawing funds from or liquidating such assets for their own benefit.

* * * * *

(e) *Exclusions from resources.* * * *

(2) Household goods, the cash value of life insurance policies, personal effects including one burial plot (no limit) per household member and one formal burial or funeral agreement per household member, provided that the agreement does not exceed $1,500 in equity value, in which event the value above $1,500 is counted. Examples of formal agreements are those from which no withdrawals can be made or if withdrawals are allowed there is a contractual obligation to make repayment. * * *

* * * * *

6. In § 273.10:

a. A new paragraph (c)(1)(iii) is added.

b. Paragraph (g)(1)(i)(A), is amended by removing the last four sentences and adding a new sentence in their place.

c. Paragraph (g)(1)(ii) is amended by revising the first sentence, removing the second sentence and adding two new sentences in its place, and by removing all text following the sentence which ends with the words "PA and/or SSI benefits."

d. Paragraph (g)(1)(iii) is revised in its entirety.

The revisions and additions read as follows:

§ 273.10 Determining household eligibility and benefit levels.

* * * * *

(c) *Determining income*—(1) *Anticipating income.* * * *

(iii) When determining interest income the State agency has the option of: Prorating interest, using the total interest income and dividing it by the number of months it covers, e.g., annually, semi-annually, and/or quarterly; using an average of each month's interest amounts adjusted for any known differences from the information used for the average; or counting each month's actual amount. Any of these procedures may be used for households prospectively or retrospectively budgeted, regardless of whether a monthly report is submitted. The State agency has the option of how the household reports the interest information on the monthly report.

* * * * *

(g) *Certification notices to households.*

(1) * * *

(i) *Notice of eligibility.* (A) * * * The notice shall also advise the household of its right to a fair hearing and, if the State agency chooses, a statement on reporting changes since the application was filed.

* * * * *

(ii) *Notice of denial.* If the application is denied, the State agency shall provide the household with written notice explaining the basis for the denial and the household's right to request a fair hearing. The State agency shall also use a notice of denial when a delay was caused by the household's failure to take action to complete the application process within the 30-day processing standard. If the State agency elects to deny a household immediately following a missed interview, as specified in § 273.2(e), the notice shall inform the household of its right and responsibility to contact the agency in order to reapply. * * *

(iii) *Notice of pending status.* If the application is to be held pending because some action by the State is necessary to complete the application process, as specified in § 273 (h)(2) and (h)(3), the State agency shall include on the notice of pending status the date by which the household must provide the missing verification.

* * * * *

7. In § 273.11:

a. Paragraphs (a)(4)(ii)(A) and (a)(4)(ii)(C) are revised in their entirety.

b. Paragraph (b)(1)(ii) is revised.

The revisions read as follows:

§ 273.11 Action on households with special circumstances.

(a) *Self-employment income.* * * *

(4) *Allowable costs of producing self-employment income.* * * *

(ii) * * *

(A) The purchase price or payments on the principal of loans for the purchase of capital assets, equipment, machinery, property or other durable goods;

* * * * *

(C) Money set aside for retirement purposes; Federal, State or local personal income taxes; personal business, entertainment and transportation expenses; and

* * * * *

(b) *Boarders*—(1) *Household with boarders.* * * *

(ii) *Cost of doing business.* In determining the income received from boarders, the State agency shall exclude that portion of the boarder payment which is a cost of doing business. To ascertain the cost of doing business, a State may use, in lieu of actual expenses, a flat amount or a fixed percentage of the gross income, provided that the method used is objective and justifiable, is stated in the State's Plan of Operation, manual, or directive and the result does not exceed 75% of the gross income from boarder-generated payments. However, if the applicant or recipient can show that the actual costs of doing business are higher than those resulting from application of the State's method, the State must use the higher amount. The cost of doing business shall not exceed the payment the household receives from the boarder for lodging and meals.

* * * * *

8. In § 273.12, introductory paragraph (a)(1) and paragraphs (a)(1)(i) are revised and (a)(2) is amended by adding a new sentence after the first sentence.

The revisions and addition read as follows:

§ 273.12 Reporting changes.

(a) *Household responsibility to report.* (1) Certified and applicant households are required to report the following changes in circumstances:

(i) Changes in income:

(A) Households with fluctuating income shall report changes in the source or in the wage rate of fluctuating income and changes in the numbers of hours worked by household members with fluctuating income;

(B) Households without fluctuating income shall report changes in the sources of income or in the amount of gross, monthly, non-fluctuating income of more than $25;

(C) Households shall not be required to report changes in the public assistance grant, or in the general assistance grant in project areas where GA and food stamp cases are jointly processed in accordance with § 273.2(j)(2). Since the State agency has prior knowledge of all changes in the public assistance grant and general assistance grants, action shall be taken on the State agency information;

* * * * *

(2) * * * Applicant households that have not yet been certified when the change occurs shall report changes at the certification interview or, for changes occurring after the interview but before the eligibility determination,

VOL
52

1987
UMI

within 10 days after the date of the determination. * * *

* * * * *

9. In § 273.13:

a. Paragraph (a) is revised.

b. Paragraph (b) is redesignated as paragraph (c).

c. A new paragraph (b) is added.

d. Newly redesignated introductory paragraph (c) is revised, paragraphs (c)(3) through (c)(13) are removed and a new paragraph (c)(3) is added.

e. A new paragraph (d) is added.

§ 273.13 Notice of adverse action.

(a) *Use of notice.* (1) Prior to any action to reduce or terminate a household's benefits within the certification period, the State or local agency shall give a timely and adequate notice of adverse action, except as provided for in paragraphs (b), (c) and (d) of this section. An adequate notice for purposes of this section shall be a written notice that explains in easily understandable language: The proposed action; the reason for the proposed action; the specific regulations (either State or Federal citation) supporting such action, or a statement of the specific law requiring such action when changes in State or Federal law require automatic grant adjustments for classes of recipients; the household's right to request a fair hearing; and the circumstances under which assistance is continued if a hearing is requested; and, if the agency action is upheld, that any overissuances must be repaid. For the purpose of a monthly reporting retrospective budgeting system, the definition of "adequate notice" in § 271.2 shall apply.

(2) "Timely" is defined as the advance notice period set by the State agency for its PA caseload provided the notice is mailed at least 10 days before the date of action, i.e., the date upon which the action would become effective. Unless it waives its right, as discussed in § 273.15(k), the household shall receive continued benefits if it requests a fair hearing within 10 days after the timely notice is mailed. If the adverse notice period ends on a weekend or holiday and a request for a fair hearing and continuation of benefits is received the day after the weekend or holiday, the State agency shall consider the request received within the request period.

(b) *Exemptions from timely notice.* The agency shall send adequate notice as defined in paragraph (a)(1) of this section no later than the date of the action when:

(1) The agency receives a clear written statement signed by the household that it no longer wishes assistance or that gives information which requires termination or reduction of assistance based solely upon the household's written information with these conditions:

(i) The household retains its right to a fair hearing;

(ii) The household retains its right to continued benefits by requesting a fair hearing within ten days of the date the notice was mailed; and

(iii) The State agency continues the household's previous benefit level, if required, within five working days of the household's request for a fair hearing.

(2) The household voluntarily requests in the presence of a caseworker that its participation be terminated. The household retains the rights listed in paragraphs (b)(1) (i) through (iii) of this section.

(3) The household's whereabouts are unknown and mail directed to it has been returned by the post office indicating no known forwarding address. The household's benefits must, however, be made available to it within five working days if its whereabouts become known during the payment period covered by a returned benefit. The household has a right to a fair hearing and continued benefits with this notice.

(c) *Exemptions from notice.* Under the following circumstances, a timely and adequate notice shall not be provided, although an informational notice may be provided:

* * * * *

(3) The State agency determines, based on reliable information, that the household has moved from the State or, if where a household may apply is limited, the jurisdiction or project area established by the State agency.

(d) *Specific notices.* Under the following circumstances a timely and adequate notice is not required. Rather, the notice specified for each circumstance shall be provided:

(1) The State agency has elected to assign a longer certification period to a household certified on an expedited basis and for which verification was postponed, provided the household has received written notice that the receipt of benefits beyond the month of application is contingent on its providing the verification which was initially postponed and that the State agency may act on the verified information without further notice as provided in § 273.2(i)(4).

(2) The State agency is converting a household from cash and/or food stamp coupon repayment to benefit reduction as a result of failure to make agreed upon repayment as discussed in § 273.18(g)(2)(ii).

(3) The State agency is terminating the eligibility of a resident of a drug or alcoholic treatment center or a group living arrangement if the facility loses either its certification from the appropriate agency or agencies of the State (as defined in § 271.2) or has its status as an authorized representative suspended due to FNS disqualifying it as a retailer. The notice requirements for these instances are discussed in § 273.11(e)(7) and (f)(6). However, residents of group living arrangements applying on their own behalf are still eligible to participate.

(4) The household has been receiving an increased allotment to restore lost benefits, the restoration is complete, and the household was previously notified in writing of when the increased allotment would terminate.

(5) The household's allotment varies from month to month within the certification period to take into account changes which were anticipated at the time of certification, and the household was so notified at the time of certification.

(6) The household jointly applied for PA/GA and food stamp benefits and has been receiving food stamp benefits pending the approval of the PA/GA grant and was notified at the time of certification that food stamp benefits would be reduced upon approval of the PA/GA grant.

(7) A household member is disqualified for an intentional Program violation, in accordance with § 273.16, or the benefits of the remaining household members are reduced or terminated to reflect the disqualification of that household member. The notice requirements for individuals or households affected by intentional Program violation disqualification are explained in § 273.16.

(8) The State agency must change the household's benefits back to the original benefit level as required in § 273.12(c)(1)(iii).

10. In § 273.15, the first sentence of paragraph (b) and paragraph (q)(3)(ii) are revised.

The revisions read as follows:

§ 273.15 Fair hearings.

* * * * *

(b) *Hearing system.* Each State agency shall provide for either a fair hearing at the State level or for a hearing at the local level which permits the household to further appeal a local decision to a State level "de novo" hearing or State level review of the local level hearing.

* * *

* * * * *

(q) *Hearing decisions* * * *

(3) * * *

(ii) After a local level hearing decision which upholds the State agency action, the household shall be notified of available appeal rights and that a reversal of the decision may result in the restoration of lost benefits to the household. A clear description of available appeal procedures must be included to enable the household to make an informed choice if it wishes to appeal.

* * * * *

11. In § 273.18, paragraph (d)(3) is amended by redesignating paragraphs (d)(3)(i) through (iii) as (d)(3)(iii) through (v), respectively and adding new paragraphs (d)(3)(i) and (d)(3)(ii) to read as follows:

§ 273.18 Claims against households.

* * * * *

(d) *Collecting claims against households.* * * *

(3) *Initiating collection on claims.* (i) The State agency shall take one of the following actions by the end of the quarter following the quarter in which the claim is first identified:

(A) Recover the claim;

(B) Initiate action to locate and/or recover the claim from a former recipient;

(C) Execute a recovery agreement from a current recipient or initiate allotment reduction, if appropriate; or

(D) Initiate action to recover the claim from a current recipient if allotment reduction is not appropriate.

(ii) Problems with meeting any of the deadlines in paragraph (3)(i) of this section shall be documented.

* * * * *

12. The authority citation for 45 CFR Parts 205 and 233 continues to read as follows:

Authority: Sec. 1102, 49 Stat. 647; 42 U.S.C. 1302.

PART 205—GENERAL ADMINISTRATION—PUBLIC ASSISTANCE PROGRAMS

Part 205 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

13. Section 205.10 is amended by:

a. Adding titles to paragraphs (a)(4), (a)(5), (a)(6), (a)(13), (a)(14) and (a)(15).

b. Revising paragraphs (a)(4)(i), (a)(4)(ii) and (a)(7). The introductory text of paragraph (a)(4) is republished.

The revisions and additions read as follows:

§ 205.10 Hearings.

(a) * * *

(4) *Notice of adverse action.* In cases of intended action to discontinue, terminate, suspend or reduce assistance or to change the manner or form of payment to a protective, vendor, or two-party payment under § 234.60:

(i) The State or local agency shall give a timely and adequate notice of adverse action, except as provided for in paragraphs (a)(4) (ii), (iii) and (iv) of this section.

(A) An adequate notice shall be a written notice that explains in easily understandable language: The proposed action; the reason for the proposed action; the specific regulations supporting such action, and/or a statement of the specific law requiring such action when changes in State or Federal law require automatic grant adjustments for classes of recipients; the individual's right to request an evidentiary hearing (if provided) and a State agency hearing; the circumstances under which assistance is continued if a hearing is requested and, if the agency action is upheld, that such assistance must be repaid under title IV–A and must also be repaid under titles I, X, XIV or XVI (AABD) if the State plan provides for recovery of such payments.

(B) The notice of adverse action shall be considered timely if the notice is mailed at least 10 days before the date of action, i.e., the date upon which the action would become effective.

(ii) *Exemptions from timely notice.* The agency may dispense with timely notice but shall send an adequate notice of adverse action not later than the date of action when:

(A) The agency receives a clear written statement signed by a recipient that he no longer wishes assistance, or that gives information which requires termination or reduction of assistance based solely upon the recipient's written information, and the recipient has indicated, in writing, that he understands that this must be the consequence of supplying such information.

(B) The recipient orally voluntarily requests in the presence of an eligibility worker that assistance be terminated;

(C) The recipient's whereabouts are unknown and agency mail directed to him has been returned by the post office indicating no known forwarding address. The recipient's check must, however, be made available to him if his whereabouts become known during the payment period covered by a returned check;

(D) For AFDC, the agency takes action because of information the recipient furnished in a monthly report or because the recipient has failed to submit a complete or a timely monthly report without good cause (See § 233.37);

(E) A recipient has been accepted for assistance in a new jurisdiction and that fact has been established by the jurisdiction previously providing assistance.

(F) A special allowance granted for a specific period is terminated and the recipient has been informed in writing at the time of initiation that the allowance shall automatically terminate at the end of the specified period;

(G) The agency has factual information confirming the death of a recipient or of the AFDC payee when there is no relative available to serve as new payee;

(H) The recipient has been admitted or committed to an institution, and further payments to that individual do not qualify for Federal financial participation under the State plan;

(I) The recipient has been placed in skilled nursing care, intermediate care or long-term hospitalization;

(J) The agency has made a presumption of mismanagement as a result of a recipient's nonpayment of rent and provides for post hearings in such circumstances.

(K) An AFDC child is removed from the home as a result of a judicial termination, or voluntarily placed in foster care by his legal guardian.

* * * * *

(5) *Availability of hearings.* * * *

(6) *Continuation of assistance.* * * *

(7) *Reinstatement of assistance.* If a recipient requests a hearing after the date of the action:

(i) A State may, at its option, reinstate and continue assistance until the hearing decision, except as provided for in paragraphs (a)(6)(i)(A), (B) and (C) of this section, if:

(A) The recipient requests a hearing no more than 10 days after the date of action; or

(B) The recipient requests a hearing more than 10 days after the date of action but establishes good cause for failing to do so within the 10 days following the action. Good cause is limited to circumstances beyond the recipient's control, e.g., hospitalization, death in the family.

(ii) A State must reinstate and continue assistance, except as provided for in paragraphs (a)(6)(i)(B) and (C) of this section, if:

(A) The action was taken without timely notice;

(B) The recipient requests a hearing within 10 days of the mailing of the notice of the action; and

(C) The agency determines that the action resulted from other than the

application of State or Federal law or policy or a change in State or Federal law.

* * * * *

(13) *Hearing process rights.* * * *
(14) *Hearing record.* * * *
(15) *Hearing decisions.* * * *

* * * * *

14. Section 205.52 is amended by designating paragraph (a)(2) as (a)(2)(i) and by adding new paragraphs (a)(2) (ii) and (iii) to read as follows:

§ 205.52 Furnishing of social security numbers.

* * * * *

(a) * * *
(2) * * *

(ii) If the applicant or recipient has been unable to complete the application for an SSN because the necessary documentation is not immediately available, the State agency will determine whether or not good cause exists for failure to comply with paragraph (a)(2)(i) of this section. If the State agency determines that good cause exists, and the applicant is otherwise eligible, the individual will be eligible for assistance for a period of no longer than four months. If the applicant has been unable to obtain the documents required to complete the SSN application, the State agency's eligibility worker should make every effort to assist the individual in obtaining these documents. Good cause for failure to apply must be shown monthly during the four-month period in order for the individual to continue to receive assistance. The State agency must maintain documentation of the good cause determination in the case file.

(iii) Good cause exists if the applicant or recipient has made every effort to supply the Social Security Administration with the necessary information and does not include delays due to factors such as illness, lack of transportation or temporary absence, because the Social Security Administration makes provisions for mail-in applications in lieu of applying in person.

* * * * *

PART 233—COVERAGE AND CONDITIONS OF ELIGIBILITY IN FINANCIAL ASSISTANCE PROGRAMS

Part 233 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

15. Section 233.20 is amended by:

a. Revising paragraphs (a)(3)(ii)(D), (a)(3)(iii), and (a)(6)(v)(B).

b. Adding a new paragraph (a)(6)(v)(C).

The additions and revisions read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *
(3) * * *
(ii) * * *

(D) Income, after application of disregards, except as provided in paragraph (a)(3)(xiii) of this section, and resources available for current use shall be considered. To the extent not inconsistent with any other provision of this chapter, income and resources are considered available both when actually available and when the applicant or recipient has a legal interest in a liquidated sum and has the legal ability to make such sum available for support and maintenance. The entire value of an available jointly-held resource will be counted as a resource to an applicant or recipient unless State law prohibits noncontributory signatories from withdrawing funds from or liquidating such assets for their own benefit.

* * * * *

(iii) States may prorate income received by individuals employed on a contractual basis over the period of the contract or may prorate intermittent income received quarterly, semiannually, or yearly over the period covered by the income. States may elect to prorate over a 12-month period income received by individuals who because of a contract or self-employment derive their income in a period of time shorter than one year. States may elect to periodically average monthly interest income. In OAA, AB, APTD and AABD, they may use the prorated or averaged amount to determine need under § 233.23 and the amount of the assistance payment under §§ 233.24 and 233.25. In AFDC, they may use the prorated or averaged amount to determine need under § 233.33 and the amount of the assistance payment under §§ 233.34 and 233.35.

* * * * *

(6) * * *
(v) * * *

(B) For AFDC, with respect to self-employment, the term "earned income" means the total profit from a business enterprise, farming, etc., resulting from a comparison of the gross receipts with the "business expenses," i.e., expenses directly related to producing the goods or services and without which the goods or services could not be produced. However, the following items shall not be considered as business expenses: Depreciation; the purchase price or payments on the principal of loans for the purchase of capital assets, equipment, machinery or other durable goods; net losses from previous periods; money set aside for retirement purposes; Federal, State or local personal income taxes; personal business, entertainment and transportation expenses.

(C) For OAA, AB, APTD, AABD and AFDC income derived from providing room and board, a State may use, in lieu of actual expenses, a flat amount or a fixed percentage of the gross income to determine the business expense, provided that the amount or percentage used is objective and justifiable and the result does not exceed 75% of the gross boarder-generated income. However, if the applicant or recipient can show that the actual expenses of producing the income are higher than those resulting from the application of the State's method, the State must use the higher amount.

* * * * *

16. Section 233.31 is amended by revising paragraph (b)(1) to read as follows:

§ 233.31 Budgeting methods for AFDC.

* * * * *

(b) * * *

(1) "Prospective budgeting" means that the agency shall determine eligibility and compute the amount of assistance based on its best estimate of income and circumstances which will exist in that month. This estimate shall be based on the agency's reasonable expectation and knowledge of current, past or future circumstances, and may be derived by multiplying weekly amounts by 4.3 and biweekly amounts by 2.15 (or reasonably equivalent fractions).

* * * * *

Date: September 22, 1987.

Richard E. Lyng,

Secretary of Agriculture.

Date: September 23, 1987.

Otis M. Bowen,

Secretary of Health and Human Services.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Rules and Regulations

Federal Register
Vol. 52, No. 189
Wednesday, September 30, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 272 and 273

[Amdt. No. 299]

Food Stamp Program; Application Processing for Expedited Service

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: On January 12, 1987, the Department published an interim rule and correction in the **Federal Register** entitled "Food Stamp Program; Application Processing for Expedited Service". The rule was published in response to the decision in *Harley v. Lyng*, Civ. 84–4101 (E.D. Pa. October 10, 1986), which held that the Department's previous expedited service policy was inconsistent with the requirement of 7 U.S.C. 2020(e)(9) mandating the issuance of benefits within five days of the date of application for households entitled to expedited service. This rule implements as a final rule the January 12, interim rule. This rule also contains a technical amendment specifying that the five-day processing standard applies to residents of treatment facilities for drug addicts and alcoholics and group living arrangements

EFFECTIVE DATE: This final action is effective retroactive to January 12, 1987.

FOR FURTHER INFORMATION CONTACT: Questions regarding this rulemaking should be addressed to Judith M. Seymour, Supervisor, Certification Rulemaking Section, Eligibility and Monitoring Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, 3101 Park Center Drive, Alexandria, Va. 22302 or by telephone at (703) 756–3429.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291

This final action has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1512–1. The Department has classified this action as non-major. The effect of this action on the economy will be less than $100 million. This final action will have no effect on costs or prices. Competition, employment, investment, productivity, and innovation will remain unaffected. There will be no effect on the competition of United States-based enterprises with foreign-based enterprises.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule and Related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

This final action has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, Stat. 1164, September 19, 1980). Anna Kondratas, Administrator of the Food and Nutrition Service, has certified that this action does not have a significant economic impact on a substantial number of small entities. The action will primarily affect State and local welfare agencies and current and potential food stamp participants.

Paperwork Reduction Act

This action does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB) pursuant to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Background

On January 12, 1987, the Department published an interim rule at 52 FR 1298 implementing the decision in *Harley v. Lyng* Civ 84–4101 (E.D. Pa. October 10, 1986), which mandated the issuance of benefits to households entitled to expedited service no later than the fifth calendar day following the date of application. The lawsuit was precipitated by the failure of the Pennsylvania Department of Public Welfare to issue benefits within the five-day statutory time frame. The interim rule amended 7 CFR 273.2(i)(3)(i) by specifying that the State agency is required to issue coupons or ATP cards within five calendar days following the date of application. The regulatory provision in effect prior to the interim rule specified (1) if the fifth calendar day is Saturday, the ATP or coupons must be available for pickup or mailed on the previous Friday; (2) if the fifth calendar day is Sunday, the ATP coupons must be available for pickup on the following Monday or mailed in the earliest outgoing mail on Monday morning; (3) if the fifth calendar day is a holiday which falls on a Monday, the ATP or coupons must be available for pickup on the following Tuesday or mailed in the earliest outgoing mail on Tuesday morning; and (4) if the fourth or fifth calendar day is a holiday which falls on a Friday, the ATP or coupons must be available for pickup or mailed on the previous Thursday.

The Department accepted comments on the January 12, 1987 interim rulemaking through March 13, 1987. The Department received six comment letters in response to the interim rule. Commenters included four State agencies, one local agency and one public interest group. The major concerns raised by the commenters are discussed below. Comments which are not relevent to the final rulemaking process are not discussed. A complete explanation of the court's decision and the rationale of the rule are contained in the preamble of the interim rule. For a full understanding of the provisions of this final rule the reader should refer to the preamble of that rule.

Three commenters addressed the short implementation time frame mandated by the interim rule. Two of the commenters indicated that they had implemented or were in the processing of implementing the rule. One commenter expressed concern that the implementation time frame was extremely short. The Department recognizes that the implementation time frame contained in the interim rule may have imposed a burden on some State agencies, however, it should be noted that the period for implementation was consistent with the court order which mandated that the Department publish

VOL 52 ISS 189 SE 30 1987 UMI

rules implementing the decision within a very short time frame.

Several commenters addressed the five day time frame for application processing. While these commenters recognized that the Department cannot extend the five days processing time, they still raised several concerns. Two commenters expressed concern regarding the ability of county offices to comply with the processing standard. These commenters expressed the belief that the processing standard would result in program abuse and additional errors. One of the commenters also expressed concern that the rule does not provide exceptions when the fifth day falls on a weekend or holiday. Although an absolute five day time frame for processing applications may result in difficulty for some State agencies, the decision in *Harley* and a strict construction of the statute clearly provide no exceptions to the five day processing standard. Consequently, the final rule remains unchanged.

One commenter expressed the opinion that the interim rule should have prohibited mail issuance for households entitled to expedited service unless specifically requested by the household. The Department has elected not to prohibit mail issuance since many State agencies have experienced no problem with issuing coupons or authorization to participate (ATP) cards through the mail within the five calendar day processing period. If a State agency is not capable of providing benefits through its mail issuance system within the five calendar day period the Department expects the State agency to utilize an alternative method of issuance which will ensure compliance with the five day standard.

The same commenter also expressed concern that a general statement that benefits must be delivered within five days cannot be counted upon to ensure compliance without strong federal monitoring of States' compliance with the expedited service standards. Since October 1985 the Department has emphasized the importance of compliance with the expedited service requirements by targeting these requirements during all State agency operations reviews and management evaluation reviews. The Department has again targeted the expedited service requirements for fiscal year 1987 and will continue to emphasize this area during 1988. As a result, all States and project areas reviewed will be examined for compliance. Any problems identified during these reviews will continue to be addressed through State agencies' corrective action processes.

Two commenters addressed the issue of providing expedited service to residents of drug addiction and alcoholic treatment centers and to residents of group living arrangements. One commenter expressed the belief that applying the five calendar day standard to these applicants would be burdensome to the agency. Another commenter expressed the opposite view, noting that the Department failed to change the mail issuance time frames specified in 7 CFR 273.2(i)(3)(ii) for providing expedited service to such applicants. The interim rule specified a five day time frame for picking up or mailing coupons or an ATP. The Department agrees that the regulatory provisions concerning delivery of benefits to residents of treatment facilities entitled to expedited service must be exactly the same as the provisions governing the delivery of benefits to other households entitled to expedited service. To correct the inconsistency in the interim rule, this final rule changes the language in 7 CFR 273.2(i)(3)(ii) to conform to 7 CFR 273.2(i)(3)(i) to provide that the State agency make available to these recipients coupons or an ATP card not later than the fifth calendar day following the date the application is filed.

Implementation

The implementation section of the interim rule specified that the rule was effective upon publication and mandated implementation within 30 days of the date of publication. Since the provisions of the interim rule are unchanged by this final rule the implementation section of the interim rule is adopted in its entirety by this final rule. Implementation of the conforming amendment in this final action regarding residents of drug addiction and alcoholism treatment facilities and group living arrangements is also retroactive to February 11, 1987 to ensure consistent implementation of the decision in *Harley v. Lyng*.

List of Subjects

7 CFR Part 272

Alaska, Civil rights, Food stamps, Grant programs-social programs, Reporting and recordkeeping requirements.

7 CFR Part 273

Administrative practice and procedure, Aliens, Claims, Food stamps, Fraud, Grant programs-social programs, Penalties, Records, Reporting and recordkeeping requirements, Social security, Students.

Therefore, 7 CFR Parts 272 and 273 are amended as follows:

1. The authority citation for Parts 272 and 273 continues to read as follows:

Authority: 7 U.S.C. 2011–2029.

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

1. The amendment to § 272.1 to add a new paragraph (g)(83), as published at 52 FR 1298, January 12, 1987 is adopted as final and a new paragraph (g)(94) is added in numerical order to read as follows:

§ 272.1 General terms and conditions.

* * * * *

(g) *Implementation.* * * *

(94) *Amendment No. 299.* The changes to § 273.2(i)(3)(ii) are effective January 12, 1987 and shall be implemented no later than February 11, 1987.

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

2. In § 273.2:

a. Paragraph (i)(3)(i) as published at 52 FR 1300, January 12, 1987, is adopted as final without change.

b. Paragraph (i)(3)(ii) is revised to read as follows:

§ 273.2 Application processing.

* * * * *

(i) *Expedited service.* * * *

(3) *Processing standards.* * * *

(ii) *Drug addicts and alcoholics, group living arrangement facilities.* For residents of drug addiction or alcoholic treatment and rehabilitation centers and residents of group living arrangements who are entitled to expedited service, the State agency shall make available to the recipient coupons or an ATP card not later than the fifth calendar day following the date an application was filed.

BILLING CODE 3410–07–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–CE–28–AD; Amendment 39–5733]

Airworthiness Directives; Cessna Models 185, 185A, 185B, 185C, 185D, 185E, A185E and A185F Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), which installs quick drains on the fuel reservoirs (accumulators) on early model Cessna 185 Series airplanes. The FAA has determined that many of the early model Cessna 185 series airplanes are not equipped with quick drains on the fuel reservoirs. This action is designed to preclude engine power loss caused by undrained fuel contamination.

DATES: *Effective date:* September 30, 1987.

Compliance: As prescribed in the body of the AD.

ADDRESSES: A copy of this information is contained in the Rules Docket, FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Mike Kelley Aircraft Supplemental Type Certificate (STC) SA2272CE information may be obtained from Mr. Kent McIntyre, Vice President, Mike Kelley Aircraft, Inc., P.O. Box 541, Wellington, Kansas 67152, telephone (316) 326–8581. Safe Air Repair Supplemental Type Certificate (STC) SA2245CE information may be obtained from Mr. John T. Roscoe, President, Safe Air Repair, Inc., 3325 Bridge Avenue, Albert Lea, Minnesota 56007, telephone (507) 373–5408.

FOR FURTHER INFORMATION CONTACT: Mr. Paul O. Pendleton, Aerospace Engineer, Aircraft Certification Office, ACE–140W, Federal Aviation Administration, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209, telephone (316) 946–4427.

SUPPLEMENTARY INFORMATION: Airworthiness Directive (AD) 84–10–01 [Amendment 39–4863] (49 FR 21507; May 22, 1984) was issued to be effective on May 23, 1984, to require the installation of fuel system quick drain provisions on all fuel bladder equipped single engine Cessna airplanes. Fuel bladder and fuel reservoir (accumulator) quick drains were available for all airplanes affected by AD 84–10–01 from Cessna Aircraft Company except for their early model Cessna 185 Series airplanes. AD 84–10–01 also allowed the use of fuel system quick drains that were considered to be equivalent aircraft standard hardware. The FAA has been advised that not all owners and operators believed they were required to equip their early model Cessna 185 Series airplanes' fuel reservoirs (accumulators) with quick drains when they complied with AD 84–10–01.

During compliance with AD 86–19–11 [Amendment 39–5407] (51 FR 30853; August 29, 1986) the FAA discovered that owners of early model Cessna 185 Series airplanes could not comply with the requirements to drain the fuel reservoir (accumulator) during the preflight inspection because these airplanes were not equipped with fuel reservoir quick drains.

The FAA has issued Supplemental Type Certificates (STCS) SA2245CE to Safe Air Repair, Inc. and SA2272CE to Mike Kelley Aircraft, Inc. for installation of fuel reservior (accumulator) quick drains on certain Cessna 185 Series airplanes. The FAA has determined that there is sufficient confusion over the installation requirements of the fuel reservoir (accumulator) quick drains on early model Cessna 185 Series airplanes, that a new AD is needed. This AD does not increase the regulatory burden on the public because the installation of fuel reservoir quick drains was required by AD 84–10–01. Therefore, notice and public procedure hereon are unnecessary, contrary to the public interest and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is not a major rule under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedure of Order 12291 with respect to this rule. If this action is subsequently determined to involve a significant regulation a final regulatory evaluation or analysis as appropriate will be prepared and placed in the regulatory docket (otherwise an evaluation is not required). A copy of it when filed, may be obtained by contacting the Rules Docket under the caption "**ADDRESSES**" at the location identified.

List of Subjects in 14 CFR Part 39

Air transportation, Aviation safety, Aircraft, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised. Pub. L. 97–449, January 12, 1983); and 14 CFR Part 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Cessna: Applies to Model 185, 185A, 185B, 185C, 185D, 185E, A185E and A185F (Serial Numbers 185–0001 thru 18503153) airplanes certificated in any category.

Compliance: Within the next 50 hours of operation or before completion of the next annual inspection, whichever comes first, after the effective date of this AD, unless already accomplished per AD 84–10–01 (49 FR 21507; May 22, 1984).

To prevent power loss or engine stoppage due to water contamination of the fuel system, accomplish the following:

(a) Modify the aircraft fuel system using one of the options in the following subparagraph (a)(1), (a)(2), or (a)(3).

(1) Install fuel reservoir (accumulator) quick drains in accordance with STC SA2272CE. This STC is held by Mike Kelley Aircraft Inc., P.O. Box 541, Wellington, Kansas 67152, telephone (316) 326–8581. This STC is applicable to Cessna 185 and 185A thru 185E, A185E and A185F Serial Numbers 185–0001 thru 18503153.

(2) Install fuel reservoir (accumulator) quick drains in accordance with STC SA2245CE. This STC is held by Safe Air

VOL
52
ISS
189
SE
30
1987
UMI

Repair, Inc., 3325 Bridge Avenue, Albert Lea, Minnesota 56007, telephone (507) 373–5408. This STC is applicable to Cessna 185A thru 185E, A185E and A185F, Serial Numbers 185–0414 thru 18503153.

(3) Install quick drains in the fuel reservoir (accumulator) outlet line by using equivalent aircraft standard hardware.

Note: A one time inspection of the Cessna fuel line Part Number 0500106–329 which is used on Serial Number 185–0001 thru 185–0413 should be performed during installation of the fuel reservoir quick drains. This fuel line requires careful attention to routing in order to insure adequate clearance from moving control components located immediately adjacent to this fuel line.

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished if it is determined that no water is present in the fuel reservoir (accumulator) or any other part of the fuel system from which fuel will be used.

(c) An equivalent means of compliance with this AD may be used, if approved by the Manager, Aircraft Certification Office, Federal Aviation Administration, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209.

All persons affected by this AD may obtain copies of the document(s) referred to herein upon request to FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on September 30, 1987.

Issued in Kansas City, Missouri, on September 15, 1987.

Jerold M. Chavkin,

Acting Director, Central Region.

[FR Doc. 87–22468 Filed 9–29–87; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 45

[Docket No. 25033; Amdt. 45–17]

Aircraft Identification and Retention of Fuel System Modification Records; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: In the September 9, 1987, issue of the **Federal Register** (52 FR 34096), the FAA published a final rule addressing the size of registration numbers, location of identification plates, and retention of FAA Form 337. The effective date of this rule is December 8, 1987. Application of this rule is to be 90 days after this effective date, or March 7, 1988. However, because of a miscalculation in the current amendatory language, §§ 45.11(d) and 45.29(h) do not reflect this date. This document serves to correct that error.

Correction of the Amendment

In consideration of the foregoing, §§ 45.11(d) and 45.29(h) of the Federal Aviation Regulations (14 CFR Part 45) are corrected as follows:

§ 45.11 [Corrected]

On p. 34101 in the third column, last paragraph, second line, "December 8, 1987," is corrected to read "March 7, 1988,".

§ 45.29 [Corrected]

On p. 34102 in the second column, first paragraph, first line, "December 8, 1987," is corrected to read "March 7, 1988,".

John H. Cassady,

Assistant Chief Counsel for Regulations and Enforcement.

[FR Doc. 87–22474 Filed 9–29–87; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 71

[Airspace Docket No. 87–ANM–10]

Revision of Transition Area, Evanston, WY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises the transition area at Evanston, Wyoming, to accommodate a new VOR/DME–A approach procedure to the Evanston-Uinta County Airport. This action is necessary to ensure segregation of aircraft using the approach procedure in instrument weather conditions and other aircraft operating in visual weather conditions.

EFFECTIVE DATE: 0901 UTC, November 19, 1987.

FOR FURTHER INFORMATION CONTACT: Robert L. Brown, ANM–535, Federal Aviation Administration, Docket No. 87–ANM–10, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168, Telephone: (206) 431–2535.

SUPPLEMENTARY INFORMATION:

History

On August 3, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the transition area at Evanston, Wyoming (52 FR 28725). This action was proposed to provide controlled airspace for a new instrument approach procedure to the Evanston-Uinta County Airport.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations revises the Evanston, Wyoming, transition by adding additional controlled airspace to accommodate a new VOR/DME–A approach procedure to the Evanston-Uinta County Airport. This action is necessary to ensure segregation of aircraft using the approach procedure in instrument weather conditions and other aircraft operating in visual weather conditions.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Evanston, Wyoming, Transition Area (Revised)

That airspace extending upward from 700 feet above the surface between lat. 41°18'30"N., long. 111°33'00"W., lat.

41°32'00"N., long. 110°47'00"W., lat. 41°27'00"N., long. 110°20'00"W., lat. 41°18'30"N., long. 110°24'00"W., lat. 41°15'00"N., long. 110°37'00"W., lat. 40°51'00"N., long. 111°05'30"W., lat. 41°05'00"N., long. 111°27'00"W., to point of beginning excluding that airspace within the Fort Bridger, Wyoming, 700 foot transition area; and that airspace extending upward from 1,200 feet above the surface between lat. 41°18'30"N., long. 111°33'00"W., lat. 41°24'00"N., long. 111°36'00"W., lat. 41°35'30"N., long. 110°56'00"W., lat. 41°32'00"N., long. 110°47'00"W., lat.41°27'00"N., long. 110°27'00"W., lat. 41°18'30"N., long. 110°24'00"W., lat. 41°15'00"N., long. 110°37'00"W., lat. 40°51'00"N., long. 111°05'30"W., lat. 41°05'00"N., long. 111°27'00"W., to point of beginning excluding the airspace within the Fort Bridger, Wyoming, 1,200 foot transition area.

Issued in Seattle, Washington, on September 21, 1987.

Temple H. Johnson, Jr.,

Manager, Air Traffic Division, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 87-AGL-14]

Alteration to Transition Area, Austin, MN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to alter the Austin, MN, transition area to accommodate a new VOR/DME-A Standard Instrument Approach Procedure (SIAP) to Austin Municipal Airport. The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: 0901 UTC, January 14, 1988.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION:

History

On Monday, August 3, 1987, the Federal Aviation Administration (FAA) proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Austin, MN, transition area (52 FR 28726).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Austin, MN, transition area to accommodate a new VOR/DME-A SIAP to Austin Municipal Airport.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Austin, MN [Revised]

That airspace extending upward from 700 feet above the surface within a 5 mile radius of the Austin Municipal Airport (lat. 43°40'00" N., long. 92°56'00" W.); within 3 miles each side of the Austin VOR 350 radial extending from the 5 mile radius to 8 miles north of the VOR; and within 3 miles each side of the Austin VOR 175 radial extending from the 5 mile radius to 8 miles south of the VOR; and within 3 miles each side of the Rochester VOR/DME 240 radial extending from the Austin Municipal Airport 5 mile radius to 7 miles northeast of the airport.

Issued in Des Plaines, Illinois, on September 18, 1987.

Teddy W. Burcham,

Manager, Air Traffic Division.

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 374

[Docket No. 70876-7176]

Export Licensing; General License Baggage; Permissive Reexports

AGENCY: Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: Export Administration is adding General License Baggage to the other General Licenses specified in § 374.2(a)(1), which allows permissive reexport privileges. A commodity that may be exported under the provisions of General License Baggage (§ 371.6) may be permissively reexported to a new country of destination as long as the direct export would be authorized from the United States to that country(ies) under the provisions of General License Baggage (§ 371.6).

EFFECTIVE DATE: September 30, 1987.

FOR FURTHER INFORMATION CONTACT: Patricia Muldonian, Regulations Branch, Telephone: (202) 377-2440.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign affairs and military function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these

VOL
52
ISS
189
SE
30
1987
UMI

APA requirements because it involves a foreign affairs and military function of the United States. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Comments should be submitted to Patricia Muldonian, Office of Technology and Policy Analysis, Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. This rule does not contain a collection of information subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

List of Subjects in 15 CFR Part 374

Exports.

Accordingly, the Export Administration Regulations (15 CFR Parts 368–399) are amended as follows:

PART 374—[AMENDED]

1. The authority citation for 15 CFR Part 374 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503, 50 U.S.C. App. 2401 et seq., as amended by Pub. L. 97–145 of December 29, 1981 and by Pub. L. 99–64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985).

2. Paragraph (a)(1) of § 374.2 is revised to read as follows:

§ 374.2 Permissive reexports [2]

* * * * *

(a) * * *

(1) May be exported directly from the United States to the new country of destination under General License G–DEST, GTE, G–COM, G–CEU, GCG, G–NNR, G–FTZ or BAGGAGE;

* * * * *

Dated: September 25, 1987.

Vincent F. DeCain,

Deputy Assistant Secretary for Trade Admininstration.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 790

[OPTS–42052D; FRL–3270–3]

Modification of Procedures Governing Two-Phase Test Rules Under the Toxic Substances Control Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Interim final rule.

SUMMARY: This immediately effective interim final rule amends EPA's regulations for developing and implementing testing requirements under section 4 of the Toxic Substances Control Act (TSCA). These amendments: (1) Modify the definition of the test standard for two-phase test rules; and (2) eliminate the requirement for the submission of final study plans for tests required under two-phase test rules. EPA believes that the amended regulations will eliminate unnecessary delays in the development of the required health or environmental effects data and reduce certain paperwork burdens associated with the current procedures.

EFFECTIVE DATE: September 30, 1987. Submit written comments on or before October 30, 1987.

ADDRESS: Written comments should bear the document control number OPTS–42052D, and should be submitted in triplicate to: TSCA Public Information Office (TS–793), Office of Toxic Substances, Environmental Protection Agency, Room NE–G004, 401 M Street SW., Washington, DC 20460.

All written comments filed under this proposal will be available for public inspection at the above address from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Room E–543, 401 M Street SW., Washington, DC 20460, (202) 554–1404.

SUPPLEMENTARY INFORMATION: This rule amends the procedural regulations in 40 CFR Part 790 which govern the development and implementation of testing requirements under section 4 of TSCA.

I. Amendments

These amendments are the outgrowth of EPA's increased experience with two-phase test rules, and are intended to simplify the two-phase rulemaking process and to decrease certain paperwork burderns associated with it for both test sponsors and the Agency.

The amendment to § 790.50 eliminates the requirement for test sponsors to submit final study plans no later than 45 days before the initiation of each test. This requirement was intended to provide EPA complete copies of the final approved study plan to facilitate review and audit of the studies. However, under the current process for adopting test standards and schedules for two-phase rules, for each required test EPA now incorporates the proposed study plan submitted by the test sponsor plus any revisions resulting from EPA review and public comment into one document. EPA now finds that this EPA-compiled document is sufficient for the purpose of a complete, approved final study plan and no longer finds a need for test sponsors to submit a separate final study plan. It should be noted, however, that this amendment does not nullify the reequirement pursuant to 40 CFR 790.50(c)(2) for test sponors to supply information on the testing facility and personnel utilized for each test before the initiation of testing, if it was not previously submitted with the proposed study plan or if it has changed since that submission.

The amendment to § 790.52 redefines the test standard to include only the revised study protocol section of the revised study plan. The test standard is currently defined as the entire revised study plan, excluding the revised schedule section. The revised schedule section remains the schedule for the required testing. This amendment will reduce the burden of testing required by two-phase test rules by eliminating the requirement for applications to modify the test stanard for all but the revised study protocol section of the revised study plan. Currently, for example, if a test sponsor changes the personnel conducting the test, the sponsor must submit an application for modification of the test standard to the Agency. In addition, although EPA may notify the test sponsor by telephone or letter of its approval of such a non-substantive change, the Ageny must publish a notice in the **Federal Register** announcing that EPA has approved this modification. The redefinition of the test standard for two-phase test rules also makes this definition more consistent with that utilized for single-phase test rules and testing consent order.

EPA is promulgating these amendments as an immediately effective interim final rule so that the current requirements for test sponsors to apply for non-substantive modifications of test standards for two-phase test

rules and the submission of final study plans may be quickly rescinded. This will result in an immediate savings in time and resources for both Agency and regulated industries, and ongoing testing will not be delayed. These amendments represent only procedural changes, and do not impose any substantive requirements on manufacturers or processors subject to TSCA section 4(a) test rules. Further, EPA finds that providing for comment before making these changes would be contrary to the public interest and that good cause exists to make the changes effective immediately.

However, EPA is inviting comment on these changes and will take any comments into consideration when promulgating a final rule on procedures governing modification of test standards or schedules.

II. Rulemaking Record

EPA has established a record for this rulemaking, docket number [OPTS–42052D]. This record, which includes basic information considered by the Agency in developing this rule and appropriate **Federal Register** Notices, is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in Rm. G–004, NE Mall, 401 M St., SW., Washington, DC 20460.

III. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. This rule on procedures governing two-phase test rule development and implementation under section 4 of TSCA is not major because it does not meet any of the criteria set forth in section 1(b) of the Order.

This rule was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA, and any EPA response to those comments, are included in the rulemaking record.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (U.S.C. 601, Pub. L. 96–354, September 19, 1980), EPA is certifying that this rule will not have a significant impact on a substantial number of small business entities.

The procedural amendments described in this rule are expected to reduce the administrative and financial burdens which two-phase test rules might otherwise impose on regulated industries.

C. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by OMB under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* and have been assigned OMB control number 2070–0033.

List of Subjects in 40 CFR Part 790

Test procedures, Environmental protection, Hazardous substances, Chemicals.

Dated: September 22, 1987.

V.J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

Therefore, 40 CFR Part 790 is amended as follows:

PART 790—[AMENDED]

1. The authority citation of Part 790 continues to read as follows:

Authority: 15 U.S.C. 2603.

§ 790.50 [Amended]

2. In § 790.50 by removing and reserving paragraph (a)(2)(ii).

3. In § 790.52 by revising paragraph (c) to read as follows:

§ 790.52 Phase II test rule.

* * * * *

(c) After receiving and considering public comments on the study plan, EPA will adopt, as proposed or as modified in response to EPA review and public comments, the study protocol section of the study plan, as defined by § 790.50(c)(1)(v) of this chapter, as the test standard for the required testing, and the schedule section of the study plan, as defined by § 790.50(c)(1)(vi) of this chapter, as the schedule for the required testing in a final Phase II test rule.

40 CFR Part 790

[OPTS–42052E; FRL–3270–2]

Procedures Governing Modification of Test Standards and Schedules for Tests Required Under Test Rules and Testing Consent Agreements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Interim final rule.

SUMMARY: EPA is amending the procedures governing modification of test standards and schedules for tests required under test rules and testing consent agreements under the authority of section 4 of the Toxic Substances Control Act (TSCA). EPA believes that the amended procedures will eliminate unnecessary delays in the development of the required health or environmental effects data and reduce certain paperwork burdens associated with the current procedures.

DATES: Effective on October 30, 1987. Submit written comments on or before October 30, 1987.

ADDRESS: Submit written comments, identified by the document control number [OPTS–42052E], in triplicate to: TSCA Public Information Office (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Room NE–G004, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Room 543, 401 M Street SW., Washington, DC 20460, (202) 554–1401.

SUPPLEMENTARY INFORMATION: This rule amends the procedural regulations in 40 CFR Part 790.

I. Statutory Background

Section 4(a) of TSCA, 15 U.S.C. 2603(a), authorizes EPA to require manufacturers (including importers) and/or processors of chemical substances and mixtures (chemicals) to conduct tests on those chemicals to determine whether they have adverse health or environmental effects. EPA exercises this authority by promulgating test rules or issuing testing consent agreements. Each test rule or testing consent agreement includes the identity of the chemical to be tested, specifies the studies to be performed, provides standards for the development of test data, and establishes deadlines for the submission of test results.

II. Procedures Governing Modification of Test Standards and Schedules

A. Current Procedures

Under EPA's current procedures governing test rules and testing consent agreements in 40 CFR Part 790, any test sponsor who wishes to modify the test standards or schedules for any test required under a test rule or testing consent agreement must submit an application in accordance with § 790.55 or § 790.68. The application must include an appropriate explanation of why the modification is necessary.

The procedures specify that EPA, to the extent feasible, will seek public comment on all substantive changes in the test standards and schedules. EPA

will issue a notice in the **Federal Register** seeking comments on requested modifications. However, EPA will act on the requested modification without seeking public comment if either: (1) EPA believes that an immediate modification to a test standard is necessary to preserve the accuracy or validity of an ongoing study, or (2) EPA determines that a modification clearly does not pose any substantive issues. When EPA approves a modification, it will publish a notice in the **Federal Register** indicating that the test standard or schedule has been modified.

B. Amended Procedures

EPA has received requests for modifications of test standards and schedules for several test rules in the past year. Based on its consideration of these requests under the existing procedures, EPA has concluded that the current procedures are unduly cumbersome, require a considerable expenditure of EPA resources, and are likely to result in unavoidable delays of testing under test rules and testing consent agreements. Accordingly, EPA is amending the current procedures for approving modifications of test standards and schedules for tests required under test rules and testing consent agreements. The amended procedures will allow requested modifications, which do not alter the scope of a test or significantly change the schedule for completing the test, to be approved by letter without the need for public comment. Letters approving such modifications will be placed in EPA's public files immediately. In addition, EPA will publish a notice of such modifications in the **Federal Register** on an annual basis.

Requests for modifications of test standards and schedules likely will fall into two categories: (1) Those which would alter the scope of a required test or significantly change the schedule for completing it and (2) those which would not. EPA believes that it is appropriate to continue to approve modifications falling into the first category through notice and comment procedures in the **Federal Register**. The current procedures for both test rules and testing consent agreements call for such notice and comment, because such modifications may lead to a test which provides quite different data in relation to its original purpose.

EPA has found that the requested modifications to date fall into the second category and would not alter the scope of the tests in question or significantly delay completion of the tests. Some recent examples include changing the purity of the test substance used in a study from 99 percent to 97 percent because 99 percent pure substance is no longer being manufactured, adjusting the study protocol to change the temperature at which a study is conducted, and slight extensions of schedules of less than six months to deal with technical difficulties encountered during preliminary phases such as problems with volatility or solubility of the test substance. In such cases, EPA believes that the modifications, while often substantive in nature, are necessary and very unlikely to be controversial. Yet, by making such modifications only through notice and comment procedures, EPA likely would have to further extend the testing schedule to account for the delays resulting from such procedures.

Under the current procedures, EPA is committed to using notice and comment procedures to adopt modifications except in two circumstances: (1) When immediate modification is necessary to preserve the accuracy or validity of an ongoing study and (2) when the modification clearly does not pose any substantive issues. None of the requested modifications to date have fit the first of these categories because they have been encountered at the beginning of a test. While the modifications that have been granted were determined to fit the second category, EPA finds that such determinations may be seen as somewhat ambiguous in the future unless the language used in this category is stated in more specific terms.

The current procedures, to the extent that they require a notice and comment process to adopt modifications that do not affect the scope of the test or significantly change the timing of the test, serve to delay testing. A test sponsor cannot make a change in how it conducts the test until EPA has completed the notice and comment process for approving the change. Consequently, because of the relatively tight schedules for submission of test data in EPA test rules and consent agreements, EPA would have to extend those submission dates by an amount equal to that taken up by the notice and comment process, further delaying receipt of test data. Thus, following these procedures is contrary to the public interest in expeditious completion of the required toxicity testing.

To deal with these problems, EPA is amending the current procedures governing modification of test standards and schedules for tests required under test rules and testing consent agreements to allow EPA to respond more quickly and efficiently to such requests, to minimize delays in completion of testing and receipt of results, and to reduce paperwork burdens.

Section 790.55, which governs modifications of test standards and schedules for tests required under test rules, is amended to allow EPA to approve modifications of test standards and schedules for tests required under test rules by letter without seeking public comment, where EPA determines that the modifications would not alter the scope of the test or significantly change the schedule for completing the test. All other modifications will continue to be made after providing for public comment through a notice in the **Federal Register**, except where immediate modification of a test standard is necessary to preserve the accuracy or validity of the test. Modifications which would alter the scope of the test or significantly change the schedule for completing it are described in § 790.55(b)(4). EPA believes that this new approach is consistent with the language of the existing rule, which refers to modifications that do not raise substantive issues, but is clearer.

To reduce the cost and burden of publishing notices in the **Federal Register** describing modifications of this type, § 790.55 is also amended to provide that EPA will publish a notice once a year describing all of the modifications approved during the previous year. EPA will place copies of the modification applications and EPA's approvals in the rulemaking records for the applicable test rules immediately. These will be available to the public in EPA's public files, in Room G–004, NE-Mall, 401 M St. SW., Washington, DC 20460, to the extent they do not contain confidential business information. Finally, until EPA has published the annual notice, each modification will apply only to the test sponsor who made the application.

The changes to § 790.68 for modifications of test standards and schedules for tests required under testing consent agreements are virtually the same. There are two minor differences from the procedures in § 790.55. First, EPA's approval letter will be sent not only to the test sponsor who requested the modification but also to any other persons who have signed the consent order. Second, the modification will apply only to the testing conducted by that test sponsor, even after publication of the annual notice in the **Federal Register**, because consent agreements apply only to those persons who sign consent orders.

EPA is promulgating these amendments as an interim final rule so that they may be used immediately. The

amendments are to procedural rules and, thus, do not require public comment. However, EPA requests comment on this approach to modification of test standards and schedules for tests required under test rules and testing consent agreements and will consider such comments when promulgating a final rule on procedures governing test rules and testing consent agreements.

III. Rulemaking Record

EPA has established a record for this rulemaking, docket number [OPTS–42052E]. This record, which includes basic information considered by the Agency in developing this rule and appropriate **Federal Register** notices, is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in Rm. G–004, NE Mall, 401 M St., SW., Washington, DC 20460.

IV. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. This rule on procedures governing modification of test standards and schedules for tests required under test rules and testing consent agreements under the authority of section 4 of TSCA is not major because it does not meet any of the criteria set forth in section 1(b) of the Order.

This rule was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA, and any EPA responses to those comments, are included in the rulemaking record.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, (5 U.S.C. 601, Pub. L. 96–354, September 19, 1980), EPA is certifying that this rule will not have a significant impact on a substantial number of small business entities.

The procedural amendments described in this rule are expected to expedite the development of test data and to reduce certain paperwork burdens associated with current regulations.

List of Subjects in 40 CFR Part 790

Test procedures, Environmental protection, Hazardous substances, Chemicals.

Dated: September 23, 1987.

Victor J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

Therefore, 40 CFR Part 790 is amended as follows:

PART 790—[AMENDED]

1. The authority citation for Part 790 continues to read as follows:

Authority: 15 U.S.C. 2603.

2. In § 790.55 by revising paragraph (b) and adding a new paragraph (c) to read as follows:

§ 790.55 Modification of test standards or schedules during conduct of test.

* * * * *

(b) *Adoption.* (1) Where EPA concludes that the requested modification of a test standard or schedule for a test required under a test rule is appropriate, EPA will proceed in accordance with this paragraph (b).

(2) Where, in EPA's judgment, the requested modification of the test standard or schedule would not alter the scope of the test or significantly change the schedule for completing the test, EPA will not ask for public comment before approving the modification. EPA will notify the test sponsor by letter of EPA's approval. EPA will place copies of each application and EPA approval letter in the rulemaking record for the test rule in question. EPA will publish a notice annually in the **Federal Register** indicating the test standards or schedules for tests required in test rules which have been modified under this paragraph (b)(2) and describing the nature of the modifications. Until the **Federal Register** notice is published, any modification approved by EPA under this paragraph (b)(2) shall apply only to the test sponsor who applied for the modification under this paragraph (a) of this section.

(3) Where, in EPA's judgment, the requested modification of a test standard or schedule would alter the scope of the test or significantly change the schedule for completing the test, EPA will publish a notice in the **Federal Register** requesting comment on the proposed modification. However, EPA will approve a requested modification of a test standard under this paragraph (b)(3) without first seeking public comment if EPA believes that an immediate modification to the test standard is necessary to preserve the accuracy or validity of an ongoing test. EPA will publish a notice in the **Federal Register** approving any modification under this paragraph (b)(3).

(4) For purposes of this paragraph (b), a requested modification of a test standard or schedule for a test required under a test rule would alter the scope of the test or significantly change the schedule for completing the test if the modification would:

(i) Change the test species.

(ii) Change the route of administration of the test chemical.

(iii) Change the period of time during which the test species is exposed to the test chemical.

(iv) Result in a delay of over six months in receiving the final report of the test.

(c) *Disapproval.* Where EPA concludes that the requested modification of a test standard or schedule for a test required under a test rule is not appropriate, EPA will so notify the test sponsor in writing.

3. In § 790.68 by revising paragraphs (b)(2) and (3) to read as follows:

§ 790.68 Modification of consent agreements.

* * * * *

(b) * * *

(2)(i) Where EPA concludes that the requested modification of a test standard or schedule for a test required under a consent agreement is appropriate, EPA will proceed in accordance with this paragraph (b)(2).

(ii) Where, in EPA's judgment, the requested modification of a test standard or schedule would not alter the scope of the test or significantly change the schedule for completing the test, EPA will not ask for public comment before approving the modification. EPA will notify the test sponsor, and any other persons who have signed the consent agreement, by letter of EPA's approval. EPA will place copies of each application and EPA approval letter in the administrative record maintained for the consent agreement in question. EPA will publish a notice annually in the **Federal Register** indicating the test standards or schedules for test required in consent agreements which have been modified under this paragraph (b)(2)(ii) and describing the nature of the modifications.

(iii) Where, in EPA's judgment, the requested modification of a test standard or schedule would alter the scope of the test or significantly change the schedule for completing the test, EPA will publish a notice in the **Federal Register** requesting comment on the proposed modification. However, EPA will approval a requested modification of a test standard under this paragraph (b)(2)(iii) without first seeking public comment if EPA believes that an immediate modification to the test standard is necessary to preserve the

accuracy or validity of an ongoing test. EPA will publish a notice in the **Federal Register** approving any modification under this paragraph (b)(2)(iii).

(iv) For purposes of this paragraph (b)(2), a requested modification of a test standard of schedule for a test required under a consent agreement would alter the scope of the test or significantly change the schedule for completing the test if the modification would:

(A) Change the test species.

(B) Change the route of administration of the test chemical.

(C) Change the period of time during which the test species is exposed to the test chemical.

(D) Result in a delay of over six months in receiving final report of the test.

(3) Where EPA concludes that the requested modification of a test standard or schedule for a test requirement under a consent agreement is not appropriate, EPA will so notify the test sponsor in writing.

[FR Doc. 87-22520 Filed 9-29-87; 8:45 am]

BILLING CODE 6560-50-M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-41

[FPMR Temp. Reg. G-50]

Use of Cash for Official Travel

AGENCY: Federal Supply Service, General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This regulation temporarily amends the Federal Property Management Regulations (FPMR) by raising the monetary limit on cash purchases of official passenger transportation services from $100 to $500. This increase will eliminate the requirement for agencies to request a written exemption from the General Services Administration (GSA) before reimbursing travelers for nonemergency cash purchases up to $500. Prior to the expiration date of this regulation, GSA will determine whether to make this increase permanent. This regulation also changes the correspondence symbol for submissions to ensure better monitoring and changes agencies' submission requirements concerning cash purchases of passenger transportation services costing more than $10.

DATES: *Effective date:* September 30, 1987.

Expiration date: September 30, 1988.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Collections, Accounts, and Procedures Division, Office of Transportation Audits, (202) 786-3014 or FTS 786-3014.

SUPPLEMENTARY INFORMATION: This revised cash policy requires agencies to make Code E submissions of all cash purchases of passenger transportation services costing more than $10 (§ 101-41.203-2(b)(3)). Also, § 101-41.203-2(a)(1) specifically prohibits the use of cash in excess of $10 to circumvent the regulations governing the contract airline program.

GSA has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. Therefore, a regulatory impact analysis has not been prepared. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

Pursuant to the provisions of section 3 of the Regulatory Flexibility Act [5 U.S.C. 605(b)], GSA has also determined that this rule will not have a significant economic impact on a substantial number of small entities. Therefore, no regulatory flexibility analysis has been prepared.

List of Subjects in 41 CFR Part 101-41

Air carriers, Accounting, Claims, Maritime carriers, Passenger services, Railroads, Transportation.

Authority: 31 U.S.C. 3726; Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

In 41 CFR Chapter 101, the following temporary regulation is added to the appendix at the end of Subchapter G to read as follows:

[Federal Property Management Regulations Temporary Regulation G-50]

August 27, 1987.

To: Heads of Federal agencies.

Subject: Use of cash for official travel.

1. *Purpose.* This temporary regulation modifies FPMR 101-41.203-2 by raising the monetary limit on cash purchases of official passenger transportation services from $100 to $500.

2. *Effective date.* This regulation is effective September 30, 1987.

3. *Expiration date.* This regulation expires on September 30, 1988, unless sooner revised or superseded.

4. *Applicability.* This regulation applies to all Government agencies that are subject to the audit authority of GSA under 31 U.S.C. 3726.

5. *Background.* FPMR Amendment G-72, published May 14, 1985 (50 FR 20101), prescribes the policy and procedures for the cash purchase of passenger transportation services. Normally, the Government Transportation Request (GTR), Government Travel System account, or a Government-issued charge card is used to purchase these services; however, agencies may require travelers to use cash instead of the prescribed methods when transportation services cost more than $10 but do not exceed $100. This regulation temporarily raises the cash limit from $100 to $500. This regulation also requires the submission of documentation relating to all cash purchases of passenger transportation services exceeding $10.

6. *Revised policy.* Section 101-41.203-2 is revised to read as follows:

§ 101-41.203-2 Use of cash.

(a) Cash shall be used to procure all passenger transportation services costing $10 or less, exclusive of Federal transportation tax, and to pay air excess baggage charges of $15 or less for each leg of a trip (see § 101-41.203-6), unless special circumstances justify the use of a GTR or Government Excess Baggage Authorization Ticket (GEBAT). Agencies have the option of requiring travelers to use cash to procure passenger transportation services from, to, or between points in the United States, including Alaska and Hawaii, and its possessions or trust territories, where such services cost more than $10, but do not exceed $500; exclusive of Federal transportation tax, for each trip authorized on an official travel authorization. GTR's shall be used to procure all passenger transportation services costing in excess of $500, excluding Federal transportation tax, unless otherwise exempted herein. For the purpose of this subpart, references made to GTR's also apply to Government Travel System (GTS) accounts and Government-issued charge cards. For cash purchased tickets costing more than $10, ticket coupons, travel authorizations, or SF 1170's shall be forwarded for audit to General Services Administration (FWCPR), Attention: CODE E, Washington, DC 20405.

(1) Approval for the use of cash in excess of $500 should be obtained prior to travel. In the absence of advance written authorization or approval, passenger transportation services shall be purchased in accordance with

policies and procedures prescribed in the Federal Travel Regulations (FTR), FPMR 101–7. The traveler shall be responsible for any additional costs incurred when cash is used to procure transportation services, such as the use of foreign-flag carriers, first-class travel, or more costly modes, unless such use is approved on the travel voucher in accordance with the governing provisions of the FTR. The traveler should be aware that the use of a GTR may be required to obtain certain discount fares and to comply with the mandatory provisions of FPMR Temporary Regulations (A Series) governing the use of contract airline services between designated city-pairs. Cash shall not be used to circumvent the regulations governing airline city-pair contracts.

(2) Agencies shall not impose a financial hardship on travelers by requiring their use of personal funds to purchase the services set forth in paragraph (a) of this section but should provide the funds through travel advances.

(3) Use of credit cards, other than the GSA contractor-issued charge cards, and all travelers checks to purchase passenger transportation services shall be considered the equivalent of cash and subject to the $500 limitation provided in paragraph (a) of this section.

(4) Passenger transportation services procured with GSA contractor-issued charge cards or under Government Travel System accounts are not subject to the $500 cash limitation.

(5) Passenger transportation services procured in accordance with the group or charter provisions of section 1–3.4(2)(a) of the FTR are not subject to the provisions of this subpart.

(b) Under emergency circumstances, where the use of GTR's is not possible, heads of agencies, or their designated representatives, may authorize travelers to exceed the $500 limitation when procuring passengers transportation services.

(1) Delegation of authority for authorizing and approving the use of cash in excess of $500 for the procurement of emergency transportation services shall be held to as high an administrative level as practicable to ensure adequate consideration and review of the circumstances. These delegations of authority shall be made in writing and copies retained to permit monitoring of the system. These records of delegations of authority shall be available for examination by GSA auditors.

(2) To justify the use of cash in excess of $500 instead of GTR's when procuring passenger transportation services, both the Government agency head, or his/her designated representative, and the traveler shall certify on the travel voucher the reasons for this use.

(3) After the traveler has been reimbursed for an emergency cash purchase in excess of $10, copies of travel authorizations, ticket coupons, and any ticket refunds applications, or SF 1170's, Redemption of Unused Tickets shall be forwarded for audit to the General Services Administration (FWCP/R), Attention: Code E, Washington, DC 20405.

(4) Travel vouchers shall be maintained by the agency and be made available for site audit by GSA auditors. General Records Schedule 9, Travel and Transportation Records (see 36 CFR 1228.22) provides instructions for the disposal of these travel vouchers.

(c) Under nonemergency circumstances, where use of a GTR is possible, heads of agencies, or their designated representatives, shall request an exemption from the Assistant Commissioner, Officer of Transportation Audits (FW), GSA, Washington, DC 20405, for cash purchases exceeding the $500 limitation.

(1) Requests shall be made in writing, shall only be for individual travel itineraries, and shall fully explain why an exemption should be granted. Traveler convenience will not be cause for GSA approval. For the purpose of performing a fare audit, requests shall also include copies of travel authorizations, ticket coupons, and any ticket refund applications, or SF 1170's associated with the travel in question.

(2) Travelers shall not be reimbursed for the nonemergency use of cash to procure passenger transportation services costing more than $500 unless written approval is granted by GSA.

(d) Suspected travel management errors and/or misroutings which result in higher travel costs to the U.S. Government will be reported by GSA (FWCA) to the appropriate military or civil agency travel manager for corrective action with the violating agency.

(e) Travelers using cash to purchase individual passenger transportation services shall procure such services directly from carriers, travel agents under GSA contract (see § 101–41.203–1), or SATO's and shall account for those expenses on their travel vouchers, furnishing passenger coupons or other evidence as appropriate in support thereof. Moreover, travelers shall assign to the Government the right to recover any excess payments involving carriers' use of improper rates. That assignment is preprinted on the travel voucher and shall be initiated by the traveler.

(f) Travelers using cash to procure passenger transportation services shall be made aware of the provisions of § 101–41.209–4 concerning a carrier's liability for liquidated damages because of failure to provide confirmed reserved space. Also, travelers using cash shall adhere to the regulations of the General Accounting Office (4 CFR 52.2) regarding the use of U.S.-flag vessels and air carriers (see § 101–41.203–1(b)).

Paul Trause,

Acting Administrator of General Services.

BILLING CODE 6820–AM–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 412

[BERC–403–CN]

Capital Payments Under the Inpatient Hospital Prospective Payment System; Correction

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of correction.

SUMMARY: In the September 1, 1987 issue of the **Federal Register** (FR Doc. 87–20081), beginning on page 33168, we amended the Medicare regulations governing the inpatient hospital prospective payment system to incorporate capital costs into that system. This notice corrects inadvertent errors we made in the preamble and regulations text of that document. We note that the change in the regulations text of 42 CFR 412.92 is necessary because of the interaction of the mandatory language concerning § 412.92 that was issued in the final rule with comment period published on August 14, 1987 (52 FR 30367) and in the subject final rule.

FOR FURTHER INFORMATION CONTACT: Mike Fiore, (301) 594–4269.

SUPPLEMENTARY INFORMATION: We are making the following corrections to the September 1, 1987 document:

1. On page 33181, in the second column, beginning with the first full paragraph and proceeding through the sixth step of the example ending in the second column on page 33182, the entire day outlier example and the entire cost outlier example are corrected to read as follows:

The following is an example of how additional payment would be

determined for a day outlier (which does not qualify as a cost outlier) in FY 1988.

Hospital X is a small central city teaching hospital located in the San Francisco MSA. Hospital X is entitled to an indirect medical education adjustment of 7.871 percent as well as a disproportionate share adjustment of five percent. Mrs. Smith is admitted to hospital X on October 3, 1987 and is discharged October 31, 1987. Mrs. Smith's stay is classified in DRG 31. Because Mrs. Smith's 28 day stay exceeds the 22 day length-of-stay outlier threshold for DRG 31, hospital X is eligible for payment for six outlier days in addition to the otherwise applicable prospective payment. The amount of Hospital X's outlier payment (excluding the usual Federal payment that applies to both outliers and non-outlier cases) is calculated as follows:

Step 1: Computation of Federal Rate (excludes capital, indirect medical education (IME), and disproportionate share hospital (DSH) payments)

National Urban Standardized Amounts:
Labor-related: $2337.09
Nonlabor-related: 828.12
San Francisco Wage Index: 1.4946
DRG 31 Relative Weight: .6550
.6550×(2337.09×1/4946+828.12)=$2830.34

Step 2: Computation of Federal Capital Payments

A. Plant/fixed Equipment:
Federal Rate: $180.03
San Francisco Construction Cost Index: 1.043
DRG 31 Relative Weight: .6550
Federal Portion of Plant/Fixed Equipment Capital Rate: 5%
.6550×(180.03×1.043)×.05=$6.15

B. Movable Equipment:
Federal Rate: $122.39
DRG 31 Relative Weight: .6550
Federal Portion of Movable Equipment Capital Rate: 5%
.6550×(122.39)×.05=$4.01

C. Capital Outlier Payment Amount
6.15+4.01=$10.16

Step 3. Payment Amount, Including Capital:

DRG 31 2830.34+10.16=$2840.50

Step 4. Computation of Day Outlier Payments

DRG 31 Geometric Length of Stay: 4.2 days
Outlier Threshold: 22 days
Outlier Days: 28 day length of stay minus 22 day threshold=6 days
Marginal Cost Factor: .60
Outlier Payment (excluding IME & DSH adjustment)=# of outlier days×(Total Federal Payment÷Geometric length of stay for DRG)×Marginal cost factor
6×(2840.50÷4.2)×.60=$2434.71

Step 5: Computation of IME and DSH adjustment for Day Outliers

IME Adjustment Factor: .07871
DSH Adjustment Factor: .05
Outlier Payment: $2434.71
IME Outlier Adjustment: 2434.71×.07871=$191.64
DSH Outlier Adjustment: 2434.71×.05=$121.74

Step 6: Total Day Outlier Payments

Regular	2434.71
IME	191.64
DSH	121.74
Total	2748.09

Step 7: Total payment for DRG 31 including day outlier payment.

Federal Payment Including Capital	$2,840.50
IME Adjustment	223.58
DSH Adjustment	142.03
Total Day Outlier Payment	2,748.09
Total	5,954.20

The following is an example of how the additional payment would be determined for a high cost outlier in FY 1988. Same facts as in the day outlier example with the exception that Mrs. Smith's length of stay was 16 days and she incurred total billed charges of $100,000.

Step 1: Computation of Hospital X's Standardized Costs (Includes Capital)

Billed charges—$100,000
National Ratio of cost to Charges[2]—.71
IME Ajustment Factor —07871
DSH Adjustment Factor—.05

$$\text{Standardized Cost} = \frac{\$100{,}000}{1 + (.07871 + .05)} \times .71 = \$62{,}903.67$$

Step 2: Determination of Cost Outlier Thresholds

Computation 1—(Based on Federal Rate) DRG 31 Federal rate excluding capital—$2830.34
DRG 31 Federal capital payment rate:
DRG 31 relative weight: .6550
Plant/fixed Equipment Federal Rate: $180.03
Construction Cost Index (San Francisco): 1.043
Movable Equipment Federal Rate: $122.39
Federal Capital Rate = (180.03 × 1.043 +122.39)×.6550=$203.16
Federal Rate including capital for threshold computation—$2830.34 + 203.16 = $3033.50
Federal Rate, doubled = 2 × $3033.50 = $6067.00

[2] This factor reflects the inclusion of capital costs and the exclusion of interest income on funded depreciation as described in the June 3, 1986 NPRM (51 FR 20029).

Computation 2—Based on Adjusted Standard Cost Outlier Threshold:
Standard Cost Outlier Threshold—$14,000
Labor-related share [3]—68.632%
San Francisco MSA wage index—1.4946
Nonlabor-related share, excluding capital [3]—23.628%
Nonlabor-related share, capital only [3]—
Plant/Fixed Equipment Share—5.761%
Movable Equipment Share—1.979%
Construction Cost Index (San Francisco)—1.043
Adjusted Cost Outlier Threshold including capital = (14,000 × .68632 × 1.4946) + (14,000 × .23628) + (14,000 x .05761 x 1.043) + (14,000 × .01979) = $18,787.03
Computation 1 result—$6,067.00
Computation 2 result—$18,787.03
Applicable cost outlier threshold—$18,787.03

Step 3: Calculation of Cost Outlier Payment

Outlier Cost—
$62,903.67 − 18,787.03 = $44,116.64
Capital portion of outlier cost
—Plant/Fixed Equipment:
$44,116.64 × .05761 = $2,541.56
Federal portion of Plant/Fixed Equipment Rate: 5%
Federal Plant/Fixed Equipment Portion of Outlier Cost:
$2,541.56 × .05 = $127.08
—Movable Equipment
$44,116.64 × .01979 = $873.07
Federal Portion of Movable Equipment Rate: 5%
Federal Movable Equipment Portion of Outlier Cost: $873.07 × .05 = $43.65
Outlier Cost Excluding Capital
$44,116.64 − (2,541.56 + 873.07) = $40,702.01
Marginal Cost factor—.60
Outlier payment—capital and noncapital portions
($127.08 + 43.65 + 40,702.01) × .60
= $24,523.64

Stept 4: Indirect medical education adjustment for cost outlier payment

Percent add-on for indirect medical education–7.871%
Indirect medical education cost outlier payment–$24,523.64 × .07871 = $1,930.26

Step 5: Disproportionate share hospital (DSH) adjustment for cost outlier payment

DSH percentage add-on–5%
DSH outlier payment
$24,523.64 × .05 = $1,226.18

[3] These market basket weights reflect updated 1986 market basket components, including capital, which are based on 1982 cost data as described in the June 3, 1986 proposed rule (51 FR 19985–19988).

Step 6: Total cost outlier payments

Regular	$24,523.64
Indirect Medical Education	1,930.26
Disproportionate Share	1,226.18
Total	27,680.08

Step 7: Total payment for DRG 31 including cost outlier payment

Federal Payment Including Capital	$2,840.50
IME Adjustment	223.58
DSH Adjustment	142.03
Total Cost Outlier Payment	27,680.08
Total	30,886.19

2. On page 33184, in the second column, in the eleventh line from the bottom of the page, the phrase "100 percent of its Federal rate" is corrected to read "50 percent of its hospital-specific costs and 50 percent of its Federal rate".

§ 412.65 [Corrected]

3. On page 33187, in the first column, in § 412.65(b), the date "*September 30, 1987*" in the title is corrected to read "*September 30, 1997*".

4. On page 33189, in the second column, paragraph (d) of § 412.92 is correctly revised to read as follows:

§ 412.92 Special treatment: Sole community hospitals.

* * * * *

(d) *Determining prospective payments for sole community hospitals.*

(1) *General rule.* For all cost reporting periods beginning on or after October 1, 1983, the prospective payment rates for sole community hospitals equal the sum total of the following payment rates:

(i) 75 percent of the hospital-specific base payment rate as determined under § 412.73;

(ii) 25 percent of the appropriate regional prospective payment rate as determined under Subpart D of this part; and

(iii) The capital payment as determined under § 412.67(f).

(2) *Adjustments to payments.* A sole community hospital may receive an adjustment to its payments to take into account a significant decrease in number of discharges or significant increase in inpatient operating costs, as described in paragraphs (e) and (f) of this section, respectively.

* * * * *

(Secs. 1102, 1122, 1871, and 1886 of the Social Security Act, as amended; 42 U.S.C 1302, 1320a–1, 1395hh, and 1395ww; 42 CFR 412.65 and 412.92)

[AA–320–87–4220]

Special Laws and Rules; Correction

AGENCY: Bureau of Land Management, Interior.

ACTION: Correction notice.

SUMMARY: The final rulemaking providing a restatement of procedures for the segregation and opening of public lands under 43 CFR Part 2090, Special Laws and Rules, that appeared on pages 12171 through 12178 of the **Federal Register** of April 15, 1987 (52 FR 12171), contained a typographical error in two citations that appeared on page 12178, column two. These citations are hereby corrected by replacing the citation "part 2470" in the two places it appears in § 2091.7–1(b)(1) (i) and (ii) with the citation "part 2740".

EFFECTIVE DATE: September 30, 1987.

Rights-of-Way, Principles and Procedures and Rights-of-Way Under the Mineral Leasing Act; Correction

AGENCY: Bureau of Land Management, Interior.

ACTION: Correction notice.

SUMMARY: Two final rulemakings amending the existing regulations on Rights-of-Way, Principles and Procedures—43 CFR Part 2800—and Rights-of-Way Under the Mineral Leasing Act—43 CFR Part 2880—were

VOL 52 ISS 189 SE 30 1987 UMI

published on pages 25802 through 25823 of the Federal Register of July 8, 1987 (52 FR 25802). Several errors were found in the final rulemakings and are corrected by this correction notice.

EFFECTIVE DATE: September 30, 1987.

FOR FURTHER INFORMATION CONTACT: Theodore Bingham, (202) 343–5441.

SUPPLEMENTARY INFORMATION: The corrections to the final rulemakings are as follows:

§ 2808.4 [Corrected]

1. On page 25810, column 1, § 2808.4(a)(1), the citation "§ 2802.2–2" is corrected to read "§ 2808.2–2".

2. On page 25810, column 2, § 2808.4(a)(1), the table is corrected by removing footnote 1 which reads "[1] Shall be included with costs determined under § 2802.3" because the footnote is no longer needed.

§ 2808.6 [Corrected]

3. On page 25811, column 1, § 2808.6(b), the citation "§ 2808.5(d)" is corrected to read "§ 2808.5(c)".

§ 2803.1–2 [Corrected]

4. On page 25818, column 3, § 2803.1–2(a), the third sentence thereof is corrected by removing the phrase "that the minimum rental under paragraph (c)(1) shall not be less than the annual payment required by the schedule for 1 acre; provided, further," because its retention in the final rulemaking was an oversight. The preamble to the final rulemaking discusses its removal.

5. On page 25819, column 3, § 2803.1–2(c)(3)(i), the phrase "under paragraph (c)(1)(v) of this section. And for non-linear right-of-way grants and temporary use permits (e.g., communications sites," is corrected to read "under paragraph (c)(1)(v) of this section, and for non-linear right-of-way grants and temporary use permits (e.g., communication sites,".

6. On page 25820, column 1, § 2803.1–2(c)(3)(i), in the last sentence thereof the phrase "communications sites," is corrected to read "communication sites,".

8. On page 25820, column 1, § 2803.1–2(d), the phrase "and such default for nonpayment default continues" is corrected to read "and such default for nonpayment continues".

James E. Cason,

Deputy Assistant Secretary of the Interior.

September 23, 1987.

BILLING CODE 4310–84–M

43 CFR Part 3160

[AA–630–07–4111–02]

Onshore Oil and Gas Operations; Final Rulemaking Changing a Form Number

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: A final rulemaking was published in the Federal Register on February 20, 1987 (52 FR 5384), which, among other things, corrected Operating Form numbers for several forms used by the Bureau of Land Management. That final rulemaking did not change the number for Operating Form "Form 9–331" to "Form 3160–5" in the Note at the beginning of 43 CFR Part 3160. The final rulemaking did, however, correct various provisions of 43 CFR Part 3160 to change "Form 9–331" to "Form 3160–5". This final rulemaking will amend the note at the beginning of 43 CFR Part 3160 to correct "Form 9–331" to "Form 3160–5".

EFFECTIVE DATE: September 30, 1987.

ADDRESS: Any inquiries or suggestions should be sent to: Director (630), Bureau of Land Management, Room 5647, Main Interior Bldg., 1800 C Street, NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Stephen Spector (202) 653–2147.

SUPPLEMENTARY INFORMATION: The change made by this final rulemaking is an administrative change designed to conform the Operating Form numbers in the Note at the beginning of 43 CFR Part 3160 with the changes in Operating Form Numbers already made in 43 CFR Part 3160. The amendment will have no impact other than clarification of the Operating Form numbers as they are set forth in the regulations. Therefore, this final rulemaking making this administrative change is being published as a final rulemaking, with no comment period, and is being made effective upon publication.

The principal author of this final rulemaking is Stephen Spector, Division of Fluid Mineral Operations, Bureau of Land Management, assisted by the staff of the Division of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

There are no information collection requirements in this final rulemaking requiring the approval of the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 43 CFR Part 3160

Government contracts, Indian lands—mineral resources, Mineral royalties, Oil and gas production, Public lands—mineral resources, Reporting and recordkeeping requirements.

Under the authority of the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359), the Act of March 3, 1909, as amended (25 U.S.C. 396), the Act of May 11, 1938, as amended (25 U.S.C. 396a–396q), the Act of February 28, 1891, as amended (25 U.S.C. 397), the Act of May 29, 1924 (25 U.S.C. 398), the Act of March 3, 1927 (25 U.S.C. 398a–398e), the Act of June 30, 1919, as amended (25 U.S.C. 399), the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701 et seq.), and the Indian Mineral Development Act of 1982 (25 U.S.C. 2102 et seq.) Part 3160, Group 3100, Subchapter C, Chapter II of Title 43 of the Code of Federal Regulations is amended as set forth below.

J. Steven Griles,

Assistant Secretary of the Interior.

September 25, 1987.

PART 3160—[AMENDED]

1. The authority citation for Part 3160 continues to read:

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359), the Act of March 3, 1909, as amended (25 U.S.C. 396), the Act of May 11, 1938, as amended (25 U.S.C. 396a–396q), the Act of February 28, 1891, as amended (25 U.S.C. 397), the Act of May 29, 1924 (25 U.S.C. 398), the Act of March 3, 1927 (25 U.S.C. 398a–398e), the Act of June 30, 1919, as amended (25 U.S.C. 399), R.S. 441 (43 U.S.C. 1457), see also Attorney General's Opinion of April 2, 1941 (40 Op. Atty. Gen. 41), the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471 et seq.), the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), the Act of December 12, 1980 (42 U.S.C. 6508), the Combined Hydrocarbon Leasing Act of 1981 (Pub. L. 97–78), the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701 et seq.), and the Indian Mineral

Development Act of 1982 (25 U.S.C. 2102 et seq.).

2. Note 1, *Operating Forms*, is amended as follows:

A. In the first column, the number "9–331" is removed and replaced with the number "3160–5"; and

B. In the third column, the number "1010–0002" is removed and replaced with the number "1004–0135".

BILLING CODE 4310–84–M

43 CFR Public Land Order 6658

[ID–943–07–4220–10; I–4966]

Withdrawal of Land for Roadless Recreation Area; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order withdraws 183.47 acres of National Forest land for 20 years in order to protect one of the few remaining stands of old-growth western red cedar as a roadless recreation area. This action will close the land to mining, but not to surface entry or mineral leasing.

EFFECTIVE DATE: September 30. 1987.

FOR FURTHER INFORMATION CONTACT: Larry Lievsay, BLM Idaho State Office, 3380 Americana Terrace, Boise, Idaho 83706, (208) 334–1735.

By virtue of the authority vested in the Secretary of the Interior, by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714 it is ordered as follows:

1. Subject to valid existing rights, the following-described National Forest lands, which are under jurisdiction of the Secretary of Agriculture, are hereby withdrawn from appropriation under the general mining laws, 30 U.S.C. Chapter 2, but not from leasing under the mineral leasing laws, for protection of the Settler's Grove of Ancient Cedars Roadless Recreation Area.

Boise Meridan, Idaho, Coeur d'Alene National Forest

Sec. 34, SW¼NW¼SW¼, NW¼SW¼ SW¼, S½ NW¼ NW¼SW¼.

The area described aggregates 183.47 acres in Shoshone County.

2. The withdrawal made by this order does not alter that applicability of those public land laws governing the use of the lands under lease, license, or permit, or governing the disposal of their nonlocatable mineral or vegetative resources.

3. This withdrawal with expire 20 years from the effective date of this order unless, as a result of the review conducted before the expiration date, pursuant, to section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

September 21, 1987.

J. Steven Griles,

Assistant Secretary of the Interior.

43 CFR Public Land Order 6659

[ES–960–07–4220–10; ES–11592]

Withdrawal of Public Land for Buffalo National River; Arkansas

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order withdraws 723.05 acres of public lands from surface entry and mining for the National Park Service for protection of Buffalo National River. The lands have been and will remain open to mineral leasing.

EFFECTIVE DATE: September 30, 1987.

FOR FURTHER INFORMATION CONTACT: Mary Weaver, BLM, Eastern States Office, 350 South Pickett Street, Alexandria, Virginia 22304, 703–274–0083.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public lands are hereby withdrawn from settlement, sale, location, or entry under the general land laws, including the United States mining laws (30 U.S.C. chapter 2), but not from leasing under the mineral leasing laws, and are reserved for use by the National Park Service as part of the Buffalo National River.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86–303; RM–5236]

Radio Broadcasting Services; Pleasant Hope, MO

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allocates Channel 238C2 to Pleasant Hope, Missouri, as that community's first broadcast service, in response to a petition filed by Charles Williams. A counterproposal to allot a higher class channel at Aurora, Missouri and a lower class channel at Pleasant Hope was denied. With this action, this proceeding is terminated.

DATES: Effective November 9, 1987; the window period for filing applications will open on November 10, 1987, and close on December 10, 1987.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 630

[Docket No. 70990-7190]

Atlantic Swordfish Fishery; Foreign Fishing

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: This rule corrects the effective dates of two sections of the foreign fishing regulations in subpart D, Part 611, and provisions of the Atlantic swordfish regulations, Part 630, to avoid their unintentional expiration at the end of this year.

EFFECTIVE DATE: September 30, 1987, except for § 611.61(b)(4); § 630.7(a) (5), (7), and (8), 630.21, and 630.23, which are removed and reserved effective January 1, 1988.

FOR FURTHER INFORMATION CONTACT: W. Perry Allen (Regulatory Coordinator), 813-893-3722.

SUPPLEMENTARY INFORMATION: The effective date section of the notice of the final rule (50 FR 33952, August 22, 1985) implementing the Fishery Management Plan for the Atlantic Swordfish Fishery (FMP) indicated that § 611.60(a)(3), § 611.61(b)(3), and all of Part 630 would expire December 31, 1987. This was an error. In approving the FMP, NOAA specified that only its provisions for seasonal closures (implemented by § 630.7(a) (5), (7), and (8), § 630.21, and § 630.23 of the regulations) would expire on December 31, 1987. This technical amendment removes the time limitation of December 31, 1987, from § 611.60(a)(3), § 611.61(b)(3), and the remaining sections of 50 CFR Part 630. This notice conforms the appropriate sections of 50 CFR Parts 611 and 630 with the original intent of the agency.

This correction will be reflected in the next printing of the Code of Federal Regulations.

It is noted that this action has no effect on the October 31, 1987, expiration date of § 630.5 (Reporting requirements). This is being addressed in a separate action.

Classification

The Assistant Administrator for Fisheries finds for good cause that because this rule only corrects an error and the change will have no substantive effect, it is unnecessary to seek prior public comment or to delay the effective date of this rule under 5 U.S.C. 553 (b) and (c). As no notice of proposed rulemaking is required, this rule is exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 603).

This rule merely corrects an error and therefore is not a major rule under Executive Order 12291. There will be no change in the impacts analyzed in the regulatory impact review prepared for the implementing regulations.

This rule does not contain a collection of information for purposes of the Paperwork Reduction Act (44 U.S.C. 3501).

(16 U.S.C. 1801 *et seq.*)

Dated: September 25, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR Parts 611 and 630 of the Code of Federal Regulations are amended as follows:

1. The authority citation for Parts 611 and 630 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

PART 611—FOREIGN FISHING

§§ 611.60 and 611.61 [Amended]

2. The effectiveness of § 611.60(a)(3) and § 611.61(b)(3) is extended indefinitely and on January 1, 1988, § 611.61(b)(4) is removed and reserved.

PART 630—ATLANTIC SWORDFISH FISHERY

§§ 630.5, 630.7, 630.21 and 630.23 [Amended]

3. The effectiveness of Part 630, except for §§ 630.5, 630.7(a)(5), (7), and (8), 630.21, and 630.23, is extended indefinitely.

§ 630.7 [Amended]

4. Effective January 1, 1988, § 630.7(a)(5), (7), and (8) are removed and reserved.

§§ 630.21 and 630.23 [Amended]

5. Effective January 1, 1988, §§ 630.21 and 630.23 are removed and reserved.

[FR Doc. 87-22532 Filed 9-29-87; 8:45 am]

BILLING CODE 3510-22-M

50 CFR Part 642

[Docket No. 70993-7193]

Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: NOAA issues this final rule to implement a technical amendment to the regulations for the Fishery Management Plan for Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic (FMP). This is a housekeeping rule which corrects two definitions, clarifies the participants in State/Federal agreements for data collection, corrects a reference in the prohibitions section, removes inappropriate and surplus wording, and clarifies the catch allowance for undersized Spanish mackerel. The intended effect is to clarify the regulations and conform them with current usage.

EFFECTIVE DATE: September 30, 1987.

FOR FURTHER INFORMATION CONTACT: W. Perry Allen (Regulatory Coordinator), 813-893-3722.

SUPPLEMENTARY INFORMATION: The mackerel fishery is managed under the FMP and its implementing regulations at 50 CFR Part 642.

This rule revises the definition of Authorized officer to remove obsolete language, corrects the telephone number of Center Director, clarifies that the U.S. Coast Guard is not a party to a State/Federal agreement for data collection, corrects a reference in one of the prohibitions, removes the term "allocation" where it is inappropriately inserted in connection with zone quotas, clarifies the catch allowance of undersized Spanish mackerel, replaces "FCZ" with "EEZ" where it was not changed in a previous amendment, and removes "State of" as surplus language before "Florida".

Other Matters

This technical amendment is taken under the authority of 50 CFR Part 642 and in compliance with Executive Order 12291. Because this action only makes minor corrections, in which the public is not particularly interested, the Assistant Administrator for Fisheries, NOAA, finds that it is unnecessary under 5 U.S.C. 553(b)(B) to provide for prior public comment on this rule and that there is good cause under 5 U.S.C. 553(d) not to delay for 30 days its effective date.

Because notice and a comment for this action are not required by 5 U.S.C. 553 or any other law, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act (5 U.S.C. 603) and none has been prepared.

This rules does not contain a collection of information requirements for purposes of the Paperwork Reduction Act (44 U.S.C. 3501).

This rule will have no effect on any person or any fishing practice; therefore no supplementary reports have been prepared.

List of Subjects in 50 CFR Part 642

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: September 25, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For reasons set forth in the preamble, 50 CFR Part 642 is amended as follows:

PART 642—COASTAL MIGRATORY PELAGIC RESOURCES OF THE GULF OF MEXICO AND SOUTH ATLANTIC

1. The authority citation for Part 642 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 642.2, introductory text, the word "shall" is removed; in the definition fot *Total length* the word "laying" is revised to read "lying"; and paragraph (b) under *Authorized officer* and the telephone number under *Center Director* are revised to read as follows:

§ 642.2 Definitions.

* * * * *

Authorized officer means;

* * * * *

(b) Any special agent of NMFS;

* * * * *

Center Director * * * telephone 305–361–4200 * * *

* * * * *

3. In § 642.3, paragraph (b) is revised to read as follows:

§ 642.3 Relation to other laws.

* * * * *

(b) Certain responsibilities relating to data collection and enforcement may be performed by authorized State personnel under a State/Federal agreement for data collection and a tripartite agreement among the State, the U.S. Coast Guard, and the Secretary for enforcement.

* * * * *

§ 642.7 [Amended]

4. In § 642.7(a)(9), the reference to paragraph "(h)" is removed and "(a)(8)" is added in its place.

§ 642.21 [Amended]

5. In § 642.21(a)(1)(i) and (ii), the word "allocation" is removed.

6. In § 642.23, paragraph (a)(2) is revised to read as follows:

§ 642.23 Size restrictions.

(a) * * *

(2) *Catch allowance.* A catch of Spanish mackerel under the minimum size limit is allowed equal to five percent by weight of the total catch of Spanish mackerel on board.

* * * * *

§ 642.26 [Amended]

7. In § 642.26, in paragraph (a)(1), introductory text, the latitude "27°0.6′ N." is revised to read "27°00.6′ N." and the words "the State of" before "Florida" are removed; in paragraph (a)(1)(ii), the initials "FCZ" are revised to read "EEZ" and the word "a" is added between "of" and "line"; in paragraphs (b) (1) and (2), (c)(3)(i) (B) and (E), and (c)(4), the words "State of" before "Florida" are removed; in paragraph (c)(4) the word "Chairman" is twice revised to read "Chairmen" and the word "Council" is revised to read "Councils"; and in Table 1, under Point 3 and Point 4, the latitude "27°0.6′ N." is revised to read "27°00.6′ N." and under Point 3 the longitude "80°2.6′ W." is revised to read "80°02.6′ W.".

[FR Doc. 87–22587 Filed 9–28–87; 9:01 am]

BILLING CODE 3510–22–M

VOL 52 ISS 189 SE 30 1987 UMI

Proposed Rules

Federal Register
Vol. 52, No. 189
Wednesday, September 30, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 1

Administrative Regulations; Privacy Act Regulations

AGENCY: Office of the Secretary, USDA.

ACTION: Proposed rule.

SUMMARY: Notice is hereby given that the Department of Agriculture (USDA) proposes to amend 7 CFR 1.123 by adding three systems of records to those exempted from certain sections of the Privacy Act of 1974 (5 U.S.C. 552a) pursuant to 5 U.S.C. 552a(k). The USDA also will amend the existing list of exempt systems it maintains to reflect changes in the numbering and names of those systems.

DATE: Comments must be received on or before October 30, 1987.

ADDRESS: Interested persons may submit written comments to: Kenneth E. Cohen, Assistant General Counsel, Research and Operations Division, Office of the General Counsel, United States Department of Agriculture, Washington, DC 20250, (202) 447–5565.

FOR FURTHER INFORMATION CONTACT: Paul E. Jordan, Office of the General Counsel, USDA, (202) 447–3564.

SUPPLEMENTARY INFORMATION: These amendments are necessary to provide for exemption of a Privacy Act system of records entitled "AMS Office of Compliance Review Cases, USDA/AMS–11" and for the exemption of two existing systems of records, "Administrative proceedings brought by the Department, court cases in which the Government is plaintiff and the court cases in which the Government is a defendant brought pursuant to the United States Warehouse Act, USDA/OGC–43" and "Investigations Undertaken by the Government Pursuant to the U.S. Grain Standards Act of 1976, as amended, or the Agricultural Marketing Act of 1946, as amended, USDA/FGIS–2." A separate notice regarding USDA/AMS–11 will be published in the **Federal Register**. This system will contain detailed information pertaining to cases in which the Agricultural Marketing Service (AMS) Office of Compliance is involved. The authority for maintenance of this system is found in the legislation listed in 7 CFR 2.50. The legislation enumerated in that section, authorizes AMS to be responsible for compliance activities pertaining to the various programs administered by AMS. System notices for USDA/OGC–43 and USDA/FGIS–2 already have been published, but they inadvertently were left off the list of exempt systems. USDA/OGC–43 contains information from investigations conducted pursuant to 7 U.S.C. 243, which authorizes both the investigation of storage, warehousing, weighing, classifying, and certification of agricultural products, and the inspections of warehouses. In accordance with 7 U.S.C. 71 et seq. and 7 U.S.C. 1621, et seq., USDA/FGIS–2 consists of investigatory material pertaining to alleged violations of the subject Acts. They, therefore, contain "investigatory material compiled for law enforcement purposes * * *" and may be exmpted from certain sections of the Privacy Act of 1974 pursuant to 5 U.S.C. 552a(k)(2). Amendments to the existing list of systems maintained by USDA are necessary to reflect changes made in the numbering of systems, the restructuring of some systems, and the transfer of a system. The system formerly entitled "Court cases brought by the Government pursuant to either the Naval Stores Act, the Honeybee Act, the Virus-Serum-Toxin Act or the Tobacco Seed and Plant Exportation Act, USDA/OGC–33" has been split into two systems: "Court cases brought by the Government pursuant to either the Naval Stores Act or the Tobacco Seed and Plant Exportation Act, USDA/OGC–29" and "Cases by and against the Department under the Virus-Serum-Toxin Act, USDA/OGC–44"; both of which are exempt from certain provisions of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2). A system formerly maintained by the Animal and Plant Health Inspection Service and entitled, "Meat and Poultry Inspection Program—Slaughter, Processing and Allied Industrial Compliance Records System, USDA/APHIS–1," has been transferred to the Food Safety and Inspection Service and is entitled "Meat and Poultry Inspection Program—Slaughter, Processing and Allied Industries Compliance Records System, USDA/FSIS–1."

This rule has been reviewed under the Secretary's Memorandum 1512–1 and Executive Order No. 12291 and has been determined not to be a "major rule" since it will not have an annual effect on the economy of $100 million or more.

In addition, it has been determined that these rules will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 7 CFR Part 1

Privacy.

For the reasons set out in the preamble, 7 CFR, Subtittle A, Part 1, Subpart G, § 1.123 of the Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 1, Subpart G, reads as follows:

Authority: 5 U.S.C. 552a.

2. Part 1, Subpart G—Privacy Act Regulations, § 1.123 is amended by revising the list of exempt systems to read as follows:

§ 1.123 Specific exemptions.

BILLING CODE 3410–01–M

Food and Nutrition Service

7 CFR Part 275

[Amdt. No. 296]

Food Stamp Program; Quality Control Arbitration Process Technical Amendment

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend Food Stamp Program regulations pertaining to the quality control arbitration process. It would limit the scope of arbitration to the issue or issues in dispute between the State agency and the Food and Nutrition Service (FNS) regional quality control findings. The intent of the proposed rule is to enhance efficiency of the quality control arbitration process.

DATE: Comments on this proposed rulemaking must be received on or before November 30, 1987 to be assured of consideration.

ADDRESS: Comments should be submitted to Joseph Pinto, Supervisor, Certification Policy and Quality Control Section, Eligibility and Monitoring Branch, Program Development Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, VA 22302. All written comments will be available for public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 am to 5:00 pm, Monday through Friday) at 3101 Park Center Drive, Alexandria, VA, Room 706.

FOR FURTHER INFORMATION CONTACT: Questions regarding this proposed rulemaking should be directed to Mr. Pinto at the above address or by telephone at (703) 756–3471.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291

This action has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1512–1. The Department has classified this action as nonmajor. The annual effect of this action on the economy will be less than $100 million. This action will have no effect on costs or prices. Competition, employment, investment, productivity, and innovation will remain unaffected. There will be no effect on the competition of United States-based

enterprises with foreign-based enterprises.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the Final rule related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983), this Program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

This action has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980, Pub. L. 96-354, 94 Stat. 1164 (1980). Anna Kondratas, Administrator of the Food and Nutrition Service, has certified that his action will not have a significant economic impact on a substantial number of small entities.

This action does not contain recordkeeping or reporting requirements subject to approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Background

Regulations issued on January 23, 1981, at 46 FR 7257, allowed State agencies to have quality control cases arbitrated when the State disputed the Federal review findings. Informally, procedures were developed at the regional and national levels to arbitrate disputes about case findings. Under these procedures, arbitration comprises review of the entire case and the arbitrator is responsible for evaluating the accuracy of the entire case.

In response to the proposed rulemaking on arbitration issued on March 21, 1986 (51 FR 9821), one State agency recommended that arbitration be limited to only the issues raised by the State agency in its request for arbitration. We have decided to consider this recommendaion and therefore are issuing this proposed rulemaking.

Limiting the review to the issues in dispute would be advantageous in several ways. It would save time and resources for both the State agencies and FNS as only arguments and material pertinent to the dispute would need to be submitted and reviewed by the arbitrator instead of the entire quality control case record. For example, if a State were contesting a sampling procedure or an implementation date which affected a large number of cases, each case affected by the decision would not have to be submitted for an individual decision. However, this proposed rule would not preclude the arbitrator from requesting portions of the quality control case record or the entire case record if necessary to properly evaluate the issue(s) under dispute. The proposed rule would eliminate determinations concerning undisputed aspects of the case. Under current arbitration procedures, the entire case record is submitted for each case and all aspects of the case are reviewed and evaluated separately. Under an issue-only review, only the issue(s) in dispute would be addressed.

Implementation

The Department proposes that this rulemaking become effective 30 days after publication as a final rule. State agencies may opt for either an entire case review or an issue only review for all cases for which an arbitration request was submitted before the effective date, provided that the arbitration decision has not already been made.

List of Subjects in 7 CFR Part 275

Administrative practice and procedures, Food Stamps, Reporting and recordkeeping requirements.

Accordingly, 7 CFR Part 275 is amended as follows:

1. The authority citation for Part 275 continues to read as follows:

Authority: (7 U.S.C. 2011-2029).

PART 275—PERFORMANCE REPORTING SYSTEM

2. Section 275.3 is amended by adding a sentence to the end of paragraph (c)(4). The sentence reads as follows:

§ 275.3 Federal monitoring.

* * * * *

(c) Validation of State Agency Error Rates. * * *

(4) *Arbitration.* * * * The arbitration review shall be limited to the point(s) within the Federal findings that the State agency disputes.

* * * * *

Date: September 27, 1987.

BILLING CODE 3410-30-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 245a

[INS Number: 1052-87]

Definitions of Felony and Misdemeanor

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: The Immigration and Naturalization Service is proposing to amend the definitions of the terms "felony" and "misdemeanor" that are set forth at 8 CFR 245a.1(o) and 8 CFR 245a.1(p), respectively. This proposal is being made to alleviate the effects that the application of the current definition is causing on certain otherwise eligible aliens who apply for temporary resident status under section 245A of the Immigration and Nationality Act.

DATES: Written comments must be submitted on or before October 30, 1987.

ADDRESS: Please submit comments, in triplicate, to Director, Policy, Directives and Instructions, Immigration and Naturalization Service, 425 I Street NW., Room 2011, Washington, DC 20536.

FOR FURTHER INFORMATION CONTACT:

For General Information: Director Policy, Directives and Instructions, Immigration and Naturalization Service, 425 I Street NW., Washington, DC 20536, Telephone: (202) 633-3291

For Specific Information: Francesco Isgro, Associate General Counsel, Immigration and Naturalization Service, 425 I Street NW., Washington, DC 20536, Telephone: (202) 633-2895

SUPPLEMENTARY INFORMATION: The Immigration Reform and Control Act of 1986 (IRCA) established a program whereby certain aliens who have been residing unlawfully in the United States since January 1, 1982, would be permitted to legalize their status. IRCA set forth a number of statutory criteria that an alien would have to meet in order to legalize his or her status. One of these criteria is that the alien must establish that he or she "has not been convicted of any felony or of three or more misdemeanors committed in the United States." 8 U.S.C. 1255a(a)(4)(B). After a notice and comment period the Immigration and Naturalization Service (Service) promulgated final regulations implementing the legalization program and defining the terms "felony" and

"misdemeanor" for purposes of the eligibility criteria under the legalization program. See 52 Federal Register 16205–16216 (May 1, 1987).

The term "felony" has been defined as "a crime committed in the United States, punishable by imprisonment for a term of more than one year, regardless of the term such alien actually served, if any." 8 CFR 245a.1(p). The term "misdemeanor" has been defined as "a crime committed in the United States punishable by imprisonment for a term of one year or less but more than five days, regardless of the term such alien actually served, if any." 8 CFR 245a.1(o).

Since May 5, 1987, aliens have had the opportunity to apply for temporary resident status under the legalization program. The Service has also had an opportunity to review the effects of the regulations implementing this provision. To determine whether an alien has been convicted of a "felony" or "misdemeanor" the Service looks at the maximum term of imprisonment provided in that particular criminal statute. If the statute provides a term of imprisonment of more than one year, an alien convicted under that statute would be ineligible for legalization regardless of the sentence imposed. The Service has determined that certain States' criminal statutes provide possible terms of imprisonment for more than one year for certain offenses, while other States provide possible terms of imprisonment for less than one year for the same offenses. Thus, aliens who would be eligible for legalization, had they been convicted in one State of a particular offense, would be ineligible if they were convicted in another State for the same offense.

Accordingly, consistent with the spirit of the legalization program and in order to uniformly treat aliens who apply for legalization, the Service is proposing an exception to the definition of "felony". That exception will provide that in the case of an alien who is convicted under a state law that defines the offense as a "misdemeanor" *and* the sentence imposed is less than one year, the crime shall be treated as a misdemeanor for purposes of legalization. The definition of "misdemeanor" is also amended to include crimes that are treated as misdemeanors under the exception to the definition of felony.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule would not, if promulgated, have a significant impact on a substantial number of small entities.

This rule is not a major rule within the meaning of section 1(b) of E.O. 12291.

List of Subjects in 8 CFR Part 245a

Aliens, Temporary resident status and Permanent resident status.

PART 245a—[AMENDED]

1. Authority citation for Part 245a continues to read as follows:

Authority: Pub. L. 99–603, 100 Stat. 3359; 8 U.S.C. 1101 note.

2. In § 245a.1, paragraphs (o) and (p) are revised to read as follows:

§ 245a.1 Definitions.

* * * * *

(o) "Misdemeanor" means a crime committed in the United States, either (1) punishable by imprisonment for a term of one year or less but more than five days, regardless of the term such alien actually served, if any, or (2) a crime treated as a misdemeanor under 8 CFR 245a.1(p).

(p) "Felony" means a crime committed in the United States, punishable by imprisonment for a term of more than one year, regardless of the term such alien actually served, if any, except: when the State law on which the conviction is based is defined as a misdemeanor and the sentence imposed is less than one year. Under this exception, for purposes of 8 CFR Part 245a, the crime shall be treated as a misdemeanor.

* * * * *

Dated: September 8, 1987.

Alan C. Nelson,

Commissioner, Immigration and Naturalization Service.

BILLING CODE 4410–10–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

High-Level Waste Licensing Support System Advisory Committee (Negotiated Rulemaking); Second Meeting

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of second meeting.

SUMMARY: The Nuclear Regulatory Commission will hold the second meeting of the High-Level Waste Licensing Support System Advisory Committee on October 15–16, 1987. The committee, established under authority of the Federal Advisory Committee Act (FACA), is tasked with developing recommendations for revision of the Commission's Rules of Practice in 10 CFR Part 2 related to the adjudicatory proceeding for the issuance of a license for a geologic repository for the disposal of high-level waste (HLW). The Committee is attempting to negotiate a consensus on proposed revisions related to the submission and management of records and documents for the HLW licensing proceeding.

DATE: The second meeting of the HLW Licensing Support System Advisory Committee will be held October 15–16, 1987, beginning at 9:30 a.m.

ADDRESS: The location of the October 15–16, 1987 meeting of the HLW Licensing Support System Advisory Committee is the Crystal City Marriott, 1999 Jefferson Davis Highway, Arlington, VA.

FOR FURTHER INFORMATION CONTACT: Donnie H. Grimsley, Director, Division of Rules and Records, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: 301–492–7211.

SUPPLEMENTARY INFORMATION: The second meeting of the HLW Licensing Support System Advisory Committee ("negotiating committee") is scheduled to include: (1) A review of the legal and technical aspects of this rulemaking on the HLW licensing support systerm, (2) training on the principles of negotiation, and (3) the establishment of the agenda for the third meeting of the negotiating committee.

Dated at Washington, DC, this 28th day of September 1987.

For the Nuclear Regulatory Commission.

Donnie H. Grimsley,

Director, Division of Rules and Records, Office of Administration and Resources Management.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–NM–124–AD]

Airworthiness Directives: British Aerospace BAe 125 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes an airworthiness directive (AD), applicable to certain Model BAe 125 series

VOL 52 ISS 189 SEP 30 1987 UMI

airplanes, that would require relocation of the 115V. AC stall vane heater power circuit breakers, and modification of the electronic flight instrument system power supply cables. This action is prompted by a report of cable chafing that resulted in the lose of certain flight instruments, the engine fuel computer, and the windscreen alternator. This condition, if not corrected, could result in the loss of critical flight instruments during flight.

DATES: Comments must be received no later than October 30, 1987.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-124-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from British Aerospace, Inc., Librarian for Service Bulletins, P.O .Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM-113; telephone (206) 431-1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All comunications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rule Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-124-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The United Kingdom Civil Aviation Authority (CAA) has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of an inservice incident involving cable chafing that resulted in the loss of both electronic flight instrument systems, the engine 1 and 2 fuel computer, the number 2 air data system, and the number 1 windscreen alternator on a British Aerospace Model BAe 125 airplane.

British Aerospace (BAe) issued Service Bulletin 24-259-(3171B), dated November 1986, which described relocation of the 115V. AC stall vane heater power circuit breakers and provides modification of the electronic flight instrument power supply cables by transposing certain circuit breakers and introducing separaters. The CAA has classified the service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require the relocation of the stall vane heater power circuit breakters, and modification of the power supply cables for the electronic flight instrument systems, in accordance with the service bulletin previously mentioned.

It is estimated that 65 airplanes of U.S. registry would be affected by this AD, that it would take approximately 12 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $31,200.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulations which is not major under Executive Order 12291 and (2) is not significant rule pursuant to the Department of Transportation Regulatory Polices and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($480). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to Model BAe 125 800A and 800 B series airplanes listed in British Aerospace BAe 125 Service Bulletin 24-259-(3171B), dated November 1986, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent loss of critical flight instruments, accomplish the following:

A. Within the next three months after the effective date of this AD, relocate the 15V. AC stall vane heater power circuit breakers, and modify power supply cable runs for the electronic flight instrument systems, in accordance with the accomplishment instructions of British Aerospace BAe 125 Service Bulletin 24-259-(3171B), dated November 1986.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have already received the appropriate service documents from the manufacturer may obtain copies upon request to British Aerospace, Inc.,

Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on September 16, 1987.

Frederick M. Isaac,

Acting Director Northwest Mountain Region.

[FR Doc. 87-22467 Filed 9-29-87; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 87-ASO-12]

Proposed Control Zone and Extension to Transition Area for Mackall Army Airfield, NC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate a control zone to encompass airspace surrounding Mackall Army Airfield near Fort Bragg, North Carolina, and amend the existing transition area with an extension needed to contain an instrument approach procedure. This action will allow positive control of aircraft operations in the vicinity of the airport during instrument meteorological conditions. Airspace affected by designation of the control zone extends upward from the surface of the ground within a five-mile radius of the airport, with an extension needed to contain IFR arrival and departure operations. Airspace affected by amending the transition area extends upward from 700 feet above the surface from the existing 6.5-mile radius of Mackall AAF and three miles either side of the 295° bearing from the Mackall RBN to 9.5 miles northwest of the RBN. The control zone is planned to be effective on a part-time basis as military requirements dictate.

DATE: Comments must be received on or before October 26, 1987.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, ASO-530, Manager, Airspace and Procedures Branch, Docket No. 87-ASO-12, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Mel Brock, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-ASO-12." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.171 and § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a control zone to encompass airspace surrounding Mackall Army Airfield, North Carolina, and amend the existing transition area for an instrument approach procedure. These actions will allow for positive control of aircraft operations in the vicinity of the airport during instrument meteorological conditions and enhance aviation safety in that area. Those sections of Part 71 of the Federal Aviation Regulations were republished in FAA Order 7400.6C dated January 2, 1987.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zone, Transition area.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Mackall AAF, NC [New]

Within a five-mile radius of Mackall AAF (lat. 35°02'13" N., long. 79°29'54" W.); within three miles each side of the 295° bearing from the Mackall RBN, extending from the five-miles radius zone to 8.5 miles northwest of the RBN. This control zone is effective during the specific days and time established in advance by a Notice to Airmen. The effective

VOL 52 ISS 189 SEP 30 1987 UMI

days will thereafter be continuously published in the Airport/Facility Director.

§ 71.181 [Amended]

3. Section 71.181 is amended as follows:

Mackall AAF, NC [Revised]

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Mackall AAF (lat. 35°02'13" N., long. 79°29'54" W.); within 3 miles each side of the 295° bearing from the Mackall RBN, extending from the 6.5-mile radius to 9.5 miles northwest of the RBN; excluding that portion that coincides with the Southern Pines, NC, transition area.

Issued in East Point, Georgia, on September 15, 1987.

William D. Wood,

Acting Manager, Air Traffic Division, Southern Region.

14 CFR Part 71

[Airspace Docket No. 87-ASW-32]

Proposed Amendment of Control Zone; Altus, OK and Proposed Amendment of Transition Area; Hobart, OK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the existing control zone at Altus, OK, and amend the existing transition area at Hobart, OK. This action is necessary since there are two new standard instrument approach procedures (SIAP) developed for the Altus Municipal Airport, Altus, OK. The intended effect of this proposed multiple action is to provide additional controlled airspace for aircraft executing the new SIAP's to the Altus Municipal Airport.

DATES: Comments must be received on or before November 19, 1987.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 87-ASW-32, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530; telephone: (817) 624-5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-ASW-32." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received.

All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to §§ 71.171 and 71.181 of the Federal Aviation Regulations (14 CFR Part 71) to amend the control zone at Altus, OK, and, simultaneously with this action, amend the transition area at Hobart, OK. This multiple action is necessary in order to provide additional controlled airspace for aircraft executing two new SIAP's to the Altus Municipal Airport, Altus, OK. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Altus, OK [Amended]

By deleting the words, "excluding that airspace within a 1½ mile radius of the Altus, OK, Municipal Airport (lat. 34°41'57"N., long. 99°20'21"W.); and substituting the words, "and within a 5-mile radius of the Altus Municipal Airport (lat. 34°42'00"N., long. 99°20'00" W.)."

§ 71.181 [Amended]

3. Section 71.181 is amended as follows:

Hobart, OK [Amended]

By deleting the words, "within an 8-mile radius of the Altus AFB;" and substituting the words, "within an 11-mile radius of the Altus AFB."

Issued in Fort Worth, TX on September 19, 1987.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[FR Doc. 87-22577 Filed 9-29-87; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 87-ASW-31]

Proposed Removal of Transition Area; Crockett, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to remove the transition area at Crockett, TX. The intended effect of this proposed action is to release controlled airspace established for a standard instrument approach procedure (SIAP) to the Houston County Airport, Crockett, TX. This action is necessary since the SIAP has been canceled. Coincident with this action, the airport status will change from instrument flight rules (IFR) to visual flight rules (VFR).

DATES: Comments must be received on or before November 19, 1987.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 87-ASW-31, Department of Transportation, Federal Aviation Administration, Forth Worth, TX 76193-0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Forth Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Forth Worth, TX 76193-0530; telephone: (817) 624-5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and engergy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-ASW-31." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Forth Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The proposal

The FAA is considering an amendment to Section 71.181 of the Federal Aviation Regulations (14 CFR Part 71) to remove the transition area at Crockett. TX. This action is necessary based on the fact that the SIAP to the Houston County Airport has been canceled. The SIAP was based on a nondirectional radio beacon (NDB) located at the Houston County Airport. The NDB has been removed, therefore requiring the cancellation of the SIAP and the associated 700-foot transition area. Coincident with this action, the Houston County Airport status will change from IFR to VFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures 87-(44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Transition areas

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Crockett, TX [Removed]

Issued in Fort Worth, TX, on September 19, 1987.

Larry L. Craig

Manager, Air Traffic Division, Southwest Region.

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis

15 CFR Part 801

[Docket No. 70865-7165]

U.S. Trade in Services; Revisions in reporting requirements for the BE-47, BE-48, and BE-93 Surveys of Services Transactions with Foreign Persons

AGENCY: Bureau of Economic Analysis, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice sets forth proposed rules to change the titles and reporting requirements for three annual surveys of U.S. services transactions with foreign persons, conducted by the Bureau of Economic Analysis (BEA).

VOL
52
ISS
189
SE
30
1987
UMI

U.S. Department of Commerce. The three surveys are the BE–47 (on construction, engineering, architectural, and mining services), the BE–48 (on insurance), and the BE–93 (on royalties, license fees, and other receipts and payments for intangible rights). These surveys are mandatory and are conducted pursuant to the International Investment and Trade in Services Survey Act.

The proposed rules will amend 15 CFR Part 801, as published in the **Federal Register** on March 6, 1986. They implement changes in the three surveys that were proposed for them when they were to have been included in the original draft of BEA's new BE–20, Benchmark Survey of Selected Services Transactions with Unaffiliated Foreign Persons. That draft, which was to cover 1985, was disapproved by the Office of Management and Budget (OMB). In preparing the revised version, which was approved and covers 1986, it was decided to keep these three surveys separate, but to revise them along the lines proposed in the BE–20.

DATE: Comments on the proposed rules will recive consideration if submitted in writing on or before November 16, 1987.

ADDRESS: Comments may be mailed to the Office of the Chief, International Investment Division (BE–50), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or hand delivered to Room 607, Tower Building, 1401K Street, NW., Washington, DC 20005. Comments received will be available for public inspection in Room 607, Tower Building, between 8:00 a.m. and 4:00 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Betty L. Barker, Acting Chief, International Investment Division (BE–50), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; phone (202) 523–0659.

SUPPLEMENTARY INFORMATION: These proposed rules will change the titles and reporting requirements for the BE–47, BE–48, and BE–93 surveys of U.S. services transactions with foreign persons, in order to implement changes in them that were proposed when they were to have been included in the original draft of the new BE–20, Benchmark Survey of Selected Services Transactions with Unaffiliated Foreign Persons. That draft was disapproved by OMB in October 1985. Following the disapproval, a task force composed of members of the Business Council on the Reduction of Paperwork (formerly The Business Advisory Council on Federal Reports) agreed that the BE–47, –48, and –93 surveys should remain separate forms. Thus, they were omitted from the BE–20 for 1986 as finally approved by OMB and will be kept separate from the annual follow-on survey to the BE–20 planned for subsequent years.

It was, however, understood that, despite being kept separate, the BE–47, –48, and –93 would be revised to incorporate many of the changes proposed earlier in the BE–20. This proposed rulemaking is intended to implement these changes. It should be noted that the proposed rules will *not* change the exemption levels for the three surveys. However, because of changes in some of the information to be reported, the exemption levels may be applied to additional items.

The title of the BE–47 has been changed to "Annual Survey of Construction, Engineering, Architectural, and Mining Services Provided by U.S. Firms to Unaffiliated Foreign Persons." (The former title was "Foreign Contract Operations of U.S. Construction, Engineering, Architectural, and Related Consulting and Technical Services Firms.") The addition of "mining services" in the Title Clarifies that such services are covered by the form. (They were covered previously as well, but the title did not so indicate.) The deletion of "related consulting and technical services" in the title is intended to avoid erroneous inclusion of all consulting and technical services on this form. Consulting and technical services are to be included on the BE–47 only if they are integral parts of a reportable construction, engineering, architectural, or mining services project; if they are not integral parts of such projects, they are to be reported in the BE–20 benchmark (or its planned annual follow-on) survey instead.

The revised description of "Who must report" in the BE–47 survey is primarily for clearification purposes; no substantive changes are intended.

The current $1,000,000 exemption level for the BE–47 survey would be applied, under these proposed rules, to a new item being added to the form. Thus, it would be applied, not only to gross operating revenues, as at present, but also to the new item, gross value of new contracts received.

These proposed rules would change the title of the BE–48 survey to "Annual Survey of Reinsurance and Other Insurance Transactions by U.S. Insurance Companies With Foreign Persons." (Its former title was "Reinsurance Transactions With Insurance Companies Resident Abroad.") The change in title reflects an expansion in survey coverage. Formerly, the BE–48 covered only reinsurance transactions with foreign persons (whether affiliated or unaffiliated). As proposed, it will also cover sales of insurance by primary insurers directly to foreign persons and losses paid on such insurance. The rules on "Who must report" are being revised to indicated that sales of primary insurance will now be reportable. Also, as proposed, the current $1,000,000 exemption level for the form will now apply to primary insurance premiums received and primary insurance losses paid, as well as to reinsurance premiums received, premiums paid, losses paid, and losses recovered. It should be noted that only sales of direct insurance are to be covered; purchases of such insurance are reportable on the BE–20 benchmark (or its planned annual follow-on) survey.

The proposed rules would change the title of the BE–93 survey to "Annual Survey of Royalties, License Fees, and Other Receipts and Payments for Intangible Rights Between U.S. and Unaffiliated Foreign Persons." (The former title was "international Transactions in Royalities, Licensing Fees, Film Rentals, Management Fees, Etc., With Unaffiliated Foreign Residents.") The proposed change in title, and also in the reporting requirements for this survey, mainly reflect the exclusion of management and administrative fees from the form; such fees are now covered on the BE–20 benchmark (0r its planned annual follow-in) survey. Also, on the form itself, a disaggregation by type of intangible right has been added; this disaggregation, however, does not require a rule change to implement.

Executive Order 12291

BEA has determined that this proposed rule is not "major" as defined in E.O. 12291 because it is not likely to result in:

(1) An annual effect on the economy of $100.0 million or more;

(2) A major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competion, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

This proposed rule contains collection of information requirements subject to the Paperwork Reduction Act. The Existing BE–47 and BE–48 surveys have been approved by OMB for use through December 31, 1988 (OMB Nos. 0608–0015

and 0608–0016, respectively), and the BE–93 survey has been approved for use through November 30, 1987 (OMB No. 0608–0017). The paperwork to revise these surveys to conform them more closely in concept and definition to the BE–20 benchmark survey, and to incorporate changes planned for them when they were previously to be included in that survey, has been submitted to OMB. Comments regarding the collection of information requirements may be directed to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for the Bureau of Economic Analysis, Washington, DC 20503.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to preparation of an initial regulatory flexibility analysis are not applicable to this proposed rulemaking because it will not have a significant economic impact on a substantial number of small entities. The exemption levels of $1,000,000 for the BE–47 and BE–48 surveys and $500,000 for the BE–93 survey, below which reporting of foreign transactions of the types covered is not required, exclude small businesses from being reported.

Accordingly, the General Counsel, Department of Commerce, has certified to the Chief Counsel for Advocacy, Small Businesses Administration, under provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that the proposed rules will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 15 CFR Part 801

Economic statistics, Foreign trade, Reporting and recordkeeping requirements, Services.

Allan H. Young,

Director, Bureau of Economic Analysis.

For the reasons set forth in the preamble, 15 CFR Part 801 is amended as follows:

PART 801—[AMENDED]

1. The authority citation for 15 CFR Part 801 continues to read as follows:

Authority: 5 U.S.C. 301, 22 U.S.C. 3101–3108, and E.O. 11961, as amended.

2. Sections 801.9(b) (3), (4), and (5) are revised to read as follows:

§ 801.9 Reports required.

* * * * *

(b) * * *

(3) BE–47, Annual Survey of Construction, Engineering, Architectural, and Mining Services Provided by U.S. Firms to Unaffiliated Foreign Persons:

(i) *Who must report.* Form BE–47 must be filed by each U.S. person (other than U.S. Government agencies) providing the following types of services of a contract, fee, or similar basis to unaffiliated persons on foreign projects: the services of general contractors in the fields of building construction and heavy constuction; construction work by special trade contractors, such as the erection of structural steel for bridges and buildings and on-site electrical work; services of a professional nature in the fields of engineering, architecture, and land surveying; and mining services in the development and operation of mineral properties, including oil and gas field services.

(ii) *Exemption.* Any U.S. person otherwise required to report is exempted from reporting if, for all countries and all projects combined, the gross value of new contracts received and gross operating revenues are both less than $1,000,000. If *either* the gross value of new contracts received or gross operating revenues is $1,000,000 or more, than a report is required.

(4) BE–48, Annual Survey of Reinsurance and other Insurance Transactions by U.S. Insurance Companies with Foreign Persons:

(i) *Who must report.* Reports on Form BE–48 are required from U.S. persons who have engaged in reinsurance transactions with foreign persons, or who have received premiums from, or paid losses to, foreign persons in the capacity of primary insurers.

(ii) *Exemption.* A U.S. person otherwise required to report is exempted from reporting if, with respect to transactions with foreign persons, each of the following six items was less than $1,000,000 in the reporting period: reinsurance permiums received, reinsurance premiums paid, reinsurance losses paid, reinsurance losses recovered, primary insurance premiums received, and primary insurance losses paid. If *any* one of these items is $1,000,000 or more in the reporting period, a report must be filed.

(5) BE–93, Annual Survey of Royalties, License Fees, and Other Receipts and Payments for Intangible Rights Between U.S. and Unaffiliated Foreign Persons:

(i) *Who must report.* Reports on Form BE–93 are required from U.S. persons who have entered into agreements with unaffiliated foreign persons to buy, sell, or use intangible assets or proprietary rights, excluding those copyrights and other intellectual property rights that are related to computer software, and excluding oil royalties and other natural resources (mining) royalties.

(ii) *Exemption.* A U.S. person otherwise required to report is exempt if total receipts and total payments of the types covered by the form are each less than $500,000 in reporting year. If the total of *either* covered receipts or payments is $500,000 or more in the reporting year, a report must be filed.

* * * * *

BILLING CODE 3510–06–M

NATIONAL LABOR RELATIONS BOARD

29 CFR Part 103

Collective-Bargaining Units in the Health Care Industry

AGENCY: National Labor Relations Board.

ACTION: Proposed rule; notice of extension of time for filing comments upon completion of hearing; notice of change of hearing location.

SUMMARY: The National Labor Relations Board gives notice that it is extending the time for filing comments on the proposed rulemaking for collective-bargaining units in the health care industry from October 30, 1987, to November 20, 1987, to allow sufficient time following the conclusion of the added October 7 hearing for interested parties to obtain and review the transcripts of the final hearing in order to prepare their comments. Additionally, the location for the hearing commencing October 7, 1987, has been changed, as indicated below.

DATES: The comment period which presently ends at the close of business on October 30,1987, has been extended to the close of business on November 20, 1987.

ADDRESSES: Comments should still be submitted to the Executive Secretary as set forth in 52 FR 25142, July 2, 1987. The hearing scheduled to commence October 7, 1987, at 9 a.m. has been relocated from the Board's Hearing Room to the Ceremonial Courtroom at the United States District Court for the District of Columbia, Sixth Floor, 3rd Street and Constitution Avenue, NW., Washington, DC 20001.

FOR FURTHER INFORMATION CONTACT: Curtis A. Wells, Associate Executive Secretary, Telephone (202) 254–2430.

SUPPLEMENTARY INFORMATION:

Background

The Board's notice of proposed rulemaking and original notice of hearing was published in the **Federal Register** (52 FR 25142) on July 2, 1987.

That notice provided for three hearings: on August 17, 1987, in Washington, DC; on August 31, 1987, in Chicago, Illinois; and on September 14, 1987, in San Francisco, California. The notice also provided that the period for comment ended at the close of business on October 30, 1987.

Thereafter, in response to requests by large numbers of organizations and individuals who wished to testify, the Board added a fourth hearing date, October 7, 1987, in Washington, DC. The Board published notice of the additional hearing in the **Federal Register** (52 FR 29038) on August 5, 1987. That notice stated that the comment right period still ended at the close of business on October 30, 1987.

Subsequently, a number of participants in the hearings contacted the Board to request an extension of time for the comment period, noting that while there were approximately 6 weeks between the conclusion of the originally scheduled hearings on September 18, 1987, and the end of the comment period on October 30, 1987, permitting sufficient time for interested parties to obtain and review the hearing transcripts in preparation of their comments to the Board, the addition of the second Washington, DC hearing scheduled to begin October 7, and expected to end about October 15, 1987, narrowed the review time to approximately 2 weeks until the comment period ended.

It will take approximately 10 days following the close of the October 7 hearings for transcripts to be available for review—approximately October 25. Since under the present schedule, interested parties might have to prepare comments without benefit of the transcripts in the October hearing, and this would reduce the value of the comments of interested parties to the Board regarding its proposed rulemaking, the Board has decided to extend the period for making comments until the close of business on November 20, 1987.

Furthermore, the hearing scheduled to commence October 7, 1987, has been moved to a larger facility, the Ceremonial Courtoom at the United States District Court for the District of Columbia at the address noted above.

Dated, Washington, DC, September 25, 1987.

By direction of the Board.

National Labor Relations Board.

John C. Truesdale,

Executive Secretary.

[FR Doc. 87-22515 Filed 9-29-87; 8:45 am]

BILLING CODE 7545-01-M

POSTAL SERVICE

39 CFR Part 601

Establishment of the Procurement Manual To Replace the Postal Contracting Manual

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: The Postal Service has determined to simplify and modernize its procurement procedures, with greater emphasis on business objectives. For that purpose it has prepared a complete replacement of the Postal Contracting Manual (PCM) in the form of a revised, renumbered, and renamed Procurement Manual. The new Manual emphasizes significant policies and processes, rather than detailed procedures, and is intended to be less complex and easier to use. It follows established commercial procedures wherever possible, to the extent consistent with the Postal Service's mission and statutory requirements. It provides greater discretion to contracting officers and Postal Service officials to exercise business judgment in the many decisions that must be made in the course of a procurement. Specific important differences between the PCM and the new Procurement Manual are described in the Supplementary Information, below.

DATE: Comments must be received on or before November 30, 1987.

ADDRESS: Request for copies of the new Procurement Manual and written comments should be mailed or delivered to the Assistant Postmaster General, Procurement and Supply Department, U.S. Postal Service, 475 L'Enfant Plaza West SW., Washington, DC 20260-6200. Copies of all written comments will be available for inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in Room 4137, at the above address.

FOR FURTHER INFORMATION CONTACT: Eugene A. Keller, (202) 268-4632.

SUPPLEMENTARY INFORMATION:

Background

The general legislation upon which much civilian federal procurement procedure is based, the Federal Property and Administrative Services Act of 1949, does not govern or affect the authority of the Postal Service (see 40 U.S.C. 474(15), 39 U.S.C. 410). Nevertheless, the PCM, which was issued in January 1972, was based in large part upon the Federal Procurement Regulations issued pursuant to the Federal Property and Administrative Services Act, as they existed in 1971. The new Procurement Manual is an attempt at simplification and modernization of postal procedures along more businesslike lines.

Specific Differences Between the PCM and the Procurement Manual

The following is a list of the most important specific differences between the existing PCM and the new Procurement Manual.

1. The Procurement Manual establishes a single method for competitive purchasing, involving a form of negotiated procurement. Award may be made based on initial proposals received, or on the basis of revised proposals following negotiations. Whenever price or price-related factors are the most important or the only evaluation criteria, award will normally be made without negotiations by acceptance of the most advantageous proposal. Proposals must be evaluated in accordance with a pre-established source selection plan whenever price or price-related factors will not be the sole basis for evaluation and award.

2. The Procurement Manual establishes a new policy of advance procurement planning, a policy not covered in the PCM. Effective procurement planning should result in shorter lead times, efficient utilization of personnel resources, competition among qualified suppliers, and assurance that the supplies or services obtained will meet requirements.

3. The Procurement Manual establishes a policy to obtain adequate competition from qualified sources, rather than maximum competition. It gives contracting officers the authority to restrict competition to products and contractors of proven quality and reliability through prequalification procedures. The ability to restrict competition to approved sources or prequalified contractors will reduce procurement lead time, since source selection can be made on the basis of price proposals without having to investigate contractor qualifications before award. It will also permit relaxation of contract administration requirements for quality assurance and inspection.

4. It raises the threshold for synopsizing solicitations in the Commerce Business Daily to $50,000, and limits synopses to competitive procurements, reducing paperwork and procurement lead time.

5. The Procurement Manual establishes a system of national and regional contracts and agreements for ordering supplies and services, reducing admininstrative effort and resulting in lower prices.

6. Policy on late proposals and proposal modifications has been simplified, consistent with the Manual's scheme of negotiated procurement. As long as award has not been made, a late proposal or modification may be considered when the contracting officer determines that doing so is in the Postal Service's interest. Guidance is given on when it is normally in the Postal Service's interest to consider a late proposal.

7. The general ceiling for use of simplified procedures is set at $50,000, up from the current $25,000 ceiling for informal purchases. Higher dollar ceilings may be established for individual purchases or categories of supplies or services considered suitable for purchase using simplified procedures.

8. Instead of the 20-page discussion of allowable costs in the PCM, the new manual has a 4-page exposition of cost categories that are unallowable. Otherwise, cost allowability is left to the contracting officer's business judgment, subject to the normal tests of reasonableness and allocability. For contracts with educational institutions, nonprofit organizations, and state and local governments, it adopts the cost principles contained in Office of Management and Budget Circulars.

9. The Procurement Manual emphasizes price analysis—rather than detailed cost analysis—in determining fair and reasonable prices. Cost and pricing data are to be obtained only to the extent necessary to ensure price reasonableness. Normally, cost analysis is to be used only when there is not adequate price competition and no method of price analysis will ensure a fair and reasonable price. When necessary, the contracting officer may use cost analysis in addition to price analysis, but may never replace market pricing with cost analysis. The requirement for certification of cost or pricing data has been eliminated. The submission of cost or pricing data that is relied on by the Postal Service is sufficient to trigger the defective pricing clause. The emphasis on price analysis over cost analysis will reduce burdensome requirements on contractors for submission of detailed cost data. It will also reduce the cost analysis burden on the Postal Service side, as well as shorten procurement lead time. Market-oriented price analysis will in most cases ensure fair and reasonable prices, and will guard against irrational results on contracts priced using cost analysis alone.

Effect on Implementation of Statutory Policies

The Postal Service as a matter of policy has adopted procedures to comply voluntarily with a number of procurement statutes not otherwise applicable to it. Except to the extent noted above, the Manual continues in effect that voluntary compliance. The Manual does not, of course, have any effect on the applicability of procurement-related statutes which have been made applicable to the Postal Service.

Description of the Contents of the Procurement Manual

The Procurement Manual contains twelve chapters and six appendices, as follows:

1. Chapter 1—Authority, Responsibility, and Policy

Chapter 1 covers general procurement policies, including the delegation of procurement authority and responsibility. It describes the procedures for issuing and changing the Procurement Manual, and for obtaining approval of deviations. It contains a section defining important words and terms used in the manual, and sets forth policies on such matters as competition, contracts with Postal Service employees, release and exchange of information, protection of individual privacy, conflicts of interest, standards of conduct, and contingent fees. It prescribes a numbering system for all solicitations, contracts, and related purchasing documents.

2. Chapter 2—Procurement Planning

Chapter 2 contains policy and procedures for advance procurement planning, including market research, and describes requirements for individual written procurement plans and implementation plans. It identifies specific matters to be considered in procurement planning, such as quality requirements, warranties, and suitability for multiyear procurement, and provides guidance for each. It establishes requirements for source selection plans, including the development of proposal evaluation criteria and procedures. It contains a section on specificiations, requiring that they be stated in terms of function, performance, or design requirements; known acceptable brand-name products; or a statement of work.

3. Chapter 3—Sources

Chapter 3 covers sources of supplies and services and their priority; included are Postal Service sources, other Government sources, and commercial sources. It establishes mandatory and optional Postal Service national and regional contracts and ordering agreements as sources for supplies and services covered by such contracts and ordering agreements. It provides for purchases from approved sources and from prequalified contractors, in addition to sources obtained through normal competitive procedures. It establishes requirements for publicizing procurements, including Commerce Business Daily synopses of solicitations and contract awards. It contains a section on contractor qualifications, including standards for determining contractor responsibility, and matters concerning debarment, suspension, and ineligibility.

4. Chapter 4—Purchasing Methods

Chapter 4 describes competitive purchasing procedures, including solicitation, evaluation of proposals, conduct of discussions, price negotiation, and contractor selection. Provision is made for award without discussions based on initial proposals received. Simplified procedures and provided for fixed-price purchases below certain dollar ceilings. It establishes limitations on the use of noncompetitive purchasing methods. It contains a section setting forth rules for filing and considering protests against Postal Service contracting procedures and awards.

5. Chapter 5—Contract Pricing

Chapter 5 describes the types of contracts authorized for Postal Service use and the circumstances for their use. It sets forth principles for determining or negotiating the allowability of costs under Postal Service contracts, and describes specific categories of costs that are unallowable. It contains procedures for establishing billing rates and final indirect cost rates. It describes policies and procedures for evaluating initial contract and subcontract prices, and for pricing contract modifications; price analysis is the preferred method of analysis, cost analysis being used only when no method of price analysis will serve.

6. Chapter 6—Contract Administration

Chapter 6 describes responsibilities and procedures for the administration of Postal Service contracts. It provides for the appointment of contacting officer's representatives to perform certain functions, and specifies records to be kept. It describes procedures for monitoring contract performance and for obtaining assurance of performance. Inspection, testing, and acceptance are

VOL
52
ISS
189
SE
30
1987
UMI

covered, with procedures for dealing with nonconforming supplies and services. It contains requirements for invoices, payment, withholding of payment, and the payment of interest by the Postal Service, in voluntary compliance with the Prompt Payment Act and OMB's implementing circular. Coverage is provided for matters concerning Postal Service property, Subcontracting, claims, and disputes. Procedures are prescribed for contract changes, equitable adjustments, and termination of contracts for default and for the convenience of the Postal Service. Detailed procedures necessary to implement this and some other parts of the new Manual will be in a separate Procurement Handbook, scheduled for issuance of January 1, 1988.

7. Chapter 7—Bonds, Insurance, and Taxes

Chapter 7 sets forth policies and procedures governing bonds and insurance under contracts, and discusses the applicability of Federal, State, and local taxes. Coverage includes performance bonds, payment bonds, patent infringement bonds, fidelity bonds, and the deposit of assets instead of surety bonds. The types of insurance described include workers' compensation, employers' liability, general liability, automobile liability, self insurance, and errors and omissions insurance required for certain categories of professional services.

8. Chapter 8—Special Categories of Contracts

Chapter 8 treats types of contracts subject to special procedures and describes the authorities of officials authorized to issue policy and procedural directives supplementing the Procurement Manual. Coverage is provided for professional and consultant services, computers and information systems, research and development, and utility services. Provisions is made for additional contracts requiring special procedures and forms (e.g., cleaning services, food services, vehicle hire, law enforcement, revenue production) to be covered in a supplemental Procurement Handbook.

9. Chapter 9—Patents and Data Rights

Chapter 9 covers the acquisition of patents, copyrights, and other rights in data. It includes policies regarding commercial application of inventions, privately developed patients and data, patent indemnification, disclosure of private data, and use of patented inventions.

10. Chapter 10—Socioeconomic Policies

Chapter 10 contains procedures for contracting with minority-owned businesses, and policies carrying out the requirements of certain statutes, including the Contract Work Hours and Safety Standards Act, the Davis-Bacon Act, and the Service Contract Act. It establishes Postal Service policy and preference regarding purchase of domestic-source products and materials.

11. Chapter 11—Facilities and Related Services

Chapter 11 covers the specialized procedures involved in the procurement of construction, including minor repairs and alterations, the acquisition of real property, and leases. In addition to construction and architect-engineer services, it covers services related to real property acquisition and management, and services related to facilities design and construction management. Procedures are included to preclude organizational conflicts of interest, and contractor prequalification procedures are described.

12. Chapter 12—Mail Transportation

Chapter 12, when completed, will prescribe special policies and procedures for the procurement of mail transportation and directly related ancillary services by contract. The coverage in this chapter will be supplemented by a Mail Transportation Handbook containing procedures for—

- Highway transportation service;
- Rail transportation service;
- Water transportation service;
- Domestic surface and intermodal service;
- Air transportation service;
- Emergency service contracts;
- Terminal handling contracts.

This chapter is reserved for issuance on or about January 4, 1988.

13. Appendix A—Solicitations

Appendix A prescribes the forms, format, and provisions to be used in preparing solicitations, and the establishment and maintenance of solicitation mailing lists. It contains all solicitation provisions prescribed in the manual.

14. Appendix B—Contract Clauses

Appendix B prescribes certain clauses not prescribed elsewhere in the manual and contains all clauses prescribed in the manual.

15. Appendix C—Forms Listing

Appendix C lists Postal Service forms related to procurement. This appendix is reserved for issuance on or about January 4, 1988.

16. Appendix D—Rules of Practice in Proceedings Relative to Debarment and Suspension from Contracting

Appendix D contains a reprint of the rules of practice issued as 39 CFR Part 957.

17. Appendix E—Rules of Practice Before the Postal Service Board of Contract Appeals

Appendix E contains a reprint of the rules of practice issued as 39 CFR Part 955.

18. Appendix F—Index

Appendix F is an alphabetical index of important words and terms used in the manual.

Implementation Schedule

Implementation of the new Procurement Manual will be phased over a period of months in order to provide time for training postal employees in its use and to secure some early experience which, along with the comments invited in this rulemaking, should enable the Postal Service to minimize transitional problems. Employees at the 100 procurement offices, the five Facilities Service Centers, and the eleven Facilities Service Offices will all be trained, but not all at the same time. Training will begin in the first 15 procurement offices in November and continue through mid-January, 1988. At the conclusion of that training period, except to the extent required pursuant to the terms of contracts already in effect or awarded after the effective date pursuant to preexisting solicitation, the procedures of the new Manual will be used exclusively in those 15 offices, and the PCM will no longer be effective there. Notices of the effective date for particular offices will be published in the Federal Register.

Between January and April 1988 training will commence in 38 other selected procurement offices and facilities service centers and offices, and between April and June it will commence in 63 more locations. At the conclusion of each training period the new Manual will be used instead of the PCM, until all 116 procurement offices and facilities centers and offices have received training.

Following the close of the public comment period at the end of November, comments received from the public plus recommendations and suggestions received from employee participants in the training sessions will

be evaluated and incorporated, as appropriate, into the next change of the Procurement Manual, presently scheduled for issuance on January 4, 1988. Chapter 12 and Appendix C of the Manual, publication of which, as noted in the *Description of the Contents of the Procurement Manual,* were reserved for a later time, will be included in this issuance. Opportunities for issuing further perfecting Manual changes are scheduled on April 1, 1988 and July 1, 1988, at which latter time the Manual is expected to have completely superseded the PCM throughout the country. Later revisions are scheduled to be made at least annually. Notice of these changes will be published in the **Federal Register**, and changes will also be made to 39 CFR Part 601 to reflect replacement of the PCM with the Procurement Manual.

Although exempt by 39 U.S.C. 410(a) from the requirements of the Administrative Procedure Act regarding proposed rulemaking, 5 U.S.C. 553 (b), (c), the Postal Service invites public comments on the new Procurement Manual described above, which will take the place of the Postal Contracting Manual, as incorporated by reference in the Code of Federal Regulations. See 39 CFR 601.100.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Docket No. AMO 23 DE; FRL-3268-5]

Proposed Revisions of the Delaware State Implementation Plan; Stack Height Revision

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: This notice proposes the approval of revisions to the Delaware State Implementation Plan (SIP). The proposed revisions consist of draft amendments to Regulation No. XXVII, for Stack Height and Regulation No. XXV, Requirements for Pre-construction Review. EPA has reviewed these revisions and has concluded that they conform to 40 CFR Part 51, including the July 8, 1985 stack height amendments (50 FR 27906). Therefore, EPA proposes to approve the amendments, following their final enactment by the State, as revisions to the Delaware SIP.

DATES: Comments must be received on or before October 30, 1987.

ADDRESSES: Copies of the proposed SIP revisions and the accompanying support documents are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Air Management Division, 841 Chestnut Building, Philadelphia, PA 19107, Attn: Ms. Esther Steinberg (3AM11).

Delaware Department of Natural Resources and Environmental Control, Division of Environmental Control Air Resources Section, 89 Kings Highway, P.O. Box 1401, Dover, DE 19901, Attn: Mr. Robert R. French.

EPA is soliciting public comments on this notice and on issues relevant to EPA's proposed action. Comments will be considered before taking final action. Interested parties may participate in the Federal rulemaking proceeding by submitting written comments to Mr. David L. Arnold, Chief, Delmarva/DC Section (3AM13) at EPA Region III address stated above. Please reference the EPA Docket Number found at the heading of this notice.

FOR FURTHER INFORMATION CONTACT: Mr. Kevin A. Magerr, (3AM13) at the EPA Region III address above or call (215) 597-6863.

SUPPLEMENTARY INFORMATION: The revisions are being proposed under a procedure called "parallel processing" (47 FR 27073). If the proposed revisions are substantially changed in areas other than those identified in this notice, EPA will evaluate those changes and may publish a revised Notice of Proposed Rulemaking. If no substantial changes are made other than those areas cited in this notice, EPA will publish a Final Rulemaking Notice on the revisions. The final rulemaking action by EPA will occur only after the SIP revisions have been adopted by the State of Delaware and submitted to EPA for incorporation into the SIP. Parallel processing can reduce the time necessary for final approval of these SIP revisions by three to four months.

Background

On February 8, 1982 (47 FR 5864), EPA promulgated final regulations limiting stack height credits and other dispersion techniques as required by section 123 of the Clean Air Act. These regulations were challenged in the U.S. Court of Appeals for the DC Circuit by the Sierra Club Legal Defense Fund, Inc., the Natural Resources Defense Council, Inc., and the Commonwealth of Pennsylvania in *Sierra Club* v. *EPA*, 719 F.2d 436 (DC Cir 1983). On October 11, 1983, the Court issued its decision ordering EPA to reconsider portions of the stack height regulations, reversing certain portions and upholding other portions.

On February 28, 1984, the electric power industry filed a petition for a writ of certiorari with the U.S. Supreme Court. On July 2, 1984, the Supreme Court denied the petition (104 S.Ct. 35710, and on July 18, 1984, the Court of Appeals' mandate was formally issued, implementing the Court's decision and requiring EPA to promulgate revisions to the stack height regulations within six months. The promulgation deadline was ultimately extended to June 27, 1985. Revisions to the stack height regulations were proposed on November 9, 1984 (49 FR 44878) and promulgated on July 8, 1985 (50 FR 27892). the revisions redefine a number of specific terms including "excessive concentrations," "dispersion techniques," "nearby," and other important concepts, and modify some of the criteria for determining Good Engineering Practice (GEP) stack height.

Pursuant to section 406(d)(2) of the Act, all states were required to (1) review and revise, as necessary, their State Implementation Plans (SIPs) to include provisions that limit stack height credit and dispersion techniques in accordance with the revised regulations; and (2) review all existing emission limitations to determine whether any of these limitations have been affected by stack height credits above GEP or any other dispersion techniques. For any limitations so affected, states were to prepare revised limitations consistent with their revised SIPs. All SIP revisions and revised emission limits were to be submitted to EPA within nine months of promulgation, as required by section 406.

Subsequently, EPA issued detailed guidance on carrying out the necessary reviews. For the review of emission limitations, the states were to prepare inventories of stacks greater than 65 meters in height and sources with emissions of sulfur dioxide (SO_2) in excess of 5,000 tons per year. These limits correspond to the *de minimis* GEP stack height and the *de minimis* SO_2 emission exemption from prohibited dispersion techniques. These sources were then subjected to detailed review for conformance with the revised regulations.

VOL 52 ISS 189 SEP 30 1987 UMI

Regulation Description

The State of Delaware, in order to conform to the July 8, 1985, stack height **Federal Register** Notice, drafted amendments to its air pollution regulations as described below:

Under Regulation No. XXVII—Stack Heights, Section 2—Definitions Specific to this Regulation, the State amended the following definitions to correspond to EPA's regulations:

Dispersion Technique
Excessive Concentrations
Nearby
Stack
Stack in Existence

The State deleted the definitions for "Elevated Terrain" and "Plume Impaction," as they do not conform with the revised EPA regulations.

The State amended section 3—Requirements for Existing and New Sources, by expanding the definition of "Good Engineering Practice" to include the changes of the July 8, 1985 **Federal Register** notice.

Under Regulation No. XXV—Requirements for Preconstruction Review, section 3.5—Stack Height, the State declares that Regulation No. XXVII is applicable to this section.

This regulation applies to new source or modifications in Delaware as required in 40 CFR 51.164, as well as existing sources as required in 40 CFR 51.118. This means that this rule applies to all sources that were constructed, reconstructed or modified subsequent to December 31, 1970.

The regulations adopted by the State do not include EPA's definition of "emission limitation" or "emission standard" found at 40 CFR 51.110(z) (old § 51.1(z)). Delaware's regulations contain a definition for "emission standard" in Regulation No. 1, Definition and Administrative Principles. That definition is not consistent with the EPA definition § 51.100(z). The State of Delaware is committed to revising its definitions to be consistent with EPAs. EPA proposes to incorporate the State's committal letter as part of the SIP in the final rulemaking.

EPA Action

EPA proposes approval of these revisions to the Delaware SIP. The Regional Administrator's decision to propose approval of these revisions is based on a determination that the amendments meet the requirements of the Clean Air Act and 40 CFR Part 51, Requirements for Preparation, Adoption, and Submittal of the State Implementation Plan.

The public is invited to submit comments on the proposed SIP revision. All comments submitted with in 30 days of publication of this Notice will be taken into account in the Administrator's decision to approve or disapprove this proposed SIP revision.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

40 CFR Part 61

[AD–FRL–3270–4]

National Emission Standards for Hazardous Air Pollutants; Coke Oven Emissions From Wet-Coal Charged By-Product Coke Oven Batteries

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public hearing and reopening of public comment period.

SUMMARY: On April 23, 1987, EPA proposed national emission standards which would limit coke oven emissions from wet-coal charged by-product coke oven batteries in the iron and steel industry (52 FR 13586). In response to requests by environmental and citizens groups, the period for receiving written comments is being reopened. Also in response to requests by several citizens groups, a public hearing will be held in Allegheny County, Pennsylvania.

DATES: *Public Hearing.* A public hearing will be held on October 29, 1987, beginning at 10:00 a.m.

Request to Speak at Hearing. Persons wishing to present oral testimony must contact the Allegheny County Health Department by October 21, 1987.

Comments. Comments must be received on or before November 30, 1987.

ADDRESSES: *Public Hearing.* A public hearing will be held in the City Council Chambers at the Clairton Municipal Building, 551 Ravensburg Boulevard, Clairton, Pennsylvania 15025. Persons wishing to present oral testimony should notify Ms. Karen Jones, Allegheny County Health Department, Bureau of Air Pollution Control, 301 Thirty-ninth Street, Pittsburgh, Pennsylvania 15201, telephone number (412) 578–8103.

Comments. Comments should be submitted (in duplicate, if possible) to: Central Docket Section (LE–131), Attention: Docket Number A–79–15, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Mr. Doug Bell or Mr. Sam Duletsky, Standards Development Branch, Emission Standards and Engineering Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541–5568, or (919) 541–5256.

SUPPLEMENTARY INFORMATION: On July 2, 1987, the Group Against Smog and Pollution (GASP), acting with Citizens for a Better Environment (CBE) and Save the Dunes Council (SDC), requested that EPA extend the August 6, 1987, deadline for public comments by 30 or 60 days to give them additional time to analyze the complex technical information which comprises the background and the basis for the proposed standards. Also, on July 31, 1987, the Natural Resources Defense Council (NRDC) and the Environmental Defense Fund (EDF) requested that the comment period for the proposed coke oven emissions standards be extended an additional 60 days. The NRDC and EDF requested the extension to obtain additional time to factor into their comments the ramifications of the July 28, 1987, decision on the national emission standards for hazardous air pollutants (NESHAP) for vinyl chloride by the U.S. Court of Appeals for the District of Columbia Circuit (*NRDC vs. EPA*, No. 85–1150). In response to these requests, EPA is reopening the public comment period until November 30, 1987. This additional time will ensure that all interested parties will have adequate time to review the background information and comment on the coke oven emissions NESHAP in light of the decision on the vinyl chloride NESHAP.

In addition to requesting an extension to the public comment period, GASP (along with CBE and SDC) and the Allegheny County Air Pollution Control Advisory Committee requested a public hearing in Allegheny County to provide those citizens most affected by coke oven emissions an opportunity to express their views on the proposed emission standards. Consequently, EPA will hold a public hearing in Allegheny County on October 29, 1987, to provide interested persons an opportunity for oral presentation of data, views, or arguments concerning the proposed standard for wet-coal charged by-

product coke oven batteries or the listing of coke oven emissions under section 112.

Date: September 24, 1987.

J. Craig Potter,

Assistant Administrator for Air and Radiation.

[OPP-250077; FRL-3268-4]

Notification to Secretary of Agriculture of a Final Regulation on Pesticide Registration Procedures and Pesticide Data Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification to the Secretary of Agriculture.

SUMMARY: Notice is given that the Administrator of EPA has forwarded to the Secretary of Agriculture a final regulation under section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The rule sets out in 40 CFR Part 152 which products are considered to be pesticides, lists exemptions, and describes the procedures for registration, classification, and suspension. The rule also modifies pesticide data requirements in 40 CFR Part 158. This action is required by section 25(a)(2)(B) of FIFRA, as amended.

FOR FURTHER INFORMATION CONTACT: By mail: Jean M. Frane, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Office location and telephone number: Rm. 1114, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-0944).

SUPPLEMENTARY INFORMATION: Section 25(a)(2)(B) of FIFRA provides that the Administrator shall provide the Secretary of Agriculture with a copy of any final regulation at least 30 days prior to signing it for publication in the Federal Register. If the Secretary comments in writing regarding the final regulation within 15 days after receiving it, the Administrator shall issue for publication in the Federal Register, with the final regulation, the comments of the Secretary, if requested by the Secretary, and the response of the Administrator concerning the Secretary's comments. If the Secretary does not comment in writing within 15 days after receiving the final regulation, the Administrator may sign the regulation for publication in the Federal Register anytime after the 15-day period.

As required by FIFRA section 25(a)(3), a copy of this final regulation has been forwarded to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

As required by FIFRA section 25(d), a copy of this final rule has also been forwarded to the Scientific Advisory Panel.

Authority: 7 U.S.C. 136 et seq.

Dated: September 21, 1987.

Douglas D. Campt,

Director, Office of Pesticide Programs.

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Gary Randall Billingsley and Paul H. Reynolds, which seeks to allot Channel 229A to Freeport, Florida, as a first FM broadcast service.

DATES: Comments must be filed on or before November 16, 1987, and reply comments on or before December 1, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Paul H. Reynolds, Amerimedia, 415 N. College Street, Greenville, Alabama 36037 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking, MM Docket No. 87–375, adopted August 25, 1987, and released September 23, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

[MM Docket No. 87–379, RM–5870]

Radio Broadcasting Services; Crystal Falls, MI

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by Munising Radio, Inc., requesting the substitution of FM Channel 264C1 for 264C at Crystal Falls, Michigan. Channel

264C at Crystal Falls has been available for application since October 12, 1984. The channel is currently vacant with no pending applications on file at the Commission. Munising Radio, Inc. has requested the substitution of channels because of the unavailability of transmitter sites for a full Class C facility. Channel 264C1 can be allocated to Crystal Falls with a site restriction 1 kilometer southwest of the community. Concurrence of the Canadian government is required for the allotment of FM Channel 264C1 at Crystal Falls.

DATES: Comments must be filed on or before November 16, 1987, and reply comments on or before December 1, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Robert A. Kramer, Munising Radio, Inc., 205 Chichester Cove, Longwood, Florida 32779.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 87–379, adopted August 25, 1987, and released September 24, 1987. National Oceanic and Atmospheric Administration

50 CFR Part 681

Western Pacific Crustacean Fisheries; Availability of Amendment to Fishery Management Plan and Request for Comments

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of an amendment to a fishery management plan and request for comments.

SUMMARY: NOAA issues this notice that the Western Pacific Fishery Management Council has resubmitted Amendment 5 to the Spiny Lobster (Crustacean) Fishery Management Plan of the Western Pacific Region (FMP) for review by the Secretary of Commerce (Secretary) and is requesting comments from the public.

DATE: Comments will be accepted through October 25, 1987.

ADDRESSES: Send comments to E.C. Fullerton, Director, Southwest Region, NMFS 300 South Ferry Street, Terminal Islands, CA 90731. Copies of the amendment are available on request from the Council at 1164 Bishop Street, Room 1405, Honolulu, HI 96813.

FOR FURTHER INFORMATION CONTACT: Kitty Simonds, Executive Director, Western Pacific Fishery Management Council, 808–523–1368.

SUPPLEMENTARY INFORMATION: This amendment was prepared under the provisions of the Magnuson Fishery Conservation and Management Act, which requires that the Secretary, upon receiving an FMP or amendment, must immediately publish a notice that the FMP or amendment is available for public review and comment. The Secretary will consider the public comments in determining whether to approve this amendment.

Amendment 5 was originally submitted on June 24, 1987. A notice of availability was published in the **Federal Register** on June 29, 1987 (52 FR 24197); however, the amendment was disapproved by the Secretary of Commerce on August 7, 1987, because it did not contain a specification of optimum yield or total allowable level of foreign fishing (TALFF) for the slipper lobster resource. The amendment was withdrawn from public review while the Council amended the document. The Council resubmitted the amendment on September 21, 1987.

This resubmitted version of the amendment proposes the same measures as the original amendment: (1) To establish a minimum legal size for slipper lobster, (2) to require escape vent panels in all lobster traps, (3) to require release of any slipper lobster carrying eggs, (4) to revise the daily lobster catch report, (5) to revise permit application forms, (6) to eliminate the annual processor's report, (7) to revise the trip processing and sales report, and (8) to change the name of the FMP. The receipt date for the resubmitted version of this amendment is September 26, 1987.

Authority: 16 U.S.C. 1801, et seq.

Dated: September 25, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

Notices

Federal Register
Vol. 52, No. 189
Wednesday, September 30, 1987

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

September 25, 1987.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should adivse the OMB Desk Office of your intent as early as possible.

BILLING CODE 3410–01–M

Determination of Market Stabilization Price for Sugar for Fiscal Year 1988

AGENCY: Office of the Secretary, USDA.

ACTION: Notice.

SUMMARY: This notice sets forth the market stabilization price for sugar for the period October 1, 1987–September 30, 1988 as 21.76 cents per pound, raw value.

EFFECTIVE DATE: September 30, 1987.

FOR FURTHER INFORMATION CONTACT: John Nuttall, Chief, Sugar Group, Foreign Agricultural Service, Room 6095, South Building, Department of Agriculture, Washington, DC 20250, Telephone: (202) 447–2916.

SUPPLEMENTARY INFORMATION: The market stabilization price is used to determine bond requirements and maximum liabilities under certain programs authorized by Presidential Proclamation No. 5002 of November 30, 1982 (47 FR 54269). The calculation of the market stabilization price is provided for in 7 CFR 6.300 through 6.302 and is the sum of (1) the price support level for the applicable fiscal year, expressed in cents per pound of raw cane sugar; (2) adjusted average transportation costs; (3) interest costs, if applicable; and (4) 0.2 cent per pound. The adjusted average transportation costs are the weighted average costs of handling and transporting domestically produced raw cane sugar from Hawaii to Gulf and Atlantic Coast ports, as determined by the Secretary. Interest costs are the amount of interest, as determined and estimated by the Secretary, that would be required to be paid by a recipient of a price support loan for raw cane sugar upon repayment of the loan at full maturity. Interest costs shall only be applicable where, as under the current sugar price support program, a price support loan recipient is not required to pay interest upon forfeiture of the loan collateral.

The Secretary of Agriculture has anounced that the applicable loan rate under the price support program for sugar, expressed in cents per pound for raw cane sugar, will be 18.00 cents per pound for loans disbursed during the period October 1, 1987–September 30, 1988.

Accordingly, after appropriate review, it has been determined that the market stabilization price for fiscal year 1988

shall be 21.76 cents per pound. This consists of the 18.00 cents per pound loan rate; adjusted average transportation costs of 2.96 cents per pound; an interest cost of .60 cent per pound; and 0.2 cent per pound. The transportation factor represents data for the most recent year for which complete data are available, 1986, projected forward to 1987 by applying a projected increase in the Producer Price index for finished goods over this time. The interest factor is based on an estimated average interest rate of 6.625 percent over the year, and a six month loan maturity period.

Notice

Notice is hereby given that, in conformity with the provisions of 7 CFR 6.300(a), the market stabilization price for sugar for fiscal year 1988 has been determined to be 21.76 cents per pound.

Signed at Washington, DC on September 25, 1987.

Richard E. Lyng,

Secretary of Agriculture.

BILLING CODE 3410-11-M

Electronic Communications Rental Fees for the Eastern Region

AGENCY: Forest Service, USDA.

ACTION: Notice of adoption of final policy.

SUMMARY: The Eastern Region of the Forest Service headquartered in Milwaukee, Wisconsin hereby gives notice that it is adopting new policy and procedures for determining rental fees for electronic communications sites. A minimum fee schedule for certain types of electronic communications has been established. The policy also provides for the establishment of rental fees above the minimum fees and fees for other types of electronic uses not specifically noted; based on market evidence and other sound business management practices.

EFFECTIVE DATE: This policy is effective September 30, 1987. The policy will be disseminated through the Agency's internal directive system.

FOR FURTHER INFORMATION CONTACT: Timothy G. Curtis, Lands, Watershed and Minerals Management Staff, (414) 291-1902.

SUPPLEMENTARY INFORMATION: On May 4, 1987, the Eastern Region of the Forest Service published notice of a proposed change to the existing policy for determining annual rental fees for communications sites in the Region (52 FR 16293, 16294).

The Region proposed the establishment of minimum fees as follows:

—Two-way Radios. A minimum fee of $200 per year. Applies to permittees renting space on an existing tower or for a permittee with a tower and associated building.

—Commercial Radio/TV Broadcasting and Microwave. A minimum fee of $1000 per year.

Rental fees above these minimums and for all other forms of electronic uses may be established on the basis of market evidence and other sound business management practices, including fees based on individual site appraisal, competitive bidding for large or unique sites or where competitive interest exists. Fee negotiations may also be appropriate.

Analysis of Public Comment

Each electronic site permittee in the Eastern Region was mailed a copy of the proposed policy. The general public was notified of the proposed policy through the **Federal Register.** The Forest Service received 8 responses; the number and percentage of which are categorized as follows:

Respondent	Number	Percentage
Amateur Radio Permittees	3	37.5
Other Government Permittees	2	25.0
Cable TV Permittees	2	25.0
Electronic Site User	1	12.5
Total	8	100.0

All of the comments received have been reviewed and given consideration in reaching the final decision. Comments have been summarized by type of respondent.

1. Amateur Radio Permittees.

All of the amateur radio respondents expressed the opinion there should be no charge for use by this group. They point out that amateur radio is frequently called upon to provide communication service in times of emergencies such as floods, tornados and fires.

They are chartered as nonprofit organizations by law and, therefore, do not charge for their services.

The Eastern Region agrees that amateur radio operators can provide a useful public service. The fee for two-way radios may be partially waived depending on the extent of public service provided; to be determined by the authorizing officer in conformity with 36 CFR 251.57(b).

2. Other Government Permittees.

Two government agencies (one state, one county) commented. In both cases these agencies provide reciprocal use for Forest Service communication facilities. Where state or local government agencies provide reciprocal use without charge, their fee may generally be waived. However, should these agencies sublet space for a charge, they in return will normally be subject to a fee. The authorizing officer shall determine on a case by case basis, in conformity with 36 CFR 251.57(b) if fees should be charged or waived.

3. Cable TV Permittees.

The respondents generally expressed concerns that the minimum fee schedules being proposed would be excessive. However, the minimum fee schedule does not apply to this category of users. Fees for cable TV permittees will be established on an individual basis to reflect market value of the area in which the use is located.

4. Electronic Site User.

One comment was received by a commercial user who expressed support for the revision of fee determination policy but felt that fees should reflect rental prices in the local area. We believe the changes proposed in our fee policy will accomplish this. The minimum fee schedule does not exceed the market value based on our previous market analysis. Additionally there were no comments expressing concerns that the minimum rates published in the initial **Federal Register** Notice were too high. The local rental market will be the basis for charging fees above the minimum fee schedule.

Summary of Final Notice

Minimum fees by category of user is established as follows:

Type of use	Minimum fee (per annum)
Two-way radio	$200
Commercial radio/TV broadcast and microwave	1,000

Rental fees above these minimums and fees for all other categories of electronic uses will be established on the basis of market evidence and other sound business management practices, including fees based on individual site appraisals, competitive bidding for large or unique sites, or where competitive interest exists. Fee negotiations may also be appropriate. Overall guidance for determining fees for communication sites can be found in Forest Service Manual 2728, Amendment 90, January, 1987.

Fees will be adjusted annually using changes reflected by the second quarter Implicit Price Deflator-Gross National Product (IPD–GNP) index. The fees for electronic uses will be updated at 5-year intervals.

The initial notice indicated an effective date of January 1, 1988. New permits issued between publication of the final notice and January 1, 1988, were to conform to the new fee policy prorated to the effective date of January 1, 1988. This has been changed to make the effective date of the final policy the date of publication in the **Federal Register.** New fees will be implemented upon publication of this Final Notice.

So that holders may adjust their operations to the fee changes, the portion of the new fee that exceeds 100% increase will be phased in over a three year period beginning with CY 1988 fees. To facilitate calculation of the phased in amounts, IPD–GNP annual adjustments will be deferred until full fees are attained for CY 1990.

This decision is subject to appeal under provision of 36 CFR 211.18. Notice of such appeal must be received by the Regional Forester within 45 days of publication in the **Federal Register.**

Date: September 17, 1987.

Jim Jordan,

Deputy Regional Forester.

DEPARTMENT OF COMMERCE

International Trade Administration

[C–577–701]

Initiation of Countervailing Duty Investigation; Carbon Steel Wire Rod From Malaysia

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in Malaysia of carbon steel wire rod, as described in the "Scope of Investigation" section of this notice, receive benefits which constitute bounties or grants within the meaning of the countervailing duty law. If our investigation proceeds normally, we will make our preliminary determination on or before November 27, 1987.

EFFECTIVE DATE: September 30, 1987.

FOR FURTHER INFORMATION CONTACT: Gary Taverman or Steven Morrison, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377–0161 or 377–0189.

SUPPLEMENTARY INFORMATION:

The Petition

On September 3, 1987, we received a petition in proper form from Armco, Inc., Georgetown Steel Corp. and Raritan River Steel Co., filed on behalf of the U.S. industry producing carbon steel wire rod. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that manufacturers, producers, or exporters in Malaysia of carbon steel wire rod receive, directly or indirectly, certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act).

Since Malaysia is not a "country under the Agreement" within the meaning of section 701(b) of the Act, sections 303(a)(1) and 303(b) of the Act apply to this investigation. Accordingly, petitioners are not required to allege that, and the U.S. international Trade Commission is not required to determine whether, imports of the subject merchandise from Malaysia materially injure, or threaten material injury to, a U.S. industry.

Initiation of Investigation

Under section 702(c) of the Act, we must determine, within 20 days after a petition is filed, whether the petition sets forth the allegations necessary for the initiation of a countervailing duty investigation and whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on carbon steel wire rod from Malaysia and have found that the petition meets these requirements.

We conducted a previous investigation of the subject merchandise from Malaysia and made a negative preliminary determination (51 FR 20324, June 4, 1986). Subsequent to our verification, petitioners withdrew their petition and we terminated the investigation. In the current petition, petitioners have asked us to investigate programs which were not investigated in

VOL
52
ISS
189
SE
30
1987
UMI

the earlier case, new programs, and programs which may have changed since the earlier negative preliminary determination. In light of these allegations, we have determined that an investigation is warranted.

Therefore, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in Malaysia of carbon steel wire rod, as described in the "Scope of Investigation" section of this notice, receive bounties or grants. If our investigation proceeds normally, we will make our preliminary determination on or before November 27, 1987.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. Congress is considering legislation to convert the United States to this harmonized System ("HS") by January 1, 1988. In view of this, we will be providing both the appropriate *Tariff Schedules of the United States Annotated (TSUSA)* item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the *TSUSA*, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the *TSUSA* item number(s) in all new petitions filed with the Department. A reference copy of the proposed HS schedule is available for consultation at the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contract the Import Specialist at their local Customs office to consult the schedule.

For purposes of this investigation, the term "carbon steel wire rod" covers coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.20 inch in diameter, nor over 0.74 inch in diameter, tempered or not tempered, treated or not treated, not manufactured or partly manufactured, and valued over or under 4 cents per pound. Wire rod is currently classifiable under items 607.1400, 607.1710, 607.1720, 607.1730, 607.2200, and 607.2300 of the *Tariff Schedules of the United States Annotated* and under HS item numbers 7213.20.00, 7213.31.30, 7213.31.60, 7213.39.00, 7213.41.30, 7213.49.00 and 7213.50.00

Allegations of Bounties or Grants

The petition alleges that manufacturers, producers, or exporters in Malaysia of carbon steel wire rod receive benefits that constitute bounties or grants under the following programs. We are initiating an investigation on the following allegations:

Export Tax Incentives

- An abatement of taxable income based on value added and/or the ratio of export sales to total sales
- An abatement of net taxable income of eight percent of the f.o.b. value of export sales if Malaysian content is more than 50 percent under section 29 of the investment incentives act of 1968
- An abatement of taxable income of five percent for trading companies exporting Malaysian-made products
- An abatement of taxable income of five percent of the value of Malaysian made inputs incorporated into exports
- An abatement of taxable income of five percent of the value of indigenous materials used in exports
- A double deduction from taxable income for export credit insurance premiums purchased from government approved insurance companies
- A double deduction from taxable income for expenses related to export promotion
- A duty and surtax exemption on imported materials available on preferential terms to manufacturers who export
- An industrial building allowance income tax deduction for a percentage of the value of warehouses used to store materials ultimately destined for export

Other Export Incentives

- Short term export financing at preferential rates
- Export insurance issued by a government corporation at premium rates which are inadequate to cover the long term operating costs and losses of the insurance program

Other Tax Incentives

- Pioneer status benefits including tax holidays, exemptions from company taxes, exemptions from development taxes, exemptions from excess profits tax, exemptions from taxes on dividends paid out of profits earned during the tax holiday, and additional tax holidays
- Investment tax allowance/ investment tax credit for qualifying capital expenditures

Government Financial Assistance

- Medium- and long-term loans on terms inconsistent with commercial considerations

We are not initiating an investigation on the following program:

Government Equity Infusions

Petitioners allege that the Government of Malaysia has provided financial assistance in the form of investments on terms inconsistent with commercial considerations in Malayawata Steel Bhd. In order for the Department to investigate an allegation on equity, the petition must contain (1) evidence of government equity participation, and (2) a showing that such participation may be on terms inconsistent with commercial considerations.

Petitioners provided insufficient information regarding Government of Malaysia equity participation in Malayawata. Therefore, we are not initiating an investigation on this allegation.

As a standard practice in our countervailing duty questionnaires, we ask for information on the ownership structure of each firm and for financial statements. If the information provided in response to these standard questions shows that the Government of Malaysia has invested in Malayawata on terms inconsistent with commerical considerations, we will examine this issue further.

This notice is published pursuant to section 702(c)(2) of the Act.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Deduction in Charges of Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Jamaica

September 25, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, and the President's February 20, 1986 announcement of a Special Access Program for textile products assembled in participating Caribbean Basin beneficiary countries from fabric formed and cut in the United States, pursuant to the requirements set forth in 51 FR 21208 (June 11, 1986), has issued the directive published below to the Commission of Customs to be effective on October 1, 1987. For further information contact Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to deduct charges made to the restraint limits established for Categories 331/631, 338/339/638/639 and 347/348/647/648 for the period which began on September 1, 1986 and extends through December 31, 1987. Subsequently, these same amounts will be charged to the guaranteed access levels established for properly certified textile products in Categories 331/631, 338/339/638/639 and 347/348/647/648 which are assembled in Jamaica from fabric formed and cut in the United States and exported from Jamaica during this same sixteen-month period.

Background

On November 21, 1986 a notice was published in the **Federal Register** (51 FR 42128) announcing import restraint limits for certain cotton, wool and man-made fiber textile products, including Category 331/631, produced or manufactured in Jamaica and exported during the sixteen-month period which began on September 1, 1986 and extends through December 31, 1987. A notice published on February 27, 1987 (52 FR 6049) announced guaranteed access levels for textile products in Category 331/631, among others, which are properly certified textile products assembled in Jamaica from fabric formed and cut in the United States.

Further, a notice was published in the **Federal Register** on April 1, 1987 (52 FR 10398) announcing import restraint limits for certain cotton and man-made fiber textile products in Categories 338/339/638/639 and 347/348/647/648, produced or manufactured in Jamaica and exported during the sixteen-month period which began on September 1, 1986 and extends through December 31, 1987. This notice also announced guaranteed access levels for products in the foregoing categories which are properly certified textile products assembled in Jamaica from fabric formed and cut in the United States.

During consultations between the Governments of the United States and Jamaica, the United States agreed to deduct charges for shipments qualifying for guaranteed access levels which were made to designated consultation levels. It was further agreed that these goods would be charged to corresponding guaranteed access levels.

The Government of Jamaica has provided documentation to the U.S. Government establishing that products in Category 331/631 and additional products in Categories 338/339/638/639 and 347/348/647/648 were assembled exclusively from U.S. formed and cut fabric and qualified for entry under the guaranteed access levels. These goods were charged to the designated consultation levels because of the unavailability of proper documentation (CBI Export Declaration (Form ITA–370P)) required for entry under TSUSA 807.0010.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of the United States Annotated (1987).*

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

September 25, 1987

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC. 20229

Dear Mr. Commissioner: To facilitate implementation of the Bilateral Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement of August 27, 1986, as amended, between the Governments of the United States and Jamaica, I request that, effective on October 1, 1987, you deduct the following amounts from charges made to the import restraint limits established in the directive of November 17, 1986 for cotton and man-made fiber textile products in Category 331/631 and, as amended on March 27, 1987, in Categories 338/339/638/639 and 347/348/647/648, produced or manufactured in Jamaica and exported during the sixteen-month period which began on September 1, 1986 and extends through December 31, 1987.

Category	Amount to be deducted
331	250,070 dozen pairs.
338	7,666 dozen.
347	32,598 dozen.
348	5,051 dozen.
638	2,139 dozen.
647	730 dozen.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

This letter will be published in the **Federal Register**.

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87–22558 Filed 9–29–87; 8:45 am]

BILLING CODE 3510–DR–M

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Korea

September 25, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 1, 1987. For further information contact Kimbank Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quotas status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 566–8041. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the

Implementation of Textile Agreements directs the Commissioner of Customs to increase the previously established import restraint limits for Categories 342 and 636, produced or manufactured in Korea and exported during 1987.

Background

A CITA directive dated December 23, 1986 (51 FR 47044) established important restraint limits for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, including Categories 342 and 636, produced or manufactured in the Republic of Korea and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Under the terms of the Bilateral Textile Agreement of November 21 and December 4, 1986, as amended, and at the request of the Government of the Republic of Korea, the limits for Categories 342 and 636 are being increased by application of swing. In addition, Category 636 also is being increased for carryforward.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of the United States Annotated (1987).*

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register.**

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

September 25, 1987

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 23, 1986, concerning imports into the United States of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the Republic of Korea and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on October 1, 1987, the directive of December 23, 1986 is amended to include the following adjustments to the previously established restraint limits for cotton and man-made fiber textile products in Categories 342 and 636, under the terms of the bilateral agreement of November 21 and December 4, 1986, as amended [1]

Category	Adjusted 12-mo. limit[1]
342	79,816 dozen.
636	240,630 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-22560 Filed 9-29-87; 8:45 am]

BILLING CODE 3510-DR-M

Proposed Correlation; Textile and Apparel Categories With Tariff Schedules of the United States Annotated 1988

September 25, 1987

For Further Information Contact: Kathy Davis, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

The purpose of this notice is to advise the public that a proposed Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated for 1988 will be available beginning October 5, 1987.

The Correlation provides for placement of numbers from the Tariff Schedules of the United States (TSUSA) in the textile and apparel category system. This publication will set forth the new category system to be used by the United States to implement bilateral textile agreements and Article 3 restraints under the Arrangement Regarding International Trade in Textiles and unilateral restraints under Section 204 of the Agricultural Act of 1956, as amended, under the proposed Harmonized System (see 52 FR 6597, published on March 4, 1987).

To obtain a copy of the proposed Correlation, send an $80.00 check or money order, payable to the U.S. Department of Commerce, to: U.S. Department of Commerce, 14th and Constitution Avenue NW., Room H3100, Washington, DC, 20230 Attn: Proposed Correlation.

James H. Babb,

Chairman, Committee for the Implementation of textile Agreements.

[FR Doc. 87-22559 Filed 9-29-87; 8:45 am]

BILLING CODE 3510-DR-M

[1] The agreement provides, in part, that (1) group limits, specific limits and sublimits may be exceeded by designated percentages for swing, carryforward and/or carryover. No carryforward will be available in the final agreement year, and (2) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

Announcement of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Mauritius Effective on October 1, 1987

September 25, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 1, 1987. For further information contact Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to control imports of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in Categories 331, 335/835, 338/339, 340, 341/641, 347/348, 604-A, 638/639, 640, 640pt., 647/648/847, and Categories 345, 438, 445, 446, 645 and 646, and a group (Group I), produced or

manufactured in Mauritius and exported during the twelve-month period which begins on October 1, 1987 and extends through September 30, 1988, at designated limits.

Background

The Bilateral Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement of June 3 and 4, 1985, as amended, between the Governments of the United States and Mauritius establishes import restraint limits for cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in Categories 331, 335/835, 338/339, 340, 341/641, 347/348, 604–A, 638.639, 640, 640pt., 647/648/847, and cotton, wool and man-made fiber textile products in Categories 345, 438, 445, 446, 645 and 646, and a group (Group I), produced or manufactured in Mauritius and exported during the twelve-month period which begins on October 1, 1987 and extends through September 30, 1988.

Further, during consultations in September 1986 and March 1987 between the Governments of the United States and Mauritius, agreement was reached to charge 1986 overshipments for Category 341 to each of the next three agreement years, beginning with the period October 1, 1987 through September 30, 1988. Consequently, 36,966 dozen shall be charged for Category 341 to the restraint limit established in this directive for Category 341/641.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (48 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 20768) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register**.

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

September 25, 1987.

Committee For The Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and pursuant to the Bilateral Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement of June 3 and 4, 1985, as amended, between the Governments of the United States and Mauritius; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on October 1, 1987, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Mauritius and exported during the twelve-month period which begins on October 1, 1987 and extends through September 30, 1988, in excess of the following restraint levels:

Category group I	12-mo restraint level
345, 438, 445, 446, 645 and 646, as a group.	118,485 dozen
331	318,000 dozen pairs
335/835	47,700 dozen
338/339	224,720 dozen
340	238,203 dozen
341/641	253,340 dozen
347/348	450,500 dozen
604–A [1]	564,980 pounds
638/639	258,428 dozen
640	121,900 dozen of which not more than 42,665 dozen shall be in shirts made from fabric with two or more colors in the warp and/or the filling in TSUSA numbers 381.3132, 381.3142, 381.3152, 381.9535, 381.9547 and 381.9550
647/648/847	371,000 dozen

[1] In Category 604–A, only TSUSA numbers 310.5049 and 310.6045.

In carrying out this directive, entries of textile products in the foregoing categories, produced or manufactured in Mauritius, which have been exported to the United States during the periods which began, in the case of Categories 345, 438, 445, 446, 645 and 646 in Group I and Categories 331, 338/339, 340, 341/641, 347/348, 638/639 and 640, on October 1, 1986; in the case of Categories 335/835 and 604–A, on March 1, 1987; and, in case of Category 647/648/847, on April 1, 1987; and extend through September 30, 1987, shall, to the extent of any unfilled balances, be charged against the restraint limits established for those periods. In the event the limits have been exhausted by previous entries, such goods shall be subject to the limits set forth in this letter.

The limits set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of June 3 and 4, 1985, as amended, between the Governments of the United States and Mauritius, which provide, in part, that the limits may be exceeded by not more than 10 percent for carryover and carryforward and the limits for Categories 338/339 and 638/639 may be exceeded by not more than 7 percent for swing, provided that an equal amount in equivalent square yards is deducted from one or more specific limits during the same agreement year. Any appropriate adjustments under the provisions of the agreement referred to above will be made to you by letter.

Also effective on October 1, 1987, you are directed to charge 36,966 dozen for Category 341 to the limit established in this letter for Category 341/641.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1987; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to Procurement List.

SUMMARY: This action adds to Procurement List 1987 a service to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: October 30, 1987.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557–1145

SUPPLEMENTARY INFORMATION: On June 26 1987, the Committee for Purchase for the Blind and Other Severely Handicapped published notice (52 FR 24049 of a proposed addition to Procurement List 1987, November 3, 1986 (51 FR 39945).

After consideration of the relevant matter presented, the Committee has determined that the service listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77 and 41 CFR 51–2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the service listed.

c. The action will result in authorizing small entities to provide the service procured by the Government.

Accordingly, the following service is hereby added to Procurement List 1987: Janitorial/Custodial, 914 Tactical Airlift Group (AFRES), Niagara Falls International Airport, Niagara Falls, New York.

C.W. Fletcher,

Executive Director.

BILLING CODE 6820–33–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Meeting; Electron Devices Advisory Group

SUMMARY: Working Group B (Microelectonics) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATE: The meeting will be held at 10:30 a.m., Tuesday, 6 October 1987, and 9:00 a.m., Wednesday, 7 October 1987.

ADDRESSES: The meeting will be held at Palisades Institute for Research Services, Inc., 2011 S. Crystal Drive, Suite 307, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: Becky Terry, AGED Secretariat, 2011 Crystal Drive, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group B meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. The Microelectronics area includes such programs as integrated circuits, charge coupled devices and memories. The review will include classified program details throughout.

In accordance with section 10(d) of Pub. L. No. 92–463, as amended, (5 U.S.C. App. II section 10(d) (1982)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly, this meeting will be closed to the public.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Meeting; Election Devices Advisory Group

SUMMARY: Working Group C (Mainly Opto Electronics) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATE: The meeting will be held at 0900, Wednesday, 14 October and 0900, Thursday, 15 October 1987.

ADDRESS; The meeting will be held at Lawrence Livermore National Laboratory, Bldg. 481, Room 2005, Livermore, California.

FOR FURTHER INFORMATION CONTACT: Gerald Weiss, AGED Secretariat, 201 Varick Street, New York, 10014.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economic and effective research and development programs in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. This opto-electronic device area includes such programs as imaging devices, infrared detectors and lasers. The review will include classified program details throughout.

In accordance with Section 10(d) of Pub. L. No. 92–463, as amended, (5 U.S.C. App. II section 10(d) (1982)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly, this meeting will be closed to the public.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Army

Army Science Board; Partially Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act, (Pub. L. 92–463), announcement is made of the following Committee Meetings:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: 19–22 October 1987.

Times of Meeting: 0800–1700 hours.

Place: Fort Bragg, North Carolina.

Agenda: The 1987 Army Science Board Fall General Membership Meeting will include:

19 October, 0905–0945—Closed. The rest of the day is open.

20 October, 0800–1300—Open. Briefings by Ft. Bragg personnel.

20 October, 1300–1700 through COB 22 October—Closed.

Subjects to be discussed include Competitive Strategies, Information Management, Bio Defense, BAST Overview and Force Cost Drivers. This portion of the meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contracted for further information at (202) 695–3039 or 695–7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710–08–M

Defense Logistics Agency

Privacy Act of 1974; New System of Records Established for Computer Matching Purposes to Implement Debt Collection Actions Under the Debt Collection Act of 1982

AGENCY: Defense Manpower Data Center (DMDC), Defense Logistics Agency, DoD.

ACTION: This action constitutes notice for public comment of a new system of records established for computer matching purposes by interagency agreement to assist Federal creditor

agencies implement debt collection actions under the Debt Collection Act of 1982.

SUMMARY: The Defense Manpower Data Center, Defense Logistics Agency, Department of Defense, is proposing a new record system established under an interagency agreement, devoted exclusively for debt collection efforts under the Debt Collection Act of 1982, in order to conduct computer matching with Federal creditor agencies for the purpose of identifying and locating individuals receiving Federal salaries or other Federal benefit payments and indebted to the U.S. Government. This new record system will identify delinquent debtors and allow Federal creditor agencies to initiate prompt collection action by contacting the debtors for voluntary repayment or pursue involuntary offset procedures against the employees' wages.

DATES: This proposed action shall be effective on or before October 30, 1987, unless comments are received that would result in a contrary determination.

ADDRESS: Send any comments to Mr. Aurelio Nepa, Jr., Staff Director, Defense Privacy Office, Room 205, 400 Army Navy Drive, Arlington, VA 22202. Telephone: (202) 694–3027, Autovon: 224–3027.

SUPPLEMENTARY INFORMATION: The establishment of this new system of records was accomplished after study, planning and coordination of an interagency working group and resulted in an interagency agreement for the Federal Salary Offset Initiative to improve and implement debt collection efforts by Federal agencies. The interagency agreement, with attachments, is published in full text below and proposes a central location for records to be matched. This central focus on the use of computer matching techniques as a tool will permit any Federal creditor agency that may wish to avail itself of this opportunity in its efforts on collection of delinquent debts. Federal creditor agencies interested in participating should contact the record system manager reflected in the system notice and should strictly follow the guidelines set forth in the attachments of the interagency agreement.

The Defense Logistics Agency systems of records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a) have been published in the **Federal Register** as follows:

FR Doc. 85–10237 (50 FR 22897) May 29, 1985 (Compilation)
FR Doc. 85–30123 (50 FR 51898) December 20, 1985
FR Doc. 86–17259 (51 FR 27443) July 31, 1986
FR Doc. 86–19035 (51 FR 30104) August 22, 1986
FR Doc. 87–21654 (52 FR 35304) September 18, 1987

A new system report, as required by 5 U.S.C. 552a(o) of the Privacy Act of 1974 was submitted on September 18, 1987 to the Administrator, Office of Information and Regulatory Affairs, OMB, the President of the Senate, and the Speaker of the House of Representatives, pursuant to paragraph 4b of Appendix I to OMB Circular No. A–130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985 (50 FR 52730, December 24, 1985) and paragraph 5.f.(1) of the OMB "Revised Supplemental Guidance for Conducting Matching Programs," dated May 11, 1982 (47 FR 21656, May 19, 1982).

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

September 24, 1987.

Interagency Agreement for Federal Salary Offset Initiative Implementation of the Debt Collection Act of 1982

The Office of Management and Budget (OMB) has established an Interagency Working Group for the Federal Employee Salary Offset Initiative. It is to assist Federal agencies in identifying Federal employees and others receiving Federal compensation who are delinquent debtors to such agencies. It has been established as a mechanism to enforce the provisions of the Debt Collection Act of 1982.

The Interagency Working Group shall consist of the following agencies: The Financial Management Service, the Office of Management and Budget, the Department of Defense (DoD), and the Office of Personnel Management (OPM). The Department of the Treasury shall serve as lead agency.

The OPM shall provide the DoD with current automated files on all personnel employed or compensated by the Federal Government. The Department of Transportation and the U.S. Postal Service may in the near future provide DoD with similar files of all employed personnel at the U.S. Coast Guard and the Postal Service.

The DoD, Defense Manpower Data Center (DMDC) shall use the above separate data bases on Federal employment and Federally compensated persons. They shall establish and maintain the capability to respond to inquiries from Federal creditor agencies about identifying data about persons who are delinquent in a debt to the Federal Government.

The agencies who are members of the Group in coordination with OMB, shall develop and publish operating procedures. These procedures will include strict compliance with the Debt Collection Act of 1982 and the Privacy Act of 1974.

When the Working Group becomes operational, all creditor agencies will be requested to submit to the Group names of persons against whom they have determined to have a clear valid claim.

Interagency Agreement for Federal Salary Offset Initiative

Background

The Debt Collection Act of 1982, (Pub. L. 97–365), provided an administrative mechanism for Federal Agencies to collect delinquent debts owed by individuals receiving salary or similar compensation from the Federal Government. Delinquent debts can be collected via an involuntary offset to salaries and pensions of fifteen percent disposable income. It is clearly the policy of the Administration that Federal employees should honor their just debts and that the provisions of the Debt Collection Act be used where voluntary compliance is not forthcoming. The utilization of computer matching programs is key to the ability of various Federal agencies to identify and locate delinquent debtors receiving offsetable payments from various Federal sources. Efforts to date under the Debt Collection Act have for the most part been bilateral between selected agencies having delinquent debtors and other agencies having records on large numbers of individuals receiving various forms of Federal compensation.

Purpose

The purpose of this agreement is to bring a central focus on the use of computer matching techniques as a tool for the collection of delinquent debts. While it is clearly preferable to receive voluntary repayment of such debts from individuals who may be identified through computer matching, it is recognized that involuntary offset procedures under the provisions of the Debt Collection Act will be utilized when voluntary repayment is not forthcoming. The Office of Management and Budget (OMB) has designated the Department of the Treasury, Financial Management Service, as the Lead Agency to coordinate and monitor the implementation of the government's Federal Salary Offset program.

This agreement, restricted exclusively to the implementation of the Debt

Collection Act, is intended to establish an Interagency Working Group to facilitate computer matching and subsequent salary offset throughout the Federal government under the auspices and oversight of the Office of Management and Budget (OMB). The Interagency Working Group will be chaired by Treasury and will consist of those agencies having records on individuals receiving Federal compensation offsetable under the Debt Collection Act. At the outset, the members of the Interagency Working Group will consist of the Department of Treasury, Office of Personnel Management (OMB), and the Department of Defense (DoD).

Objectives

It is recognized at the outset that computer matching can be conducted most efficiently if there is central location for records to be matched. Such centralization will eliminate duplication in data processing, in the negotiation of required Memoranda of Understanding between agencies, and in the publication of various announcements in the **Federal Register** which are required by the Privacy Act of 1974, as amended, and by the OMB Guidelines on Computer Matching. It is further recognized and agreed upon that no data base will be used for any other purposes other than that authorized by the Debt Collection Act. No single agency (e.g. DoD) maintaining the data bases as the matching agency shall have sole responsibility for determining what other uses shall be made of records in its custody received from another source agency. These activities shall be controlled as a policy matter by the Interagency Working Group, with each of the member agencies retaining control of the uses made of its own records.

An additional objective of this agreement is to establish procedures for sharing the work load and financial burden associated with computer matching subsequent salary offset among those members of the Interagency Working Group as well as among those other Federal creditor agencies who will utilize the resources of the Interagency Working Group to recover funds owed them. Attachment A, Roles and Responsibilities, and Attachment B, Example of Interagency Memorandum of Understanding (MOU) to Perform a Debt Collection Computer Matching Program, establish the procedures to be utilized to ensure a sharing of this burden.

It is a basic tenant of this effort that all matching activities, access to and disclosure of records, and efforts to recover funds owed will be undertaken in strict compliance with the Privacy Act, the OMB publications "Revised Supplemental Guidance for Conducting Matching Programs" and "Guidelines on the Relationship Between the Privacy Act of 1974 and the Debt Collection Act of 1982," and the due process and other provisions of the Debt Collection Act and applicable regulations.

Reporting Relationships

In its role as both the designated Lead Agency and the Chair of the Interagency Working Group, the Department of the Treasury will be responsible for establishing reporting requirements for the Interagency Working Group, for those Federal agencies which utilize the services of the group, and also, for reporting periodically to OMB on progress made and problems encountered in administering this program.

For Department of the Treasury,

W.E. Douglas,

Commissioner, Financial Management Service.

Dated: April 10, 1987.

For Office of Management and Budget,

Gerald R. Riso,

Associate Director for Management.

Dated: April 14, 1987.

For Department of Defense,

H.H. Kraft, Jr.,

Deputy Assistant Secretary of Defense (Management Systems).

Dated: April 24, 1987.

For Defense Manpower Data Center,

Kenneth C. Scheflen,

Director, DMDC.

Dated: April 16, 1987.

For the U.S. Office of Personnel Management.

Central Personnel Data File,

Phillip A.D. Schneider,

Assistant Director for Work Force Information.

Dated: April 23, 1987.

Civil Service Retired File,

Jerome D. Julius,

Deputy Associate Retirement & Insurance.

Dated: April 15, 1987.

Attachment A—Roles and Responsibilities

Agency roles and responsibilities are as follows:

Treasury Financial Management Service (FMS), lead agency, will

coordinate and monitor the implementation of the government's Federal Salary Offset program. FMS will:

- Chair the Interagency Working Group.
- Establish reporting requirements for the Interagency Working Group, agencies submitting delinquent debtor files for matching, and employing agencies.
- Report periodically to OMB and Treasury management regarding the progress of this initiative.
- Coordinate with participating agencies processing for all phases of the matching and offset procedures to ensure timely completion.
- Assist OMB in monitoring compliance with Privacy Act requirements and OMB published guidance.
- Assure agency compliance with reporting requirements on collection activity.
- Assist agencies in resolving any problems which might otherwise impede implementation of this initiative.

The Department of Defense (DoD) will:

- Negotiate the Memoranda of Understanding (example shown as Attachment B) for the matches with each agency providing the delinquent debtor file. DOD will receive and approve a Memorandum of Understanding from each creditor agency for the conduct of the match. It is in these agreements that specifics for reimbursement of DoD for costs related to the match will be contained.
- Publish a notice to match in the **Federal Register** on or about the time of the match in conformance with OMB matching guidelines.
- Perform the computer matching runs as matching agency, utilizing delinquent debtor files provided by, but not limited to, the Departments of Agriculture, Education, Housing and Urban Development, and by the Veterans Administration and Small Business Administration. DoD will match these files against civilian and retired employment files provided by the Office of Personnel Management, as well as, DoD civilian and active, retired and reserve military personnel files.
- Report the volume and dollar total of raw hits for each creditor agency match by employing agency of record to the Financial Management Service, Department of the Treasury.
- Provide a quarterly schedule of when creditor agencies are to be matched to the agencies providing the employment files.

The Office of Personnel Management will provide updated active and retired employment files on a recurring basis for matching in accordance with its agreed upon schedule with DoD.

The Office of Management and Budget will monitor privacy act compliance as a part of its ongoing oversight review responsibility.

Each creditor agency participating in the salary offset program and providing files for matching will:

- Enter into a reimbursable agreement with DoD for matching. The Agencies will draft Memorandum of Understanding for DoD approval.
- Transmit to DoD only the delinquent debtor file to be matched containing the agreed upon record fields to be matched, accompanied by format specifications enabling the match.

Each agency will designate a primary and alternate point of contact for this initiative.

Attachment B.—Example of Inter-Agency Memorandum of Understanding (MOU) To Perform a Debt Collection Computer Matching Program

Purpose

The purpose of this Memorandum of Understanding (MOU) is to establish, before any matching takes place, administrative procedures and assign responsibility for a government-wide debt collection computer matching program. The matches will be performed at the Defense Manpower Data Center (DMDC) utilizing employment records provided by the Department of Defense and the Office of Personnel Management. The employment records will be matched with records of individuals delinquent in their debt to the Federal government as supplied by the signatory creditor agency to this MOU.

General

Under authority of the Debt Collection Act of 1982, and other applicable regulations, the head of a Federal agency may request that deductions be made from the pay of an employee or member delinquent in his/her debt to the United States. This matching program will facilitate the identification of the delinquent debtor employees and members by the employment records at one location (DMDC). The matches will be performed to allow the creditor agency to receive a current home or work address in order to issue the required due process notice. The creditor agency will be responsible for sending the request for offset to the employing agency. These procedures are expected to shorten the collection agency timeframes and reduce confusion due to utilizing standard formats and procedures.

Responsibilities

Defense Manpower Data Center shall:

• Establish and maintain a system of records (S322.11 DLA–LZ, Federal Creditor Agency Debt Collection Data Base) devoted exclusively for Federal debt collection efforts containing, at the onset, a data bank record of DoD active and retired military members, including the Reserve, National Guard, and the OPM Government-wide Federal civilian and retired civilian records for computer matching purposes with any Federal creditor agency that may wish to avail itself of this opportunity to utilize this resource.

• Assure before any matching takes place that the participating creditor agency has published a system of records notice in the **Federal Register** with an adequate routine use permitting disclosure of delinquent debtor records for computer matching purposes and that DMDC publishes a proper notice of the proposed match for public comment, including the starting date, as required by the OMB Computer Matching Guidelines.

• Provide name, social security number, demographic information and current address based on a match of social security number to the creditor agency within thirty (30) days of the start of the match.

• Bill the creditor agency for match reimbursement.

The Federal Creditor Agency shall:

• Provide to DMDC before any matching occurs a copy of the full text notice of the record system(s), and any amendments thereto, originally published in the **Federal Register** (not from Privacy Act Issuances Compilation) containing an appropriate routine use authorizing the disclosure of debtor records to DMDC(DoD) for the purpose of conducting a computer matching program.[1]

• Provide only delinquent debtor records to DMDC in an agreed upon format with any specific instructions as to the control and final disposition of the creditor agency records upon completion of the match.[2]

• Assure by proper certification or statement that due process has been, or shall be, given upon locating the debtor prior to requesting any administrative or salary offset procedures according to the Debt Collection Act of 1982, 4 CFR Chapter II, 5 CFR 550.1101–.1108, and any other applicable regulations of the creditor agency.

• Provide quarterly reports to DMDC on collection activity resulting from hits of the matches in a format and content as agreed upon jointly by DMDC and the creditor agency.

• Assure that proper reimbursement is made to DoD in accordance with schedule of charges.

• Designate a primary and an alternate contact point with full name, title, address and telephone number.

Reimbursement for Match

Costs of the file maintenance, computer time and staff time for the matching effort will be reimbursed by the creditor agency to DMDC according to the following schedule of charges:

Schedule of Charges

$500 flat fee per match plus $.25 per "hit" record.

Data Security

Both the creditor agency and DMDC will safeguard individual data as required by the Privacy Act of 1974 and the OMB computer matching guidelines. Data security extends to non-hit records which will not be used for any purpose. Hard copy records will be stored in lockable desks or file cabinets and automated records will be stored in limited access computer facilities.

Duration of Agreement

This MOU will remain in force unless notified or terminated in writing by both agencies.

_____

Kenneth C. Scheflen, Director

[1] Model "Routine Use" for record system notice of creditor agency to disclose records of debtors to DMDC for conducting computer matching programs.

[2] Procedures for participation in matching program.

Date

To the Defense Manpower Data Center, Department of Defense, to conduct computer matching programs for the purpose of identifying and locating individuals who are receiving Federal salaries or benefit payments and delinquent in their repayment of debts owed to the U.S. Government under certain programs administered by the * * * (insert Federal creditor agency name) * * * in order to collect the debts under the provisions of the Debt Collection Act of 1982, (Pub. L. 97–365) by voluntary repayment, or by administrative or salary offset procedures.

General

All computer matches are performed at the Defense Manpower Data Center (DMDC) in Monterey, CA using an IBM computer system located at the Naval Postgraduate School (NPS) in Monterey, CA. Computer files of Active Duty, Retired and Reserve members, Federal Civil Service employees and retirees are maintained at the NPS Computer Center and are updated on a quarterly (for DoD files) or semiannual (for other files) basis. All file matching is performed using the full nine (9) digit social security number as the determinate.

Participation and Contract Point

All Federal agencies are eligible to participate in the matching program after entering into a written memorandum of understanding (MOU) with DMDC. A sample MOU is included in this notice. Signed agreements should be sent to: Kenneth C. Scheflen, Director, Defense Manpower Data Center, 1600 N. Wilson Blvd., Suite 400, Arlington, VA 22209–2593, Telephone (202) 696–5816.

Technical inquiries can be directed to Debt Collection Project Leader, Stewart Reiman, telephone (408) 646–2951.

Legal or policy questions can be directed to Don Rouse, Treasury FMS—telephone (202) 634–2031.

Data Information

All data submitted for a match must consist only of delinquent debts of individuals indebted under a Federal Program. At a minimum, the data must contain: Social Security Number, Name of Debtor (Last, First, MI), Amount of Delinquent Debt.

—The matching agency will provide to the creditor agency summary totals and dollar amounts of raw hits.

—Matching will be on SSN, and validated using the name. The natching agency will identify for the creditor agency invalid hits because of garbled data, incorrect SSN, same SSN, different name, etc.

—The matching agency will transmit to the creditor agency the matched records containing the following data elements from the employment records:

—Agency where employed and location.

—Address of employment and home address or latest address of record.

—The matching agency, within 30 days after the match, will as standard practice either erase or return to the creditor agency the

file of delinquent debt records unless contrary specific instructions are furnished by the creditor agency.

—The creditor agency will reimburse the matching agency for the cost of operations according to a schedule of charges set forth in the MOU.

Tape Specifications

IBM compatible, unlabled, 6250 (or 1600) BPI, fixed block, 9 track, odd parity, EBCDIC, character data. Tape(s) should be sent to: Defense Manpower Data Center, ATTN: Debt Collection Project, 550 Camino El Estero, Suite 200, Monterey, CA 93940–3231.

S322.11 DLA–LZ

SYSTEM NAME:

Federal Creditor Agency Debt Collection Data Base.

SYSTEM LOCATION:

Primary location: W.R. Church Computer Center, Naval Postgraduate School, Monterey, CA 93943–5000 Decentralized segments: Military and civilian payment and personnel centers of the military services, the Office of Personnel Management, and Federal creditor agencies. Backup location: Defense Manpower Data Center, 550 Camino El Estero, Monterey, CA 93940–3231

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Department of Defense officers and enlisted personnel, members of reserve and guard components, retired military personnel. All Federal-wide civilian employees and retirees. Individuals identified by Federal creditor agencies as delinquent in repayment of debts owed to the U.S. Government.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, Social Security Account Number, debt principal amount, interest and penalty amount, if any, debt reason, debt status, demographic information such as grade or rank, sex, date of birth, duty and home address, and various dates identifying the status changes occurring in the debt collection process.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 5514 "Installment deduction of indebtedness"; 5 U.S.C. 552a "Privacy Act of 1974"; 10 U.S.C. 136; 4 CFR Chapter II "Federal Claims Collection Standards"; 5 CFR 550.1101–.1108 "Collection by Offset from Indebted Government Employees"; Office of Management and Budget, "Revised Supplemental Guidance for Conducting Matching Programs," May 11, 1982 (47 FR 21656, May 19, 1982) and "Guidelines on the Relationship Between the Privacy Act of 1974 and the Debt Collection Act of 1982," March 30, 1983 (48 FR 15556, April 11, 1983); the Interagency Agreement for Federal Salary Offset Initiative (Office of Management and Budget, Department of the Treasury, Office of Personnel Management and the Department of Defense, April 1987).

PURPOSE(S):

The primary purpose for the establishment of this system of records is to maintain a computer data base permitting computer matching to assist and implement debt collection efforts by Federal creditor agencies under the Debt Collection Act of 1982 to identify and locate individual debtors. To increase the efficiency of U.S. Government-wide efforts to collect debts owed the U.S. Government. To provide a centralized Federal data bank for computer matching of Federal employment records with delinquent debt records furnished by Federal creditor agencies under an interagency agreement sponsored and monitored by the Department of the Treasury and the Office of Management and Budget. To identify and locate employees or beneficiaries who are receiving Federal salaries or other benefit payments and indebted to the creditor agency in order to recoup the debt either through voluntary repayment or by administrative or salary offset procedures established by law.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEMS, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Individual's name, SSN, Federal agency or military service, category of employee, Federal salary or benefit payments, records of debts and current work or home address and any other appropriate demographic data to a Federal creditor agency for the purpose contacting the debtor to obtain voluntary repayment and, if necessary, to initiate any administrative or salary offset measures to recover the debt.

The DoD Blanket Routine Uses do not apply to this record system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on magnetic computer tape.

RETRIEVABILITY:

Records are retrieved by social security number and name from a computerized index.

SAFEGUARDS:

Primary location at the W.R. Church Computer Center, Monterey, CA, tapes are stored in a controlled access area; tapes can be physically accessed only by computer center personnel and can be mounted for processing only if the appropriate security code is provided.

At the back-up location in Monterey, CA tapes are stored in rooms protected with cypher locks, the building is locked up after hours, and only property cleared and authorized personnel have access.

RETENTION AND DISPOSAL:

Records are erased within six months after each match cycle.

SYSTEM MANAGER AND ADDRESS:

Deputy Director, Defense Manpower Data Center (DMDC), 550 Camino El Estero, Monterey, CA 93940–3231

NOTIFICATION PROCEDURE:

Information may be obtained from the system manager.

RECORDS ACCESS PROCEDURE:

Requests from individuals should be addressed to the system manager. Written requests for information should contain the full name, social security number, current address and telephone number of the individual requesting information.

CONTESTING RECORD PROCEDURES:

The agency's rules for access to records and for contesting contents and appealing initial determinations may be obtained from the system manager and are contained in Defense Logistics Agency Regulation 5400.21 (32 CFR Part 1286).

RECORD SOURCE CATEGORIES:

Federal creditor agencies, the Office of Personnel Management and DoD personnel and finance centers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 3810–01–M

DEPARTMENT OF ENERGY

Voluntary Agreement and Plan of Action to Implement the International Energy Program; Meeting

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272(c)(1)(A)(i)), the following meeting notice is provided:

A meeting of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held on Wednesday, October 7, 1987, at the offices of the IEA, 2 rue Andre Pascal, Paris 16, France, beginning at 10:00 a.m.

The purpose of this meeting is to permit attendance by representatives of U.S. company members of the IAB at a meeting of the IEA's Standing Group on Emergency Questions (SEQ) which is being held at the offices of the IEA on that date. The agenda for the meeting is under the control of the SEQ. It is expected that the following draft agenda will be followed:

1. Adoption of the agenda.
2. Summary record of the 57th meeting.
3. Report on discussions of the Governing Board on future work related to oil emergency questions.
4. IEA test issues.
(a) Test Guide for Coordinated Emergency Response Measures.
(b) Status of preparations for data test/Sixth Allocation Systems Test.
5. Emergency stocks.
(a) Revision of minimum operating requirements—progress report.
(b) Mandatory stocks of IEA member countries.
(c) Questionnaire on "compensation" for early coordinated emergency response measures.
6. Other emergency preparedness issues.
(a) U.S. Plan of Action—progress report.
(b) Member countries' emergency response program reviews—status report and revised timetable.
(c) Middle East oil supply flows.
(d) New forms of oil trading—the futures market—possible implications for the IEA Oil Emergency Sharing System.
7. 1988 program of work.
8. Other topics.
(a) End-September oil market report.
(b) Base Period Final Consumption (3Q86–2Q87).
(c) OECD Electronic mailbox—a way to expedite data/information transmission.
9. Any other business.
10. Date of next meeting.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, the SEQ meeting is open only to representatives of members of the SEQ, representatives of members of the IAB, their counsel, representatives of the Departments of Energy, Justice, State, the Federal Trade Commission, and the General Accounting Office, representatives of committees of Congress, representatives of the IEA, representatives of the Commission of the European Communities, and invitees of the SEQ or the IEA.

Issued in Washington, DC, September 25, 1987.

J. Michael Farrell,
General Counsel.

Economic Regulatory Administration

[ERA Docket No. 87–25–NG]

Order Granting Blanket Authorization To Import Natural Gas; Continental Natural Gas, Inc.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of order granting blanket authorization to import natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order granting Continental Natural Gas, Inc. (CNG), blanket authorization to import natural gas. The order issued in ERA Docket No. 87–25–NG authorizes CNG to import up to 185 Bcf of natural gas over a two-year period beginning on the date of first delivery.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA–076, Forrestal Building, 100 Independence Avenue, SW., Washington, DC, 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, September 22, 1987.

Constance L. Buckley,
Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. ER87–658–000 et al]

Electric Rate and Corporate Regulation Filings; Southern California Edison Co. et al.

September 23, 1987.

Take notice that the following filings have been made with the Commission:

1. Southern California Edison Co.

[Docket No. ER87–658–000]

Take notice that on September 17, 1987, Southern California Edison Company (Edison) tendered for filing, as an initial rate schedule, the following agreement, which has been executed by Edison, San Diego Gas & Electric Company (SDG&E), the City of Anaheim, California (Anaheim), and the City of Riverside, California (Riverside) (collectively "Parties").

San Onofre Refueling Exchange Agreement among Southern California Edison Company, San Diego Gas & Electric Company, City of Anaheim and City of Riverside.

The San Onofre Refueling Exchange Agreement provides for an arrangement whereby, for system reliability purposes, a planned refueling outage can be changed to either an early refueling outage or a delayed refueling outage at the request of one or more Parties and the nonparticipating Parties will receive an exchange of energy and capacity as if the changed refueling outage had not occurred.

Copies of this filing were served upon the Public Utilities Commission of the State of California, San Diego Gas & Electric Company, the City of Anaheim, and the City of Riverside.

Comment date: October 8, 1987, in accordance with Standard Paragraph E at the end of this notice.

2. Iowa Southern Utilities Co.

[Docket No. ER87–454–000]

Take notice that on September 18, 1987, Iowa Southern Utilities Company (Iowa Southern) tendered for filing an amendment to its earlier filing in this docket.

Iowa Southern states that the purpose of the amendment is to submit: a second set of fixed charge rates by each filing utility which incorporate the 34% statutory federal income tax rate to become effective July 1, 1987; and the details supporting the calculations of the levelized rates of return and the income tax components for each filing utility.

Copies of this filing have been served upon all parties in interest.

Iowa Southern requests a waiver of the Commission's notice requirement and Iowa Southern requests that the filing be permitted to become effective May 22, 1981.

Comment date: October 8, 1987, in accordance with Standard Paragraph E at the end of this notice.

3. Central Hudson Gas & Electric Corp.

[Docket No. ER87–657–000]

Take notice that on September 17, 1987, Central Hudson Gas & Electric Corporation (Central Hudson) tendered for filing, as a supplemental rate schedule to FERC No. 70 an executed Agreement dated March 1, 1987 between Central Hudson and Orange and Rockland Utilities, Inc. (O&R). The proposed rate schedule provides for Transmission of Capacity and Energy by Central Hudson for O&R between Central Hudson's 69 Kv. transmission

interconnection with New York State Electric & Gas Corporation's (NYSE&G) West Woodbourne Substation and Central Hudson's 115 Kv. interconnection with O&R at O&R's Sugarloaf Substation and from New York Power Authority's Blenheim-Gilboa Pumped Storage Hydroelectric Plant.

The rate schedule provides for a monthly transmission charge of $1.00 per megawatt hour of Energy received from NYSE&G for O&R's account at NYSE&G's West Woodbourne Substation for delivery to O&R Sugarloaf Substation and from New York Power Authority's Blenheim-Gilboa Pumped Storage Hydroelectric Plant.

Central Hudson states that copies of the subject filing were served upon: Orange and Rockland Utilities, Inc., 75 West Route 59, Spring Valley, New York 10977.

Comment date: October 8, 1987, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Fedeal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. GP87-74-000]

Request To Reopen and Vacate Well Category Determinations; State of Pennsylvania, CNG Development Co.

September 25, 1987.

Take notice that on July 28, 1987, CNG Development Company requested the Commission to reopen and cate final NGPA section 102 well category determinations for four wells [1] due to the existence of marker wells within 2.5 miles of each well.

The question of whether refunds plus interest will be required in connection with CNG's request is a matter subject to review and final decision by the Commission.

Any person desiring to be heard or to protest this petition should file a motion to intervene or protest in accordance with Rule 214 or 211 of the Commission's rules of practice and procedure. All motions to intervene or protests should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, not later than 30 days following publication of this notice in the **Federal Register.** All protests will be considered by the Commission, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene in accordance with Rule 214. Copies of CNG's request are on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP87-144-000]

Proposed Changes in FERC Gas Tariff; Northern Border Pipeline Co.

September 24, 1987.

Take notice that on September 21, 1987, Northern Border Pipeline Company (Northern Border) tendered for filing to become a part of Northern Border Pipeline Company's FERC Gas Tariff, Original Volumes Nos. 1 and 2 the following tariff sheets:

Original Volume No. 1

First Revised Sheet Number 120
Original Sheet Number 121
First Revised Sheet Numbers 202, 203 and 204
Second Revised Sheet Number 210

Original Volume No. 2

First Revised Sheet Number 11

The revised tariff sheets were filed to accomplish two objectives. First, to change the definitions of terms in Original Volume No. 1; Contract Dekatherm-Miles, Total Maximum Receipt Quantity and Daily Receipt Quantity, and in Original Volume No. 2; Daily Contract Receipt Quantity, to provide increased operational flexibility for Northern Border and its customers. Secondly, to insert a credit worthiness standard aplicable to potential firm service pursuant to Rate Schedule T-1.

Northern Border has requested that the filed tariff sheets be effective on October 19, 1987. Copies of this filing have been sent to all of Northern Border's customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC, 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 1, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI87-855-000]

Application For Permanent Abandonment With Three-Year Limited-Term Pregranted Abandonment; Petro-Energy Exploration, Inc., et al.

Take notice that on August 28, 1987, as supplemented on September 15, 1987, Petro-Energy Exploration, Inc. *et al.*.[1] (Applicants) filed an application pursuant to Section 7(b) of the Natural Gas Act and § 2.77 of the Commission's rules for a permanent abandonment of their sale of gas to ANR Pipeline Company (ANR) from the NE/4 of section 35, T23N-R16W, Major County, Oklahoma. Applicants also request three-year limited-term pregranted abandonment for the sale of gas initially under a proposed percentage-of-

---

[1] CNGD No. 76, Aaron Leamer No. 2 (FERC No. 84-11509). CNGD No. 83, Theodore Garman No. 1 (FERC No. 84-23348). CNGD No. 395, Theodore Garman No. 2 (FERC No. 84-23349). CNGD No. 84, Wm. Somerville No. 1 (FERC No. 84-24526).

[1] The *et al.* parties are Imperial Oil Company of California; Well, Rich and Greene, Inc; Total Minatome Corporation; Petro-Search Nominee Partnership Co. and Rosemary McCord.

proceeds contract and for any subsequent sales under Applicants' small producer certificates.

In support of their application Applicants state that ANR has taken gas on an average of ½ day per month. Applicants have been and expect to continue suffering substantially reduced takes without payment.[2] As part of a settlement of contract claims against ANR, ANR agreed to terminate the contract and release the acreage. Applicants propose to sell the gas under a percentage-of-proceeds contract to Union Texas Products Corporation which will resell the gas at the tailgate of its processing facility in the spot market. Deliverability is approximately 900 Mcf/d. The gas is NGPA section 104 small producer flowing gas which is currently limited by the contract with ANR to the NGPA minimum rate.

Since Applicants have requested that their application be considered on an expedited basis, all as more fully described in the application which is on file with the Commission and open to public inspection, any person desiring to be heard or to make any protest with reference to said application should on or before 15 days after the date of publication of this notice in the **Federal Register**, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-22540 Filed 9-29-87; 8:45 am]

BILLING CODE 6717-01-M

[2] The United States Court of Appeals for the District of Columbia vacated the Commission's Order No. 436 on June 23, 1987. In vacating Order No. 436, the Court rejected challenges to the Commission's statement of policy in § 2.77 of its Regulations. Section 2.77 states that the Commission will consider on an expedited basis applications for certificate and abandonment authority where the producers assert they are subject to substantially reduced takes without payment.

[Docket No. CI87-867-000 and Docket No. CI87-880-000]

Applications for Two-Year Limited-Term; Abandonment With Pregranted Abandonment for Sales Under Small Producer Certificate; Thomas R. Fuller and Resource Reserves Co.

September 25, 1987.

Take notice that on August 31, 1987, Thomas R. Fuller and on September 3, 1987, Resource Reserves Co., c/o Carolyn Lee Baker, 1212 Main Street, Suite 364, Houston, Texas 77002, filed applications in Docket Nos. CI87-867-000 and CI87-880-000, respectively, requesting limited-term abandonment of the sale of gas to ANR Pipeline Company from their interest in the Cheap C-1 well in Harper County, Oklahoma. Applicants request the abandonment for a period of two years and request pregranted abandonment for two years for sales for resale in interstate commerce under small producer certificates of Resource Reserves Co. in Docket No. CS87-29-000 and Thomas R. Fuller in Docket No. CS87-30-000.

In support of their applications Applicants state that ANR cannot purchase the gas due to market constraints. Applicants therefore request that their applications be considered on an expedited basis pursuant to 18 CFR 2.77.[1] Estimated deliverability is 25 Mcf/d. The gas is NGPA section 104 minimum rate gas.

Since Applicants state that they are subject to substantially reduced takes without payment and have requested that their applications be considered on an expedited basis, all as more fully described in the applications which are on file with the Commission and open to public inspection, any person desiring to be heard or to make any protest with reference to said applications should on or before 15 days after the date of publication of this notice in the **Federal Register**, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-2253 Filed 9-29-87; 8:45 am]

BILLING CODE 6717-01-M

[1] The United States Court of Appeals for the District of Columbia vacated the Commission's Order No. 436 on June 23, 1987. In vacating Order No. 436, the Court rejected challenges to the Commission's statement of policy in Section 2.77 of its Regulations. Section 2.77 states that the Commission will consider on an expedited basis applications for certificate and abandonment authority where the producers assert they are subject to substantially reduced takes without payment.

[Docket Nos. CP87-451-001, -002 and -003]

Order Granting Rehearing; Northeast U.S. Pipeline Projects

Issued: September 25, 1987.

Before Commissioner: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On July 24, 1987, in Docket No. CP87-451-000 (40 FERC ¶ 61,087), the Commission issued a notice inviting applications to provide new gas service to the Northeast. The notice established a cut-off date, December 1, 1987, for the filing of new applications for certificate authority to provide such service. Applications on file as of that date would then be evaluated as a class to determine the need for a comparative evidentiary hearing. Applications filed, or amended, subsequent to that date would be considered on their merits but would not be deemed to be competitive with, or mutually exclusive to, applications filed prior to that date.

The notice afforded all interested persons an opportunity to file requests for rehearing. Such requests have been filed by Champlain Pipeline Company, Tennessee Gas Pipeline Company, a Division of Tenneco, Inc., ANR Pipeline Company, and the Vermont Department of Public Service.[1]

[1] Champlain, Tennessee and Vermont also filed motions to intervene. The motions are granted by Rule 214. However, inasmuch as the notice did not require the filing of motions to intervene as a prerequisite to filing a request for rehearing, ANR, by virtue of its request for rehearing, is also a party to this docket. The applications for new service, when filed, will be assigned separate docket numbers, and all persons having an interest in those applications will have ample opportunity to intervene in those dockets.

ANR contends that it would be "unwise and undesirable * * * for the Commission to adopt hard and fast rules which limit its ability to review reasonable *bona fide* alternatives to 'complete proposals' on file by December 1, 1987." Tennessee takes the opposite approach, urging us to rigidly adhere to the cut-off date except upon a showing of "truly extraordinary circumstances." Tennessee also asks us to define the concepts of "complete", "in compliance with the Commission's regulations", "ripe", and "amendments". Champlain raises comparable issues.

The July 24 notice does not preclude or foreclose any procedural options available to the Commission. Rather, the purpose of the notice is to enable the Commission "if it so chooses, to use December 1, 1987, as a cut-off date, so that subsequent applicants cannot delay whatever proceeding may have been established (if any) to process mutually exclusive applications that were on file, complete, and ripe for action as of December 1, 1987." Notice at p. 6.

While the Commission is determined to act expeditiously in evaluating the Northeast gas markets and any proposals that may be submitted to provide new service to that region, the Commission must necessarily reserve the flexibility to respond to the situation before it as the matter evolves. In the long run, we believe that the Commission, the potential applicants, and the potential ultimate customers would all be best served by a procedural regime that permits the Commission to determine the course of its proceedings in light of the legal and factual context before it as events transpire.

Thus, we do not wish to adopt definitions so rigid as to defeat our purpose of expeditious consideration of *bona fide* proposals. We do not wish to exclude from consideration, for instance, timely proposals that contain inadvertent minor flaws that could easily be remedied without disruption to whatever proceedings might transpire. Similarly, we do not wish to discourage parties for negotiating reasonable revisions to their proposals during the course of such proceedings. For instance, if interveners raise legitimate environmental objections to a proposed pipeline route, and if the parties then work out a mutually acceptable solution that would permit construction of a desirable pipeline along a modified route pursuant to an amendment to the application, the public interest would not be well served by a procedural framework so rigid that the only alternatives available to the parties and the Commission were (a) to proceed with consideration of the unmodified, flawed proposal or (b) to defer consideration of a modified, acceptable proposal to some later proceeding on grounds that the modification post-dated the cut-off date for consideration. Under such circumstances, the Commission would want to proceed with consideration of a modified proposal even if the modification necessitated the filing of an amendment to the application.

On the other hand, our purpose in proceeding expeditiously to consider new service to the Northeast would be defeated if applicants were permitted to meet the standards of the cut-off date by filing sketchy *pro forma* applications, applications that are patently deficient in light of our regulations, applications for proposals that are still under negotiation and are likely to be revised, or applications that the applicants are not prepared to explain, support, and, if approved, implement. The standards, therefore, must necessarily be sufficiently flexible to permit the Commission to embark promptly on expeditious consideration of meaningful, well formulated proposals that are ready to be considered—and to permit subsequent changes to those proposals if such changes are warranted—while excluding from contemporaneous consideration proposals that are in such early stages of formulation that prompt and meaningful analysis of their merits is not feasible.

In light of all of these considerations, we have established a cut-off date procedure to enable the Commission to exclude from consideration in a competitive proceeding (if one is established) applications that are not complete and ripe for consideration as of that cut-off date. In so doing, the Commission has reserved to itself the right to exercise its procedural discretion to permit consideration of particular proposals, or modifications thereof, under circumstances in which such consideration would not derogate from expeditious consideration and authorization of new facilities or services mandated by the public interest.

Tennessee seeks clarification on several other points. First, Tennessee asks us to declare that the notice does not apply to applications on file prior to July 24, 1987, or to new applications that "propose the use of existing facilities or minor facilities." The July 24 notice makes clear that all applications on file by the cut-off date will be deemed to meet the cut-off date regardless of whether they were filed prior or subsequent to July 24. The notice also makes clear that all applications will be processed on their merits. We note, in fact, that subsequent to July 24 the Commission issued several orders granting certificate authority with respect to smaller proposals to provide gas service in discrete markets in the Northeast, under circumstances in which there were no issues of mutual exclusivity. We will continue to act on pending cases, as well as on newly filed cases, as appropriate in light of the circumstances presented. The July 24 notice does not mandate a competitive evidentiary proceeding, nor any other particular procedure, for consideration of whatever applications may be filed. It merely sets a cut-off date that can be invoked—and for which all potential applicants have been afforded prior notice—in the event that a competitive evidentiary hearing is warranted with respect to particular applications received by that date.

Tennessee perceives a potential ambiguity in the July 24 notice with respect to applications filed pursuant to the optional certificate procedures. There is no ambiguity. The language quoted by Tennessee is clear: "Applications filed under our optional certificate procedures (Subpart E of Part 157 of our Regulations) are deemed not to be mutually exclusive for the purpose of establishing a comparative evidentiary hearing * * *."[2]

We turn now to Champlain's rehearing request, which raises case specific issues arising out of its own proposed project. Champlain states that it is preparing an application for certificate authority to construct new pipeline facilities running from the Quebec/Vermont border to the Boston area. Champlain states that it is very sensitive to environmental concerns in the New England area, and that it is attempting to resolve these concerns through extensive consultation with State and local agencies, elected officials, and the Commission's environmental staff. In particular, Champlain is seeking to determine a precise route for its proposed pipeline, rather than a more generalized corridor, and that in the interest of avoiding unnecessary environmental controversy it is seeking to determine that route *before* it files its application. Champlain is also seeking to complete the "engineering/design" of its pipeline as an integral part of its environmental inquiry and consultation, so as to minimize potential concern over land use, health and safety. Champlain states

[2] Notice at p. 5, n. 2.

that its current schedule for completion of this work is March 1, 1988, and requests that the Commission extend the cut-off date accordingly.[3]

We find Champlain's rehearing request highly persuasive. The densely populated nature of the Northeast U.S. puts a particular premium on careful environmental planning and consultation, and Champlain's efforts to resolve these matters in detail before filing its application are highly laudable. On the other hand, we are reluctant to delay until March 1, 1988, the commencement of our consideration of potential major new service to the Northeast. Furthermore, while there is considerable merit to Champlain's desire to refine its route in detail before filing an application, such a level of refinement is not a prerequisite to meeting the cut-off date of the July 24 notice. For purposes of meeting the cut-off date, an application that contains the information required by Subpart A of Part 157 of the Commission's Regulations would constitute a meaningful filing that is ripe for serious consideration, and the subsequent filing (after the cut-off date) of revised or more detailed route maps would not constitute an amendment that jeopardized the timeliness of the underlying application vis-a-vis the cut-off date.

In this regard, we note that our Regulations do not specify what scale of map is required to be submitted as part of the application. Champlain states in its request for clarification that it was advised by our environmental staff to include a pipeline route map at a scale of 1 inch equals 500 feet. While a map at that scale will eventually be needed in order to fully evaluate the potential environmental impact of the proposed project, that level of detail is not mandated by Part 157 of the Regulations, and is therefore not required as a prerequisite to meeting the cut-off date.

In order to be able to commence its environmental review, our environmental staff needs to have maps at the level of detail of U.S. Geological Survey (USGS) 7.5 minute series (scale 1:24000) topographic maps. The Commission's environmental staff has routinely requested applicants to file USGS 7.5 minute series maps to complete their applications in those instances when such maps have not been included in the application as originally filed. It is our understanding that such maps are readily available from the USGS. Inasmuch as the environmental review process generally requires the greatest lead time in processing this type of application, the Commission strongly encourages applicants to submit such maps at the outset, as part of their applications, so as to avoid delay in the processing of these applications. Inasmuch as such maps are not specified in Subpart A of Part 157 of the Regulations, however, the cut-off date can be met through filing whatever maps will show the location of the facilities proposed to the level of detail specified in Subpart A of Part 157.

While the discussion above was prompted by the questions posed in Champlain's request for clarification with respect to its own application, that discussion is, of course, equally applicable to all potential applicants, not just to Champlain.

In addition, in light of the matters raised by Champlain, and in recognition that the clarifications discussed in this order on rehearing might have some impact on the planning of all potential applicants, we will extend the cut-off date from December 1, 1987 to January 15, 1988.

Finally, Champlain, like Tennessee, urges us to make the cut-off date binding and absolute, contending that it would be unfair to allow potential competitors to have more time to prepare and file their applications, and to prepare them with advance knowledge of the details of Champlain's application if Champlain files its application by the cut-off date and others do not. For the reasons discussed above, the Commission deems it unwise to legally preclude itself from considering anything filed subsequent to the cut-off date. Champlain's potential competitors, however, are on notice that, absent compelling public interest justifications, such filings bear a very heavy risk of being deemed not mutually exclusive with Champlain's application, and of being processed separately from Champlain's, and on a later schedule.

The Commission orders:

(A) The cut-off date for the filing of applications to provide new gas service to the Northeast U.S., as that cut-off date is explained above and in the notice issued July 24, 1987, is extended from December 1, 1987 to January 15, 1988.

(B) The notice is clarified as discussed above.

(C) In all other respects, the requests for rehearing are denied.

(D) The Secretary shall cause this order to be published in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

---

[3] The comments filed by the Vermont Department of Public Service support Champlain's request for the extension of time, for the reasons stated by Champlain.

[Docket No. GP87-53-000]

Regarding Production-Related Costs; Trunkline Gas Co. v. Sun Exploration and Production Co.

September 25, 1987.

On May 21, 1987, Trunkline Gas Company (Trunkline) filed a complaint pursuant to 18 CFR 271.1105(d)(3) and Rule 206 of 385.206. Trunkline requests that the Production-Related Costs Board (Board) find that Sun Exploration and production Company (Sun) has collected production-related costs in violation of 18 CFR 271.1104.

Trunkline states that Sun sold natural gas to Trunkline from the West Cameron Block 639 Field, Offshore Louisiana pursuant to an April 18, 1973, gas sales contract. On September 27, 1974, the Commisison, in Docket No. CI73-878, granted Sun a certificate of public convenience and necessity, authorizing Sun to sell the subject gas at the national rate specified in § 2.56a of the Commisison's Rules of Practice and Procedure. By an amendment dated January 23, 1976, Sun and Trunkline agreed to an initial contract price in excess of the national rate with specific annual escalation. Sun petitioned for special relief in Docket No. RU76-117 and by order issued on January 19, 1977, the Commission accepted a settlement of the case and grated Sun's petition.

On May 3, 1976, Trunkline entered into a gas purchase agreement with Clark Oil Producing Company (Clark) for the sale of gas from Clark's working interest in the West Cameron Block 639 Field. The contract contained the same pricing provisions in the January 23, 1976, amendment to the gas sales contract between Sun and Trunkline. In Docket No. RI76-133, Clark sought special relief allowing it to collect a price above the national rate. On March 1, 1977, the Commission accepted a settlement of the case and granted Clark's petition.

Trunkline states that when Sun and Clark filed their Notices of Rate Change pursuant to the special relief orders each had received, the rates did not include any adjustments for the generic gathering rates then in effect.

Trunkline further states that under Section 104 of the NGPA and § 271.402(c)(1) of the Commisison's regulations, special relief rates

VOL

1987
UMI

established pursuant to § 2.56a(g) of the regulations (plus inflation adjustment) were allowed to continue in effect as the maximum lawful price. Sun filed the appropriate blanket affidavit to establish the special relief rate, increased by the contract escalation and NGPA inflation adjustment factors, as the maximum lawful price for its sales from West Cameron Block 639. Clark followed an identical course of action and on May 1, 1984, Sun acquired Clark's contract with Truckline by assignment from Clark's successor, Petro-Lewis Corporation.

Finally Trunkline states that on September 12, 1984, it received Sun's bill for production-related costs applicable to Sun's working interests in various offshore blocks dedicated to Trunkline, including West Cameron Block 639, retroactive to July 25, 1980 and it paid Sun $7,520,572.18 for Sun's production-related costs for the period from July 25, 1980 through February 28, 1985, on September 30, 1985. Trunkline further states this payment did not include any amount related to Sun's claim for production-related costs associated with its working interests in West Cameron Block 639. Trunkline asserts that on October 19, 1985, Sun unilaterally appropriated $1,263,796.85 as reimbursement for production-related costs associated with Sun's working interests in West Cameron Block 639 from other funds of Trunkline that were temporarily in Sun's possession.

Trunkline requests that the Board issue an order finding that Sun is not entitled to collect production-related costs in addition to the special relief prices paid for first sales of natural gas from its working interests in West Cameron Block 639 Field and directing Sun to refund to Trunkline the amount of $1,263,796.85 plus interest.

Under Rules 206(b) and 213(a), 18 CFR 385.206(b) and 385.213(a), Sun must file an answer to Trunkline's complaint with the Commisison unless otherwise ordered by the Commisison. Under Rule 213(e), 18 CFR 385.213(e), any person failing to answer a complaint may be considered in default, and all relevant facts stated in such complaint may be deemed admitted. Sun shall file its answer with the Commisison not later than 15 days after publication of this notice in the **Federal Register.**

Any person desiring to be heard or to protest said filing should file a protest or a motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214, 18 CFR 385.211 and 385.214. All such protest or motions should be filed not later than 15 days after publication of this notice in the **Federal Register.** Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-00246; FRL 3270-1]

FIFRA Scientific Advisory Panel Appointments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Notice is given of the appointment of three members to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel established pursuant to section 25(d) of FIFRA, as amended (86 Stat. 973 and 89 Stat. 751; 7 U.S.C. 136 et seq.). Public notice of nominees along with a request for public comments appeared in the **Federal Register** of May 20, 1987, page 18950.

FOR FURTHER INFORMATION CONTACT: By Mail: Stephen L. Johnson, Executive Secretary, FIFRA Scientific Advisory Panel (TS-769C), Office of Pesticide Programs. Office location and telephone number: Rm. 1121, Crystal Mall Building No. 2, Arlington, VA 22202, (703-557-7695).

SUPPLEMENTARY INFORMATION: Congress mandated that the Scientific Advisory Panel would consist of seven members, selected from candidates nominated by the National Science Foundation (NSF) and the National Institutes of Health (NIH). Congress also mandated that the terms of appointment would be staggered. List of nominees were obtained from NIH and NSF, and a public notice of nominees, including biographical data, appeared in the **Federal Register** as indicated above. One comment was received in response to this Notice.

My decision to appoint the following three nominees to serve as members of the Scientific Advisory Panel is based upon several factors including comments received, the need for a disciplinary mix, and the need for wide geographic representation.

Robert G. Anthony, Department of Fisheries and Wildlife, Oregon State University, Corvallis, Oregon 97331.

Edward Bresnick, Eppley Institute for Research in Cancer and Allied Diseases, University of Nebraska Medical Center, Omaha, Nebraska 68105.

Mont R. Juchau, Department of Pharmacology, School of Medicine, University of Washington, Seattle, Washington 98195.

I am reappointing Joe W. Grisham, Department of Pathology, School of Medicine, University of North Carolina, to the Panel.

Meetings of the Scientific Advisory Panel are always announced in the **Federal Register** at least 15 days prior to each meeting.

Dated: September 23, 1987.

A. James Barnes,

Acting Administrator.

BILLING CODE 6560-50-M

[FRL 3270-7]

Science Advisory Board, Radiation Advisory Committee, Radon Mitigation Subcommittee; Meetings

Under Pub. L. 92-463, notice is hereby given that a meeting of the Radon Mitigation Subcommittee of the Science Advisory Board's Radiation Advisory Committee will be held on October 13-14, 1987 at the U.S. Environmental Protection Agency, Administrator's Conference Room 1103 West Tower, Waterside Mall, 401 M Street, SW., Washington, DC. The meeting will begin at 9:00 a.m. Tuesday and adjourn no later than 5:00 p.m. Wednesday. The Radiation Advisory Committee will meet at the same location on October 15-16, 1987 beginning at 8:30 a.m. on Thursday and adjourn no later than 5:00 p.m. Friday.

The Subcommittee will review the March 9, 1987 draft of *Radon Reduction Research and Development: Program Descriptions and Plans* and two related memoranda on data analysis. Copies of the document being reviewed may be obtained by calling or writing Paul Shapiro on (202) 382-2583, Office of Environmental Engineering and Technology Demonstrations (RD-681), U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

The Committee will hear the report of the Radon Mitigation Subcommittee; review the radiation portions of *EPA Indoor Air Quality Implementation Plan;* begin a review of the radon measurement proficiency program; and

be briefed on EPA's radiation related activities. *EPA Indoor Air Quality Implementation Plan* EPA–600/8–87/014, June 1987 is available through CERI, 26 W. St. Clair Street Cincinnati, Ohio 45268 (513) 569–7562. The earlier *Report to Congress on Indoor Air Pollution and Radon Under Title IV Superfund Amendments and Reauthorization Act of 1986* is available from Richard Guimond and the documents describing the radon measurement proficiency program are available from Michael Mardis. The address for Mr. Guimond and Mr. Mardis is Office of Radiation Programs (ANR–460), U.S. Envrionmental Protection Agency, 401 M Street, SW., Washington, DC 20460 (202) 475–9600.

Both meetings are open to the public; however, seating is limited. Any member of the public wishing to attend, make brief oral comments, or submit written comments to the Subcommittee, should notify Mrs. Kathleen Conway, Executive Secretary, or Mrs. Dorothy Clark, Staff Secretary, (A101–F) Radiation Advisory Committee, Science Advisory Board, by the close of business on October 8, 1987. The telephone number is (202) 382–2552.

Kathleen W. Conway,

Deputy Director, Science Advisory Board.

Date: September 29, 1987.

[FR Doc. 87–22516 Filed 9–29–87; 8:45 am]

BILING CODE 6560–50–M

[FRL 3270–8]

Science Advisory Board, Research Strategies Subcommittee, Risk Reduction Work Group; Meeting

Under Pub. L. 92–463, notice is hereby given that a meeting of the Risk Reduction Work Group of the Science Advisory Board's Research Strategies Subcommittee will meet Monday, October 12, 1987 from 9:00 a.m. to 5:00 p.m. in the Administrator's Conference Room, 1101 West Tower of the U.S. Environmental Protection Agency's headquarters building at 401 M Street, SW., Washington, DC.

The purpose of the meeting is to begin preparation of a draft strategy on environmental risk reduction.

Members of the public wishing to attend must call Mrs. Dorothy Clark on (202) 382–2552 no later than October 6, 1987. Because October 12 is a Federal Holiday, security will only admit those members of the public who have made prior arrangements with Mrs. Clark to attend the meeting. Some form of identification, such as a driver's license, should be brought with you.

Kathleen W. Conway,

Deputy Director, Science Advisory Board.

Dated: September 25, 1987.

BILLING CODE 6560–50–M

[FRL–3270–6]

Draft NPDES General Permit for Oil and Gas Operations on the Outer Continetal Shelf (OCS) of Alaska; Beaufort Sea General Permit II

AGENCY: Environmental Protection Agency.

ACTION: Notice of draft NPDES general permit.

SUMMARY: The Regional Administrator, Region 10, is proposing to issue a draft National Pollutant Discharge Elimination System (NPDES) general permit for oil and gas stratigraphic test and exploration wells on the Alaskan Outer Continental Shelf.

The proposed Beaufort Sea II general permit will authorize oil and gas stratigraphic test and exploration wells only (not production wells) in the federal waters of the Beaufort and Chukchi seas. The permit will authorize discharges from operations in all areas offered for lease by the U.S. Department of the Interior's Minerals Management Service (MMS) during Federal Lease Sale 97. A general NPDES permit (49 FR 23734, June 7, 1984) was issued May 30, 1984, for all previous Beaufort Sea lease sales including Federal Lease Sales 71 and 87, all contiguous inshore State lease sales, and joint Federal/State Lease Sale BF. Some of the lease blocks offered but not leased in these prior sales may be reoffered in Lease Sale 97. In this case, EPA will grant coverage under this general permit as it reflects Region 10's most recent Ocean Discharge Criteria Evaluation.

When issued, the proposed permit will establish effluent limitations, standards, prohibitions, and other conditions on discharges from facilities in the general permit area. These conditions are based on the administrative record. EPA regulations and the permit contain a procedure which allows the owner or operator of a point source discharge to apply for an individual permit instead of coverage under the general permit.

A brief description of the basis for the conditions and requirements of the proposed permit is given in the fact sheet published below.

Public comment period: Interested persons may submit comments on the draft general permit to EPA, Region 10, at the address below. Comments must be submitted to the regional office by November 9, 1987.

Public hearing: Public hearings on the proposed general permit are tentatively scheduled to be held in Anchorage and Barrow, Alaska. The Anchorage hearing will be held at the Federal Building, Room C121, 710 "C" Street, Anchorage, Alaska on November 3, 1987, from 9 a.m. until all persons have been heard. The Barrow hearing will be held at the North Slope Borough Assembly Chambers on November 4, 1987, from 2 p.m. until all persons have been heard. Persons interested in making a statement at the hearing must contact Kris Flint at the address below or at (206) 442–8155 by 4:00 p.m. on October 28, 1987. Either or both of the public hearings will be cancelled if insufficient interest is expressed in them. Interested persons can contact Kris Flint between the hours of 8:30 a.m. and 4 p.m. on October 29, 1987, to confirm that the hearings will take place. At the hearings, interested persons may submit oral or written statements concerning the draft general permit.

Request for coverage: Written request for authorization to discharge under the general permit shall be provided, as described in Part I.A. of the draft permit, to EPA, Region 10, at least 60 days prior to initiation of discharges. Authorization to discharge requires written notification from EPA that coverage has been granted and that a specific permit number has been assigned to operations at the discharge site. The permit also requires permittees to notify EPA no more than seven (7) days prior to the initiation of discharges at the site, and prior to the initiation of discharges from each new well at a given site.

Administrative record: The administrative record for the draft permit is available for public review at EPA, Region 10, Room 13D, at the address listed below.

Address: Public comments and requests for coverage should be sent to: Environmental Protection Agency, Region 10, Attn: Ocean Programs Section WD–137, 1200 Sixth Avenue, Seattle, Washington 98101.

For further information contact: Duane Karna, Region 10, at the address listed above or telephone (206) 442–1413. Copies of the draft general permit and today's publication will be provided upon request.

Fact Sheet

I. General Permits and Requests for Individual NPDES Permits

Section 301(a) of the Clean Water Act (the Act) provides that the discharge of pollutants is unlawful except in accordance with the terms of an NPDES permit. Under EPA's regulations [40 CFR 122.28(a)(2)], EPA may issue a single general permit to a category of point sources located within the same geographic area if the regulated point sources:

- Involve the same or substantially similar types of operations;
- Discharge the same types of wastes;
- Require the same effluent limitations or operating conditions;
- Require similar monitoring requirements; and
- In the opinion of the Regional Administrator, are more appropriately controlled under a general permit than under individual permits.

In addition, under EPA regulations [40 CFR 122.28(c)(1)], the Regional Administrator is required to issue general permits covering discharges from offshore oil and gas facilities within the Region's jurisdiction. Where the offshore area includes areas for which separate permit conditions are required, such as areas of environmental concern, a separate individual or general permit may be required by the Regional Administrator.

The Regional Administrator has determined that exploratory oil and gas facilities operating in the area described in this general NPDES permit are more appropriately controlled by a general permit than by individual permits. The decision of the Regional Administrator is based on an evaluation of the section 403(c) Ocean Discharge Criteria (40 CFR Part 125, Subpart M) for discharges from exploratory operations into the waters of Lease Sale 97, the Agency's recent permit decisions in other Alaskan OCS areas, and the Final Environmental Impact Statement (Final EIS) for OCS Lease Sale 97.

Any owner and/or operator authorized to discharge under a general permit may request to be excluded from coverage under the general permit by applying for an individual permit as provided by 40 CFR 122.28(b). The operator shall submit an application together with the reasons supporting the request to the Director, Water Division, EPA, Region 10 ("Director"). A source located within a general permit area, excluded from coverage under the general permit solely because it already has an individual permit (i.e., a permit that has not been continued under the Administrative Procedure Act), may request that its individual permit be revoked, and that it be covered by the general permit. Upon revocation of the individual permit, the general permit shall apply. Procedures for modification, revocation, termination, and processing of NPDES permits are provided by 40 CFR 122.62—122.64. As in the case of individual permits, violation of any condition of a general permit constitutes a violation of the Act that is enforceable under section 309 of the Act.

II. Covered Facilities and Nature of Discharges

The general permit proposed today authorizes the discharge of drilling muds, drill cuttings, and associated operational wastewaters from exploratory operations in federal waters. Exploratory operations are defined as those operations involving the drilling of wells to determine the nature of potential hydrocarbon reserves. Under the permit, the number of wells from which discharges may occur is limited to a maximum of five at a single site. Exploration facilities covered by this general permit are included in the Offshore Subcategory of the Oil and Gas Extraction Point Source Category (40 CFR Part 435).

This general permit authorizes the following discharges: drilling mid; drill cuttings and washwater; deck drainage; sanitary wastes; domestic wastes; desalination unit wastes; blowout preventer fluid; boiler blowdown; fire control system test water; non-contact cooling water; uncontaminated ballast water; uncontaminated bilge water; excess cement slurry; mud, cuttings, and cement at the seafloor; and test fluids. Descriptions of discharges are given in Part II.A. of the draft permit.

Drilling muds and cuttings are the major pollutant sources discharged from exploratory drilling operations.

III. Statutory Basis for Permit Conditions

Sections 301(b), 304, 308, 401, 402, and 403 of the Act provide the basis for the permit conditions contained in the permit. The general requirements of these sections fall into three categories, which are described below. A discussion of the basis for specific permit conditions follows in section IV of this fact sheet.

A. Technology-Based Effluent Limitations

1. *BPT effluent limitations*: The Act requires particular classes of industrial discharges to meet effluent limitations established by EPA. EPA promulgated effluent limitations guidelines requiring Best Practicable Control Technology Currently Available (BPT) for the Offshore Subcategory of the Oil and Gas Extraction Point Source Category (40 CFR Part 435, Subparts A and D) on April 13, 1979 (44 FR 22069).

BPT effluent limitations guidelines required "no discharge of free oil" for discharges of deck drainage, drilling muds, drill cuttings, and well treatment fluids. This limitation required that a discharge shall not cause a film or sheen upon or discoloration on the surface of the water or adjoining shorelines, or cause a sludge or emulsion to be desposited beneath the surface of the water or upon adjoining shorelines [40 CFR 435.11(d)]. The BPT effluent limitations guideline for sanitary waste required that the concentration of chlorine be maintained as close to 1 mg/1 as possible in discharges from facilities housing ten or more persons. For facilities continuously manned by nine or fewer persons or only intermittently manned by any number of persons, the BPT effluent limitations guideline for sanitary waste required no discharge of floating solids. A "no floating solids" guideline is also applied to domestic waste. BPT limitations on oil and grease in produced water allowed a daily maximum of 72 mg/1 and a monthly average of 48 mg/1.

2. *BAT and BCT effluent limitations:* As soon as practicable but in no case later than March 31, 1989, all permits are required by section 301(b)(2) of the Act to contain effluent limitations for all categories and classes of point sources which: (1) Control toxic pollutants (40 CFR 401.15) and nonconventional pollutants through the use of Best Available Technology Economically Achievable (BAT), and (2) represent Best Conventional Pollutant Control Technology (BCT). BCT effluent limitations apply to conventional pollutants (ph, BOD, oil and grease, suspended solids, and fecal coliform). In no case may BCT or BAT be less strigent than BPT.

BAT and BCT effluent limitations guidelines and New Source Performance Standards (NSPS) were proposed on August 26, 1985 (50 FR 34592). Promulgation of the final guidelines and standards for muds and cuttings is expected to occur in mid-1988. In the absence of effluent limitations guidelines for the Offshore Subcategory, permit conditions must be established using Best Professional Judgment (BPJ) procedures (40 CFR 122.43, 122.44, and 125.3). This permit incorporates BAT and BCT effluent limitations based on the Agency's Best Professional Judgment. Previous BPJ determinations

for offshore oil and gas exploratory operations were incorporated into the general permits for the Bering and Beaufort seas (49 FR 23734, June 7, 1984), Norton Sound (50 FR 23578, June 4, 1985), and Cook Inlet (51 FR 35460, October 3, 1986).

As required by section 304(b)(2)(B) of the Act, in developing the BPJ/BAT permit conditions, the Agency considered the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, the cost of achieving such effluent reduction, non-water quality environmental impact (including energy requirements), and such other factors as the Director deemed appropriate.

The types of equipment and processes employed in exploratory drilling operations are well known to the Agency. Region 10 has issued numerous general and individual permits for such operations. The records for this permit and those earlier permits thoroughly discuss the types of equipment, facilities and processes employed in exploratory drilling operations. With regard to the engineering aspects of the application of various types of control techniques, there are no BAT permit limitations based on installation of control equipment. All proposed BAT permit limitations can be achieved through product substitution, the technology basis for the limitations in this permit. Any costs of achieving the effluent limitations and any non-water quality environmental impacts were also evaluated. A discussion of such evaluations is presented below with respect to any limitation where applicable.

As required by section 304(b)(4)(B) of the Act, Region 10 considered the same factors is determining BPJ/BCT permit conditions, but with one exception. Rather than considering "the cost of achieving such effluent reduction," any BCT determination includes "consideration of the reasonableness of the relationship between the costs of attaining a reduction in effluents and the effluent reduction benefits derived, and the comparison of the cost and level of reduction of such pollutants from publicly owned treatment works to the cost and level of reduction of such pollutants from a class or category of industrial sources." BCT effluent limitations cannot be less stringent than BPT; therefore, if the candidate industrial technology fails the BCT "cost test", BCT effluent limitations are set equal to BPT.

Region 10's evaluation of the BAT factors, as discussed above, is also applicable to BCT, as well as to the Region's best professional judgment determinations of BPT in instances where there is no BPT effluent limitation guideline for a particular wastestream. Unlike the BAT permit limitations, there is one BCT limitation based on installation of control equipment. There is a 10 percent limitation on the oil content of cuttings, based on the efficiency of conventional cuttings washers. With respect to the BCT "cost test," all BCT limitations are equal to the BPT effluent limitations guidelines or to the Region's best professional judgment determinations of BPT. Therefore, no incremental cost will be incurred.

B. Ocean Discharge Criteria

Section 401 of the Act requires that an NPDES permit for a discharge into marine waters located seaward of the inner boundary of the territorial seas be issued in accordance with guidelines for determining the degradation of the marine environment. These guidelines, referred to as the Ocean Discharge Criteria (40 CFR Part 125, Subpart M), and section 403 are intended to "prevent unreasonable degradation of the marine environment and to authorize imposition of effluent limitations, including a prohibition of discharge, if necessary, to ensure this goal" (45 FR 65942, October 3, 1980).

If EPA determines that the discharge will cause unreasonable degradation, an NPDES permit will not be issued. If a determination of unreasonable degradation cannot be made because of a lack of sufficient information, EPA must then determine whether a discharge will cause irreparable harm to the marine environment and whether there are reasonable alternatives to on-site disposal. To assess the probability of irreparable harm, EPA is required to make a determination that the discharger, operating under appropriate permit conditions, will not cause permanent and significant harm to the environment during a monitoring period in which additional information is gathered. If data gathered through monitoring indicate that continued discharge may cause unreasonable degradation, the discharge must be halted or additional permit limitations established.

The Director has concluded that there is sufficient information to determine that exploratory oil and gas facilities operating under the effluent limitations and conditions in this general permit will not cause unreasonable degradation of the marine environment pursuant to the Ocean Discharge Criteria guidelines. Conditions imposed under section 403(c) of the Act are discussed below in section IV.D., Requirements Based on the Ocean Discharge Criteria Evaluation.

C. Section 308 of the Clean Water Act

Under section 308 of the Act and 40 CFR 122.44(i), the Director must require a discharger to conduct monitoring to determine compliance with effluent limitations and to assist in the development of effluent limitations. EPA has included several monitoring requirements in this permit, as listed in the table below.

IV. Specific Permit Conditions

A. Approach

The determination of appropriate conditions for each discharge was accomplished through:

(1) Consideration of technology-based effluent limitations to control conventional pollutants under BCT;

(2) Consideration of technology-based effluent limitations to control toxic and nonconventional pollutants under BAT; and

(3) Evaluation of the Ocean Discharge Criteria for discharges in the Offshore Subcategory, assuming conditions in (1) and (2), above, were in place.

Discussions of the specific effluent limitations and monitoring requirements derived from (1) through (3) appear below in sections B. through D., respectively. For convenience, these conditions and the regulatory basis for eacha are cross-referenced by discharge in the following table.

Discharge and permit condition	Statutory basis
Drilling muds and cuttings:	
Authorized muds and additives only	BAT.
No oil-based muds	BCT.
No diesel	BAT.
10% max. oil content of cuttings	BCT.
No free oil	BCT.
3 mg/kg cadmium and 1 mg/kg mercury in barite.	BAT.
Monitoring of metals, oil content and toxicity	Section 308.
Monitor volume discharged	Section 308.
Chemical inventory	Section 308.
Depth and area related discharge rate limits.	Section 403(c).
Deck drainage:	
No free oil	BCT.
Monitor discharge rate	Section 308.
Sanitary wastes:	
No floating solids	BCT.
Chlorine 1.0 mg/l (facilities with more than 10 people).	BCT.
Monitor discharge rate	Section 308.
Domestic wastes:	
No floating solids	BCT.
Monitor discharge rate	Section 308.
Miscellaneous discharges (Discharges 006 to 014 in the permit):	
No free oil	BCT.
Monitor discharge rate	Section 308.
Inventory of added substances	Section 308.
Test fluids:	
pH 6.5–8.5	BCT & Marine Water Quality Criteria.
No free oil	BCT.

Discharge and permit condition	Statutory basis
Oil & grease limits: 48 mg/l monthly avg., 72 mg/l daily max	BCT
Monitor frequency and volume of discharge	Section 308
All discharges:	
No halogenated phenol compounds, diesel oil, sodium chromate, sodium dichromate, or trisodium nitrilotriacetic acid	BAT
No floating solids	BCT

B. BCT Requirements

1. *Oil and grease in test fluids:* Limited volumes of formation waters which are encountered during testing of the well are authorized for discharge as test fluids. Under BPT oil and grease in discharges of produced water were limited to a 48 mg/1 monthly average and a 72 mg/1 daily maximum based on oil/water separation technologies. Since formation waters may be present in test fluids, these limits are applied to the discharge of test fluids under BCT. This limitation is equal to BPT because Region 10 does not have technology performance data available at this time on which to base a more stringent limitation. As this limitation is equal to the BPT level of control, there is no incremental cost involved.

2. *Free oil and oil-based muds:* No discharge of free oil is permitted from discharges authorized by this permit. Region 10 has determined that the BPT effluent limitations guideline of no discharge of free oil from the discharge of deck drainage, drilling muds, drill cuttings, and well treatment fluids should apply to other discharges, including uncontaminated bilge water, uncontaminated ballast water, test fluids, desalination unit wastes, boiler blowdown, non-contract cooling water, excess cement slurry, blowout preventer fluid, fire control system test water, mud, cuttings and cement at the seafloor. Thus, the no free oil limitation is Region 10's best professional judgment determination of BPT controls for these discharges. They have been subject to a no free oil limitation in previous permits issued by Region 10, and past practices have not resulted in violations of this limitation.

Under the draft permit, the discharge of oil-based drilling muds (with oil as the continuous phase and water as the dispersed phase) is prohibited since oil-based muds would violate the BCT effluent limitation of no discharge of free oil.

No technology performance data available to Region 10 indicate that more stringent standards are appropriate at this time. Region 10 has, therefore, set BCT effluent limitations equal to the BPT level of control. As such, these limitations impose no incremental costs.

Compliance with the free oil limitation for deck drainage and miscellaneous discharges will be by visual observation for a sheen on the receiving water, except for deck drainage and bilge water under the conditions described below. This requirement is similar to that in the Region's BPT permits and will not result in any additional costs to the industry. The requirement was also a condition of Region 10's BAT/BCT permits for the Bering and Beaufort seas (49 FR 23734, June 7, 1984), Norton Sound (50 FR 23578, June 4, 1985), and Cook Inlet (51 FR 35460, October 3, 1986).

Compliance with the free oil limitation for muds and cuttings will be monitored by year-round use of the Static Sheen Test. The Static Sheen Test will also be required for the monitoring of deck drainage and bilge water during unstable or broken ice and stable ice conditions. This requirement for muds and cuttings was a condition of the Region's BPT permits and thus imposes no additional cost to industry. These requirements and those on deck drainage and bilge water were also conditions of the Region's BAT/BCT permits. Use of the Static Sheen Test will prevent a violation of the free oil limitation due to those discharges most likely to be contaminated with oil. This would not be possible with an after-the-fact visual observation of a sheen on the receiving water.

3. *Oil content of cuttings:* The draft general permit restricts the discharge of oil-contaminated cuttings by prohibiting the discharge of free oil (see paragraph 2. above) and by limiting the maximum mineral oil content of cuttings. The limitation of 10 percent by weight on oil content is based on the efficiency of conventional cuttings washers in removing oil from drill cuttings. Region 10 expects that if mineral oil-based drilling muds or water-based muds with high concentrations of mineral oil additives are used, drill cuttings would, at a minimum, have to be washed by cuttings washers to meet the free oil limitation. The limitation on the maximum oil content of drill cuttings has been imposed as an additional means of effectively controlling the discharge of oil from cuttings associated with these muds.

Region 10 expects that cuttings washers will routinely be required only for drilling operations which use mineral oil-based drilling muds or water-based muds with high concentrations of mineral oil additives, and not for all drilling operations. Due to the rare usage of such muds by exploratory drilling operations, very few, if any, Alaskan exploratory facilities will require the installation of cuttings washers. Any facility requiring a cuttings washer to meet the 10 percent oil limitation is expected to already require a cuttings washer to meet the BPT effluent limitation of no free oil. Therefore, there is no incremental cost involved beyond the cost of monitoring compliance, and the limitation passes the BCT cost test.

Region 10 has taken an approach to controlling the oil content of cuttings which differs from that taken by Regions 4 and 6 in the Gulf of Mexico permit (51 FR 284897). Regions 4 and 6 have imposed a visible sheen test to determine compliance of cuttings with the no free oil limit, in combination with a prohibition on the discharge of cuttings from oil-based mud systems. The prohibition on the discharge of cuttings from oil-based mud systems is necessary since some of these cuttings are expected to have free oil and the visible sheen test results would not be evident until after a discharge to the receiving water had occurred. Region 10 has chosen to require the Static Sheen Test rather than the visible sheen test. An advantage of the Static Sheen Test is that it is done prior to discharge and cuttings which do not pass the test cannot be discharged. This test is also appropriate for the harsh weather and extended periods of darkness common in Alaska. Although the 10 percent oil limitation in Region 10 is less stringent than the prohibition by Regions 4 and 6 on discharges of cuttings from oil-based mud systems, any cuttings which pass the 10 percent limitation must also pass the Static Sheen Test prior to discharge.

EPA is presently studying a newly developed technology for removing oil and grease from drill cuttings from oil-based and invert emulsion drilling muds discharged into the Gulf of Mexico. This new technology, if successful, may be able to achieve a limit lower than 10 percent oil and grease and not result in the discharge of free oil. Should this new information become available during the public notice period, Region 10 will consider it in developing the final permit.

The permit requires an analysis of drill cuttings for oil content daily when oil-based drilling fluids or oil additives are used. Analysis is also required daily when drilling fluids could be contaminated with hydrocarbons from the formation. In addition, analysis is required immediately on any sample that has failed the daily Static Sheen Test if a discharge has occurred. Two alternative analytical methods for

determining the oil content of drill cuttings are specified in the permit: (1) The soxhlet extraction procedure for oil and grease (as specified in 40 CFR Part 136), and (2) the American Petroleum Institute retort distillation procedure for oil (Recommended Practice 13B, 1980).

4. *pH*: The pH of discharged test fluids (which may have a substantially different pH from that of the ambient receiving water) has been limited to a range of 6.5–8.5 at the point of discharge. In Region 10's best professional judgment, this limitation appropriately equals a BPT level of control. No more stringent standard has been identified by the Region at this time. Therefore, Region 10 is setting a BCT effluent limitation for the pH of test fluids equal to that of BPT. This limitation will ensure that pH changes greater than 0.2 pH unit will not occur beyond the edge of the 100-meter mixing zone [40 CFR 125.121(c)]. This requirement has been and is routinely complied with by operations under previous BPT permits and thus, reflects no cost incremental to BPT.

5. *Floating solids*: The BCT prohibition on floating solids is equal to the BPT level of control for sanitary wastes. As with the free oil limitations for other waste streams, Region 10 has determined that the BPT effluent limitations guideline of no discharge of floating solids from the discharge of sanitary wastes should apply to all other discharges as well. Thus, the no floating solids limitation is Region 10's best professional judgment determination of BPT limitations for these discharges. They have been subject to this limitation in previous permits issued by Region 10, and past practices have not resulted in violations of this limitation. No technology performance data available to Region 10 indicate that a more stringent standard is appropriate at this time, Therefore, Region 10 has determined that the BCT effluent limitation on floating solids from these discharges is equal to the BPT level of control. As such, the extension of this limitation to all discharges will involve no incremental cost.

6. *Chlorine*: The requirement of maintaining residual chlorine levels as close as possible to, but no less than 1 mg/1 in sanitary waste discharges for facilities manned by ten (10) or more people is a BCT determination equal to BPT. There is therefore no incremental cost to the industry.

C. BAT Requirements

1. *Diesel oil:* The discharge of drilling muds and associated cuttings which have been contaminated diesel oil is prohibited. Diesel, which is sometimes added to a water-based mud system, is a complex mixture of petroleum hydrocarbons, known to be highly toxic to marine organisms and to contain numerous toxic and nonconventional pollutants. While this limitation thereby controls the toxic as well as nonconventional pollutants present in diesel, Region 10's primary concern is to control the toxic pollutants. The pollutant "diesel oil" is being used as an "indicator" of the listed toxic pollutants present in diesel oil which are controlled through compliance with the effluent limitation (i.e., no discharge). The technology basis for this limitation is product substitution of less toxic mineral oil for diesel oil.

Diesel as an Indicator of Toxic Pollutants: Region 10 selected "diesel" as an "indicator" as an alternative to establishing limitations on each of the specific toxic and nonconventional pollutants present in the diesel-contaminated waste streams. The listed toxic pollutants found in various diesel oils include naphthalene, benzene, ethylbenzene, phenanthrene, toluene, fluorene, and phenol. Diesel oil may contain from 20 to 60 percent by volume aromatic hydrocarbons. The light aromatic hydrocarbons, such as benzenes, naphthalenes, and phenanthrenes, constitute the most toxic major components of petroleum products. Mineral oils, with their lower aromatic hydrocarbon content and lower toxicity, contain lower concentrations of toxic pollutants than do diesel oils. Diesel oil also contains a number of nonconventional pollutants, including polynuclear aromatic hydrocarbons such as methylnaphthalene, dimethylnaphthalene, methylphenanthrene, and other alkylated forms of each of the listed toxic pollutants.

The Region has determined that eliminating the discharge of drilling fluids contaminated with diesel oil will reduce the levels of toxic pollutants present in discharged fluids. Results of the EPA/API Diesel Pill Monitoring Program (DPMP) and other studies show that when the amount of the diesel is reduced in drilling muds, the concentrations of toxic pollutants and the overall toxicity and the fluid generally is reduced. Available data clearly establish that diesel oil as a class contain significantly higher levels of toxic pollutants than do mineral oils as a class. It is reasonable and appropriate to conclude that BAT-level control of toxic pollutants (i.e., reduction in concentrations through substitution of mineral oil for diesel oil) will be achieved by regulating diesel oil as an indicator pollutant.

Region 10 has concluded that establishing effluent limitations for each of the seven toxic pollutants present in diesel oil is not economically or technically feasible at this time. The level achievable by BAT controls on the specific toxics can be calculated using available data on the three mineral oils which have been extensively characterized. However, the limited data on the many diesel and mineral oils, mud formulations, and the various additives used, and on the unquantified effects of drilling discharges all frustrate an attempt to develop specific toxic pollutant effluent limitations at this time.

Not only is it infeasible to establish limitations on the specific toxic pollutants, but to comply with specific limitations on each of the toxic pollutants would be costly and technically complex. The analytical costs for specific pollutant analyses would be much greater than the cost of analyzing for diesel by gas chromatography alone. The high cost of compliance monitoring, which may include awaiting results of analyses, which must be conducted onshore, possibly outside the State of Alaska, also would be unwarranted. Either operators would have to delay discharge until monitoring results confirmed compliance or they would discharge and risk permit noncompliance. A permit limitation that prohibits the discharge of diesel oil is economically and technologically feasible and allows a determination of permit compliance prior to discharge.

Mineral Oil as a Substitute of Diesel Oil: In the proposed modification to the Bering and Beaufort seas general permits (50 FR 29600), Region 10 presented information pertaining to the operational performance of mineral oil as a substitute for diesel oil. This information is herein incorporated by reference. API and other parties have contended in the past that survey data on the relative success rates of diesel oil and mineral oil pills refute the above findings that mineral oil is an acceptable substitute for diesel oil. Region 10 has carefully reviewed all the available data concerning the 1983–1984 API (Burgbacher 1985) and the 1983–1986 Offshore Operators Committee (OOC) (Ayers et al. 1987) surveys as well as results from the DPMP (U.S. EPA and API 1987).

In spite of industry's claim that diesel pills are more effective than mineral oil pills, the OOC survey did show that mineral oil was used by operators in 41

percent of the stuck pipe incidents. Of the 506 incidents in the OOC survey, 298 (or 59 percent) were treated with a diesel pill, while 208 (or 41 percent) were treated with a mineral oil pill. For some operators, mineral oil was the material of choice. Three operators out of 16 used mineral oil pills exclusively. It can be concluded that during the period of this study, mineral oil was in common use by operators in the Gulf of Mexico.

Mineral oil is also commonly planned for use in drilling operations on the Alaskan OCS. Operators under Region 10's existing Bering and Beaufort seas general permits have routinely requested authorization in advance to discharge these products. Differential sticking is not an uncommon drilling problem, and it is planned for in advance of drilling operations.

Results to date from the EPA/API DPMP also shed doubt on the industry's position that mineral oil is not an acceptable substitute for diesel oil in pill applications. The success rate of diesel pills as of April 21, 1987 in the DPMP (35.9 percent) was comparable to that reported for mineral oil pills in the OOC survey (32.7 percent). It is not clear why the diesel pill success rate in the DPMP was lower than that reported in the OOC survey (52.7 percent), since there were no apparent factors that might account for this difference. Both tabulations included data from the Gulf of Mexico and incorporate only the first pill of multiple pill sticking events. These findings are consistent with the other information available to Region 10 supporting the determination that mineral oil is an operationally acceptable substitute for applications where diesel oil has been used.

In summary, regarding the technology of product substitution, mineral oil-based fluids have a demonstrated product development and performance as acceptable substitutes for diesel oil-based fluids. This determination is based on the following: (1) The availability and successful formulation and use of chemical additives that are compatible with mineral oils, (2) the commercial availability of mineral oil spotting fluids, and (3) the demonstrated performance of mineral oil spotting fluids as documented by published case histories (see 51 FR 29604–06) and (4) a consideration of the performance statistics from the 1983–1984 API surveys, the 1983–1986 OOC survey, and the Diesel Pill Monitoring Program.

Cost Considerations: The prohibition on the discharge of diesel oil is a technology-based BAT limitation based on product substitution. Low toxicity mineral oils are available as product substitutes for diesel oil, and do not impose unreasonable additional costs on industry. Region 10 has quantified the increased cost associated with the use of a mineral oil pill in place of a diesel pill by assuming that mineral oil would be stored in a rented tank on the rig. The details of this analysis are contained in the proposed modification to the Bering and Beaufort seas general permit. The total cost per mineral oil pill is estimated to be $22,765 ($7,665 for oil, $13,900 for chemical additives, and $1,200 for storage tank rental). Estimates of the total cost for use of diesel pills range from $19,700 up to $32,200 (including hauling the contaminated mud ashore). If removal and barging of the mineral oil pill is required to meet the limitations on toxicity or free oil, the increased cost of a mineral pill over a diesel pill may be attributed primarily to the increased cost of mineral oil ($5,500), chemical additives ($4,700), and tank storage ($1,200), resulting in a total increased cost of $11,400.

The cost of drilling an exploratory well is approximately $40 to $50 million in the Beaufort Sea, not including the island or drilling structure, and roughly $20 to $30 million in the Bering Sea (Weeks and Weller 1984). The increased cost due to a mineral oil pill is approximately 0.05 percent or less of the total drilling cost. The cost associated with the prohibition on the discharge of diesel oil clearly is economically achievable for Alaskan offshore operations.

Environmental Concerns: While an environmental assessement under section 403(c) was not the basis for the limitation, Region 10, however, is considering the general environmental effects of diesel-contaminated muds in developing the proposed diesel oil prohibition. Diesel oil is highly toxic to marine organisms in the water column, but also poses a potential longer term threat to bottom-dwelling (benthic) organisms. Certain diesel oils, such as the frequency used No. 2 diesel fuel oil "are among the most toxic petroleum products to marine organisms" (National Research Council 1983, p. 105). Laboratory studies have demonstrated the higher toxicity of diesel oils relative to mineral oils (e.g., see U.S. EPA 1985, p. 4–34). Since diesel oil is known to be highly toxic, substitution of low toxicity mineral oils for diesel in drilling fluids will reduce the poptential hazard to marine organisms from these discharges.

Alternatives to Diesel Oil Prohibition (Removal of Diesel Pill and Oil Limitation): One suggested alternative to the diesel oil prohibition would be to allow the discharge of drilling muds in which a diesel pill had been used, provided that the pill is removed and the residual drilling mud meets specified limitations on oil content. Such an approach depends on accomplishing effective pill removal such that the drilling mud can meet all other effluent limitations. The oil content limitation would be set at a level which not only reflects BAT control of toxic pollutants in diesel oil but also provides adequate safeguards for the marine environment. The Diesel Pill Monitoring Program (DPMP) was conducted to address the effectiveness of pill recovery in removing diesel oil from drilling muds. Based on results available to date, Region 10 has concluded that the recovery techniques being implemented in the DPMP to date are not successful in recovering the diesel pill and reducing mud toxicity to acceptable levels. DPMP results to date indicate that the toxicity of drilling muds increases with their diesel oil content, and that pill recovery techniques currently in use may leave up to 30 percent of the diesel oil added as a pill. Hence, Region 10 has determined that the prohibition on the discharge of drilling fluids and cuttings contaminated with diesel oil is appropriate for the BAT level of control.

Region 10 has considered using "free oil," "oil-based drilling fluids," and "oil content of cuttings" as indicators of toxic pollutants. While the Region has determined that such effluent limitation will control the discharge of toxic pollutants in diesel oils, it is unnecessary to designate these pollutants as indicators since the same levels of control have been established under BCT, which are equal to levels of control required by the BPT effluent limitations guidelines. Therefore, redundant limitations under BAT are not proposed for these pollutant parameters.

Conclusion: Region 10 has evaluated alternative control technologies and alternative control parameters to reduce the toxic pollutants in discharged drilling muds. Based on this evaluation, the Region has determined that the prohibition on the discharge of diesel contaminated drilling mud is reasonable and appropriate since complete diesel pill recovery is unproven and substitution of a mineral oil pill for a diesel pill is technologically feasible and economically achievable.

2. *Mercury and cadmium in barite:* The permit contains limitations of 1 mg/kg mercury and 3 mg/kg cadmium in barite, a major constituent of drilling muds. These restrictions are designed to limit the discharge of mercury, cadmium, and other potentially toxic metals which can occur as contaminants in some sources of barite. An identical limitation is included in the general permits for the

Bering and Beaufort seas, Norton Sound, and Cook Inlet.

As discussed in the facts sheets for the above permits, the justification for the limitation under BAT is product substitution; i.e., Alaskan operators can substitute "clean" barite, which meets the above limitations, for contaminated barite which does not. Numerous offshore exploratory wells have been drilled in Alaska over the past years, and chemical analyses have shown that the barite used has not exceeded the limitations. Given that "clean" barite is available and that operators in the above referenced general permit areas have been complying with an identical limitation, Region 10 believes that this limitation is both technologically feasible and economically achievable.

Region 10 has determined that it is impractical at this time to place the limitations on drilling mud until additional data are collected.

Furthermore, if the limitation were placed on the drilling mud rather than on the barite, it would not be feasible for an operator to determine in advance if the discharge complied with the permit requirements since metals analyses must be conducted at commercial laboratories onshore. Such a requirement may impose costly and unreasonable delays while the analyses were being conducted.

Region 10 does recognize the possibility of changes in the available supply of "clean barite. The draft permit contains a provision (Part II.B.1.g.) which would allow the Director the discretion to grant a waiver from the limitations on a case-by-case basis if the permittee (1) satisfactorily demonstrates that barite which meets the limitation is not available, and (2) provides results of analyses of the substitute barite. In determining the availability of "clean" barite under this provision, Region 10 will reasonably consider all relevant factors, including the cost of obtaining barite which meets the limitations.

3. *Generic muds and authorized additives.* The draft permit limits the discharge of toxic substances in drilling fluids of allowing only the discharge of generic drilling muds (listed in Table 1 of the draft permit) and additives for which acceptable bioassay or chemical data are available. Permittees are required to certify in advance of discharge that only generic drilling muds and authorized additives will be discharged.

The generic muds listed in Table 1 of the draft permit are the same generic muds listed on Table 1 of the Cook Inlet NPDES general permit (51 FR 35460, October 3, 1986). The six listed generic muds are the result of several changes to the original eight generic muds (listed on previous tables in permits for Norton Sound, Bering Sea, and Beaufort Sea). Three lignosulfonate muds (previously 2, 7, and 8) have been combined into a single mud, Generic Mud No. 2. The Region will use the toxicity of the most toxic of the three muds (old Generic Mud No. 8) in performing additive toxicity calculations. If a permittee requests authorization to discharge an additive in Generic Mud No. 2 as listed in Table 2 of this draft permit and can demonstrate that generic mud components will not exceed the concentrations of old Generic Mud Nos. 2 or 7, Region 10 will use the toxicity values for those muds instead. Reference to "generic muds" throughout this fact sheet means the six muds currently listed on Table 1 of the draft permit.

Authorized additives which may be discharged in combination with Generic Muds Nos. 2 through 6 are listed in Table 2 of the draft permit. The Region has determined that the toxicity limitations (i.e,, generic muds and authorized additives) constitute a reasonable approach which is expected to control not only listed toxic pollutants, but other toxic substances (i.e., toxic nonconventional pollutants) as well. The technology basis for this permit condition is product substitution: that is, mud additives and components which would cause the toxicity of a mud system to exceed that of Generic Mud No. 1 can be replaced by less toxic mud additives and components. This principle has been successfully applied in Region 10 with the development of several "non-generic" muds. These "non-generic muds" are functionally similar to Generic Mud No. 1 but they are less toxic and may be used with specialty drilling fluid additives (e.g., polymers) without exceeding the toxicity of Generic Mud No. 1.

Permittees may discharge additives listed in Table 2 of the draft permit up to the specified concentrations in Generic Muds Nos. 2 through 6 without prior authorization. This table is an updated version of Table 2 in the Cook Inlet general permit (51 FR 35460, October 3, 1986). Tables 1 and 2 of this permit may be administratively updated during the effective period of the permit. Updated versions will be mailed to permittees when they become effective, and will supersede all earlier versions. Any additive or mud receiving authorization in the future by administrative update will be evaluated according to the regional criteria used for this permit before the tables are amended.

Most additives listed in Table 2 of the permit may not be discharged in Generic Mud No. 1 without prior authorization because Region 10 has determined that the addition of additives would cause the toxicity of the discharged mud to be more toxic than Generic Mud No. 1 alone. The only additives listed on Table 2 which may be added to Generic Mud No. 1 are: aluminum stearate; calcium carbide; cellophane flakes; flakes of silicate mineral mica; inert spheres (glass or plastic); basic zinc carbonate (Mil-Gard); crushed granular nut hulls; sodium polyphosphate; vegetable plus polymer fibers, flakes, and granules; zinc carbonate and lime; and zinc oxide (Sulf-X ES). (Mention of any trade names or commerical products does not constitute endorsement or recommendation by the U.S. Environmental Protection Agency for use.). These additives were originally authorized in Table 2 of the Bering Sea (AKG283000) and Beaufort Sea (AKG284000) general permits. They are not expected to appreciably affect the toxicity of Generic Mud No. 1. Although the most recent versions of Table 2 (Norton Sound [AKG287000] and Cook Inlet [AKG285000]) did not clearly exclude other additives from discharge in Generic Mud No. 1, the Region has not authorized any other additives. Thus, this condition is not expected to have any effect on industry.

Any discharge of a generic mud which has been modified by addition of an additive not listed in Table 2 requires prior authorization by Region 10. Permittees may request authorization to discharge additives (including mineral oils) not listed in Table 2 by submitting appropriate information and bioassay data in advance of discharge. Region 10 will determine whether the use of requested additives is likely to cause the mud system to be more toxic than Generic Mud No. 1, which is the base formulation the Agency uses to determine acceptable toxicity levels for discharge of fluids. Other criteria (e.g., persistence and degradation) are also considered in the evaluation process, as appropriate. For the evaluation of mineral oil additives the draft permit contains a provision (Part II.B.1.f.) which allows an exception for the discharge of muds which exceed the toxicity of Generic Mud No. 1 if the least toxic available alternative is discharged.

In some cases, interim authorizations for the discharge of muds and additives may be granted if perliminary bioassay data are submitted and appear acceptable but the Region determines that additional bioassay testing or other analyses are required. For example, such testing may be required to examine possible cumulative or synergistic

effects if the additive is to be used in combination with a number of other additives or if a "non-generic mud" (described above) is to be used, with or without additives. Because the additional testing may take a considerable amount of time to conduct, interim authorization to discharge may be granted, if a reasonable amount of data are available, so that operations are not impaired for an unreasonable amount of time. The information obtained under the requirements of an interim authorization will be used in further evaluations of the subject additives or muds. Thus, interim authorizations do not set a precedent for future full authorization of the subject additives or muds. Interim authorizations may require testing a used drilling mud from a rig.

This approach to limiting toxicity is expected to control the discharge of listed toxic as well as nonconventional pollutants is drilling muds. For example, the toxicity of muds containing lubricants, including mineral oil products, may vary widely, and such additives may greatly increase the toxicity of the mud. Studies on diesel-contaminated drilling muds have shown toxicity to be strongly correlated with the content of aromatic hydrocarbons, which include listed toxic pollutants. Some mineral oils also contain aromatic hydrocarbons which are listed toxics, such as fluorene, naphthalene, and phenanthrene. The toxicity of muds containing these oils is assumed to be caused, in part, by the listed toxic pollutants as well as by the nonconventional pollutants. Region 10 has determined that it is technically and economically infeasible to directly limit the toxic pollutants in drilling muds, as discussed above in section IV.C.I. Therefore, the Region has determined that the toxicity limitations constitute a reasonable approach which is expected to control not only listed toxic pollutants, but other toxic substances (i.e., toxic nonconventional pollutants) as well.

Under section 308 of the Act, compliance with this permit condition will be monitored in two ways. First, by requiring that permittees certify that only generic muds and authorized additives will be discharged; and second, by requiring that permittees submit an end-of-well inventory listing all chemicals and the amounts of each added to each mud system. In addition, permittees must analyze at least one mud sample for metals content and toxicity. The draft permit requires that any discharged mud system which has a mineral oil lubricity of spotting agent must be sampled and analyzed when the mineral oil content is highest. In the event that no mineral oil lubricity or spotting agents are used, analyses are required on a sample of discharged mud use at the greatest well depth, typically referred to as an "end-of-well" sample. The metals data will be used to verify that mercury and cadmium limits on barite are adequately controlling metal concentrations in used muds. The Drilling Fluids Toxicity Test will provide a comparsion between the toxicity of used muds containing mixtures of additives and the bioassay data submitted on individual additives prior to discharge.

4. *Other toxic and nonconventional compounds.* Under the permit discharges of the following pollutants are prohibited: halogenated phenol compounds, trisodium nitrilotriacetic acid, sodium chromate, and sodium dichromate. The class of halogenated phenol compounds includes toxic pollutants, and sodium chromate and sodium dichromate contain chromium, also a toxic pollutant. Trisodium nitrilotriacetic acid is a nonconventional pollutant. The discharge of these compounds was previously prohibited in the BPT general permits for the Beaufort Sea and Norton Sound (48 FR 54881, December 7, 1983) as well as in the BAT/BCT general permits for the Bering and Beaufort seas, Norton Sound, the Cook Inlet. These compounds are therefore subject to BAT limitations. Bcause operators complied with this provision in the BPT permit, there is no additional cost to the industry.

The draft permit contains a provision that the discharge of surfactants, dispersants, and detergents shall be minimized except as necessary to comply with the safety requirements of the Occupational Health and Safety Administration and the Minerals Management Service. These products contain primarily nonconventional pollutants. This provision previously appeared in the BPT permits for the Beaufort Sea and Norton Sound, as well as in the Region's other BAT/BCT permits. Because operators complied with the provision in the BPT permits, there is no additional cost to the industry.

D. Requirements Based on the Ocean Discharge Criteria Evaulation

1. *Drilling muds, cuttings, and washwater:* Additional restrictions on these discharges are necessary to ensure no unreasonable degradation of the environment. Lease Sale 97 includes water depths from 2 to about 1,000 meters deep. Discharge rate limitations on total muds and cuttings have been established in the Ocean Discharge Criteria Evaluation process in order to allow adequate dispersion of the discharges. These maximum rates are:

- 1,000 bbl/hr for discharges into waters greater than 40 m in depth,
- 750 bbl/hr for discharges into waters greater than 20 m but not more than 40 m in depth.
- 500 bbl/hr for dicharges into waters greater than 5 m but not more than 20 m in depth, and
- 250 bbl/hr for dicharges into waters greater than 2 m but not more than 5 m in depth.

These limits are necessary because for any given discharge rate, the dilution of drilling muds and cuttings is not as great in shallow waters as in deeper waters. However, at any particular water depth, greater dilution close to the discharge point will be achieved with a lower discharge rate. These maximum rates will ensure that acceptable toxicity limits will not be exceeded at the edge of the 100 m mixing zone (Bigham et al. 1984, p. 62).

Discharge of muds, cuttings, and washwater are prohibited in the following three areas: (a) Between the shore (mainland and island) and the 2 m isobath, (b) within 1000 m of river mouths or deltas during unstable or broken ice or open water conditions, and (c) near the Stefansson Sound Boulder Patch (see Part II.B.2. and 3. of the permit).

With regard to (a) and (b) above, EPA has extensively studied the nearshore zone of the Alaskan Beaufort Sea in two Ocean Discharge Criteria Evaluations (Jones & Stokes 1983, 1984). These evaluations have clearly shown that these nearshore areas provide important feeding and migratory habitat for a large number of species including fish, waterfowl, and mammals. Further, these are areas provide essential feeding and preferred habitat for species of major importance for substance and commercial fisheries. Concerning (c) above. Region 10 proposes a permit that does not authorize discharges within 1000 m of the Stefansson Sound Boulder Patch as defined by Dunton et al. (1983). The "Patch" is a rare and unique biological community that is susceptible to adverse affects caused by discharged drilling muds and cuttings. In accordance with 40 CFR 125.123(b), the Director has prohibited these discharges as the Region has determined they will cause inreasonable degradation of the marine environment. These prohibitions are also contained in the previous Beaufort Sea NPDES general permit (49 FR 23734, June 7, 1984).

Additionally, three areas included in the draft permit are of particular concern to Region 10. They involve discharges of drilling muds and cuttings: (a) to open water in water depths from 2–5 m, (b) below-ice to water depths shallower than 20 m, and (c) within 1000 m of an area of biological concern (i.e., a unique biological community or habitat). The Director has determined that controlled discharges to these areas, in accordance with 40 CFR § 125.123 (a) and the limitations and conditions in the draft permit, will not cause unreasonable degradation of the marine environment. Monitoring is required to verify that the discharge of effluents to these areas will not produce conditions in the future that would lead to unreasonable degradation. These monitoring requirements are the same as those required by the previous Beaufort Sea general permit, except that the monitoring requirements for below-ice discharges have changed from "any depth" to "waters less than 20 m deep." Region 10 believes that the OOC (Offshore Operators Committee) model can successfully be used to predict the fate of under-ice discharges into waters greater than 20 m deep (excluding ice thickness).

2. *Other discharges (003–015).* These discharges are adequately controlled by the technology-based limitations in Part II.C. through E. of the draft permit to ensure no unreasonable degradation of the marine environment due to those discharges.

V. Other Legal Requirements

A. Oil Spill Requirements

Section 311 of the Act prohibits the discharge of oil and hazardous materials in harmful quantities. Routine discharges specifically controlled by the permit are excluded from the provisions of section 311. However, this permit does not preclude the institution of legal action or relieve permittees from any responsibilities, liabilities, or penalties for other, unauthorized discharges of oil and hazardous materials which are covered by section 311 of the Act.

B. Endangered Species Act

Based on information in the Draft Ocean Discharge Criteria Evaluation and in the Final Environmental Impact Statement prepared for Federal Lease Sale 97, Region 10 has concluded that the discharges authorized by this general permit are not likely to adversely affect any endangered or threatened species nor adversely affect its critical habitat. Region 10 is requesting written concurrence from the U.S. Fish and Wildlife Service and the National Marine Fisheries Service on this determination. Region 10 will consult with the services as appropriate, depending upon the outcome of the request for concurrence, and otherwise will comply with the requirements of section 7 of the Endangered Species Act before issuing the final permit.

C. Coastal Zone Management Act

EPA has determined that the activities authorized by this general permit are consistent with local and state Coastal Management Plans. The proposed permit and consistency determination will be submitted to the State of Alaska for state interagency review at the time of public notice. The requirements for State Coastal Zone Management Review and approval must be satisfied before the general permit may be issued.

D. Marine Protection, Research and Sanctuaries Act

No marine sanctuaries as designated by this Act exist in the vicinity of the permit areas.

E. State Water Quality Standards and State Certification

No state waters are included in this permit.

F. Executive Order 12291

The Office of Management and Budget has exempted this action from the review requirements of Executive Order 12291 pursuant to section 8(b) of that order.

G. Paperwork Reduction Act

EPA has reviewed the requirements imposed on regulated facilities in this draft general permit under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Most of the information collection requirements have already been approved by the Office of Management and Budget (OMB) in submissions made for the NPDES permit program under the provisions of the Clean Water Act. In addition, the environmental monitoring requirements pursuant to section 403(c) of the Clean Water Act in Part II.B.4 of this permit are similar to the monitoring requirements that were approved by OMB for the previously issued Beaufort Sea general permit (June 7, 1984; 49 FR 23734) and the Norton Sound general permit (50 FR 23578, June 4, 1985). The final general permit will explain how the information collection requirements respond to any OMB or public comments.

H. The Regulatory Flexibility Act

After review of the facts presented in the notice of intent printed above, I hereby certify, pursuant to the provisions of 5 U.S.C. 605(b), that this general permit will not have a significant impact on a substantial number of small entities. This certification is based on the fact that the regulated parties have greater than 500 employees and are not classified as small businesses under the Small Business Administration regulations established at 49 FR 5024 *et seq.* (February 9, 1984). These facilities are classified as Major Group 13—Oil and Gas Extraction SIC 1311 Crude Petroleum and Natural Gas.

Robert Burd,

Acting Regional Administrator, Region 10.

BILLING CODE 6560–50–M

[OPP-240077; FRL-3266-4]

State Registration of Pesticides; Alabama, et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received notices of registration of pesticides to meet special local needs under section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, from 23 States. A registration issued under this section of FIFRA shall not be effective for more than 90 days if the Administrator disapproves the registration or finds it to be invalid within that period. If the Administrator disapproves a registration or finds it to be invalid after 90 days, a notice giving that information will be published in the Federal Register.

DATE: The last entry for each item is the date the State registration of that product became effective.

FOR FURTHER INFORMATION CONTACT: Owen F. Beeder, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC. Office location and telephone number: Room 716A, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703)-557-7893.

SUPPLEMENTARY INFORMATION: This notice only lists the section 24(c) applications submitted to the Agency. The Agency has 90 days to approve or disapprove each application listed in this notice. Applications that are not approved are returned to the appropriate State for action. Most of the registrations listed below were received by the EPA in May through July 1987. Receipts of State registrations will be published periodically. Of the following registrations, none involve a changed-use pattern (CUP). The term "changed-use pattern" is defined in 40 CFR 162.3(k) as a significant change from a use pattern approved in connection with the registration of a pesticide product. Examples of significant changes include, but are not limited to, changes from a nonfood to food use, outdoor to indoor use, ground to aerial application, terrestrial to aquatic use, and nondomestic to domestic use.

Alabama

EPA SLN No. AL 87 0003. ICI Americas, Inc. Registration is for Gramoxone Super Paraquat Herbicide to be used on fescue to control endophyte. June 30, 1987.

Arizona

EPA SLN No. AZ 87 0006. Dow Chemical. Registration is for Lorsban 50W to be used on fruit and nut crops to control various insects. February 24, 1987.

EPA SLN No. AZ 87 0011. Gowan Co. Registration is for Prokil Dicofol EC to be used on Bermudagrass grown for seed to control mites. June 15, 1987.

EPA SLN No. AZ 87 0015. Gustafson, Inc. Registration is for Gustafson Flo-Pro IMZ Flowable Systemic Fungicide to be used as wheat and barley seed treatment to control common root rot and barley leaf stripe. July 27, 1987.

EPA SLN No. AZ 87 0016. Wilbur-Ellis Co. Registration is for Nu-Zone 10ME to be used on wheat and barley as seed treatment to control common root rot and barley leaf stripe. July 27, 1987.

California

EPA SLN No. CA 87 0002. Lake County Dept. of Agriculture. Registration is for Grasshopper Bait to be used on various crops to control grasshoppers. January 12, 1987.

EPA SLN No. CA 87 0011. California Dept. of Water Resources, Division of Flood Management. Registration is for Rodeo to be used on settling basins and flood channels to control alders, poison oak, wild roses, and willows. February 26, 1987.

EPA SLN No. CA 87 0016. California Dept. of Human Services. Registration is for Cythion Premium Grade Malathion to be used on wild rice to control mosquitoes. May 11, 1987.

EPA SLN No. CA 87 0018. Northrup King Co. Registration is for Malathion 25 Insect Spray to be used on seed trials of various commodities to control aphids. May 15, 1987.

EPA SLN No. CA 87 0019. Monterey County Agricultural Commissioner. Registration is for Mesurol 75 Wettable Powder to be used on sugar beets grown for seed to control linnets. May 20, 1987.

EPA SLN No. CA 87 0021. Wilbur-Ellis Co. Registration is for Wilbur-Ellis Harvest Aid to be used on field corn (grain) for desiccation of corn grown for seed. April 3, 1987.

EPA SLN No. CA 87 0022. Wilbur-Ellis Co. Registration is for Wilbur-Ellis Harvest Aid to be used on okra and cauliflower grown for seed for desiccation. March 3, 1987.

EPA SLN No CA 87 0023. Wilbur-Ellis Co. Registration is for Wilbur-Ellis Harvest Aid to be used on wheat grown for seed to control various weeds. March 3, 1987.

EPA SLN No. CA 87 0024. Imperial County Agricultural Commissioner. Registration is for Poast to be used on alfalfa to control grassy weeds. June 1, 1987.

EPA SLN No. CA 87 0026. Desert Cotton Growers Association. Registration is for Gramoxone to be used on cotton to control annual weeds and perennial weeds. June 22, 1987.

EPA SLN No. CA 87 0027. Glenn County Dept. of Agriculture. Registration is for Apron 25W to be used on sugar beet seed to control *Pythium* damping-off and early season *Phytophthora* infections. July 6, 1987.

EPA SLN No. CA 87 0028. San Diego County Dept. of Agriculture/Weights and Measures. Registration is for Safer Insecticidal Soap to be used on strawberries to control spider mites. July 1, 1987.

Delaware

EPA SLN No. DE 87 0001. Union Carbide. Registration is for Arvin SC Thiodicarb Insecticide to be used on sweet corn used to control European corn borers, corn earworms, and fall armyworms. May 14, 1987.

Florida

EPA SLN No. FL 87 0004. Morgan International Products. Registration is for Rethrocide to be used on horses to control face and biting flies. April 16, 1987.

EPA SLN No. FL 87 0005. Pennwalt Corp. Registration is for Aquathol K Aquatic Herbicide to be used on ponds, lakes, reservoirs, marshes, bayous, and various areas where water is quiescent or moving to control hydrilla. May 13, 1987.

EPA SLN No. FL 87 0006. Pennwalt Corp. Registration is for Aquathol Granular Aquatic Herbicide to be used on ponds, lakes, reservoirs, marshes, bayous, and various areas where water is quiescent or moving to control hydrilla. May 13, 1987.

EPA SLN No. FL 87 0007. Mobay Corp. Registration is for Baygon 70% Wettable Powder to be used on turfgrass to control mole crickets. April 16, 1987.

EPA SLN No. FL 87 0008. Mobay Corp. Registration is for Baytex Liquid Concentrate to be used for aerial spray to control mosquito adults in mosquito-infested areas. May 7, 1987.

EPA SLN No. FL 87 0009. Union Carbide. Registration is for Temik Brand 10G Aldicarb Pesticide to be used on ornamental and nursery plants to control certain insects, mites, and nematodes. May 7, 1987.

EPA SLN No. FL 87 0010. D.A. Darnell Co. Registration is for Fly Guard to be used in homes and buildings to control house flies, mosquitoes, gnats, moths, and other flying insects. June 8, 1987.

Georgia

EPA SLN No. GA 87 0005. Unocal Corp. Registration is for N-TAC Desiccant to be used on lima beans and southern peas for plant desiccation. July 9, 1987.

Hawaii

EPA SLN No. HI 87 0003. Rohm and Haas Co. Registration is for Goal 1.6E Herbicide to be used on nonbearing age coffee plantings to control certain broadleaf weeds. April 13, 1987.

Idaho

EPA SLN No. ID 87 0010. Pennwalt Corp. Registration is for Topsin M 70W Fungicide to be used on bean crops for in-furrow treatment to control fusarium and rhizoctonia. May 18, 1987.

EPA SLN No. ID 87 0011. Pennwalt Corp. Registration is for Topsin M 4.5F Fungicide to be used on bean crops for in forrow treatment to control fusarium and rhizoctonia. May 18, 1987.

EPA SLN No. ID 87 0012. Wilbur-Ellis Co. Registration is for Red-Top Methyl Parathion 5 Spray to be used on lentils to control several insect pests. June 12, 1987.

EPA SLN No. ID 87 0013. FMC Corp. Registration is for Thiodan 3EC Insecticide to be used on conifers and Christmas trees to control Cooley spruce adelgid and Douglas fir needle midge. June 19, 1987.

EPA SLN No. ID 87 0014. FMC Corp. Registration is for Thiodan 50 WP Insecticide to be used on conifers and Christmas trees to control Cooley spruce adelgid and Douglas fir needle midge. June 19, 1987.

EPA SLN No. ID 87 0015. Pennwalt Corp. Registration is for Des-I-Cate Harvest Aid to be used on hops to control hops sucker growth. July 20, 1987.

EPA SLN No. ID 87 0016. Mobay Corp. Registration is for Sencor 4 Flowable Herbicide to be used on potatoes to control various weeds. July 7, 1987.

EPA SLN No. ID 87 0017. Mobay Corp. Registration is for Sencor DF 75% Dry Flowable to be used on potatoes to control various weeds. July 7, 1987.

EPA SLN No. ID 87 0018. Gustafson, Inc. Registration is for Gustafson Flo-Pro IMZ Flowable Systemic Fungicide to be used as seed treatment on wheat and barley to control common root rot and barley leaf stripe. July 24, 1987.

Iowa

EPA SLN No. IA 87 0003. FMC Corp. Registration is for Pounce 3.2 EC to be used on seed corn to control earworms. July 20, 1987.

Michigan

EPA SLN No. MI 87 0001. Platte Chemical Co. Registration is for Clean Crop Captan 50W to be used on blueberries to control anthracnose fruit rot and botyrytis gray mold. April 16, 1987.

EPA SLN No. MI 87 0004. American Cyanamid Co. Registration is for Cycocel Plant Growth Regulant to be used on geraniums as a growth regulator. May 22, 1987.

EPA SLN No. MI 87 0005. FMC Corp. Registration is for Pounce 3.2 EC Insecticide to be used on asparagus to control cutworms and asparagus beetles. June 2, 1987.

Minnesota

EPA SLN No. MN 87 0001. FMC Corp. Registration is for Furadan CR-10 to be used on rape seed for export to Canada to control crucifer and striped flea beetles. May 12, 1987.

Montana

EPA SLN No. MT 87 0002. FMC Corp. Registration is for Thiodan 50 WP Insecticide to be used on conifers (including Christmas trees) to control Cooley spruce adelgid and Douglas fir needle midge. July 10, 1987.

EPA SLN No. MT 87 0003. FMC Corp. Registration is for Thiodan 3EC Insecticide to be used on conifers (including Christmas trees) to control Cooley spruce adelgid and Douglas fir needle midge. July 10, 1987.

Nevada

EPA SLN No. NV 87 0001. ICI Americas. Registration is for Gramoxone Super Herbicide to be used on garlic to control broadleaf annual weeds and grass. May 27, 1987.

EPA SLN No. NV 87 0004. E.I. du Pont de Nemours & Co. Registration is for Du Pont Oust Herbicide to be used under asphalt and concrete pavements to control weeds. June 24, 1987.

EPA SLN No. NV 87 0005. Nevada Dept. of Agriculture. Registration is for Poast Herbicide to be used on alfalfa to control grassy weeds. July 1, 1987.

EPA SLN No. NV 87 0006. Chevron Chemical Co. Registration is for Ortho Diquat Herbicide H/A to be used on potatoes for desiccation to facilitate harvest. July 7, 1987.

EPA SLN No. NV 87 0007. ICI Americas. Registration is for Gramoxone Super Herbicide to be used on seeded onions to control broadleaf weeds and grasses. July 9, 1987.

EPA SLN No. NV 87 0008. Pennwalt Corp. Registration is for Des-I-Cate to be used on alfalfa to control potato vine. July 16, 1987.

North Carolina

EPA SLN No. NC 87 0002. FMC Corp. Registration is for Talstar 10 WP to be used on outdoor ornamentals to control insects and mites. March 27, 1987.

EPA SLN No. NC 87 0004. Chevron Chemical Co. Registration is for Ortho Diquat Herbicide to be used on evening primrose (seed crops only) for preharvest desiccation of foliage. June 6, 1987.

Oklahoma

EPA SLN No. OK 87 0002. PBI Gordon Corp. Registration is for Pestroy 8 EC to be used on pine trees to control southern pine beetles. July 9, 1987.

EPA SLN No. OK 87 0003. Sandoz Crop Protection Corp. Registration is for Banvel Herbicide to be used on grass to control annual and perennial broadleaf weeds. July 9, 1987.

Oregon

EPA SLN No. OR 87 0006. Uniroyal Chemical Co. Registration is for Omite-CR to be used on pears, postharvest and nonbearing trees only, to control two-spotted McDaniel spider mites and European red mites. June 29, 1987.

EPA SLN No. OR 87 0007. Platte Chemical Co. Registration is for Clean Crop Diazinon 14G to be used on cranberries to control cranberry girdler. July 14, 1987.

EPA SLN No. OR 87 0008. Union Carbide. Registration is for Weedar 64 Broadleaf Herbicide to be used on cranberry bogs to control tall weeds. July 16, 1987.

EPA SLN No. OR 87 0009. E.I. du Pont de Nemours & Co., Inc. Registration is for Du Pont Pydrin Insecticide 2.4 to be used on cranberries to control oblique-banded leafroller, orange tortrix, and aphids. July 22, 1987.

Pennsylvania

EPA SLN No. PA 87 0003. Union Carbide. Registration is for Larvin SC Thiodicarb Insecticide to be used on sweet corn to control armyworms, corn earworms, and European corn borers. May 29, 1987.

EPA SLN No. PA 87 0004. Union Carbide. Registration is for Larvin 3.2 Thiodicarb Insecticide to be used on sweet corn to control armyworms, corn earworms, and European corn borers. June 1, 1987.

EPA SLN No. PA 87 0005. E.I. du Pont de Nemours & Co. Registration is for Du Pont Phosdrin 4 EC Insecticide to be used on watercress to control aphids. June 30, 1987.

EPA SLN No. PA 87 0006. Union Carbide. Registration is for Larvin 3.2

FEDERAL COMMUNICATIONS COMMISSION

Information Collection Requirement Approval by Office of Management and Budget

September 21, 1987.

The following information collection requirements have been approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507). For further information contact Terry Johnson, Federal Communications Commission, telephone (202) 632–7513.

OMB No.: 3060–0051
Title: Ship/Aircraft License Expiration Notice and/or Renewal Application
Form No.: FCC 405–B

A revised form FCC 405–B has been approved for use through 6/30/90. The April 1986 edition with an expiration of 11/30/87 will remain in use until revised forms are available.

OMB No.: 3060–0090
Title: Registration of Canadian Radio Station Licensee and Application for Permit to Operate in the U.S.
Form No.: FCC 410

The approval on application form FCC 410 has been extended through 9/30/90. The March 1987 edition with an expiration of 9/30/87 will remain in use until updated forms are available.

OMB No.: 3060–0039
Title: Application for a New or Modified Common Carrier Microwave Radio Station License Under Part 21
Form No.: FCC 436

The approval on application form FCC 436 has been extended through 6/30/89. The November 1984 edition with a previous expiration of 8/31/87 will remain in use until updated forms are available.

OMB No.: 3060–0096
Title: Application for Ship Radio Station License and Temporary Operating Authority
Form No.: FCC 506/506–A

A revised application form FCC 506/506–A has been approved for use through 6/30/90. The February 1986 edition with an expiration date of 11/30/88 will remain in use until revised forms are available.

OMB No.: 3060–0056
Title: Application for Registration of Equipment to be Connected to the Telephone Network
Form No.: FCC 730

The approval on form FCC 730 has been extended through 8/31/90. The March 1987 edition with a previous

expiration date of 8/31/87 will remain in use until updated forms are available.

Federal Communications Commission.

BILLING CODE 6712-01-M

Lottery Rankings of 900 MHz SMRS Applicants for the Indianapolis, San Antonio, Charlotte and Greensboro Designated Filing Areas

September 18, 1987.

On August 21, 1987, the Federal Communications Commission conducted its sixth round of lotteries to select applicants to provide 900 MHz Specialized Mobile Radio (SMR) Service. These lotteries were used to rank applicants in each of the following Designated Filing Areas (DFAs):

#32 Indianapolis
#33 San Antonio
#35 Charlotte
#45 Greensboro

Lists of the forty top-ranked applications in each of these Designated Filing Areas are attached to this Public Notice. The top 20 selectees in each DFA will be granted authorizations to provide SMR service. The next 20 ranked applicants will be alternate selectees should it be determined that any of the winners are not qualified to be licensees, or if any of the winners fail to provide the Commission with required transmitter site information within the specified time period. Within 30 days of the publication of this Public Notice in the **Federal Register**, interested parties may advise the Commission of any matter that may reflect on an applicant's qualifications to be a licensee. A copy of any such pleading must be served on the applicant in question on or before the day on which the document is filed with the Commission. *See* § 1.47(b) of the Commission's rules, 47 CFR 1.47(b). Service can be accomplished pursuant to § 1.47(d) of the Commission's rules, 47 CFR 1.47(d). Matters raised in such pleadings will be resolved prior to issuance of any license to the applicant. Individual applications may be examined at the Private Radio Bureau's Public Reference Room in Gettysburg, PA. Copies of individual applications may be ordered from the Commission's copy contractor, International Transcription Services, at (717) 337-1433.

All applications ranked below number 40 are hereby dismissed and will not be returned to the applicants. There will be no individual notices of dismissal mailed to applicants. The Lottery Notice of August 5, 1987 contains the names and addresses of lottery participants.

For further information regarding the selection procedures, consult the November 4, 1986 Public Notice [1 FCC Rcd 543 (1986), 52 FR 1302 (January 12, 1987)] or contact Betty Woolford of the Land Mobile and Microwave Division at (202) 632-7125.

[REPORT NO. 1679]

Petitions for Reconsideration and Clarification of Actions

September 23, 1987.

Petitions for reconsideration and clarification have been filed in the Commission rule making proceeding listed in this Public Notice and published pursuant to 47 CFR 1.429(e). The full text of these documents are available for review and copying in Room 239, 1919 M Street, NW., Washington, DC., or may be purchased from the Commission's copy contractor, International Transcription Service (202-857-3800). Notwithstanding the general filing provisions of § 1.4(b)(1) of the Commission's rules, which specify shorter filing periods, oppositions to these petitions may be filed within 30 days of the date of public notice of these petitions in the **Federal Register**. Replies must be filed within 15 days after the time for filing oppositions has expired.

Subject: Inquiry into § 73.1910 of the Commission's Rules and Regulations Concerning Alternatives to the General Fairness Doctrine Obligations of Broadcast Licensees. (MM Docket No. 87-26)

Number of petitions received: 1.

Subject: Syracuse Peace Council against Television Station WTVH, Syracuse, New York (*Meredith* Fairness Doctrine case).

Number of petitions received: 2 (Although an adjudicatory proceeding, comments will be received in accordance with the same procedures specified in the Commission's *Order Requesting Comment* in this proceeding released January 23, 1987, FCC 87-33, 52 FR 2805 (January 27, 1987).

[PR Docket No. 87-345]

Hearing Designation Order; Mobile Marine Radio, Inc., et al.

AGENCY: Federal Communications Commission.

ACTION: Hearing Designation Order.

SUMMARY: The Commission has designated two mutually exclusive applications for VHF public coast station frequency 161.825 MHz for hearing. These stations propose to serve Mobile and Foley, Alabama.

DATE: applicants must file a notice of appearance within 20 days of the mailing of the designation order.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Robert DeYoung, Private Radio Bureau, (202) 632-7175.

SUPPLEMENTARY INFORMATION: This is a summary of the Hearing Designation Order in PR Docket No. 87-345 which designates the applications of Mobile Marine Radio, Inc. (MMR) and COM/NAV Marine, Inc. (COM/NAV) for hearing. The issues in this proceeding are to determine if MMR's application is subject to an additional frequency showing and to determine which applicant should be licensed based on various comparative criteria. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Services, Inc., 2100 M Street NW., Washington, DC 20037 (Telephone No. (202) 857-3800).

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-010839-002.
Title: Port of Seattle Terminal Lease Agreement.
Parties:

Port of Seattle (Port)
American President Lines, Ltd. (Lessee)

Synopsis: The proposed agreement amends the basic lease between the parties to provide for the rental of a fifth container Crane at the Port's Terminal 5 by lessee.

Joseph C. Polking,
Secretary.
Dated: September 24, 1987.

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

September 24, 1987.

Background

Notice is hereby given of final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulations on Controlling Paperwork Burdens on the Public).

For further information contact: Federal Reserve Board Clearance Officer—Nancy Steele—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3822).

OMB Desk Officer—Robert Fishman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503 (202-395-7340).

Proposal to approve under OMB delegated authority the extension, with revision, of the following report:

1. Report title: Report of Condition for Edge and Agreement Corporations
Agency form number: FR 2886b
OMB Docket number: 7100-0086
Frequency: Quarterly or annually
Reporters: Edge and agreement corporations
Annual reporting hours: 4945 hours
Small businesses are not affected.

General description of report: This report collects balance sheet and income data from Edge and Agreement corporations. The data are used to supplement examination reports and support the applications process, to monitor aggregate institutional trends, and to measure the effect of and compliance with the Board's Regulation K. The proposed revisions consist of changes to Schedule E that are designed to maintain consistency with similar information collected from commercial banks in Schedule N of the Reports of Condition and Income (FFIEC 031-034). Under the proposal, the title of Schedule E would be changed to "Past Due, Nonaccrual Loans and Leases;" item 4, entitled Renegotiated "troubled" debt would be deleted; item 5, Total would be renumbered item 4; and a memorandum item would be added to collect restructured loans and leases included in the total reported in item 4.

This report is required and authorized by law [12 U.S.C. 602 and 605]. Certain

BILLING CODE 6210-01-M

Consumer Advisory Council, Meeting

The Consumer Advisory Council will meet on Thursday, October 22, and Friday, October 23. The meeting, which will be open to public observation, will take place in Terrance Room E of the Martin Building. The October 22 session is expected to begin at 9:00 a.m. and to continue until 5:00 p.m. with a lunch break from 1:00 p.m. until 2:00 p.m. The October 23 session is expected to begin at 9:00 a.m. and continue until 1:00 p.m. The Martin Building is on C Street, Northwest, between 20th and 21st Streets in Washington, DC.

The Council's function is to advise the Board on the exercise of the Board's responsibilities under the Consumer Credit Protection Act and on other matters on which the Board seeks its advice. Time permitting, the Council will discuss the following topics:

1. *Government Check-Cashing and Basic Banking Services.* Informational session led by the Basic Banking Subcommittee on cost and benfits of mandatory check cashing; and discussion of packages designed by trade associations on how to develop a basic banking account (tentative).

2. *Industry Survey on Home Equity Lines of Credit.* Briefing by staff on the results of an industry-sponsored survey of home equity lending by financial institutions (tentative).

3. *Developments Regarding Caps in Certain Adjustable Rate Transactions and Home Equity Lines of Credit.* Report by a Council subcommittee on proposed federal legislation to establish additional disclosure and advertising requirements for home equity lines of credit; and a briefing by staff on (1) a Board proposal that implements federal law mandating interest rate caps for adjustable rate mortgages (including home equity lines of credit) and solicits comment on disclosure of the creditor's right to terminate and to require payment in full once the maximum interest rate is reached, and (2) issues regarding whether different or additional Truth in Lending disclosure requirements should apply to home equity lines of credit.

4. *Community Reinvestment Act.* Report by the Community Affairs Committee on a proposed survey of Federal Reserve examiners to determine how banks' varios CRA activities are evaluated, and on th results of a survey of community groups' information needs concerning CRA; and discussion of the Federal Reserve's role in the implementation of privately negotiated CRA agreements.

5. *Update on 1986 Survey of Consumer Finances.* Briefing by staff on the results of the Board-sponsored 1986 nationwide survey of consumer finances.

6. *Interstate Banking.* Briefing by staff on interstate banking developments.

7. *Expanded Powers and Financial Services Restructuring.* Reports and recommendations by the Financial Structure Committee.

8. *Consumer Education.* Report by the Consumer Education Committe on its assessment of consumer education material available to the public, and recommendations for enhancing the Federal Reserve System's education program.

9. *Delayed Funds Availability.* Briefing by staff on consumer aspects of the Expedited Funds Availability Act, which directs the Board to issue rules governing institutions' disclosure policies, and mandatory schedules in connection with institution's delayed availability practices.

10. *Regulary Update.* Report by staff on the status of recent Board actions in the area of consumer financial services.

Other matters previously considered by the Council or initiated by Council members may also be discussed.

Persons wishing to submit to the Council their views regarding any of the above topics may do so by sending written statements to Ms. Ann Marie Bray, Secetary, Consumer Advisory Council, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551. Comments must be received no later than close of business Friday, October 16, and must be of a quality suitable for reproduction.

Information with regard to this meeting may be obtained from Ms. Bedelia Calhoun, Staff Specialist, at (202) 452-2412; Board of Governors of the Federal Reserve System, Washington, DC 20551. Telecommunications Device for the Deaf (TDD) users, may contact Earnestine Hill or Dorothea Thompson (202) 452-3544.

Board of Governors of the Federal Reserve System, September 24, 1987.

James McAfee,

Associate Secretary to the Board.

[FR Doc. 87-22462 Filed 9-29-87; 8:45 am]

BILLING CODE 6210-01-M

Formations of; Acquisitions by; and Mergers of Bank Holding Companies; BankWorcester Corporation et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statment of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 20, 1987.

A. **Federal Reserve Bank of Boston** (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *BankWorcester Corporation,* Worcester, Massachusetts; to become bank holding company by acquiring 100 percent of the voting shares of Worcester County Institution for Savings, Worcester, Massachusetts, which is a participant in the Massachusetts Saving Bank Life Insurance Program.

B. **Federal Reserve Bank of Cleveland** (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Whitley City Bancshares, Inc.,* Whitley City, Kentucky; to become a bank holding company by acquiring 50.73 percent of the voting shares of Bank of McCreary County, Whitley City, Kentucky.

2. *Whitley City Bancshares, Inc.,* Whitley City, Kentucky; to merge with McCreary Bancshares, Inc., Whitley City, Kentucky, and thereby indirectly acquire Bank of McCreary County, Whitley City, Kentucky.

C. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Embry Bankshares, Inc.*, Atlantic, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of Embry National Bank, Atanta, Georgia, a *de novo* bank.

2. *SouthTrust Corporation*, Birmingham, Alabama; to acquire 100 percent of the voting shares of Gulf-Bay Financial Corporation, Tampa, Florida.

D. **Federal Reserve Bank of Chicago** (David S. Epstein, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Associated Banc-Corp.*, Green Bay, Wisconsin; to acquire 100 percent of the voting shares of Valders Bancorporation, Valders, Wisconsin, and thereby indirectly acquire Valders State Bank, Valders, Wisconsin.

E. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Gower Bancshares, Inc.*, Gower, Missouri; to become a bank holding company by acquiring 92.4 percent of the voting shares of Farmers Bank of Gower, Gower, Missouri.

F. **Federal Reserve Bank of Dalls** (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Royal Bancshares, Inc.*, Farmers Branch, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Centre National Bank-Farmers Branch, Farmers Branch, Texas.

Board of Governors of the Federal Reserve System, September 24, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Change in Bank Control Notice; Acquisition of Shares of Banks or Bank Holding Companies; Barney U. Brown, Jr.

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. § 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than October 15, 1987.

A. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Barney U. Brown, Jr.*, Oklahoma City, Oklahoma; to acquire 1.74 percent; Barney U. Brown Trust, Oklahoma City, Oklahoma, to acquire 5.29 percent; and Red Rock Petroleum Co., Oklahoma City, Oklahoma; to acquire .01 percent of the voting shares of Guaranty Bancshares, Inc., Oklahoma City, Oklahoma, and thereby indirectly acquire Guaranty Bank and Trust Company, Oklahoma City, Oklahoma.

Board of Governors of the Federal Reserve System, September 24, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Applications To Engage de Novo in Permissible Nonbanking Activities; the United States Bank of Kuwait PLC et al.

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1) of the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of the Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 20, 1987.

A. **Federal Reserve Bank of New York** (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *The United Bank of Kuwait PLC*, London, England; to engage *de novo* through its subsidiary, United Bank Mortgage Services, which is to be incorporated in New York, New York, in servicing mortgage loans pursuant to § 225.25(b)(1) of the Board's Regulation Y.

B. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *SunTrust Banks, Inc.*, Atlanta, Georgia; to engage *de novo* through its subsidiary, SunTrust Insurance Company, Phoenix, Arizona, formerly Third National Life Insurance Company, in underwriting, as reinsurer, credit life and credit accident and health insurance pursuant to § 225.25(b)(8) of the Board's Regulation Y.

C. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Business Bancorp*, San Jose, California; to engage *de novo* in providing data processing services to nonaffiliated financial institutions pursuant to § 225.25(b)(7) of the Board's Regulation Y. This activity will be conducted in the State of California.

Board of Governors of the Federal Reserve System, September 24, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 4160–01–M

Health Resources and Services Administration

Fiscal Year 1987 Fellowship Eligibility Criteria and Final Funding Preference for Post-baccalaureate Faculty Fellowship Grants

The Health Resources and Services Administration announces the fellowship eligibility criteria and final funding preference which will govern the distribution of Fiscal Year 1987 grant awards for Post-baccalaureate Faculty Fellowship Grants authorized by section 830(b) of the Public Health Service Act, as amended.

Proposed fellowship eligibility criteria and a funding prefernce were published for public comment in the **Federal Register** on June 29, 1987 (52 FR 24221). The proposed criteria for fellowship eligibility stated that potential fellows must:

1. Hold a baccalaureate degree.
2. Be employed by the applicant institution as a faculty member during the period of the awarded fellowship.
3. Be enrolled in a master's program in nursing or in a doctoral program which requires a substantial study, master's thesis or a doctoral dissertation, and anticipate meeting master's or doctoral degree requirements by August 31, 1988 or sooner.
4. Undertake a reported study, thesis or dissertation focusing on an:

(a) Investigation of cost-effective alternatives to traditional health care modalities, with special attention to the needs of at-risk populations; such as the elderly, premature infants, physically and mentally disabled individuals, and ethnic and minority groups; or

(b) Examination of nursing interventions that result in positive outcomes in health status, with attention to interventions which address family violence, drug and alcohol abuse, the health of women, adolescent care, and disease prevention.

5. Be licensed to practice as a registered nurse in a State.

The proposed funding preference stated that preference would be given to those schools that have been successful in recruiting or retaining minority faculty.

One professional organization and four schools of nursing responded to the notice. The Department has retained the eligibility criteria and funding preference as proposed for the reasons discussed below.

In terms of the criteria, it was suggested that:

(1) Proposed fellows should hold a baccalaureate degree in nursing;

(2) Eligibility should not be limited to the final year of study but be extended to the entirety of the degree program in which the faculty member is enrolled, including full-time, summer-only graduate programs;

(3) Two years should be allowed for completion of the study, thesis or dissertation; and

(4) The study areas be expanded.

The Department believes that restricting the baccalaureate degree to one in nursing would be contrary to the intent of the law. It would impact adversely on institutions which employ faculty with baccalaureate degrees in other disciplines who have the potential to make a contribution to nursing. Further, most schools admit students to Masters in Nursing programs only if the individual holds a baccalaureate degree in nursing or its equivalent.

The Department appreciates the fact that some faculty members may need assistance throughout the entirety of the academic programs they are pursuing and that many factors impinge both on decisions about part time versus full time study as well as the time an individual may need to complete a study. Nevertheless, the main intent of the Post-baccalaureate Faculty Fellowship program is to enable faculty to study areas of national concern through the mechanism of a fellowship. The Department has elected to limit funding to faculty able to complete a pertinent study and degree requirements within the budget year in order to:

(1) Assist faculty who might, without this assistance, need a longer period of time to complete their studies; and

(2) Provide some financial relief to faculty in the dissertation stage of study.

With regard to the expansion of study areas, while the Secretary is authorized to designate other areas of nursing practice considered to require additional study, there is immediate need to address the broad areas of concern designated in the authorizing legislation.

Comment was made that policy should be expanded to provide cost reimbursement for release time (faculty replacement salary costs) and to provide administrative compensation. These grants are authorized only for student support. They are provided to help schools increase the quality of their faculties by providing support through the schools to allow certain faculty members to complete degree requirements in the course of carrying out prescribed studies. The cost of hiring faculty to replace the fellows supported under the grant is not within the scope of this legislative authority.

Concerning the proposed funding preference, the comment was made that the preference would discriminate against schools located where minority faculty were not readily available for hiring. The Department realizes that there are many reasons why some schools have more success than others in recruiting and retaining minority faculty. Nevertheless, both the recruitment and retention of minority faculty must be the goal of all schools in order to maintain and increase the progress made toward a better racial mix in higher education in general and in the health professions particularly.

Fellowship Criteria

In order to be considered for a fellowship from an award made under section 830(b) of the Public Health Service Act, as amended, a person must:

1. Hold a baccalaureate degree.
2. Be employed by the applicant institution as a faculty member during the period of the awarded fellowship.
3. Be enrolled in a master's program in nursing or in a doctoral program which requires a substantial study, master's thesis or a doctoral dissertation, and anticipate meeting master's or doctoral degree requirements by August 31, 1988 or sooner.
4. Undertake a reported study, thesis or dissertation focusing on an:

(a) Investigation of cost-effective alternatives to traditional health care modalities, with special attention to the needs of at-risk populations, such as the elderly, premature infants, physically

and mentally disabled individuals, and ethnic and minority groups; or

(b) Examination of nursing interventions that result in positive outcomes in health status, with attention to interventions which address family violence, drug and alcohol abuse, the health of women, adolescent care, and disease prevention.

5. Be licensed to practice as a registered nurse in a State.

Final Funding Preference

In determining the order of funding, preference will be given to approved applications which satisfactorily demonstrate success in recruiting or retaining minority faculty. All eligible applications, however, will be reviewed and given consideration for funding.

(This program is listed at 13.147 in the *Catalog of Federal Domestic Assistance*)

Dated: September 24, 1987.

BILLING CODE 4160-15-M

Public Health Service

Statement of Organization, Functions, and Delegations of Authority; National Institutes of Health

Part H, Chapter HN (National Institutes of Health) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (40 FR 22859, May 27, 1975, as amended most recently at 52 FR 16457, May 5, 1987) is amended to reflect the following changes in the Office of the Director, NIH: (1) Change the functional statement of the Office of Intramural Research (HNA4); and (2) establish the Office of Intramural Affairs (HNA43) in the Office of Intramural Research (HNA4). These changes will enable the Deputy Director for Intramural Research to fulfill his responsibilities for overall supervision and overview of the intramural activities of the NIH, while creating an organizational focal point for intramural policy and administrative responsibilities.

Section HN-B, Organization and Functions is amended as follows:

(1) Under the heading *Office of Intramural Research (HNA4),* delete the functional statement in its entirety and substitute the following:

Office of Intramural Research (HNA4). (1) Acts on behalf of the Director, NIH, to implement and coordinate intramural research policy and programs; and (2) advises the Director, NIH, and staff on issues relating to the intramural program.

(2) Under the heading *Office of Intramural Research (HNA4),* insert the following:

Office of Intramural Affairs (HNA43). (1) Advises the Deputy Director for Intramural Research on matters pertaining to the management of NIH intramural research programs; (2) formulates and recommends policies on such intramural research issues as personnel systems for scientists, research evaluation, use of humans and animals in research, outside work, commercialization of research findings, and scientific misconduct; (3) provides staff support to the Scientific Directors' meetings; (4) reviews intramural personnel actions, appointments to the Visiting Program, the NRC Research Associates Program, and the Intramural Research Training Award Program; (5) reviews outside work requests; (6) chairs and staffs the NIH Patent Policy Board, NIH Oversight Committee on AAALAC Accreditation, and the Positron Emission Tomography/Policy Advisory Committee; (7) monitors the evaluation of intramural research programs by Boards of Scientific Counselors; (8) manages the annual reporting on intramural research achievements, the NIH Lecture Series, and the foreign work-study program; (9) represents the OD on the NIH Animal Care and Use Committee, the Radiation Safety Committee, the Medical Board, and represents the intramural program on task groups and ad hoc committees; (10) performs a variety of activities involving the interactions of universities and industry with intramural research; and (11) responds to inquiries concerning intramural research.

Date: September 21, 1987.

Wilford J. Forbush,

Director, Office of Management, PHS.

BILLING CODE 4140-01-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Privacy Act of 1974; Establishment of New Notice of System of Records

Pursuant to the provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a), notice is hereby given that the Department of the Interior proposes to establish a new notice describing a system of records maintained by the Bureau of Land Management. The notice is entitled "Uniform Accountability System—Interior, BLM-30," and describes records on inventorying, distribution, and accountability for uniforms issued to employees authorized to wear the Bureau's uniform. The notice is published in its entirety below.

As required by section 3 of the Privacy Act of 1974, as amended (5 U.S.C. 552a(o)), the Office of Management and Budget, the President of the Senate, and the Speaker of the House of Representatives have been notified of this action.

5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment. The Office of Management and Budget in its Circular A-130 requires a 60-day period to review such proposals. Therefore, written comments on this proposal can be addressed to the Department Privacy Act Officer, Office of the Secretary (PMA), Room 7357, Main Interior Building, U.S. Department of the Interior, Washington, DC 20240. Comments received on or before November 30, 1987, will be considered. The notice shall be effective as proposed without further publication at the end of the comment period, unless comments are received which would require a contrary determination.

Dated: September 22, 1987.

Oscar W. Mueller, Jr.,

Director, Office of Management Analysis.

INTERIOR/LLM-30

SYSTEM NAME:

Uniform Accountability System—Interior, BLM-30.

SYSTEM LOCATION:

Division of Administrative Services, Bureau of Land Management, U.S. Department of the Interior, Washington, DC 20240.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

BLM employees or volunteers authorized to wear the uniform.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information identifying the individual's name, sex, position title, series, and grade, sizing information (such as height, weight, waist measurement, etc.), last seven digits of the individual's social security number, office cost accounting data, name and addresses for the administrative and shipping offices, type of appointment (such as full-time employee, volunteer, ranger, etc.), amount of allowance authorized, class(es) of uniforms authorized, dates of authorization, the name of the authorizing individual, and all ordering data (such as items shipped, exchanged, returned, etc.) are obtained

VOL
52
ISS
189
SE
30
1987
UMI

via uniform allowance authorization and ordering forms.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 5901, Uniform Allowances, and 5 U.S.C. 301, Departmental Regulations.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the records are to establish and maintain an individual uniform allowance account for BLM employees and volunteers, to ensure individual allowance amounts do not exceed the authorized limitations, to accommodate the efficient processing of individual uniform orders, to expedite payments to the contractor, and to bill appropriate BLM office accounts for uniform items received. The information contained in this system of records is provided to management through reports for purposes of expediting payments to the contractor, auditing of records, and maintenance of the overall program. Disclosure outside the Department of the Interior may be made (1) to the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or when represented by the government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (2) to disclose pertinent information to an appropriate Federal, State, local, or foreign agency responsible for investigating, prosecuting, enforcing, or implementing a statute, regulation, rule, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation; (3) to a Member of Congress from the record of an individual in response to an inquiry made at the request of that individual; (4) to the Department of Treasury to effect payment to Federal, State, and local government agencies, nongovernmental organizations, and individuals; and (5) to a debt collection agency to effect payment to the contractor for items ordered by BLM employees and volunteers that are in excess of the authorized uniform allowance amount.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures may be made from this system to 'consumer reporting agencies' as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

An individual's allowance authorization, ordering, and shipping data are stored in a computer data base at the supplier's facility by the individual's name and account number (last seven digits of their social security number). A copy of the forms are stored in file folders at the supplier's facility and BLM administrative offices arranged alphabetically by name.

RETRIEVABILITY:

Indexed by individual's name and/or account number, order and shipping data, and BLM cost accounting data.

SAFEGUARDS:

Maintained with safeguards meeting the requirements of 43 CFR 2.51 for computerized and manual records.

RETENTION AND DISPOSAL:

BLM offices are required to maintain all file copies of transactions for a minimum of three years. The supplier is required to maintain all file copies of transactions for the life of the contract or termination of the individual's authorization (whichever terminates first). The records control schedule governing these records is pending the approval of the Archivist.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Division of Administrative Services, Bureau of Land Management (850), Room 2444, Main Interior Building, 18th and C Sts., NW., Washington, DC 20240.

NOTIFICATION PROCEDURES:

A written request addressed to the Systems Manager is required. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

To see your records write to the Systems Manager describing as specifically as possible the records sought. If copies are desired, indicate the maximum you are willing to pay. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

To request corrections or the removal of material from your files, write the Systems Manager. See 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

(1) Individual BLM employees and volunteers authorized to wear the uniform, (2) BLM state and administrative office's, and (3) the authorized supplier.

Alaska Native Claims Selection; Northway Natives Inc.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to Northway Natives Incorporated for approximately 297 acres. The lands involved are within U.S. Survey No. 2630 (T. 14 N., R. 18 E., Copper River Meridian), in the vicinity of Northway, Alaska.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the *Fairbanks Daily News-Miner*. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 (907) 271-5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until October 30, 1987, to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

BILLING CODE 4310-JA-M

[NM-018-07-4410-08]

Availability of the Proposed Resource Management Plan/Final Environmental Impact Statement for the Taos Resource Area, Albuquerque District, NM

AGENCY: Bureau of Land Management, Albuquerque District, Taos Resource Area, New Mexico, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management announces the availability of the Taos Proposed Resource Management Plan (RMP) and Final Environmental Impact Statement (EIS). This document identifies and analyzes the future options for managing 564,000 acres of public land and 1,800,000 acres of federal mineral estate in northeastern New Mexico. The Plan also contains recommendations that the Areas of Critical Environmental Concern (ACEC) be designated.

The Draft Taos RMP/EIS was made available for public review and comment on March 27, 1987. Comments received on the Draft were considered in preparing the Proposed RM/Final EIS. Any person who participated in the planning process and has an interest that is or may be affected by approval of the Proposed RMP may file a protest.

DATE: Protests must be postmarked no later than November 9, 1987.

ADDRESS: Comments should be sent to: Director, Bureau of Land Management, Department of the Interior, 18th and C Streets NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Dan Wood, Area Manager, Taos Resource Area, Bureau of Land Management, Box 6168, Taos, New Mexico 87571–6168. Telephone (505) 758–8851.

SUPPLEMENTARY INFORMATION: The Proposed RMP provides a comprehensive framework for allocating public land and resources within the Taos Resource Area during the next 10 to 20 years. The document is primarily focused on resolving five key resource management issues that were identified with public involvement early in the planning process. The issues are: (1) Special Management Areas; (2) Transportation; (3) Vegetative Uses; (4) Land Ownership Adjustments and (5) Rights-of-Way Exclusion Areas. The "Continuing Management Guidance" section of the Proposed RMP describes those aspects of current management which are not at issue and will continue after the RMP is approved. The Continuing Management Guidance was developed primarily from laws, regulations, and manuals, as well as from previous land use plans.

The Proposed Plan is a slightly modified version of the Preferred Alternative (Alternative D) presented on the Draft RMP/EIS. Slight changes were made to the Special Management Areas and Land Ownership Adjustments issue resolutions of the Preferred Alternative as a result of comments received on the Draft RMP/EIS.

The Proposed Plan will protect important environmental values and sensitive resources while at the same time allowing development of resources which provide commercial goods and services.

Areas of Critical Environmental Concern

Eight ACEC's were recommended for designation in the Draft RMP/EIS and were described in the **Federal Register** on March 27, 1987. As a result of the comments received on the Draft RMP/EIS, the Proposed Plan recommends the designation of nine ACEC's. The Draft RMP recommended that the entire San Antonio/Pot Mountain SMA be designated as an ACEC. The Proposed Plan recommends the designation of two smaller ACEC's within the San Antonio SMA, and has dropped the ACEC recommendation for the remaining SMA acreage.

Dated: September 22, 1987.

Larry L. Woodard,

State Director.

Proposed Reinstatement of Terminated Oil and Gas Lease; Washakie County, WY

September 21, 1987.

Pursuant to the provisions of Pub. L. 97–451, 96 Stat. 2462–2466, and Regulation 43 CFR 3108.2–3(a) and (b)(1), a petition for reinstatement of oil and gas lease W–63426 for lands in Washakie County, Wyoming, was timely filed and was accompanied by all the required rentals accuring from the date of termination.

The lessees have agreed to the amended lease terms for rentals and royalties at rates of $5 per acre, or fraction thereof, per year and 16–2/3 percent, respectively.

The lessees have paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this **Federal Register** notice. The lessees have met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease W–63426 effective June 1, 1987, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Proposed Modification and Continuation of Withdrawals; Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Forest Service proposes that the withdrawal of approximately 1,504.43 acres covering portions of 34 recreation/administrative sites in the Medicine Bow National Forest be modified to establish a 20-year term and to modify the segregation on 8 sites to be closed only to mining location. These lands have been and will remain closed to mining. All of the lands have been and will remain open to mineral leasing. Additionally, certain legal descriptions will be modified to conform to current surveys.

DATE: Comments must be received by December 29, 1987.

ADDRESS: Comments should be sent to the Chief, Branch of Land Resources, Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyoming 82003.

FOR FURTHER INFORMATION CONTACT: Rochelle S. Ames, Wyoming State Office, (307) 772-2071.

The Forest Service proposes that the existing land withdrawn by Public Land Order Nos. 5140, 3777, 2978, 2796, 3250, 4265, 2278, 4788, 3310, 1658*, and 2643 dated October 18, 1971, August 10, 1965, March 18, 1963, October 19, 1962, October 10, 1963, August 30, 1967, February 27, 1961, April 2, 1970, January 17, 1964, June 17, 1958, and April 6, 1962, respectively, be continued for a period of 20 years, and that order marked with an asterisk (*) be modifed to segregate the lands only from location under the mining laws; pursuant to section 204 of the Federal land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is described as follows:

Sixth Principal Meridian

**Barber Lake Picnic Ground*

T. 16 N., R. 78 W.,
Sec. 29, NW¼SW¼NE¼SE¼, NE¼SE¼ NW¼SE¼.

Battle Creek Campground

South Brush Creek Campground

T. 16 N., R. 81 W.,
Sec. 21, S½NE¼NW¼NE¼, N½SE¼ NW¼NE¼, SE¼NW¼NW¼NE¼, NE¼SW¼NW¼NE¼.

**Upper Nash Fork Campground*

T. 16 N., R. 79 W.,
Sec. 14, W½SE¼NW¼NE¼, SW¼NW¼NE¼.

The area described contains approximately 1,504.43 acres in Albany and Carbon Counties, Wyoming.

The purpose of these withdrawals is to protect the financial investment in the recreational and administrative facilities on these sites. The withdrawals segregate the lands from the operation of the mining laws, and those sites marked with an asterisk (*) are further segregated from the operation of the public land laws generally. All of the lands have been and will remain open to mineral leasing. A modification in the segregative effect of the lands marked with an asterisk (*) is proposed to remove the segregation on the lands to the operation of the public land laws.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawals may present their views in writing to the Chief, Branch of Land Resources, in the Wyoming State Office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawals will be continued, and if so, for how long. The final determination on the continuation of the withdrawals will be published in the **Federal Register**. The existing withdrawals will continue until such final determination is made.

Hillary A. Oden,

State Director.

September 18, 1987.

BILLING CODE 4310-22-M

Minerals Management Service

Development Operations Coordination Document; Placid Oil Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Placid Oil Company has submitted a DOCD describing the activities it proposes to conduct on Leases OCS–G 5882 and 6994, Blocks 29 and 31, respectively, Green Canyon Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from onshore bases located at Houma and Fourchon, Louisiana.

DATE: The subject DOCD was deemed submitted on September 21, 1987.

ADDRESS: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: September 21, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Joint Committee on Agricultural Research and Development of the Board for International Food and Agricultural Development; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the Meeting of the Joint Committee on Agricultural Research and Development (JCARD) of the Board for International Food and Agricultural Development (BIFAD) on October 8, 1987.

The primary purposes of the meeting are to: (1) Review Participant Training concerns and issues; (2) to review the recommendation of the June Meeting in Rhode Island; (3) to react to proposed activities over the next year around the theme, "Getting Ready for the 90's"; (4) and to review proposed plans for the JCARD Sub-Committee on Agricultural Research and Technology Transfer.

JCARD will meet from 10:00 a.m. to 5:00 p.m. on October 8 in the State Plaza Hotel, 2117 E Street NW., Washington, DC. Any interested person may attend, may file written statements with the Committee before or after the meetings, or may present oral statements in accordance with procedures established by the Committee, and to the extent the time available for the meeting permits.

Dr. John Stovall, BIFAD Support Staff, is the designated A.I.D. Advisory Committee Representative at the meetings. It is suggested that those desiring further information write to him in care of the Agency for International Development, BIFAD Support Staff, Washington, D.C. 20523 or telephone him at (202) 647-6987.

Date: September 23, 1987.

John Stovall,

A.I.D. Advisory Committee Representative, Joint Committee on Agricultural Research and Development, Board for International Food and Agricultural Development.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-265]

Certain Dental Prophylaxis Methods, Equipment and Components Thereof; Initial Determination Terminating Respondents on the Basis of Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondents on the basis of a settlement agreement: Sanofi, S.A. and Sanofi, Inc.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on September 21, 1987.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing impaired individuals are advised that information on this matter can be obtained by contracting the Commission's TDD terminal on 202-724-0002.

Written Comments: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondents. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street NW., Washington, DC 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202-523-0176.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-242]

Certain Dynamic Random Access Memories, Components Thereof and Products Containing Same; Issuance of Limited Exclusion Order

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has issued a limited exclusion order in the above-captioned investigation prohibiting the unlicensed importation of certain dynamic random access memories (DRAMs) of 64 and 256 kilobits, or any combinations thereof (such as DRAMs of 128 kilobits), manufactured abroad by Samsung Company, Ltd. and/or Samsung Semiconductor & Telecommunications

Co., Ltd., or any of their affiliated companies, parents, subsidiaries, licensees, or other related business entities, or their successors or assigns, whether assembled or unassembled, or incorporated into a carrier of any form, including Single-Inline-Packages and Single-Inline-Modules, or assembled into circuit boards of any configuration. The order also prohibits the unlicensed importation of computers (such as mainframe, personal, and small business computers), facsmilie equipment, telecommunicatons switching equipment, and printers containing infringing DRAMs of 64 or 256 kilobits (or any combinations thereof such as 128 kilobits) manufactured by Samsung Company, Ltd. and/or samsung Semiconductor & Telecommunications Co., Ltd., or any of their affiliated companies, parents, subsidiaries, licensees, or other related business entities, or their successors or assigns.

Authority: The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in § 210.58 of the Commission's Rules of Practice and Procedure (19 CFR 210.58).

FOR FURTHER INFORMATION CONTACT: Judith M. Czako, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0359.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on March 19, 1986, in response to a complaint filed on February 7, 1986, by Texas Instruments, Inc. (TI) of Dallas, Texas to determine whether there is a violation of section 337 (19 U.S.C. 1337) and 19 U.S.C. 1337a in the importation and sale of certain dynamic random access memories (DRAMs). The complaint alleged that such important and sale by the nineteen named respondents constitute unfair methods of competition and unfair acts by reason of infringement of certain claims of ten U.S. patents owned by TI. The complaint further alleged that the effect or tendency of these unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States. During the course of the proceedings, thirteen of the original nineteen respondents were terminated from the investigation on the basis of license and settlement agreements.

On May 21, 1987, the presiding administrative law judge (ALJ) issued her initial determination (ID), finding that there is a violation of section 337 and 19 U.S.C. 1337a in the importation and sale of certain DRAMs by two of the remaining respondents, Samsung Company, Ltd. and Samsung Semiconductor & Telecommunications Co., Ltd., and that there is no violation of section 337 and 19 U.S.C. 1337a in the importation and sale of certain DRAMS by the other four remaining respondents, Hitachi, Ltd. and Hitachi America, Ltd. (the Hitachi respondents) and NEC Coporation and NEC Electronics, Inc. Subsequently, the Hitachi respondents were terminated from the investigation on the basis of a license and settlement agreement. 52 FR. 26577 (July 15, 1987). On July 24, 1987, the Commission ordered review of certain portions of the ID, and requested written submissions regarding certain specific questions raised by the issues under review. The Commission vacated certain portions of the ID, including those concerning the Hitachi respondents, and determined not to review the remainder of the ID, which thereby became the determination of the Commission. The Commission also requested written submissions concerning the questions of remedy, bonding, and the public interest. 52 FR 29077 (Aug. 5, 1987). Having considered the record in this investigation, including the written submissions of the parties and comments from the U.S. Customs Service and members of the public, the Commission made its determinations disposing of the issues on review, and the questions of remedy, bonding, and the public interest.

Notice of this investigation was published in the **Federal Register** of March 19, 1986 (51 FR 9537).

Copies of the Commission's Action and Order, the nonconfidential versions of opinions issued in connection therewith, and all other nonconfidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E. Street NW., Washington, DC 20436, telephone 202–523–0161. Hearing-imparied individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: Setember 21, 1987.

Certain Hard Sided Molded Luggage Cases; Receipt of Initial Determination Terminating Respondents on the Basis of Consent Order Agreement

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondents on the basis of a consent order agreement: La Societe Delsey and Delsey Luggage, Inc.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on September 10, 1987.

Copies of the initial determination, the consent order agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, DC 20436, telephone 202–523–0161. Hearing imparied individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

Written Comments: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondents. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, DC 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

Industrial Forklift Trucks; Revised Schedule for the Subject Investigation

AGENCY: International Trade Commission.

ACTION: Revised schedule for the subject investigation.

SUMMARY: The Commission has revised its schedule in connection with its preliminary investigation No. TA–603–10, concerning industrial forklift trucks, to reflect a 45-day postponement of the hearing approved on September 1, 1987. The Commission will now hold its hearing on October 22, 1987.

EFFECTIVE DATE: September 21, 1987.

FOR FURTHER INFORMATION CONTACT: Lawrence Rausch (202–523–0300), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–523–0161.

SUPPLEMENTARY INFORMATION:

Background

On August 28, 1987, the Commission received a request from Clark Equipment Company, acting on its own behalf and on behalf of certain other parties to the investigation, asking that the Commission postpone the hearing to be held in connection with this investigation for a period of 90 days. On September 1, 1987, the Commission decided to postpone the hearing for a nonrenewable period of 45 days and cancelled its public hearing scheduled for September 2, 1987. Notice of the investigaiton and originally scheduled hearing was published in the **Federal Register** of July 29, 1987 (52 FR 15258).

Participation in the Investigation

Persons wishing to participate in the investigation as parties who have not previously entered an appearance in accord with the procedures set forth in the earlier notice may request an opportunity to enter an appearance. Such requests will be referred to the Chairman, who will determine whether to accept the late entry for good cause shown.

Revised Schedule

The Commission will hold a hearing in connection with this investigation beginning at 9:30 a.m. on October 22, 1987, at the U.S. International Trade Commission Building, 701 E. Street NW., Washington, DC. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on October 14, 1987. Parties will be contacted after that date regarding time allocations for the hearing. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs by October 19, 1987. Posthearing briefs must be submitted not later than the close of business on October 27, 1987. All written submissions, including briefs, should be filed in accordance with the procedures described in the **Federal Register** notice of July 29, 1987.

Parties are encouraged to limit their testimony at the hearing to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before October 19, 1987.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: September 22, 1987.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–248]

Certain Plastic Fasteners and Processes for the Manufacture Thereof; Decision To Review Initial Determination and To Extend Deadline for Completion of Investigation

AGENCY: International Trade Commission.

ACTION: Review of initial determination and extension of deadline for completion of investigation.

SUMMARY: Notice is given that the Commission has determined to review the presiding administrative law judge's (ALJ's) initial determination (ID) that there is no violation of section 337 of the Tariff Act of 1930 in the above-captioned investigation. Further, the Commission has determined to extend the deadline for completion of the investigation until December 18, 1987. This action is taken pursuant to Commission rules 210.53–210.56, 210.59 (19 CFR 210.53–210.56, 210.59).

FOR FURTHER INFORMATION CONTACT: Stephen McLaughlin, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0421.

SUPPLEMENTARY INFORMATION: On June 18, 1986, the Commission instituted an investigation to determine whether there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation or sale of certain plastic feasteners. The investigation was instituted on the basis of a complaint filed by Dennison Manufacturing Company, alleging unfair methods of competition and unfair acts by reason of the alleged manufacture abroad by a process which, if practiced in the United States, would infringe: (1) Claims 1–4 and 8–12 of U.S. Letters Patent 4,183,894; (2) claims 1–6, 9–11, and 13 of U.S. Letters Patent 4,304,743; (3) claims 1–2, 6–7, and 11–15 of U.S. Letters Patent 4,416,838, and (4) would infringe claims 1–4 and 8–12 of U.S. Letters Patent 4,429,437, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated in the United States.

On June 19, 1987, the ALJ issued an ID that there is no violation of section 337. Complainant and respondents filed petitions for review of various parts of the ID pursuant to § 210.54(a) (19 CFR 210.54(a)) of the Commission's rules.

Having examined the record in this investigation, including the ID, the petitions for review, and the responses thereto, the Commission has concluded that review of the ID is warranted. The Commission does not require further written submissions from the parties regarding the merits of the ID and the determination of no violation of section 337.

If the Commission finds that a violation of section 337 has occurred, it may issue (1) an order which could result in the exclusion of the subject articles from entry into the United States and/or (2) cease and desist orders which could result in one or more respondents being required to cease and desist from engaging in unfair acts in the importation and sale of such articles.

Accordingly, the Commission is interested in receiving written submissions which address the form of remedy, if any, which should be ordered.

If the Commission concludes that a violation of section 337 has occurred and contemplates some form of remedy, it must consider the effect of that remedy upon the public interest. The factors which the Commission will consider include the effect that an exclusion order and/or cease and desist order(s) would have upon (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) the U.S. production of articles which are like or directly competitive with those which are the subject of the investigation, and (4) U.S. consumers. The Commission is therefore interested in written submissions which address the aforementioned public interest factors in the context of this investigation.

If the Commission finds that a violation of section 337 has occurred and orders some form of remedy, the President has 60 days to approve or disapprove the Commission's action. During this period, the subject articles would be entitled to enter the United States under a bond in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving written submissions concerning the amount of the bond which should be imposed.

Written Submissions

While the Commission has determined that no hearing will be held in this investigation and no written submissions are necessary regarding the ID, the parties to the investigation and interested Government agencies are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Complainant and the Commission investigative attorney are also requested to submit a proposed exclusion order and/or proposed cease and desist order(s) for the Commission's consideration. Persons other than the parties and Government agencies may file written submissions addressing the issues of remedy, the public interest, and bonding. Written submissions on remedy, the public interest, and bonding, must be filed by October 23, 1987. Reply submissions on remedy, the public interest, and bonding, must be filed by October 30, 1987.

Additional Information

Persons submitting written submissions must file the original document and 14 true copies thereof with the Office of the Secretary on or before the deadlines stated above. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment unless the information has already been granted such treatment during the proceedings. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. Documents containing confidential information approved by the Commission for confidential treatment will be treated accordingly. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary.

Copies of the nonconfidential version of the ALJ's ID and all other non-confidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: September 18, 1987.

BILLING CODE 7020–02–M

DEPARTMENT OF JUSTICE

Pollution Control; Consent Decree; Ashland Chemical Co. et al.

In accordance with Departmental policy, 28 CFR 50.7, section 122(d)(2) of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9622(d)(2), and section 7003(d) of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6973(d), notice is hereby given that on September 16, 1987, a proposed consent decree in *United States v. Ashland Chemical Company, a division of Ashland Oil, Inc., et al.*, Civil Action No. CA87–0475, was lodged with the United States District Court for the District of Rhode Island. The proposed consent decree involves claims by the United States for recovery of clean-up costs incurred and to be incurred at the Picillo Farm Superfund Site in Coventry, Rhode Island as well as claims for injunctive relief. These claims were brought against defendants Ashland Chemical Company, a division of Ashland Oil, Inc.; GAF Corporation; General Electric Company; and Monsanto Company pursuant to RCRA and CERCLA.

The proposed consent decree requires the defendants to perform the remedial action selected in the Record of Decision issued by the United States Environmental Protection Agency on March 3, 1987, which specifies removal of three piles of contaminated soil at the Site to a secure off-site landfill. The estimated cost for the government to perform this remedial action is approximately $3.5 million. The defendants are also required to pay $100,000 to the state of Rhode Island and the United States Environmental Protection Agency for past costs expended at the Site. In return, the defendants are given a release from claims for past costs at the Site and a release for the costs associated with a future groundwater remedial investigation and feasibility study to be conducted at the Site. The defendants are also given a release for certain natural resource damage claims.

The Department of Justice will receive for a period of thirty (30) days from the date of publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. Ashland Chemical Co., et al.*, D.J. Ref. No. 90–11–2–131.

The proposed consent decree may be examined at the Office of the United States' Attorney for the District of Rhode Island, 223 Federal Building and Courthouse, Kennedy Plaza, Providence, Rhode Island 02903 and at the Region I Office of the United States Environmental Protection Agency, John F. Kennedy Federal Building, Room 2203, Boston, Massachusetts 02203. Copies may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $4.00 (10 cents per page reproduction cost) payable to the Treasurer to the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

Pollution Control; Consent Decree; Renora, Inc., et al.,

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on September 16, 1987, a proposed consent decree in *United States v. Renora, Inc., et al.*, Civil Action No. 86–3462, was lodged with the United States District Court for the District of New Jersey. The proposed consent decree involves claims by the United States for recovery of certain clean-up costs incurred at the Renora Superfund Site in Edison, New Jersey. These claims were brought against defendants pursuant to section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9607.

The proposed consent decree only deals with the liability of defendants Ronald Kaschner, Viking Wire, Inc., Jersey State Power Equipment Manufacturing Co., and Whatman, Inc. The decree requires these defendants to pay $78,000 towards the government's pasts costs associated with the Site. In return, the defendants are given a release from claims for past costs at the Site.

The Department of Justice will receive for a period of thirty (30) days from the date of publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. Renora, et al.*, D.J. Ref. No. 90–11–3–113.

The proposed consent decree may be examined at the Offce of the United States' Attorney for the District of New Jersey, Federal Building, 970 Broad Street, Newark, New Jersey 07102 and at the Region II Office of the United States Environmental Protection Agency, 26 Federal Plaza, Room 437, New York, New York 10278. Copies may also be examined at the Environmental Enforcement Section, Land and Natural Resources Divsion of the Department of Justice, Room 1517, Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.80 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Divsion.

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; Aramco Service Co. et al

Petitions have been filed with the Secretary of Labor under section 221 (a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 13, 1987.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 13, 1987.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC this 21st day of September 1987.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

[TA–W–19,671 and TA–W–19,671A]

Revised Determinations on Reconsideration; Hobart Corp.

In the matter of Hobart Corporation, Torrence Street and Huffman Avenue, Dayton, Ohio.

On August 21, 1987, the Department issued a Notice of Affirmative Determination Regarding Application for Reconsideration for former workers of the Hobart Corporation's Torrence Street plant in Dayton, Ohio. The affirmed notice was published in the **Federal Register** on September 1, 1987 (52 FR 32975).

The application for reconsideration from the International Union of Electronic and Electrical Workers (IUE) claims that the Hobart Corporation is transferring its production of food weighing scales from Dayton to Taiwan. According to the union, the transferred production will be sold to Hobart's domestic customers.

On reconsideration, the Department confirmed the union's claims that Hobart transferred production of food weighing scales to an overseas location. The findings show that a substantial amount of the production from the Torrence Street plant in Dayton, Ohio was transferred to Taiwan in 1987. The Torrence Street plant ceased production in May, 1987. Additional findings show that the first shipment of the transferred production re-entered the U.S. for sale to domestic customers in September, 1987.

Also, on reconsideration it was found that the Huffman Avenue plant is a parts distribution center for 15 other plants of the Hobart Corporation, none of which have workers certified eligible to apply for adjustment assistance. A substantial part of Huffman's operations are not derived from any single plant of Hobart.

Conclusion

After careful review of the additional facts obtained on reconsideration, it is concluded that increased company imports of articles like or directly competitive with food weighing scales at Hobart Corporation contributed importantly to the decline in production and to the total or partial separation of workers at the company's Torrence Street plant in Dayton, Ohio. In accordance with the provisions of the Trade Act of 1974, I make the following revised determinations.

All workers of the Torrence Street plant, Dayton, Ohio of Hobart Corporation who became totally or partially separated from employment on or after March 1, 1987 and before September 1, 1987 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

It is further determined that the Department's negative determination for workers at the Huffman Avenue plant, Dayton, Ohio of Hobart Corporation be affirmed.

Signed at Washington, DC, this 21st day of September, 1987.

Harold A. Bratt,

Deputy Director, Office of Program Management, UIS.

BILLING CODE 4510-30-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; Parker Hannifin Corp., et al.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period September 14, 1987—September 18, 1987.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-19,900; Parker Hannifin Corp., Cylinder Division, Plymouth, MI

TA-W-19,989; Anamag, Inc., Shelbyville, IN

TA-W-19,894; HPM Corp., Eastern Div., Hartford, CT

TA-W-19,959; Motion Control, Industries, Ridgway, PA

TA-W-19,887; Art Embroidery, West New York, NJ

TA-W-19,873; McNally Pittsburg, Inc., Ohio Div., Wellston, OH

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-19,914; Donnelley Rocappi, Cherry Hill, NJ

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-19,983; SKF Automotive Products, Casey, IL

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-19,970; AT & T Information Systems, Charlotte, NC

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,046; Elm Coal Corp., Paintsville, KY

U.S. imports of coal are negligible the ratio of imports to domestic production is less than one percent.

TA-W-19,977; Energy Exchange Corp., Oklahoma City, OK

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-19,881; Emerson Electric, U.S. Electrical Motors Div., Prescott, AZ

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,006; Drelco Co., Inc., Iraam, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-19,995; Edco Drilling and Producing, Mt. Gilead, OH

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,035; TMBR/Sharp Drilling, Midland, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-19,912; Cachuma Drilling Corp, Vernal, UT

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

Affirmative Determinations

TA-W-19,898; Litton Industrial Automation Systems, Inc., New Britain Machine Div., New Britain, CT

A certification was issued covering all workers of the firm separated on or after June 24, 1986.

TA-W-19,891; E.J. Fennel, Inc., Hagerstown, MD

A certification was issued covering all workers of the firm separated on or after July 6, 1986.

TA-W-19,984; Trico Products Corp., Buffalo, NY

A certification was issued covering all workers of the firm separated on or after July 27, 1986.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel; Meetings

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended) notice is hereby given that the following meetings will be held at the Old Post Office, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506; telephone 202/786–0322.

SUPPLEMENTARY INFORMATION: The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; or (3) information the disclosure of which would significantly frustrate implementation of agency action, pursuant to the authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 45, United States Code.

1. Date: October 15–16, 1987
   Time: 7:30 a.m. to 5:30 p.m.
   Room: 415
   Program: This meeting will review applications submitted for Humanities Projects in Media, submitted to the Division of General Programs, for projects beginning after April 1, 1988.
2. Date: October 22–23, 1987
   Time: 7:30 a.m. to 5:30 p.m.
   Room: 415
   Program: This meeting will review applications submitted for Humanities Projects in Media, submitted to the Division of General Programs, for projects beginning after April 1, 1988.
3. Date: October 27–28, 1987
   Time: 7:30 a.m. to 5:30 p.m.
   Room: 415
   Program: This meeting will review applications submitted for Humanities Projects in Media, submitted to the Division of General Programs, for projects beginning after April 1, 1988.

Susan Metts,

Assistant Chairman for Administration.

BILLING CODE 7536–00

NATIONAL SCIENCE FOUNDATION

Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation

ACTION: Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978, Pub. L. 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act of 1978 at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by October 30, 1987. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESS: Comments should be addressed to Permit Office, Room 627, Division of Polar Programs, National Science Foundation, Washington, DC 20550.

FOR FURTHER INFORMATION CONTACT: Charles E. Myers at the above address or (202) 357–7934.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed in 1964 by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest. Additional information was published in the **Federal Register** on July 24, 1987.

The applications received are as follows:

1. Applicant

David C. White, Institute for Applied Microbiology, University of Tennessee, Knoxville, Tennessee 37932.

Activity for Which Permit Requested

Enter Specially Protected Area. The applicant is conducting a study of shallow water benthic marine microorganisms, and requests access to Litchfield Island Specially Protected Area for taking of samples.

Location

Palmer Station vicinity, Antarctica.

Dates

December 1987—March 1988

2. Applicant

Robert G. Robbins, ITT/Antarctic Services, Inc., 621 Industrial Avenue, Paramus, New Jersey 07652.

Activity for Which Permit Requested

Enter Specially Protected Area. The applicant proposes to enter Specially Protected Area No. 17, Litchfield Island, to inspect a boating operations survival cache. Inspection is conducted twice annually during December and March. The applicant will also examine notification signs that indicate Litchfield Island is a specially protected area, and participate in a census of bird populations.

Location

Palmer Station vicinity, Antarctica

Dates

November 1987—November 1988

3. Applicant

J. Alan Campbell, P.O. Box 209, Athens, Georgia 30603.

Activity for Which Permit Requested

The applicant proposes to enter protected areas accessible from McMurdo Station, Antarctica to observe, draw/sketch, paint, and photograph Antarctic wildlife. The applicant is an artist who is being supported by the National Science Foundation to document, depict, and interpret the Antarctic landscape, wildlife, and the Antarctic experience.

Location

McMurdo Station and vicinity, Antarctica.

Dates

December 1987–February 1988.

4. Applicants

Edward G. Atkins, Children's Television Workshop, One Lincoln Plaza, New York, New York 10023.

Activity for Which Permit Requested

Taking, Enter Specially Protected Areas, Enter Site of Special Scientific Interest. The applicant will be filming scientific investigators working in Antarctica. The applicant requests permission to enter protected areas and film scientists working with protected species at close range.

Location

McMurdo Station and vicinity.

Dates

November 16–30, 1987.

5. Applicant

Barry Lopez, Finn Rock, Oregon 97488.

Activity for Which Permit Requested

Take, enter Specially Protected Areas, enter Sites of Special Scientific Interest. The applicant will be writing articles about scientific investigators working in Antarctica. He requests permission to enter protected areas and observe at close range scientists working with protected species of birds and mammals.

Location

McMurdo Station and vicinity; Palmer Station vicinity.

Dates

November 1987–February 1988.

6. Applicant

Charlotte Evans, 741 Sport Hill Road, Easton, Connecticut 06612.

Activity for Which Permit Requested

Take, enter specially protected areas, enter sites of special scientific interest. The applicant will be writing news and feature articles about scientific investigators working in Antarctica. The applicant requests permission to enter protected areas, and observe at close range scientists working with protected species of birds and mammals.

Location

McMurdo Station and vicinity; Palmer Station and vicinity.

Dates

November 16–30, 1987 and January 4–February 4, 1988.

7. Applicant

Bailey Smith Barash, Turner Broadcasting System, Box 105366, Atlanta, Georgia 30348.

Activity for Which Permit Requested

Taking, Enter Specially Protected Areas, Enter Site of Special Scientific Interest. The applicant will be filming scientific investigators working in Antarctica. The applicant requests permission to enter protected areas and film scientists working with protected species at close range.

Location

McMurdo Station and vicinity.

Dates

November–December 1987.

Charles E. Myers,

Permit Office.

[FR Doc. 87–22499 Filed 9–29–87; 8:45 am]

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Revised Meeting Agenda

In accordance with the purposes of section 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on October 8–10, 1987, in Room 1046, 1717 H Street, NW., Washington, DC. Notice of this meeting was published in the **Federal Register** on September 21, 1987. Portions of this meeting for Thursday, October 8, 1987 have been cancelled to accommodate the availability of participants, and sessions have been added.

Thursday, October 8, 1987

8:30 a.m.–8:45 a.m.: Report of ACRS Chairman (Open)—The ACRS Chairman will report briefly regarding items of current interest to the Committee.

8:45 a.m.–9:45 a.m.: Revision to the Backfit Rule (Open)—Discuss the recently published revision to the Backfit Rule.

10:00 a.m.–11:00 a.m.: Integrated Safety Assessment Program (Open)—Discuss proposed NRC Staff's plan for implementation of ISAP taking into account ACRS's comments in its report of July 15, 1987..

11:00 a.m.–11:30 a.m.: Future ACRS Activities (Open)—Discuss anticipated subcommittee activities and items proposed for consideration by the full Committee.

11:30 a.m.–12:30 p.m.: and 1:30 p.m.–2:15 p.m.: Management Allocation of Resources (Closed)—Discuss NRC internal allocation of resources, including personnel, to provide technical advice regarding nuclear waste management and disposal.

This session will be closed to discuss information the release of which would represent an unwarranted invasion of personal privacy and information that involves the internal personnel rules and practices of NRC.

2:15 p.m.–3:15 p.m.: Zion Nuclear Station (Open)—Briefing and discussion of full field exercises to exercise emergency plans following a severe core melt accident.

3:30 p.m.–4:15 p.m.: Chernobyl Nuclear Accident (Open)—Discuss proposed NRC Staff implementation of NRC recommendations regarding the lessons learned from this accident and their applicability to U.S. nuclear power plant design and operation.

4:15 p.m.–5:15 p.m.: Planning Subcommittee Meeting Agenda

VOL
52
ISS
189
SE
30
1987
UMI

(Open)—Discuss proposed agenda items for the Planning Subcommittee Meeting to be held October 22–24, 1987 and discuss scheduling of ACRS reviews.

I have determined in accordance with subsection 10(d) Pub. L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss information related to the internal personnel rules and practices of the agency (5 U.S.C. 552b(c)(2)), and information the release of which would represent a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 a.m. and 5:00 p.m.

Date: September 24, 1987.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 87–22567 Filed 9–29–87; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos.: 50–454, STN 50–455 and STN 50–456]

Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing; Commonwealth Edison Co.

September 22, 1987.

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendments to Facility Operating License Nos. NPF–37 and NPF–66 issued to Commonwealth Edison Company (the licensee), for operation of Byron Station, Units 1 and 2 located in Ogle County, Illinois, and Facility Operating License No. NPF–72, issued to the licensee, for operation of Braidwood Station, Unit 1, located in Will County, Illinois. It is the staff's intention to apply this amendment, if it is found acceptable, to Braidwood Station, Unit 2, when it receives its operating license.

The amendment would revise Technical Specifications 4.2.3.4, 4.4.4.1, 4.4.6.1, 4.4.9.3.1 and 4.5.1.2, and Technical Specification Tables 4.3–1, 4.3–2, 4.3–3, 4.3–6, 4.3–7, 4.3–8 and 4.3–9 for a one-time extension to 32 months for the interval for performing certain 18-month instrument surveillances, in accordance with the licensee's application for amendment dated September 3, 1987.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By October 30, 1987, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall filed a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Daniel R. Muller: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Michael Miller, Isham, Lincoln, and Beale, One First National Plaza, 42nd Floor, Chicago, Illinois 60603, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i) through (v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated September 3, 1987, which is available for public inspection at the Commission's Public Document

Room, 1717 H Street, NW., Washington, DC; the Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61101; and the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Dated at Bethesda, Maryland this 22nd day of September, 1987.

For the Nuclear Regulatory Commission.

Jan A. Norris,

Acting Director, Project Directorate III–2, Division of Reactor Projects—III, IV, V and Special Projects.

[FR Doc. 87–22564 Filed 9–29–87; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–458]

Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing; Gulf States Utilities Co.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–47 issued to Gulf States Utilities Company, for operation of the River Bend Station, Unit 1, located in West Feliciana Parish, Louisiana.

The proposed amendment would revise Attachment 3, "TDI Diesel Engines Requirements," to the River Bend Station Operating License, NPF–47. This revision would modify the provisions on maintenance and surveillance for the TDI emergency diesel generators. The revision would incorporate the recommendations of Revision 2 to Appendix II of the TDI Diesel Generator Owners Group Design Review and Qualification Revalidation (DR/QR) report, submitted May 1, 1986, as reflected in the staff's generic Safety Evaluation Report (SER), NUREG–1216, "Safety Evaluation Report Related to the Operability on Reliability of Emergency Diesel Generators Manufactured by Transamerica Delaval, Inc.," August 1986. The NRC staff's evaluation of the River Bend Station DR/QR report is documented in Supplement 3 to the Safety Evaluation Report related to the operation of River Bend Station, NUREG–0989.

The proposed license condition change is in accordance with the licensee's application dated August 4, 1986 as amended August 15, 1986, supplemented September 26, 1986, and amended September 8, 1987.

A previous notice on this subject was published in the **Federal Register** on October 22, 1986 (51 FR 37512).

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Gulf States Utilities Company (GSU) addressed the above three standards in the amendment:

1. No significant increase in the probability or the consequences of an accident previously evaluated results from this change because:

The Transamerica Delaval Inc. (TDI) Owners Group DR/QR Report requires inspections that are more thorough than the inspections currently being performed in accordance with the manufacturers recommendations. Gulf States Utilities' (GSU's) commitment to the DR/QR Report is designed to increase the reliability of the Division I and II diesel generators. Implementing revision 2 of Appendix II of TDI DR/QR report will increase the reliability of the diesel generators at River Bend Station (RBS). Furthermore, this change is within the existing safety analysis provided in the RBS Final Safety Analysis Report (FSAR).

Thus, there is no increase in the probability or consequences of any accident previously evaluted.

2. This change would not create the possibility of a new or different kind of accident from any accident previously evaluated because:

The change clarifies the existing commitments presently being adhered to. The River Bend Station Unit 1 Facility Operating License (NPF–47) currently contains a condition that GSU shall implement the TDI requirements as incorporated within the license. By implementing the recommendations of Revision 2 of Appendix II of the TDI DR/QR Report, GSU will be implementing a program that has undergone extensive industry and regulatory review (reference NUREG–1216 dated July, 1986). Implementing revision 2 of Appendix II of the TDI DR/QR report will increase the reliability of the diesel generators at RBS. Thus no new or different kind of accident scenario is introduced for any accident previously evaluated.

3. This change would not involve a significant reduction in the margin of safety because:

The change makes the license condition consistent with the NRC Staff approved program (reference NUREG–1216) which ensures that the design adequacy and manufacturing of the TDI diesel generators for nuclear standby service is within the range normally assumed for diesel engines designed and manufactured in accordance with General Design Criterion (GDC) 17 and 10 CFR Part 50, Appendix B. Therefore, this change does not reduce any margin of safety as defined in the Technical Specifications Bases.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the analysis.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of the **Federal Register** notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 1717 H Street NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By October 30, 1987, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for

VOL

30
1987
UMI

leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Att: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Jose A. Calvo, Director, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Troy B. Conner, Jr., Esq., Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental peititions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i) through (v) and 2.714(d).

For further details with respects to this action, see the application for amendment dated August 4, 1986, as amended August 15, 1986, supplemented September 26, 1986 and amended September 8, 1987, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555, and at the Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803.

Dated at Bethesda, Maryland, this 25th day of September, 1987.

For the Nuclear Regulatory Commission.

Walter A. Paulson,

Project Manager, Project Directorate–IV, Division of Reactor Projects–III, IV, V and Special Projects.

[FR Doc. 87–22565 Filed 9–29–87; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–458]

Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing; Gulf States Utilities Co.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–47 issued to Gulf States Utilities Company, for operation of the River Bend Station, Unit 1, located in West Feliciana Parish, Louisiana.

The proposed amendment would revise license condition 2.C(1), Attachment 1, Item 4.b. This license condition requires that the licensee verify that adequate radio communication capability exists from all appropriate plant areas prior to startup following the first refueling outage. The revision would replace this license condition with new license conditions Items 5., 6., and 7., of Attachment 1. Proposed Item 5. would require that the installation of equipment improvements

to the security radio communications system be accomplished by May 31, 1988. Proposed Item 6. would require that testing be conducted to determine if adequate radio communications capability exists from appropriate plant areas and this testing would be accomplished prior to startup following a subsequent outage with a planned duration of seven days or longer following May 31, 1988. Proposed Item 7. would require that any further modifications or testing which may be determined to be necessary as the result of acceptance testing, be performed during a subsequent outage of sufficient duration but prior to start-up following the second refueling outage in accordance with the licensee's application for amendment dated September 8, 1987.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee provided an analysis that addressed the above three standards in the amendment application. The staff modified items 1. and 3., below, to delete safeguards information.

1. No significant increase in the probability or the consequences of an accident previously evaluated results from this change because:

The River Bend Station (RBS) communication system is designed to provide reliable intraplant and interplant (plant-to-offsite) communication under both normal plant operation and accident operations. An independent and redundant communication system exists for communications between the Central Alarm Station (CAS) and Secondary Alarm Station (SAS), operators, security officers, watch officers, and armed response personnel through the use of several different types of systems. The SER related to the operation of River Bend Station (NUREG–0939) has reviewed the RBS communication system in Section 9.5.2 and determined that the communication system is designed to provide a reliable intraplant and interplant (or plant-to-offsite) communications under both normal plant operations and accident conditions, to start-up, continue safe operation, or safely shut down. The two-way radio communications systems is not an initiator of any accident in FSAR Chapters 6 and 15. No Limiting Conditions for Operation are identified in the Technical Specifications for security communications. In addition, this change does not revise any safety analyses as described in the Final Safety Analysis Report.

2. This change would not create the possibility of a new or different kind of accident from any accident previously evaluated because:

River Bend Station relies on an established onsite physical protection system and a dedicated, well trained security force to implement an accepted program with capabilities for the protection of design basis threats to the plant. No changes are proposed to these other measures of protection, (i.e., Physical Barriers, Access Control, Detection Capabilities and Response Force). Therefore, there is no anticipated decrease in levels of overall program effectiveness. Radiological sabotage, attach threats and other miscellaneous event potentials are based on postulated considerations. This change has no significant effect on such contingencies. This provides additional assurance prior to installation and system testing that the system does not initiate any new or different kinds of accident from any previously evaluated.

3. This change would not involve a significant reduction in the margin of safety because:

No plant system, as it relates to plant operations and other security systems, will be altered as a result of this change. As identified in NUREG–0908, "Acceptance Criteria for the Evaluation of Nuclear Power Reactor Security Plans," for those cases where areas have been identified where use of portable radios could interfere with plant monitoring equipment, etc., an alternate means of communication exists with the CAS and SAS via several other alternate systems. These alternate means of communications will continue to be available during the extended period.

In addition, the CAS and SAS will continue to have the capability with alternate communication systems to provide fully independent and redundant communication with local law enforcement and the plant control room(s). This adheres to NUREG–0416, "Security Plan Evaluation Report Workbook." Security force control and coordination links are separate and distinct from all other internal administrative operations, logistics, telemetry, and process control communication systems in the facility.

This system will improve the existing radio communications throughout RBS. The proposed change does not reduce the margin of safety defined in the current Technial Specification Bases for security communications. Therefore, this proposed change does not significantly decrease the margin of safety.

This change is not considered, as stated above, to increase the probability or consequences of a previously analyzed accident due to the requested extended period for installation and testing of the system. The security force will continue to function as it has during the first cycle with the current system. Therefore, this request does not create the possibility of a new or different type of accident. The system, once completed, will improve the existing radio communications. Therefore, continuing operation with the current system will not involve a significant reduction in the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the analysis.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of the **Federal Register** notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By October 30, 1987, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be

affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR § 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Att: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Jose A. Calvo, Director, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Troy B. Conner, Jr., Esq., Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i) through (v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated September 8, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555, and at the Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803.

Dated at Bethesda, Maryland, this 24th day of September, 1987.

For the Nuclear Regulatory Commission.

Walter A. Paulson,

Project Manager, Project Directorate-IV, Division of Reactor Projects-III, IV, V and Special Projects.

BILLING CODE 7590–01–M

OFFICE OF MANAGEMENT AND BUDGET

OSHA "Hazard Communication" Standard; Open Public Meeting

AGENCY: Office of Management and Budget.

ACTION: Notice of public meeting.

SUMMARY: The Office of Management and Budget (OMB) will solicit comments on the recordkeeping, notification and other paperwork requirements of the Occupational Safety and Health Administration's (OSHA) recently expanded standard, "Hazard Communication" (29 CFR 1910.1200) at a public meeting. Members of the public are invited to provide comments and suggestions concerning these requirements and the associated paperwork. This meeting will be conducted under the authority of the

Paperwork Reduction Act of 1980 (Pub. L. 96–511).

DATE: October 16, 1987, beginning at 9:00 a.m.

ADDRESS: The meeting will be held at the New Executive Office Building, Room 2010, 726 Jackson Place, NW., Washington DC, (use 17th Street entrance). To obtain entrance into the building, please call (202) 395–6880 with your full name and birthdate by October 14 and request that your name be placed on the access list. Attendees who notify OMB in writing do not need to call to be cleared into the building.

FOR FURTHER INFORMATION CONTACT: Scott H. Jacobs, Human Resources and Housing Branch, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395–6880.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act (PRA) requires OMB to review Federal information requirements and to provide interested persons early and meaningful opportunity to comment on information requirements imposed by Federal agencies (44 U.S.C. 3517). Public participation in review of such requirements is appropriate in assisting OMB and other Federal agencies to carry out the goals of the Act. Under the Act and implementing regulations at 5 CFR 1320.4(b), agencies must ensure that collections of information have practical utility, are the least burdensome necessary to achieve program objectives, and are not duplicative of information otherwise available. The Act prohibits agencies from conducting or sponsoring any collection of information which has not received OMB approval or an OMB control number.

OMB conducted a public meeting on April 2, 1987, on the paperwork requirements of the Hazard Communication Standard, which at that time covered only manufacturers (the transcript and all submitted documents for that meeting are available to the public in OMB paperwork docket 1218–0072 at the above address). On August 24, 1987, pursuant to an order from the U.S. Court of Appeals for the Third Circuit, OSHA published a final rule expanding coverage of the Standard to the nonmanufacturing sector. Recognizing that "there may be additional information" regarding the "feasibility or practicality" of the expanded rule, OSHA asked that comments on the final rule be submitted within 60 days so that OSHA could determine whether additional rulemaking is required. Subsequently, OMB has received several letters from the affected public requesting that OMB conduct a second public meeting under the PRA to examine the paperwork requirements of OSHA's expanded Standard.

On September 10, 1987, OSHA submitted the paperwork requirements of the Standard to OMB for review under the PRA. These requirements include chemical hazard evaluation, written hazard communication programs, labeling, development and provision of Material Safety Data Sheets (MSDS), and the paperwork and notification aspects of access to trade secrets. OSHA has estimated that the expanded Standard imposes a paperwork burden of 34,780,000 hours in the first year, and 8,080,000 hours in subsequent years. OSHA's statement of justification and calculation of burden for the paperwork requirements is available from the Department of Labor, Office of the Assistant Secretary for Administration and Management (Paul Larson, 523–6331). A detailed explanation of the evidence in the public record and policy considerations upon which OSHA based the information collection and paperwork requirements of the expanded Standard can be found in the preamble to the final rule (52 FR 31852).

The purpose of this public meeting is to solicit comments from a wide range of individuals and organizations on the information collection requirements of the expanded standard. These comments will assist OMB in determining if the information requirements of the Standard are consistent with the Paperwork Reduction Act, and, if not, in suggesting possible revisions to the Standard. Copies of these comments will also be placed in OSHA's public record for this Standard. Comments provided for the OMB public meeting of April 2, 1987, need not be resubmitted.

Commenters are urged to present their views with as much data as possible so that the merits of their cases can be evaluated. Comments are welcome on all aspects of the paperwork requirements of the standard; however, the audience will be particularly encouraged to comment on the following issues:

Burden Estimates

• What will be the paperwork burden required for compliance with the standard? How many hours will be required to comply with the paperwork requirements? What will be the costs of compliance associated with these requirements?

Transmittal of Hazard Information

• Does each recordkeeping, notification and paperwork component of the expanded "Hazard Communication" standard contribute to the efficient, effective transmittal of hazard information? Can these components be made more efficient or effective?

Consumer Products

• What is the practical utility of the paperwork requirements that apply to consumer products? Are there specific classes or categories of products that should or should not be covered?

Sealed Containers

• Are the paperwork provisions covering sealed containers the least burdensome necessary to address the hazards?

Multi-Employer Worksites

• What is the practical utility of the paperwork requirements covering multi-employer worksites? Are these provisions the least burdensome necessary to address the hazards and conditions at those sites?

Solid Products

• OSHA has included a limited exemption from labeling requirements for solid metal. Should this limited exemption be applied to other solid products, such as wood or plastics?

Generic Hazard Communication Program

• Are there administrative actions that OSHA or other agencies of the Federal government can take to reduce the paperwork burden, such as developing a generic hazard communication program?

Computerized Hazard Information Systems

• Are computerized hazard information systems widely available that can assist in reducing the time and resources needed to comply with the paperwork provisions of the Standard?

Coverage of "De Minimis" Exposures

• What would be the practical utility of paperwork provisions for substances or exposure circumstances for which exposures or risks may be "de minimis"? If appropriate, could the paperwork provisions be revised so as to exclude "de minimis" situations?

Impact on Community Right-to-Know

• What will be the paperwork burden and associated costs required for compliance with sections 311 and 312 of

VOL 52 ISS 189 SEP 30 1987 UMI

the Superfund Amendments and Reauthorization Act, following the expansion of scope of the Standard to nonmanufacturers? Does the expansion affect the practical utility of the section 311 and 312 paperwork requirements? Are there regulatory alternatives that OSHA could adopt which would achieve the goals of sections 311 and 312 while reducing the paperwork burdens?

Persons who wish to speak at the public meeting should notify OMB in writing or by telephone at the above number by October 14, and should provide the full names and birthdates of all attendees, as well as an estimate of the time needed. Oral presentations will be limited to 15 minutes for each individual or organization, except under special circumstances. An agenda of the meeting and a list of attendees will be available on October 15. Persons who are unable to attend but who wish to provide comment may do so in writing. Comments, particularly recommendations for alternatives, should be as detailed and specific as possible, and should include supporting data. All written comments should be submitted on or before October 19, 1987, to the following address: Office of Management and Budget; OIRA Docket Library; Room 3201; Washington, DC 20503, Attn: Scott Jacobs.

Joseph R. Wright, Jr.,

Deputy Director.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review By Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272-2142.

Upon Written Request Copy Available from: Securities and Exchange Commission, Office of Consumer Affairs, 450 Fifth Street, NW., Washington, DC 20549.

Extension

File No. 270-94, Rule 17a-11;
File No. 270-25, Rule 15A-1, Forms X-15AJ-1, X-15AJ-2;
File No. 270-35, Rule 17f-2(c);
File No. 270-37, Rule 17f-2(e);
File No. 270-11, Rule 15b3-1;
File No. 270-38, Rule 19b-4 and Form 19b-4;
File No. 270-36, Rule 11Ab2-1 and Form SIP;

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for extension of OMB clearance the following rules and forms under the Securities Exchange Act of 1934:

Rule 17a-11-Supplemental Current Financial and Operational Reports to be made by Certain Exchange Members, Brokers and Dealers. Six hundred respondents incur as estimated average of one hour to comply with the Rule.

Rule 15Aj-1 (17 CFR 240.15Aj-1) and Forms X-15AJ-1 and X-15AJ-2 (17 CFR 249.802 and 803) which provide for registered securities associations to file annual amendments to their registration statements to reflect changes made during the preceding year in the information contained in those statements. One respondent incurs an estimated average of three burden hours to comply with this rule.

Rule 17f-2(c) (17 CFR 240.17f-2(c)) which generally requires registered national securities exchange and registered national securities associations to submit plans for collecting, processing and forwarding fingerprint cards to the FBI. A respondent incurs an estimated average of one burden hour to comply with this rule.

Rule 17f-2(e) (17 CFR 240.17f-2(e)) which generally requires members of national securities exchanges, brokers, dealers, registered transfer agents and registered clearing agencies claiming exemptions from the fingerprint requirement to prepare and maintain a statement supporting their claim for exemption. One respondent incurs an estimated total of one-half burden hour to comply with the rule.

Rule 15b3-1 (17 CFR 240.15c3-3) which requires brokers or dealers to amend the information contained in Form BD whenever such information becomes inaccurate for any reason. One respondent incurs an estimated average of two-thirds of an hour to comply with the rule.

Rule 11Ab2-1 and Form SIP (17 CFR 240.11Ab2-1) which outline the requirements for filing an application to register as an exclusive processor of securities information. One respondent incurs 440 burden hours to comply with this rule.

Submit comments to OMB Desk Officer: Mr. Robert Neal (202) 395-7340, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3228 NEOB, Washington, DC 20503.

September 25, 1987.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-W

[Release No. 34-24942; File No. SR-CBOE-87-38]

Self-Regulatory Organizations; Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to Government Securities Options Permits

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on August 13, 1987, the Chicago Board Options Exchange, Inc., ("Exchange") filed with the Securities and Exchange Commission, the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The addition is italicized; there are no deletions.

Additional Government Security Options Permits

Rule 3.22A. The Exchange may issue up to 20 three-year permits for effecting transactions in Government security options settled by physical delivery, since no new permits may be issued under Rule 3.20. All of these permits shall expire three years after [insert date to be set by the Exchange after SEC approval]. These additional permits shall have the same terms as the old permits with the following exceptions. There is no right to purchase a regular membership. No member or member organization may hold more than two permits. A member who is a sole proprietor may employ a nominee to use a permit, with the approval of the Membership Committee. The Membership Committee may withdraw, temporarily or permanently, some or all unused permits.

In addition, the Exchange (1) may provide that the 20 permits described above also enable permit holders to effect transactions as market makers and floor brokers in option contracts on interest rate measures traded on the Exchange and/or (2) may issue up to 75 additional permits on the same terms as the permits described above, except that they shall expire three years after the date trading begins in interest rate measures, which permits would enable permit holders to effect transactions as market makers and floor brokers in option contracts on Government securities and on interest rate measures.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections (A), (B), and (C) below.

(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The purpose of this proposed rule change is to give the Exchange the flexibility to facilitate the development of the exchange's market for the trading of option contracts on interest rate measures, which market is scheduled to open later this year. The proposed permits would have the same terms as those permits recently approved by the SEC in filing SR–CBOE–87–15, except that the proposed permits would expire three years after the date trading begins in interest rate measures. In addition, the Board may provide that the 20 permits that are limited to the trading of government securities option contracts settled by physical delivery be broadened to include option contracts on interest rate measures. The proposed permits are designed to provide inexpensive access in order to attract market-makers and floor brokers to trade a new product, namely, option contracts on interest rate measures. The statutory basis for this proposed rule change is Section 6(b)(5) of the Securities Exchange Act of 1934, in that the proposed permits are designed to facilitate transactions in option contracts on interest rate measures.

(B) Self-Regulatory Organization's Statement on Burden on Competiton

The proposed rule change will not impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be approriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by October 21, 1987.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: September 25, 1987.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 87–22551 Filed 9–29–87; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–24941; File No. SR–NYSE–87–10]

Self-Regulatory Organizations; Amendment to Proposed Rule Change by New York Stock Exchange, Inc. Relating to Trading Review, Investigation and Reporting Requirements, Annual Compliance Reports, Customer Complaint Statistics, and Compliance Official Examination.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on August 28, 1987, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

On March 26, 1987, the Exchange filed a proposed rule change (the "March Filing") that, among other changes, amends Rules 342 and 351 to codify, clarify and make explicit certain supervisory and compliance obligations of members and member organizations.[1] Amendment No. 1 makes additional changes to those two rules.

The Exchange proposes to amend proposed rule 342.21 to confine the scope of the review of trades to seeking to identify trades that may violate "the provisions of the Securities Exchange Act of 1934, the rules under that act and the rules of the Exchange prohibiting insider trading and manipulative and deceptive devices." This conforms with the requirements of the "no reasonable cause" statement required by proposed rule 351(e). In addition, the application of the "no reasonable cause" statement to employee trades is narrowed to cover only those trades of a particular quarter actually reviewed.

As discussed in Item II(A) below, the Exchange also makes minor textual changes to proposed rules 342.30 (Annual Reports) and 342.20 (Information Requests).

Finally, the Exchange is amending proposed rule 342.13(b) to provide that the person designated to direct day-to-day compliance activity, as well as any other person who directly supervises ten or more persons engaged in compliance activity, must pass the Compliance Official Qualification Examination.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in Sections A, B, and C below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) *Purpose.* The purpose of Amendment No. 1 is to revise the text of the changes proposed in the March Filing to (a) clarify the Exchange's orginal intent in drafting the proposed rules and (b) reflect practical and drafting suggestions made in comment letters received by the Exchange in response to publication of the proposed rules (the "Comment Letters") and in discussions with the Commission staff. The following paragraphs discuss the key changes.

(a) *Proprietary and employee trading review.* Many of the Comment Letters indicate that their writers (the "Commentators") interpret proposed rule 342.21 to require a review of each and every proprietary and employee trade. In addition, some Commentators objected to reviewing trades for violations of all Federal securities laws. Proposed rule 342.21 has been revised to make clear the Exchange's original intent that the review procedures need not necessarily mandate an examination of every trade, but could use sampling techniques. The proposed rule also conforms the review requirement to the scope of the statement that rule 351(e) requires; i.e., the review seeks to identify trades that may violate "the provisions of the Securities Exchange Act of 1934, the rules under that act and the rules of the Exchange prohibiting insider trading and manipulative and deceptive devices".

In reviewing the consequences of using sampling techniques for the written statement that proposed rule 351(e) requires, it became evident that conceptually the rule 351(e) statement and the sampling technique that could be employed as a review procedure were in tension. Members or member organizations whose sample disclosed no questionable trades could state that they have "no reasonable cause to believe" that a violation had occurred. But how could members or member organizations whose samples disclosed one or more questionable trades do so? If their sampling techniques were valid, they would know that all their trades were questionable in the same proportion as their samples' trades had proven to be. They would likely have to go back and review all their trades in order to make the required statement.

Since the likely practical consequence of the statement requirement was to cause the review of all trades during the first pass, the Exchange determined to address Commentators' concerns about the burden of reviewing trades by reducing the frequency of employee trade reviews.

Amendment No. 1 implements that determination by confining the "no reasonable cause" statement as it applies to employee trades to cover only those trades actually reviewed. An information circular will make clear that each employee account must be reviewed at least once a year. Thus, member or member organizations that uncover one or more questionable employee trades will not then have to review every employee trade of the current quarter to make the required statement.

The Exchange will also use its authority to exclude classes of trades in furtherance of achieving an appropriate balancing of the review burden against the benefits of review. Initially, the Exchange anticipates permitting members and member organizations to exclude proprietary trades of 1000 shares or less so long as their procedures adequately address the possibility of splitting trades into 900-share lots to avoid review.

In addition, the Exchange has amended proposed rule 342.21 to make clear that the accounts that will be subject to review will include the accounts of family members of employees. An information circular will amplify what is meant by family members.

(b) *Annual report.* At the suggestion of the Commentators, the Exchange has revised the language of proposed rule 342.30 to provide for the identification and analysis of future systems and procedures to detect violations of federal securities laws and rules and Exchange rules.

(c) *Information requests.* In response to Commentators' concerns with respect to complying with the Exchange's information requests by specified dates when the nature or volume of a response legitimately requires adjustments, the language of proposed rule 342.20 has been revised to provide that information must be provided by the date required by the Exchange. This makes clear that the Exchange can adjust deadlines for members or member organizations which show reasonable grounds for not meeting the timetable of an information request.

(d) *Compliance official qualification examination.* To make the Exchange's original intent clearer, proposed rule 342.13(b) has been revised to state that the person at a member organization designated to direct day-to-day compliance activity as well as any other person at such organization who directly supervises ten or more persons engaged in compliance activity must pass the Compliance Official Qualification Examination. The Exchange determined that, rather than testing the person or persons with overall responsibility for compliance, the most effective way of promoting responsible compliance activity would be to have (i) the person or persons designated to direct day-to-day compliance activity and (ii) persons directly supervising ten or more persons engaged in compliance activity take the Compliance Official Qualification Examination. While it is desirable that the person or persons with overall responsibility for compliance have a good understanding of the Federal securities laws and rules and the Exchange rules, unless he or she is also the person or persons supervising compliance on a daily basis (which is often not the case at larger member organizations), the provision would miss its mark. The revised text corrects this mistargeting.

(2) *Statutory basis.* As noted in the March filing, the statutory basis for the proposed rule change is section 6(b)(5) of the Act. The NYSE also stated that the rule change also relates to Section 9, 10, and 14 of the Act. See March filing.

B. Self-Regulatory Organization's Statement on Burden on Competition.

As noted in the March filing, the NYSE continues to believe that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.

At the time of the March filing the NYSE had received four letters commenting on drafts of the rules included in the proposed rule change.[2] Subsequently, the NYSE received thirteen additional comment letters, which have been filed with the Commission.[3] The NYSE has submitted, at the request of Commission staff, a memorandum to the Division of Market Regulation discussing the thirteen additional comment letters it has received and the Exchanges response.[4]

[2] *See* March Filing for a summary of these comment letters.

[3] The Commission also received five comment letters in response to their publication of the proposal.

[4] Copies of the comment letters and the NYSE's memorandum are available from the Commission at the address noted below in Section IV or from the NYSE.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing.[5] Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications, relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submittted by October 21, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: September 25, 1987.

Shirley E. Hollis,

Assistant Secretary.

FR Doc. 87-22552 Filed 9-29-87; 8:45 am]

BILLING CODE 8010-01-M

[5] The Commission notes that comments received in response to the March filing are presently being considerded, and requests that comments submitted pursuant to the present filing should be limited to the content of the above-described amendments.

[Release No. 34-24939; File No. SR-MSE-86-5]

Self-Regulatory Organizations; Midwest Stock Exchange, Inc.; Order Approving Proposed Rule Change

The Midwest Stock Exchange, Inc. ("MSE" or "Exchange") submitted on August 14, 1986, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), and Rule 19b-4 thereunder to amend its standards for listing on the Exchange.[1]

Notice of the proposed rule change together with its terms of substance was provided by issuance of a Commission release (Securities Exchange Act Release No. 23564), August 26, 1986) and by publications in the **Federal Register** (51 FR 31862, September 5, 1986). The Commission did not receive any comments on the proposal in response to its solicitation, although the MSE forwarded to the Commission nine comment letters it had received in response to its own solicitation of comments.[2]

Under the MSE's proposed rule change, two new listing requirements would be added to Article XXVIII, Rule 7, of the Rules of the MSE. First, listed companies would be required to maintain a minimum of two independent directors on their board of directors. Second, all listed companies would be required to establish an Audit Committee composed of a majority of independent directors.[3] The Exchange states that these changes have been proposed to help ensure that companies listed on the MSE will continue to maintain their financial integrity and favorable reputation while meeting minimal standards necessary for the protection of investors.

As defined by the MSE's proposed rule, the term independent director would mean "a person, other than an officer or employee of the company or its subsidiaries or any other person having a relationship which, in the opinion of the board of directors, would interfere with the exercise of independent judgment in carrying out the responsibilities of a director."[4] The Audit Committee, which the proposed rule requires companies to establish and maintain, would be required to have the majority of its membership composed of independent directors.[5]

Amendment No. 1 to the proposed rule change adds a provision that addresses the application of these revised standards to companies that are currently listed on the MSE. It provides that, upon approval of the proposed rule change, all companies currently listed on the Exchange will be notified of the revised standards and informed that they have two years from the date of such notification to come into compliance with those standards.[6] The

[1] On June 3, 1987, the MSE submitted amendment No. 1 to File No. SR-MSE-86-5. This amendment adds a provision to the proposed rule that sets out procedures under which currently listed companies must come into compliance with the proposed revised requirements.

[2] *See* note 5, *infra.*

[3] The New York Stock Exchange, Inc. ("NYSE"), the American Stock Exchange, Inc. ("Amex") and the National Association of Securities Dealers ("NASD") have similar requirements for audit committees and independent directors. The NYSE Listed Company Manual, § 303.00, requires domestic listed companies to establish and maintain an Audit Committee comprised solely of independent members of the board of directors. The Amex Company Guide, section 121, recommends that every listed company have at least two independent directors. This provision also recommends that every listed company establish and maintain an Audit Committee composed solely of independent directors. Subdivision D, Schedule D, Part II of the By-Laws of the NASD requires National Market System ("NMS") companies quoted on the NASD's Automated Quotation System ("NASDAQ") to maintain a minimum of two independent directors on their board of directors. In addition, NASDAQ/NMS companies must have an Audit Committee with the majority of its membership made up of independent directors. These requirements were part of a group of corporate governance standards which the Commission recently approved for NASDAQ/NMS companies. *See* Securities Exchange Act Release No. 24633, June 23, 1987, 52 FR 24234, (hereafter "NASDAQ/NMS Release").

[4] The definition of independent director in the proposed MSE rule is similar to the definitions used in the comparable NYSE, Amex and NASD rules. *See* note 3, *supra.* The NYSE rule defines independent director as being independent of management and free from any relationship that, in the opinion of its board of directors, would interfere with the exercise of independent judgment as an audit committee member. Under the NYSE rule, directors who are affiliates of the company or officers or employees of the company or its subsidiaries would not be qualified for audit committee membership.

The Amex rule defines independent directors as directors who are not officers of the company; who are neither related to its officers nor represent concentrated or family holdings; and who, in the view of the company's board of directors, are free from any relationship that would interfere with the exercise of independent judgment.

The recently adopted NASD rule defines independent director as a person other than an officer or employee of the company or its subsidiaries or any other individual having a relationship which, in the opinion of the board of directors, would interfere with the exercise of independent judgment in carrying out the responsibilities of a director.

[5] MSE issued a notice to its members and listed companies soliciting comments on the proposed rule change on July 12, 1985. Eight of the comment letters received were from companies currently listed on the MSE and one letter was from an MSE member broker-dealer. All of the nine comment letters expressed support for the proposed rule change. The proposed rule change was approved by the Executive Committee of the MSE Board of Governors on July 23, 1986.

[6] There are currently 18 MSE listed companies. Eight of those companies are exclusively listed on

Continued

VOL 52 ISS 189 SE 30 1987 UMI

MSE would require such listed companies to notify the Exchange in writing, within the two year period, of their compliance with the rules. Companies applying for listing after approval of the proposed rule change would be required to comply with the revised standards prior to Exchange approval of their application.[7]

As noted above, the proposed MSE rule change would adopt independent director and audit committee listing standards for MSE listed companies that are similar to standards required by Amex, and NYSE and which were recently adopted, along with a number of other corporate governance requirements, by the NASD for NASDAQ/NMS companies. As the Commission stated in its order approving the adoption of corporate governance standards for NASDAQ/NMS companies, the exchanges have become accepted as sources of fundamental investor protection and therefore it is reasonable for an SRO to continue to set standards affecting minimum investor protection. As noted in the NASDAQ/NMS Release, the establishment of minimum exchange listing and NASDAQ/NMS authorization standards create uniformity that helps to assure investors that all the companies traded in those markets have the fundamental safeguards they have come to expect of major companies.[8] As a consequence of this, investors are spared the costs of evaluating the significance of varying corporate structures in making investment decisions.

The MSE proposal seeks to adopt standards which the Commission understands, and the comments of MSE listed companies indicate, have been met or surpassed by most major U.S. corporations. In addition, the Commission does not believe that compliance with these proposed standards will impose substantial cost burdens on those MSE companies that will need to come into compliance with these new standards. In this regard, the Commission believes that Amendment No. 1 to the proposed rule change grants existing MSE issuers a sufficient period of time to comply wtih the new standards.

Based on the above, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder in that they will serve to protect investors and the public interest.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: September 24, 1987.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 87-22506 Filed 9-29-87; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-24940; File No. SR-NYSE-87-29]

Self-Regulatory Organizations; Proposed Rule Change by New York Stock Exchange, Inc. Relating to the Order Size of Specialist's "One-Half Point Error Guarantee" (Rule 123A.47(b)) From 1,099 Shares to 2,099 Shares

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on August 28, 1987, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amending Rule 123A.47(b)[1] to increase specialists responsibility for errors up to one-half point for Super DOT[2] market, marketable limited price orders and limited price orders from 1,099 shares to 2,099 shares.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections (A), (B), and (C) below.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

The purpose for adopting Rule 123A.47(b) in October, 1982,[3] was to provide for a more efficient, cost-efficient way of resolving errors in order executions reported through the Super DOT System.[4] Ever since the Designated

---

the MSE. The remaining 10 companies are listed on both the MSE and the NYSE and, thus, are already in compliance with the new MSE standards. The MSE's procedures for bringing currently listed companies into compliance with the new standards are similar to the procedures employed by the NASD with the adoption of new corporate governance standards for NASDAQ/NMS companies. The NASD has given existing NASDAQ/NMS companies 18 months from the effective date of the changes (i.e., until February 1, 1989) to come into compliance with their new standards. New companies receiving NASDAQ/NMS designation must be in compliance with the corporate governance standards. *See* Commission's order approving NASDAQ/NMS corporate governance standards, note 3, *supra*, at 5.

[7] The MSE did not solicit comments from members and listed companies on the contents of Amendment No. 1. However, of the eight listed companies commenting on the original proposed rule change, all supported the proposal and four of those companies indicated that they were already in compliance with the proposed standards.

[8] *See* Commission's order approving NYSE requirement for audit committee composed solely of independent directors. Securities Exchange Act Release No. 13346, March 9, 1977, 11 SEC Doc. 1945.

[1] Under Rule 123A.47(b), a specialist guarantees the execution price he reports to member firms via Super DOT, unless the reported price is more than ½ point away from the actual execution price, in which case the actual price is binding.

[2] The NYSE's Super DOT system is an order routing and execution system for market and marketable limited price orders up to a certain size. Currently the size limit for the system is 2,099. Super DOT electronically routes orders from a NYSE Member's office to the specialist in the particular stock on the floor of the NYSE.

[3] *See*, Securities Exchange Act Rel. No. 19366 (December 22, 1982), 47 FR 58420. Under the Rule is a specialist reports an erroneous execution price to a subscribing Super DOT member firm, he absorbs the difference between the erroneous reported price and the actual price, provided the difference is less than one-half point form the actual price. When the difference between the reported price and actual price is greater than one-half point, the specialist is permitted to correct the erroneous price through the Super DOT system; he is not, however, liable for the difference between the reported price and the actual price. In this case, the member firm has the option to either place the transaction in its error account or require the customer to absorb the difference.

[4] According to the Exchange, it costs a member firm an average of $75-$80 per trade to correct an erroneously reported execution price. In addition, reported errors are not corrected immediately; there is usually a lag in correcting erroneously reported prices. During the time lag, member firms usually quote the erroneous price to their customers. The one-half point guarantee provided in Rule 123A.47(b) protects both the member firm and its customer since the specialist aborbs any price

Continued

Order Turnaround ("DOT") System was first introduced, the Exchange has remained sensitive to the needs of its membership constituency to provide a fast, efficient, cost-effective way to send orders to the Floor and receive back execution reports.

As other system enhancements were added, the entire system became known as Super DOT. When the last amendment was made to Rule 123A.47(b) in July, 1985, the average trade size was 1,860 shares.[5] In the first six months of 1987, the average trade size has increased to 2,045 shares.[6]

This request to increase the size of orders that will be subject to the "one-half point error guarantee" requirement contained in Rule 123A.47(b) from 1,099 shares to 2,099 shares directly responds to specific member firm subscriber requests to permit them to obtain the inherent efficiencies of Super DOT for larger orders.

(2) Statutory Basis for the Proposed Rule Change

The statutory basis for the proposed rule change is Section 6(b)(5) of the Act in that it will ". . . foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, . . ." and section 17A(a)(1) of the Act in that it will enhance "the prompt and accurate clearance and settlement of securities transactions, ..."

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Changes Received from Members, Participants or Others

The Exchange has not solicited comments on the proposed rule change and no unsolicited comments have been received.

difference below one-half a point. In addition, the Rule eliminates the cost a member firm would incur if it were to correct the erroneous price.

[5] *See* Securities Exchange Act Rel. No. 22498 (October 2, 1985) 50 FR 41082. The amendment permitted the Exchange to determine the size of market, marketable limited price orders and limited price orders that are subject to the "one-half point error guarantee" provision of Rule 123A.47(b).

[6] NYSE Business Research Department Statistics.

III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE.

All submissions should refer to the file number in the caption above and should be submitted by October 21, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: September 24, 1987

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16002; 812-6682]

Applications; Prudential-Bache Municipal Bond Fund et al.

September 24, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: Prudential-Bache Municipal Bond Fund ("Fund"), The Prudential Insurance Company of America ("Prudential"), and Prudential Reinsurance Company ("PruRe").

Relevant 1940 Act Sections: Exemption requested under section 17(b) from the provisions of section 17(a), permission for joint transactions under section 17(d) and Rule 17d-1 thereunder, and an exemption under section 6(c) for prospective relief.

Summary of Application: Applicants seek an order to allow its Insured Series, and any other series of the Fund that may be established in the future having an investment objective and investment policies and restrictions that are substantially similar to those of the Insured Series ("Future Insured Series"), to purchase the portfolio insurance coverage described herein from an affiliate and to accept full settlements arising from claims made upon the insurance.

Filing Date: The application was filed on April 10, 1987, and amended on September 11, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 19, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Prudential-Bache Municipal Bond Fund, One Seaport Plaza, New York, New York 10292. The Prudential Insurance Company of America, Prudential Plaza, Newark, New Jersey 07101. Prudential Reinsurance Company, 100 Mulberry Street, Newark, New Jersey 07102.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney (202) 272-2190 or Brion R. Thompson, Special Counsel (202) 272-3016 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copies who can be

contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations:

1. Prudential is the investment adviser of the Fund, an open-end, diversified, management investment company registered under the 1940 Act. The Fund currently consists of three separate series; additional series may be added in the future. The investment objective of the Insured Series of the Fund is to provide the maximum amount of income that is eligible for exclusion from federal income taxes consistent with the preservation of capital, and this objective is to be achieved, *inter alia*, through investing in municipal obligations that are insured. This insurance may be either "New Issue Insurance" obtained by the issuer or underwriter of a municipal bond or note at the time of issuance, "Secondary Market Insurance" on a particular municipal bond or note purchased by the Insured Series or a previous bondholder or noteholder, or "Portfolio Insurance" maintained by the Insured Series. Unlike New Issue or Secondary Market Insurance (which continues in force for the life of the municipal obligation), Portfolio Insurance covers obligations only while held by the Insured Series.

2. New Issue, Portfolio and Secondary Market Insurance may be obtained from AMBAC Indemnity Company ("AMBAC"), among other unaffiliated insurers, (each an "Insurer") guaranteeing the scheduled payment of principal and interest on certain securities while in the portfolio of the Insured Series. In selecting an Insurer, consideration is given to the insurance premium rates charged, the capacity or allocation of insurance made available for a given issuer, ratings given to an Insurer by a nationally recognized rating agency, and the level of service provided by and reputation of an Insurer.

3. PruRe reinsures, in part, AMBAC's insurance obligations on an excess of loss basis to protect against catastrophic losses incurred by AMBAC for all of AMBAC's financial guaranty policies. Since PruRe's reinsurance applies to New Issue, Secondary Market and Portfolio Insurance written for the Insured Series and other bond funds, PruRe's interest is not limited solely to those losses which may be experienced by the Insured Series. However, PruRe is one of five reinsurers that are parties to a reinsurance treaty with AMBAC that provides for reinsurance of $30 million in excess of $200 million only after all of AMBAC's first layer reinsurance has been used. Because the Insured Series is expected to generate a portfolio of municipal obligations of several hundred million dollars, the reinsurance policy limits provided by PruRe on the aggregate loss cover are not anticipated to be greater than 10% of the Insured Series' portfolio of municipal obligations for which Portfolio or Secondary Market Insurance has been obtained. Further, PruRe has never been called upon to pay under the reinsurance treaty with AMBAC, which has been in effect approximately four and a half years.

4. The premiums on any policy of Portfolio or Secondary Market Insurance will be paid by the Insured Series directly to an Insurer and, by virtue of the Insurer's reinsurance arrangement, indirectly to PruRe or another affiliate of Prudential providing reinsurance to that Insurer. Insurance premiums on New Issue Insurance are typically paid for by the issuer of or the obligor on a municipal obligation; the Insured Series indirectly pays for the insurance through the price it pays for the security.

5. The proposed insurance would involve the payment by the Insured Series to Insurers of premium rates determined by the Insurers within a rate framework applicable to all mutual funds and filed with applicable state insurance regulatory authorities based upon an Insurer's determination of the creditworthiness of the issuers of the municipal obligations, the risk of default by such issuers, the potential liability arising from insuring such issues, and the demand of mutual funds to apply for such insurance. Neither the Fund, Prudential nor PruRe will have any role in setting such rates. The insurance premiums paid to the Insurers and the level of insurance coverage obtained by the Insured Series will be negotiated at arm's length and will not be directly affected by an unrelated Insurer's reinsuring with an affiliate of Prudential.

6. The premium rates for each issue of municipal bonds, notes or other securities protected by a policy obtained by the Insured Series are irrevocably fixed by the terms of the insurance. The premium for Secondary Market Insurance on municipal obligations for which the Insured Series has purchased Portfolio Insurance is determined at the time the Insured Series purchases the Portfolio Insurance, and the premium will not be paid at the time of sale to another holder unless it increases the net sale price of the security. In addition, the Portfolio Insurance will be non-cancellable and will remain in force as long as the Insured Series exists and the premium is paid, the Insurer is in business and the securities continue to be held by the Insured Series. Further, the Secondary Market Insurance and New Issue Insurance will also be non-cancellable and will remain in force as long as the Insurer is in business and the securities insured thereby remain outstanding. The Insured Series will not participate in the proposed Portfolio Insurance unless the Fund is entitled to charge such Insured Series for the expense of the required Portfolio Insurance premium. Premiums paid for Secondary Market Insurance will be treated as capital costs by the Fund, which will increase the cost basis of the investment, and thereby reduce the effective yield of the investment.

7. If there is a payment default on an obligation held by the Insured Series, once an Insurer makes the required payment the Insured Series will be in the same position it would have been in had there been no default. Furthermore, the Insurer's obligation to pay the principal of and interest on a security is fixed regardless of the identity of the shareholder, thus preserving the fairness of the transaction.

Applicants' Legal Conclusions:

1. Prudential, the Fund's investment adviser, is an "affiliated person" of the Fund under section 2(a)(3)(E) of the 1940 Act. PruRe is an "affiliated person" of Prudential under section 2(a)(3)(C) of the 1940 Act. Therefore, PruRe may be deemed an "affiliated person of an affiliated person" of the Fund for purposes of the prohibitions in sections 17(a) and 17(d) of the 1940 Act against transactions by a registered investment company and affiliates thereof. Applicants request an order under section 17(b) of the 1940 Act to the extent that the proposed reinsurance of the Insured Series by PruRe might be deemed to be the sale of property to the Insured Series. Applicants also request an order under section 17(b) of the 1940 Act to the extent that, in the event of a payment default on a security held by the Insured Series and covered by a policy of New Issue, Portfolio or Secondary Market Insurance, the Insured Series acquires rights to payments under such policy by an Insurer and the making of payments under the reinsurance to an Insurer by PruRe might be deemed the purchase of securities from the Insured Series. To the extent that the reinsurance of Portfolio or Secondary Market Insurance might be considered to involve a joint transaction, Applicants request an order under Rule 17d–1 of the 1940 Act to permit PruRe to reinsure Portfolio Insurance and Secondary Market Insurance for the Insured Series. Applicants further request an order

under section 8(c) of the 1940 Act from the application filing requirements of section 17(b) and Rule 17d–1 to permit the Insured Series, as well as any Future Insured Series of the Fund, to purchase municipal obligations insured by AMBAC and any other unaffiliated Insurer whose insurance obligations are reinsured by PruRe or any other affiliated person of Prudential.

2. The order requested is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. Also, the proposed transactions will be reasonable and fair, will not involve overreaching on the part of any person concerned, will be consistent with the investment policy of the Insured Series, and no party will be disadvantaged by any Insured Series purchasing insurance from AMBAC of any other Insurer, whose insurance obligations are reinsured by PruRe or any affiliate of Prudential. The terms of the reinsurance between PruRe and an Insurer will be negotiated at arm's length and will not directly involve the Fund or any series thereof. The Fund will pay premium rates to Insurers that are fixed in nature, easily ascertainable and comparable to the rates paid by other mutual funds for the same or similar coverage, so no party will be disadvantaged by the Fund purchasing insurance from an Insurer. PruRe has not been established solely for the purpose of effecting the proposed transactions.

Applicants' Conditions:

If the requested order is granted, Applicants agree to the following conditions:

1. If the Fund selects an Insurer (i.e., an unaffiliated insurer whose obligations are reinsured by PruRe or any other affiliate of Prudential), the selection will be in the best interests of the Fund.

2. Applicants will seek an amended order prior to such time as PruRe determines to reinsure the obligations of an affiliated insurer that insures municipal obligations that may be purchased by the Fund.

3. Each Insured Series will not settle any claim under Portfolio Insurance provided by an Insurer for less than full payment without obtaining a further exemptive order or other relief from the SEC.

For the SEC, by the Division of Investment Management, under delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 87–22508 Filed 9–29–87; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 35–24464]

Filings Under the Public Utility Holding Company Act of 1935 ("Act"); Magnolia Power Co. et al.

September 24, 1987.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by October 19, 1987 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the addresses specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s) as filed or as amended, may be granted and/or permitted to become effective.

Monongahela Power Company, et al. (70–7300)

Monongahela Power Company ("Monongahela"), 1310 Fairmont Avenue, Fairmont, West Virginia 26554, The Potomac Edison Company ("Potomac"), Downsville Pike, Hagerstown, Maryland 21740, and West Penn Power Company ("West Penn"), 800 Cabin Hill Drive, Greensburg, Pennsylvania 15601, wholly owned electric-utility subsidiaries of Allegheny Power System, Inc., a registered holding company, have filed a post-effective amendment to their application-declaration pursuant to sections 6(a), 6(b) and 7 and Rule 50 thereunder.

By order dated June 12, 1987 (HCAR No. 24410), Monongahela, Potomac and West Penn were authorized to issue and sell from time to time through December 31, 1987, pursuant to the alternative competitive bidding procedures, their first mortgage bonds in maximum aggregate principal amounts of $115 million, $110 million, and $35 million, respectively. On July 1, 1987, Monongahela issued and sold $40 million of its bonds. No other bonds have yet been sold. Because the companies intend to redeem certain of their currently outstanding first mortgage bonds with all but $40 million of the proceeds from the issuance and sale of the bonds, and because interest rates may not decline sufficiently during 1987 to permit such redemptions, the applicants-declarants now request authorization for Monongahela to issue and sell up to $75 million and West Penn up to $35 million of remaining bonds, through December 31, 1988.

GPU Service Corporation, et al. (70–7429)

GPU Service Corporation ("Service Company") and General Public Utilities Corporation ("GPU"), 100 Interpace Parkway, Parsippany, New Jersey 07960, have filed a declaration pursuant to sections 6(a), 7 and 12(b) of the Act and Rule 45 thereunder.

Service Company proposes to enter into a revolving credit agreement ("Credit Agreement") with the Bank of New York ("Bank") under which Service Company would issue to the Bank from time to time until September 30, 1990, Service Company's unsecured promissory notes ("Notes") in an aggregate principal amount of up to $15.4 million at any one time outstanding. Each Note would mature not less than 30 days and not more than one year from its date of issuance, and would bear interest, at the election of Service Company, at a rate set by using any one of four rate-setting methods. The Credit Agreement provides that GPU will unconditionally guarantee Service Company's payments of principal and interest on the Notes and other obligations under the Credit Agreement.

Alabama Power Company (70–7431)

Alabama Power Company ("Alabama"), 600 North 18th Street, Birmingham, Alabama 35291, Georgia Power Company ("Georgia"), 333 Piedmont Avenue, N.E., Atlanta, Georgia 30308, Gulf Power Company ("Gulf"), 500 Bayfront Parkway, Pensacola, Florida 32501, and Mississippi Power Company ("Mississippi"), 2992 West Beach, Gulfport, Mississippi 39501, wholly owned subsidiaries of The Southern Company, a registered holding company, and Southern Electric Generating Company ("SEGCO"), 600 North 18th Street, Birmingham, Alabama 35291, a subsidiary of Alabama and Georgia,

have filed a declaration pursuant to section 12(c) of the Act and Rule 42 thereunder.

The companies propose, at any time or from time to time through December 31, 1992, to acquire and retire their first mortgage bonds and preferred stock, as well as pollution control or industrial development revenue bonds issued by public bodies for their benefit, up to the respective aggregate amounts indicated in the following table:

	First mortgage bonds (principal amount) $ millions	Preferred stock (par or stated value $ millions	Revenue bonds (principal amount) $ millions
Alabama	225	30	315
Georgia	1,110	240	1,365
Gulf	75	10	125
Mississippi		10	
SEGCO	9		20

The proposed transactions in which such securities are to be acquired may include purchases on the open market, purchases in privately negotiated transactions, and acquisitions pursuant to tender or exchange offers to the then current holders in which the consideration offered consists of cash, first mortgage bonds, preferred stock or revenue bonds (as the case may be) of a newly issued series, or a combination thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

Senior Executive Service Performance Review Boards; List of Members

AGENCY: Small Business Administration.

ACTION: Listing of personnel serving as members of this agency's Senior Executive Service Performance Review Boards.

SUMMARY: Public Law 95-454 dated October 13, 1978, (Civil Service Reform Act of 1978) requires that Federal agencies publish notification of the appointment of individuals who serve as members of that agency's Performance Review Board (PRB). The following is a listing of those individuals currently serving as members of this Agency's PRB:

1. John R. Cox, Associate Administrator, for Business Development
2. Charles Freeman, Regional Administrator, New York
3. Charles R. Hertzberg, Deputy Associate Administrator for Financial Assistance
4. William A. Powell, Regional Administrator, Kansas City
5. Lawrence R. Rosenbaum, Comptroller
6. Richard L. Osbourn, Director of Personnel, (Non-voting Technical Advisor)
7. George H. Robinson, Director of Equal Employment Opportunity and Compliance (Non-voting Equal Employment Advisor)
8. Martin D. Teckler, Deputy General Counsel
9. Thomas Topuzes, Regional Administrator, San Francisco
10. Janice E. Wolfe, Deputy Associate Administrator for Management Assistance (SBDC)
11. Lawrence J. Dempsey, Assistant Inspector General for Investigations, General Services Administration
12. Paul F. Gibbons, Inspector General, Federal Home Loan Bank Board.

James Abdnor,

Administrator.

September 25, 1987.

DEPARTMENT OF STATE

[Public Notice CM-8/1119]

Study Group 1 of the U.S. Organization for the International Radio Consultative Committee (CCIR); Meeting

The Department of State announces that Study Group 1 of the U.S. Organization for the International Radio Consultative Committee (CCIR) will meet on October 22, 1987 at 9:30 a.m. in Conference Room 6802, Department of Commerce, 14th and Constitution Avenue NW., Washingotn, DC.

Study Group 1 deals with matters relating to efficient use of the radio frequency spectrum, and in particular, with problems of frequency sharing, taking into account the attainable characteristics of radio equipment and systems; principles for classifying emissions; and the measurement of emission characteristics and spectrum occupancy. The purpose of the meeting is to continue the plan of work for the Study Group during the 1986-1990 period.

Members of the general public may attend the meeting and join in the discussion subject to instructions of the Chairman. Requests for further information should be directed to Mr. Richard Shrum, State Department, Washington, DC 20520; telephone (202) 647-2592.

Richard E. Shrum,

Chairman, U.S. CCIR National Committee.

Date: September 17, 1987.

BILLING CODE 4710-07-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Order 87-9-57]

Fitness Determination of WRA, Inc.

AGENCY: Department of Transportation.

ACTION: Notice of Commuter Air Carrier Fitness Determination—Order 87-9-57, Order to Show Cause.

SUMMARY: The Department of Transportation is proposing to find that WRA, Inc., is fit, willing, and able to provide commuter air service under section 419(c)(2) of the Federal Aviation Act.

Responses: All interested persons wishing to respond to the Department of Transportation's tentative fitness determination should file their responses with the Air Carrier Fitness Division, Room 6420, Department of Transportation, 400 7th Street, SW., Washington, DC 20590, and serve them on all persons listed in Attachment A to the order. Responses shall be filed no later than October 2, 1987.

FOR FURTHER INFORMATION CONTACT: Barbara P. Dunnigan, Air Carrier Fitness Division, Department of Transportation, 400 7th Street, SW., Washington, DC 20590, (202) 366-2342.

Dated: September 24, 1987.

Matthew V. Scocozza,

Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910-62-M

Federal Aviation Administration

Noise Compatibility Program; Lambert-St. Louis International Airport; St. Louis, MO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: The FAA announces its findings on the noise compatibility program submitted by the city of St. Louis Airport Authority under the provisions of Title I of the Aviation

Safety and Noise Abatement Act (ASNA) of 1979 (Pub. L. 96–193) and 14 CFR Part 150. These findings are made in recognition of the description of Federal and non-federal responsibilities in Senate Report No. 96–52 (1980). On April 29, 1987, the FAA determined that the noise exposure maps submitted by the city of St. Louis Airport Authority under Part 150 were in compliance with applicable requirements. On August 23, 1987, the Administrator approved the Lambert-St. Louis International Airport noise compatibility program. All of the recommendations of the program were approved.

EFFECTIVE DATE: The effective date of the FAA's approval of the Lambert-St. Louis International Airport noise compatibility program is August 23, 1987.

FOR FURTHER INFORMATION CONTACT: Kenneth M. Ornes, ACE–615B, Federal Aviation Administration, Airports Division, 601 E. 12th St., Kansas City, Missouri 64106, Telephone No. (816) 374–6614. Documents reflecting this FAA action may be obtained from the same individual.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for the Lambert-St. Louis International Airport, effective August 23, 1987.

Under section 104(a) the Aviation Safety and Noise Abatement Act (ASNA) of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act, and is limited to the following determinations:

The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government.

Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable Airspace and Air Traffic Control Systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR Part 150, section 150.5. Approval is not a determination concerning the acceptability or unacceptability of that land use under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program, nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where Federal funding is sought, requests for project grants must be submitted to the FAA Regional Office in Kansas City, Missouri.

The city of St. Louis Airport Authority submitted to the FAA on February 17, 1987, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from April 1986 through June 1987. The Lambert-St. Louis International Airport noise exposure maps were determined by the FAA to be in compliance with applicable requirements on April 29, 1987. Notice of this determination was published in the **Federal Register** on May 11, 1987.

The Lambert-St. Louis International Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to beyond the year 1991. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on April 29, 1987, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained 17 proposed actions for noise abatement and mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The overall program, therefore, was approved by the Administrator effective August 23, 1987.

Outright approval was granted for all of the specific program elements. Noise abatment measures include re-evaluation and adjustment of noise monitoring sites, continuation of existing informal, voluntary noise abatement procedures, and restrictions on engine test run-ups and night-time powerbacks. Also included are actions by the sponsor to support noise related legislation and oppose continued use of stage 1 aircraft. Noise mitigation measures involve elimination or control of imcompatible land uses by continuation of existing acquisition or acoustical treatment programs, rezoning and adoption of fair disclosure ordinances as spelled out in detail in the Record of Approval.

These determinations are set forth in detail in a Record of Approval endorsed by the Administrator on August 23, 1987. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices for the Lambert-St. Louis International Airport.

Issued in Kansas City, Missouri, on September 14, 1987.

Paul K. Bohr,

Director, Central Region.

Noise Compatibility Program and Request for Review; Palm Springs Municipal Airport; Palm Springs, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: The FAA announces its determination that the Noise Exposure Maps submitted by the city of Palm Springs, California for the Palm Springs Municipal Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) and the 14 CFR Part 150 are in compliance with applicable requirements.

EFFECTIVE DATE: The effective date of the FAA's determination on the noise exposure maps is August 24, 1987.

FOR FURTHER INFORMATION CONTACT: Thomas J. Conley, Environmental Protection Specialist, AWP–611.3, Federal Aviation Administration, Western-Pacific Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009, (213) 297–1621.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the Noise Exposure Maps submitted for the Palm Springs Municipal Airport, Palm Springs, California, are in compliance with applicable requirements of Part 150, effective August 24, 1987.

Under Section 103 of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA Noise Exposure Maps which meet applicable regulations and which depict noncompatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies and persons using the airport.

An airport operator who has submitted Noise Exposure Maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR), Part 150, promulgated pursuant to Title 1 of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The FAA has completed its review of the Noise Exposure Maps and related descriptions submitted by the city of Palm Springs, on June 30, 1986. The specific maps under consideration are 4E and 4F in the submission. The FAA has determined that the Noise Exposure Maps for the Palm Springs Municipal Airport are in compliance with applicable requirements. This determination is effective on August 24, 1987. The FAA's determination on an airport operator's Noise Exposure Maps is limited to a finding that the maps were developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, nor is it a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a Noise Exposure Map submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the Noise Exposure Maps to resolve questions concerning, for example, which properties should be covered by provisions of section 107 of the Act. These functions are inseperable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under FAR Part 150 or through FAA's review of Noise Exposure Maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the maps depicting properties on the surface rests exclusively with the airport operator who submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 103 of the Act. The FAA has relied on the certification by the airport operator, under section 150.21 of the FAR Part 150, that the statutorily required consultation has been accomplished. Copies of the noise exposure maps and the FAA's evaluation of the maps are available for examination at the following locations:

Federal Aviation Administration, 800 Independence Avenue SW., Room 617, Washington, DC. 20591

Federal Aviation Administration, Western-Pacific Region, Airports Division, 15000 S. Aviation Boulevard, Room 6E25, Hawthorne, California 90261

Mr. Allen Smoot, Director of Transportation & Energy, P.O. Box 1786, Palm Springs, California 92263–1786.

Questions may be directed to the individual named above under the heading, for further information contact.

Issued in Hawthorne, California, on September 2, 1987.

James J. Wiggins,

Manager, Airport Planning & Programming Branch, Western-Pacific Region.

BILLING CODE 4910–13–M

Maritime Administration

[Docket S–814]

Application for a Waiver of Section 804 of the Merchant Marine Act, 1936, as Amended To Permit the Charter of Two Foreign-flag Vessels, American President Lines, Ltd.

American President Lines, Ltd. (APL), by application of September 17, 1987, requests a waiver of the provisions of section 804 of the Merchant Marine Act, 1936, as amended (Act), so as to permit APL to charter two foreign-flag vessels to be deployed between ports in the Philippine Islands and Hong Kong and/or Kaohsiung.

APL plans to charter two foreign-flag self-sustaining vessels each of approximately 400 TEU capacity, principally to carry canned and fresh pineapple from the Philippines to destinations on Trade Route 29. The vessels would be deployed in a weekly service from the Philippines to Hong Kong at the present time and later, if circumstances warrant, Kaohsiung. APL wishes to charter the vessels for a period of approximately one year.

APL advises that in addition to the carriage of pineapple, it would make space available for other cargoes that may be offered, but the principal purpose would be for pineapples. Currently, no U.S.-flag service is offered in this trade except for APL's PRESIDENT KENNEDY shuttle, but this service would continue whether or not APL is successful in obtaining the pineapple contract.

This application may be inspected in the Office of the Secretary, Maritime Administration. Any person, firm, or corporation having any interest in such application within the meaning of section 804 of the Act and desiring to submit comments concerning the application must file written comments in triplicate with the Secretary, Maritime Administration, Room 7300, Nassif Building, 400 Seventh Street SW., Washington DC. 20590. Comments must be received no later than 5:00 P.M. on October 9, 1987. This notice is published

as a matter of discretion. The Maritime Administrator will consider any comments submitted and take such action with respect thereto as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 20.804 Operating-Differential Subsidies).

By Order of the Maritime Administrator
Date: September 25, 1987.

James E. Saari,

Secretary.

BILLING CODE 4910-81-M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: September 25, 1987.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub.L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW, Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0415.
Form Number: W-4P.
Type of Review: Revision.
Title: Withholding Certificate for Pension or Annuity Payments.
Description: Used by the recipient of pension or annuity payments to designate the number of withholding allowances he or she is claiming, an additional amount to be withheld, or to elect that no tax be withheld, so that the payer can withhold the proper amount.
Respondents: Individuals or households.
Estimated Burden: 2,496,204 hours.
Clearance Officer: Garrick Shear, (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue NW, Washington, DC 20224.
OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Comptroller of the Currency

OMB Number: 1557-0057.
Form Number: CC 7021-01 and CC 7027-01.
Type of Review: Extension.
Title: Establishment of Domestic Branches, Seasonal Agencies and CBCT's.
Description: This collection of information contains data needed to evaluate applications.
Respondents: Businesses or other for-profit, Small businesses or organizations.
Estimated Burden: 3,425 hours.
OMB Number: New.
Form Number: G-Fin: G-Fin-W..
Type of Review: New Collection.
Title: Registration and Withdrawal of Government Securities Brokers and Dealers.
Description: The Government Securities Act of 1986 requires all financial institutions that act as government securities brokers and dealers to notify designated Federal regulatory agencies of their broker/dealer activities, unless exempted from the notice requirement by Treasury Department regulations. These forms are developed to meet the requirement of the act.
Respondents: Businesses or other for-profit, Small businesses or organizations.
Estimated Burden: 250 hours.
Clearance Officer: Eric Thompson, (202) 447-1632, Comptroller of the Currency, 5th Floor, L'Enfant Plaza, Washington, DC 20219.
OMB Reviewer: Robert Fishman, (202) 395-7340, Office of Management and Budget, Room 3228, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

[FR Doc. 87-22526 Filed 9-29-87; 8:45 am]

BILLING CODE 4810-25-M

Debt Management Advisory Committee; Meeting

Notice is hereby given, pursuant to section 10 of Pub. L. 92-463, that a meeting will be held at the U.S. Treasury Department in Washington, DC on October 27 and 28, 1987 of the following debt management advisory committee: Public Securities Association, U.S. Government and Federal Agencies, Securities Committee.

The agenda for the Public Securities Association, U.S. Government and Federal Agencies Securites Committee meeting provides for a working session on October 27 and the preparation of a written report to the Secretary of the Treasury on October 28, 1987.

Pursuant to the authority placed in Heads of Departments by section 10(d) of Pub. L. 92-463, and vested in me by Treasury Department Order 101-05, I hereby determine that this meeting is concerned with information exempt from disclosure under section 552(c)(4) and (9)(A) of Title 5 of the United States Code, and that the public interest requires that such meetings be closed to the public.

My reasons for this determination are as follows. The Treasury Department requires frank and full advice from representatives of the financial community prior to making its final decision on major financing operations. Historically, this advice has been offered by debt management advisory committees established by the several major segments of the financial community, which committees have been utilized by the Department at meetings called by representatives of the Secretary. When so utilized, such a committee is recognized to be an advisory committee under Pub. L. 92-463. The advice provided consists of commerical and financial information given and received in confidence. As such debt management advisory committee activities concern matters which fall within the exemption covered by section 552(c)(4) of Title 5 of the United States Code for matters which are "trade secrets and commerical or financial information obtained from a person and privileged or confidential."

Although the Treasury's final announcement of financing plans may not reflect the recommendations provided in reports of an advisory committee, premature disclosure of these reports would lead to significant financial speculation in the securities market. Thus, these meetings also fall within the exemption covered by section 552(c)(9)(A) of Title 5 of the United States Code.

The Assistant Secretary (Domestic Finance) shall be responsible for maintaining records of debt management advisory committee meetings and for providing annual reports setting forth a summary of committee activities and such other matters as may be informative to the public consistent with the policy of section 552b of Title 5 of the United States Code.

Charles O. Sethness,

Assistant Secretary (Domestic Finance).

49 CFR Parts 107, 171, 172, 173, 175, 177, 178, and 179

[Docket No. HM-189E, Amdt. Nos. 107-17, 171-95, 172-111, 173-204, 775-41, 177-71, 178-89, and 179-41]

Hazardous Materials; Editorial Corrections and Clarifications

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Final rule.

SUMMARY: The purpose of these amendments to the Hazardous Materials Regulations (HMR) is to correct certain editorial errors and to make minor regulatory changes which will not impose any new requirements on persons subject to the HMR.

EFFECTIVE DATE: September 30, 1987.

FOR FURTHER INFORMATION CONTACT: Ann Boylan, Office of Hazardous Materials Transportation, Research and Special Programs Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, Telephone (202) 366-4488.

SUPPLEMENTARY INFORMATION: In its maintenance of the HMR, RSPA performs an annual review of the regulations to detect errors which may be causing confusion to users. Inaccuracies detected in Title 49, Code of Federal Regulations (CFR), Parts 100 through 199, revised as of October 1, 1986, include typographical errors, incorrect references to other rules and regulations in the CFR and misstatements of certain regulatory requirements. Additionally, in response to inquiries which RSPA received concerning the clarity of particular requirements specified in the HMR, changes are made which should reduce uncertainties.

Since these amendments do not impose new requirements, notice and public procedure are unnecessary. For the same reason, these amendments are effective without the customary 30-day delay following publication. This will allow these changes to appear in the next revision of 49 CFR.

The RSPA has determined that this rule, as promulgated, is not a major rule under the terms of Executive Order 12291 or significant under DOT implementing procedures (44 FR 11034). A final regulatory evaluation and environmental assessment was not prepared, as these amendments are not substantive changes to the HMR.

Based on limited information available concerning the size and nature of entities likely to be affected by these amendments, I certify that these amendments will not, as promulgated, have a significant economic impact on a substantial number of small entities.

The following is a section-by-section summary of the amendments:

Appendix A to Subpart B of Part 107. The address for the Office of Motor Carriers is changed to read: "Chief, Field Programs Division, Office of Motor Carrier Safety Field Operations, Federal Highway Administration, Department of Transportation, Washington, DC 20590. Day 202-366-1975 and Night 202-267-2100."

Section 107.315(c). Civil penalty payments are no longer remitted to the Chief Counsel's office. Certified checks or money orders are made payable to the "Department of Transportation" and sent to: Chief, General Accounting Branch (M-86.2), Accounting Operations Division, Office of the Secretary, Room 2228, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590.

Sections 171.7 (c)(21) and (c)(31). In paragraph (c)(21), the address for the American Welding Society is changed to read "550 N.W. Le Jeune Road, Miami, Florida 33126." In paragraph (c)(31), the address for INTEREG is changed to read, "4000 West Victoria Avenue, Chicago, Illinois 60646."

Section 171.8. The definition of "reportable quantity" is revised to read: "Reportable quantity (RQ) for the purposes of this subchapter means the quantity specified in Column 3 of the Appendix to § 172.101 for any material identified in column 1 of the Appendix." This change is necessary to correspond to amendments made under Docket HM-145F in final rules published in the **Federal Register** on November 21, 1986 [51 FR 42174] and February 17, 1987 [52 FR 4824].

Section 172.101. In column 5(b) of § 172.101, "173.316" is added for the proper shipping name "Air, refrigerated liquid, (*cryogenic*)," In column 4 of § 172.101, the word "liquid" is added following "Flammable", for the proper shipping name "Ethylene glycol diethyl ether." These changes are necessary to correct omissions made under Docket HM-166U final rule published in the **Federal Register** on April 20, 1987 [52 FR 13034].

Section 172.102. The shipping name "N,N-Diethylene diamine", is corrected to read "N,N-Diethylethylene diamine", UN 2685. The shipping name "Dicyclohexylammonium nitrate" is corrected to read "Dicyclohexylammonium nitrite", UN 2687. (This correction is also made in Appendix A to Subpart B.)

Section 172.400. In paragraph (c) the reference to "MAGNETIZED MATERIAL labels" is removed. The MAGNETIZED MATERIAL label which appeared in § 172.446 was removed under Docket HM-166S final rule published in the **Federal Register** on November 25, 1985 [50 FR 48419].

Section 172.510. Paragraph (b) is removed and reserved. The tank cars which required a DOME placard are no longer in service.

Section 172.512. Paragraph (a)(1) erroneously refers to § 172.504(c)(1). The correct reference is § 172.504(c).

Section 173.34. In note 1 of paragraph (e)(9), "method of external" should read "method or external".

Section 173.115. In paragraph (b)(2)(ii), the typographical error "-his subchapter" is corrected to read "this subchapter."

Section 173.253. In paragraph (a)(2), "Spec. IM" is corrected to read, "Spec. 1M".

Section 173.271. In paragraph (a)(7), the typographical error "Speification" is corrected to read "Specification". In paragraph (a)(9), on the second line, "111A00F2" is corrected to read "111A100F2".

Section 173.272. In paragraph (i)(2), "test requirements prescribed in § 178.219-10" is corrected to read "test requirements in § 178.210-10".

Section 173.294. In paragraph (a), line 1, the word "monochloroacetic" is corrected to read "chloroacetic". In paragraph (a)(3), line 6 should read "304 or 316".

Section 173.304. In paragraph (a)(4), the word "without" is corrected to read "with the".

Section 173.386. In paragraph (d), the typographical error "zgquirements" is corrected to read "requirements".

Section 173.421-1. In paragraph (a), reference to "§ 173.425" is corrected to read "§ 173.424".

Section 173.427. In paragraph (a), reference to § 173.421 (b), (c), and (d)" is corrected to read "§ 173.421 (b), (c) and (e)".

Section 175.31 In paragraph (a), the office designation "FAA Air Transportation Security Field Office" is changed to "FAA Civil Aviation Security Office".

Section 177.824. In paragraph (f), the language is changed to reflect the recent reorganization within the Office of Motor Carriers, which consolidates the hazardous materials functions into the Office of Motor Carrier Safety Field Operations.

Section 177.825 In paragraph (b)(1), the introductory language is changed to read: "A preferred route consists of either or both:" to indicate that a preferred route need not consist of both an interstate highway and a state-designated route. In line 16 of paragraph (c), the typographical error of "shippper" is corrected to "shipper".

Section 177.861. In paragraph (a), line 10, a comma is inserted following the word "buildings" to read: "buildings, * * *."

Section 178.54. The entire DOT 4B240–FLW specification contained in §§ 178.54 through 178.54–23 is removed and reserved. Section 178.54 for 4B240 cylinders was removed from Part 178 under Docket HM–166U final rule published in the **Federal Register** on April 20, 1987 [52 FR 13034]. The amendment is being reprinted in this document to ensure the removal of all applicable sections.

Section 178.135–8. Paragraph (a)(1) is amended to include an example of the specification markings on a DOT–37C drum.

Section 179.3. In paragraph (c), the last line is changed from "DOT Special Permits" to read "exemptions".

Section 179.4. In paragraph (a), "special permit" is changed to read "exemptions".

Section 179.103–5. As amended under Docket HM–166U final rule, paragraph (b)(1), line 12, the word "value" is corrected to read "valve".

Section 179.222. This section was added under Docket HM–166U final rule. The section heading "§ 179.222 *Chloroprene*" is correctly designated "§ 179.222–1 *Chloroprene.*"

List of Subjects

49 CFR Part 107

Hazardous materials, Program procedures.

49 CFR Part 171

Hazardous materials transportation, Incorporated by reference.

49 CFR Part 172

Hazardous materials transportation, Labeling, Packaging and containers.

49 CFR Part 173

Hazardous materials transportation, Packaging and containers.

49 CFR Part 175

Hazardous materials transportation, Air carriers.

49 CFR Part 177

Hazardous materials transportation, Carriage by public highway.

49 CFR Part 178

Hazardous materials transportation, Shipping container specifications.

49 CFR Part 179

Hazardous materials transportation, Specifications for tank cars.

In consideration of the foregoing, 49 CFR Parts 107 through 179 are amended as follows:

PART 107—HAZARDOUS MATERIALS PROGRAM PROCEDURES

1. The authority citation for Part 107 is revised to read as follows:

Authority: 49 App. U.S.C. 1421(c); 49 App. U.S.C. 1802, 1806, 1808–1811; 49 CFR 1.45 and 1.53 and App. A of Part 1, Pub. L. 89–670 (49 U.S.C. 1653(d), 1655).

Appendix A to Subpart B of Part 107 [Amended]

2. The address for the Office of Motor Carriers in Appendix A to Subpart B of Part 107 is changed to read as follows:

Chief, Field Programs Division, Office of Motor Carrier Safety Field Operations, Federal Highway Administration, Department of Transportation, Washington, DC 20590. Day 202–366–1975 and Night 202–267–2100.

3. Paragraph (c) of § 107.315 is revised to read as follows:

§ 107.315 [Amended]

* * * * *

(c) Payment of a civil penalty must be made by certified check or money order payable to the "Department of Transportation" and sent to the Chief, General Accounting Branch (M–86.2), Accounting Operations Division, Office of the Secretary, Room 2228, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590.

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

4. The authority citation for Part 171 is revised to read as follows:

Authority: 49 App. U.S.C. 1802, 1803, 1804, 1808; 49 CFR Part 1, unless otherwise noted.

§ 171.7 [Amended]

5. In paragraph (c)(21) of § 171.7, the address for the American Welding Society is changed to read "550 N.W. LeJeune Rd., Miami, Florida 33126." In paragraph (c)(31) of § 171.7, the address for INTEREG is changed to read, "4000 West Victoria Avenue, Chicago, Illinois 60646".

6. In § 171.8, the definition for "reportable quantity" is revised to read as follows:

§ 171.8 [Amended]

* * * * *

"Reportable quantity (RQ)" for the purposes of this subchapter means the quantity specified in Column 3 of the Appendix to § 172.101 for any material identified in Column 1 of the Appendix.

* * * * *

PART 172—HAZARDOUS MATERIALS TABLES AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

7. The authority citation for Part 172 is revised to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1808; 49 CFR Part 1, unless otherwise noted.

§ 172.101 [Amended]

8. In the § 172.101 Hazardous Materials Table:

a. "§ 173.316" is added in column 5(b) for the proper shipping name "Air, refrigerated liquid (*cryogenic*)."

b. The word "liquid" is added following the word "Flammable" in column 4 for the proper shipping name "Ethylene glycol diethyl ether".

§ 172.102 [Amended]

9. In the § 172.102 Optional Hazardous Materials Table:

a. The shipping name "N,N-Diethylene diamine" is corrected to read "N,N-Diethylethylene diamine", UN 2685.

b. The shipping name "Dicyclohexylammonium nitrate" is corrected to read "Dicyclohexylammonium nitrite", UN 2687.

§ 172.400 [Amended]

10. In paragraph (c) of § 172.400, the words "or the MAGNETIZED MATERIAL label" are removed.

Appendix A to Subpart B [Amended]

11. In Appendix A to Subpart B, the shipping name "N,N-Diethylene diamine" is corrected to read "N,N-Diethylethylene diamine", UN 2685.

In Appendix A to Subpart B, the shipping name "Dicyclohexylammonium nitrate" is corrected to read "Dicyclohexylammonium nitrite", UN 2687.

§ 172.510 [Amended]

12. Paragraph (b) of § 172.510 is removed and reserved.

§ 172.512 [Amended]

13. In paragraph (a)(1) of § 172.512, reference to "§ 172.504(c)(1)" is corrected to read "§ 172.504(c)".

VOL 52 ISS 189 SE 30 1987 UMI

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

14. The authority citation for Part 173 is revised to read as follows:

Authority: 49 U.S.C. 1803, 1804, 1805, 1806, 1807, 1808; 49 CFR Part 1, unless otherwise noted.

§ 173.34 [Amended]

15. In note 1 of paragraph (e)(9) of § 173.34, "method of external" is corrected to read "method or external".

§ 173.115 [Amended]

16. In paragraph (b)(2)(ii) of § 173.115, the typographical error "-his subchapter" is corrected to read "this subchapter."

§ 173.253 [Amended]

17. In paragraph (a)(2) of § 173.253, "Spec. IM" is corrected to read "Spec. 1M".

§ 173.271 [Amended]

18. In § 173.271, paragraph (a)(7), the typographical error of "Speification" is corrected to "Specification". In paragraph (a)(9), "111A00F2" is corrected to read "111A100F2".

§ 173.272 [Amended]

19. In paragraph (i)(2) of § 173.272, reference to "§ 178.219–10" is corrected to read "§ 178.210–10".

§ 173.294 [Amended]

20. In the first line of paragraph (a) of § 173.294, the word "Monochloroacetic" is corrected to read "Chloroacetic". In paragraph (a)(3), line 6, "304 of 316" is corrected to read "304 or 316".

§ 173.304 [Amended]

21. In the introductory text to paragraph (a)(4) of § 173.304, the word "without" is corrected to read "with the".

§ 173.386 [Amended]

22. In paragraph (d) of § 173.386, the typographical error "zgquirements" is corrected to read "requirements".

§ 173.421–1 [Amended]

23. In the first sentence of paragraph (a) of § 173.421–1, reference to "§ 173.425" is corrected to read "§ 173.424".

§ 173.427 [Amended]

24. In paragraph (a) of § 173.427, reference to "§ 173.421 (b), (c) and (d)" is corrected to read, "§ 173.421 (b), (c) and (e)".

PART 175—CARRIAGE BY AIRCRAFT

25. The authority citation for Part 175 is revised to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1807, 1808; 49 App. U.S.C. 1472(h) (1); 49 CFR Part 1, unless otherwise noted.

§ 175.31 [Amended]

26. In paragraph (a) of § 175.31, the office designation "FAA Air Transportation Security Field Office" is changed to "FAA Civil Aviation Security Office".

PART 177—CARRIAGE BY PUBLIC HIGHWAY

27. The authority citation for Part 177 is revised to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 49 CFR Part 1, unless otherwise noted.

28. The introductory text of paragraph (f) of § 177.824 is revised to read as follows:

§ 177.824 [Amended]

* * * * *

Reporting requirements. Each motor carrier shall file with the Chief, Federal Programs Division, Office of Motor Carrier Safety Field Operations, Federal Highway Administration, Department of Transportation, Washington, DC 20590, a written listing of all MC 330 or MC 331 cargo tanks he has in service. Each motor carrier, upon placing in service or withdrawing from service any MC 330 or MC 331 cargo tank (other than a cargo tank used in interchange service which is reported upon by another motor carrier), shall file a supplemental report with the Office of Motor Carrier Safety Field Operations.

* * * * *

§ 177.825 [Amended]

29. In paragraph (b)(1) of § 177.825, the introductory text is revised to read: "A preferred route consists of either or both:". In paragraph (c), line 16, the typographical error of "shippper" in line 16 is corrected to read "shipper".

§ 177.861 [Amended]

30. In paragraph (a) of § 177.861, line 10 is corrected by adding a comma after the word "buildings".

PART 178—SHIPPING CONTAINER SPECIFICATIONS

31. The authority citation for Part 178 is revised to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806, 1808; 49 CFR Part 1, unless otherwise noted.

§§ 178.54 through 178.54–23 [Removed and Reserved]

32. Sections 178.54 through 178.54–23 are removed and reserved.

33. In § 178.135–8, paragraph (a)(1) is revised to read as follows:

§ 178.135–8 Marking.

(a) * * *

(1) DOT–37C*** and the letters NRC, located near the DOT mark to indicate a nonreusable drum. Stars are to be replaced by the authorized gross weight, or less, at which the container was type tested (for example, DOT–37C 80).

* * * * *

PART 179—SPECIFICATIONS FOR TANK CARS

34. The authority citation for Part 179 is revised to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806, 1808; 49 CFR Part 1, unless otherwise noted.

§ 179.3 [Amended]

35. In paragraph (c) of § 179.3, line 10, the phrase "DOT Special Permits" is replaced with the word "exemptions".

§ 179.4 [Amended]

36. In paragraph (a) of § 179.4, line 11, "special permit" is changed to read "exemptions".

§ 179.103–5 [Amended]

37. In paragraph (b)(1) of § 179.103–5, line 12, "value" is corrected to read "valve".

§ 179.222–1 [Correctly Designated]

38. Section 179.222 *Chloroprene* is correctly designated "§ 179.222–1 *Chloroprene*".

Issued in Washington, DC, on September 24, 1987 under authority delegated in 49 CFR 1.53.

M. Cynthia Douglass,

Administrator, Research and Special Programs Administration.

Federal Acquisition Regulation (FAR); Incorporation of Cost Accounting Standards; Correction

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule in Federal Acquisition Circular (FAC) 84–30 published in the **Federal Register** on Tuesday, September 22, 1987 (52 FR 35612).

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

SUPPLEMENTARY INFORMATION: The requirements of FAR 1.303, Publication and codification, specify that supplementary material for which there is no counterpart in the FAR shall be codified using numbers of 70 and up. In FR Doc. 87–21682, beginning on page 35612, all subsection references ending with "–70" are to be corrected to read "–61". In addition, all internal references to "–70" are to be changed accordingly. Please make the following corrections:

30.401–70 [Corrected]

On page 35622, in the first column, "30.401–70" should read "30.401–61".

30.402–70 [Corrected]

On page 35624, in the first column, "30.402–70" should read "30.402–61".

30.403–70 [Corrected]

On page 35626, in the first column, "30.403–70" should read "30.403–61".

30.414–70 [Corrected]

On page 35650, in the third column, "30.414–70" should read "30.414–61".

30.418–70 [Corrected]

On page 35665, in the third column, "30.418–70" should read "30.418–61".

30.420–70 [Corrected]

On page 35667, in the first column, "30.420–70" should read "30.420–61".

Standards of Performance for New Stationary Sources; Polypropylene, Polyethylene, Polystyrene, and Poly(ethylene terephthalate) Manufacturing Industry; Proposed Rule and Notice of Public Hearing

BEST COPY AVAILABLE

VOL 52 ISS 189 SE 30 1987 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[AD-FRL-3190-3]

Standards of Performance for New Stationary Sources; Polypropylene, Polyethylene, Polystyrene, and Poly(ethylene terephthalate) Manufacturing Industry

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule and notice of public hearing.

SUMMARY: The proposed standards would limit emissions of volatile organic compounds (VOC) from new, modified, and reconstructed polypropylene, polyethylene, polystyrene, and polyester [poly(ethylene terephthalate)] production plants. The proposed standards implement section 111 of the Clean Air Act and are based on the determination that VOC emissions from these polymer production plants cause, or contribute significantly to, air pollution which may reasonably be anticipated to endanger public health or welfare. The intent of the proposed standards is to require new, modified, and reconstructed polypropylene, polyethylene, polystyrene, and polyester [poly(ethylene terephthalate)] production plants to control emissions to the level achievable by the best demonstrated system of continuous emission reduction for control of VOC emissions, considering costs, nonair quality health, and environmental and energy impacts.

A public hearing will be held, if requested, to provide interested parties an opportunity for oral presentation of data, views, or arguments concerning the proposed standards.

DATES: *Comments.* Comments must be received on or before December 10, 1987 (Contact Ann Eleanor at FTS 629–5578).

Public hearing. If anyone contacts EPA requesting to speak at a public hearing by October 16, 1987 (Contact Ann Eleanor at FTS 629–5578), a public hearing will be held on (Contact Ann Eleanor at FTS 629–5578) beginning at 10 a.m. Persons interested in attending the hearing should call Ms. Ann Eleanor at (919) 541–5578 to verify that a hearing will be held.

Request to speak at hearing. Persons wishing to present oral testimony must contact EPA by November 16, 1987 (Contact Ann Eleanor at FTS 629–5578).

Incorporation by reference. The incorporation by reference of certain publications in these standards will be approved by the Director of the Federal Register as of the date of publication of the final rule.

ADDRESSES: *Comments.* Comments should be submitted (in duplicate if possible) to: Central Docket Section (LE–131), Attention: Docket Number A–82–19, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Public hearing. If anyone contacts EPA requesting a public hearing, the public hearing will be held at EPA's Office of Administration Auditorium, Research Triangle Park, North Carolina. Persons interested in attending the hearing or wishing to present oral testimony should notify Ms. Ann Eleanor, Standards Development Branch (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541–5578.

Background information document. The background information document (BID) for the proposed standards may be obtained from the U.S. EPA Library (MD–35), Research Triangle Park, North Carolina 27711, telephone number (919) 541–2777. For information on the polymer manufacturing industry, please refer to "Polymer Manufacturing Industry—Background Information for Proposed Standards," EPA–450/3–83–019a. For detailed information on fugitive emissions, please refer to "VOC Fugitive Emission Sources in the Synthetic Organic Chemicals Manufacturing Industry—Background Information for Proposed Standards," EPA–450/30–80–033a, and "VOC Fugitive Emissions in Synthetic Organic Chemicals Manufacturing Industry—Background Information for Promulgated Standards," EPA–450/3–80–033b.

Docket. Docket No. A–82–19, containing supporting information used in developing the proposed standards, is available for public inspection and copying between 8:00 a.m. and 4:00 p.m., Monday through Friday, at EPA's Central Docket Section, South Conference Center, Room 4, Waterside Mall, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: For information on the proposed standards, contact Mr. Sims Roy (telephone number (919) 541–5263); for information on the BID, contact Mr. Jim Berry (telephone number (919) 541–5605), Emission Standards and Engineering Division (MU–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

I. Proposed Standards

The proposed standards of performance cover certain process sources of VOC within polymer manufacturing plants that produce the following basic polymers: polypropylene, polyethylene, polystyrene, and poly(ethylene terephthalate). In addition, the proposed standards would apply to certain sources in polymer manufacturing plants that produce copolymers consisting of at least 50 percent by weight of ethylene, propylene, or bis-(2-hydroxylethyl)-terephthalate, or at least 80 percent by weight of styrene. The proposed standards also cover fugitive emission sources of VOC in all of these plants except those producing poly(ethylene terephthalate) or poly(ethylene terephthalate) copolymers. The affected facilities within these polymer manufacturing plants are process sections for process sources of VOC and process units for fugitive emission

sources of VOC. The definitions of process section and process unit are discussed below in "Selection of Affected Facilities."

An organic compound is considered to be a VOC unless it is specifically determined not to be a VOC. To date, the following compounds have been determined not to be VOC: methane; ethane; 1,1,1-trichloroethane; methylene chloride; trichlorofluoromethane; dichlorodifluoromethane; chlorodifluoromethane; trifluoromethane; trichlorotrifluoroethane; dichlorotetrafluoroethane; and chloropentafluoroethane. The emission limits are expressed in terms of total organic compounds (minus methane and ethane) rather than VOC. As discussed below under "Compounds Used for Determining Compliance," this is a reflection of the technology, data, and test methods on which the proposed standards are based.

A. Process Emissions

The proposed process emission standards for polypropylene plants would apply to certain new, modified, and reconstructed process sections involved in the manufacture of polypropylene or polypropylene copolymers. For plants producing polypropylene using a liquid phase production process, the affected facilities are each raw materials preparation section, polymerization reaction section, material recovery section, and product finishing section. The proposed process emission standards would require 98 percent reduction of emissions of total organic compounds minus methane and ethane (TOC) contained in gas streams continuously discharged to the atmosphere from each new, modified, or reconstructed raw materials preparation section, polymerization reaction section, material recovery section, and product finishing section. In addition, the proposed standards would require the flaring of gas streams intermittently discharged to the atmosphere from each new, modified, or reconstructed polymerization reaction section.

For plants producing polypropylene using a gas phase production process, the affected facilities are each polymerization reaction section and material recovery section. The proposed process emission standards would require 98 percent reduction of emissions of TOC contained in gas streams continuously discharged to the atmosphere from each new, modified, or reconstructed material recovery section and flaring of gas streams intermittently discharged to the atmosphere from each new, modified, or reconstructed polymerization reaction section.

The proposed process emission standards for polyethylene plants would apply to certain new, modified, and reconstructed process sections involved in the manufacture of low density (including linear low density) polyethylene, high density polyethylene, or polyethylene copolymers. For plants producing low density polyethylene or low density polyethylene copolymers using a high pressure production process, the affected facilities are each raw materials preparation section, polymerization reaction section, material recovery section, product finishing section, and product storage section. The proposed process emission standards would require flaring of gas streams intermittently discharged to the atmosphere from all new, modified, or reconstructed process sections (except emergency releases).

For plants producing low density polyethylene or low density polyethylene copolymers using a low pressure production process or high density polyethylene or high density polyethylene copolymers using a gas phase production process, the affected facilities are each raw materials preparation section, polymerization reaction section, and product finishing section. The proposed process emission standards would require 98 percent reduction of emissions of TOC contained in the gas streams continuously discharged to the atmosphere from each new, modified, or reconstructed raw materials preparation section and product finishing section. The proposed standards would also require the flaring of gas streams intermittently discharged to the atmosphere from each new, modified, or reconstructed raw materials preparation section and polymerization reaction section (except emergency releases).

For plants producing high density polyethylene or high density polyethylene copolymers using a liquid phase slurry process, the affected facilities are each raw materials preparation section, material recovery section, and product finishing section. The proposed process emission standards would require 98 percent reduction of emissions of TOC contained in the gas streams continuously discharged to the atmosphere from each new, modified, or reconstructed material recovery section and product finishing section and flaring of gas streams intermittently discharged to the atmosphere from each new, modified, or reconstructed raw materials preparation section.

For plants producing high density polyethylene or high density polyethylene copolymers using a liquid phase solution process, the affected facilities are each raw materials preparation section, polymerization reaction section, and material recovery section. The proposed process emission standards would require 98 percent reduction of emissions of TOC contained in the gas streams continuously discharged to the atmosphere from each new, modified, or reconstructed raw materials preparation section and material recovery section. The proposed standards would also require the flaring of gas streams intermittently discharged to the atmosphere from each new, modified, or reconstructed raw materials preparation section, polymerization reaction section, and material recovery section.

The proposed process emission standards for polystyrene plants would apply to certain new, modified, and reconstructed process sections involved in the manufacture of general purpose (crystal) or impact polystyrene or polystyrene copolymers. The proposed standards would apply only to certain process sections in those plants producing general purpose or impact polystyrene using a continuous process. No process emission standards are being proposed at this time for plants that produce general purpose (crystal) or impact polystyrene or polystyrene copolymers using a batch production process or for plants that produce expandable polystyrene using either an in-situ suspension process or a post-impregnation suspension process.

For plants producing general purpose or impact polystyrene using a continuous process, the affected facility is each material recovery section. The proposed process emission standards would limit the emissions of TOC from each new, modified, or reconstructed material recovery section to 0.0036 kilograms (kg) of TOC per megagram (Mg) of product (0.0036 lbs TOC/1,000 lbs product). Compliance could also be achieved by limiting the outlet gas temperature from each final condenser in the material recovery section to −25 °C (−13 °F).

The proposed process emission standards for poly(ethylene terephthalate) plants would apply to certain new, modified, or reconstructed facilities producing poly(ethylene terephthalate) or poly(ethylene terephthalate) copolymers using either the dimethyl terephthalate process or the terephthalic acid process. The proposed standards would apply only to certain facilities in those plants using a

VOL

1987
UMI

continuous production process. No standards are being proposed at this time for facilities that use a batch production process.

For plants producing low viscosity poly(ethylene terephthalate) with either a single end finisher or multiple end finishers or high viscosity poly(ethylene terephthalate) with a single end finisher using the dimethyl terephthalate process, the affected facilities are each material recovery section and polymerization reaction section. The proposed process emission standards would limit TOC to the atmosphere from each new, modified, or reconstructed material recovery section (i.e., methanol recovery) to 0.0027 kg of TOC per Mg of product (0.0027 lbs TOC/1,000 lbs product). Compliance could also be achieved by limiting the outlet gas temperature from each final condenser in the material recovery section (i.e., methanol recovery) to −24 °C (−11 °F). The proposed process emission standards would limit TOC to the atmosphere from each new, modified, or reconstructed polymerization reaction section to 0.02 kg of TOC per Mg of product (0.02 lbs TOC/1,000 lbs product). This limit includes emissions from any equipment used to recover further the ethylene glycol for reuse in the process or sale offsite, but does not include organic compound emissions released to the atmosphere from the cooling tower used to provide the cooling water to the vacuum system servicing the polymerization reactor(s). The proposed standards would also limit the ethylene glycol concentration in the condensate exiting the vacuum system servicing the polymerization reaction section to 0.35 percent or less by weight based on a 14-day rolling average on a daily basis.

For plants producing low viscosity poly(ethylene terephthalate) with either a single end finisher or multiple end finishers or high viscosity poly(ethylene terephthalate) with a single end finisher using the terephthalic acid process, the affected facilities are each raw materials preparation section and polymerization reaction section. The proposed process emission standards would limit TOC to the atmosphere from each new, modified, or reconstructed polymerization reaction section to 0.02 kg TOC per Mg of product (0.02 lbs TOC/1,000 lbs product). This limit includes emissions from any equipment used to recover further the ethylene glycol for reuse in the process or sale offsite, but does not include organic compound emissions released to the atmosphere from the cooling tower used to provide the cooling water to the vacuum system servicing the polymerization reaction section. The proposed standards would also limit the ethylene glycol concentration in the condensate exiting the vacuum system servicing the polymerization reaction section to 0.35 percent or less by weight based on a 14-day rolling average on a daily basis. The proposed standards would limit TOC from each new, modified, or reconstructed raw materials preparation section (i.e., the esterifiers) to 0.04 kg of TOC per Mg of product (0.04 lbs TOC/1,000 lbs product).

For plants producing high viscosity poly(ethylene terephthalate) with multiple end finishers using the terephthalic acid process, the affected facilities are each raw materials preparation section and polymerization reaction section for those plants using the terephthalic acid process, and each material recovery section and polymerization reaction section for those plants using the dimethyl terephthalate process. The proposed process emission standards would limit TOC to the atmosphere from each new, modified, or reconstructed polymerization reaction section to 0.02 kg TOC per Mg of product (0.02 lbs TOC/1,000 lbs product). This limit includes emissions from any equipment used to recover further the ethylene glycol for reuse in the process or sale offsite, but does not include organic compound emissions released to the atmosphere from the cooling tower used to provide the cooling water to the vacuum system servicing the polymerization reaction section. The proposed standards would also limit the ethylene glycol concentration in the cooling water in the cooling water tower to 6.0 percent or less by weight based on a 14-day rolling average on a daily basis. The proposed process emission standards would limit TOC to the atmosphere from each new, modified, or reconstructed raw materials preparation section (i.e., the esterifiers) to 0.04 kg of TOC per Mg of product (0.04 lbs TOC/1,000 lbs product) in those plants using the terephthalic acid process. The proposed process emission standard would limit TOC to the atmosphere from each new, modified, or reconstructed material recovery section (i.e., methanol recovery) to 0.0027 kg of TOC per Mg of product (0.0027 lbs TOC/1,000 lbs product) or the outlet gas temperature from each final condenser in the material recovery section (i.e., methanol recovery) to −24 °C (−11 °F).

As an alternative to demonstrating compliance with the 98 percent emission reduction requirements contained in any of the standards outlined above, affected facilities may demonstrate compliance with a TOC emission limit of 20 ppm. Flares may be used to comply with the proposed standards, provided the flares are operated under conditions, as specified in these proposed standards, that have been shown to result in a 98 percent reduction in TOC.

The proposed standards for intermittent gas streams would require the use of a smokeless flare and a thermocouple heat sensor to indicate the continuous presence of a flame at each pilot light included in the flare.

The proposed process emission standards would not apply to any process section with an uncontrolled emission rate at or below the "threshold" level specified for that process section.

B. Fugitive Emissions

The proposed standards of performance would cover certain fugitive emission sources of VOC within polypropylene, polyethylene, polystyrene, polypropylene copolymer, polyethylene copolymer, and polystryene copolymer manufacturing plants. The proposed fugitive emission standards would not cover equipment in poly(ethylene terephthalate) or poly(ethylene terephthalate) copolymer manufacturing plants.

The proposed standards would require owners and operators of affected facilities in the plants identified above to comply with 40 CFR Part 60—Subpart VV—*Standards of Performance for Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry* (SOCMI) and would apply to pumps, valves, sampling connections, pressure relief devices, open-ended valves, and compressors in VOC service within each new, modified, and reconstructed process unit. "In VOC service" means that a fugitive emission source contains or contacts a fluid containing 10 or more percent by weight VOC.

The SOCMI standards that would be made applicable to the affected facilities in the plants specified above require: (1) A leak detection and repair program for valves in gas or light liquid service and for pumps in light liquid service; (2) certain equipment for compressors, sampling connection systems, and open-ended valves; and (3) no detectable emissions from pressure relief devices in gas service during normal operation. "In gas service" means that a fugitive emission source contains VOC fluids in the gaseous or vapor state. "In light liquid service" means that a fugitive emission source contains a liquid in which the vapor pressure of one or more

of the components is greater than 0.3 kPa at 20 degrees Centigrade, as obtained from standard reference texts or as determined by ASTM Method D–2879, and the total concentration of the pure components having a vapor pressure greater than 0.3 kPa at 20 degrees Centigrade is equal to or greater than 20 percent by weight.

The SOCMI standards allow the use of "leakless" equipment for valves, pumps, compressors and sampling connection systems as an alternative to the required equipment and work practices. In addition, the SOCMI standards for valves provide for the use of alternative leak detection and repair programs. The SOCMI standards also contain a procedure for determining the equivalency of alternative leak detection and repair programs.

II. Bubble Considerations

During the development of these proposed standards, the Agency considered the possibility of incorporating a "generic" numerical bubble limit or limits into the proposed standards. However, after examining this, the Agency concluded that inclusion of such bubble limits in these proposed standards is not advisable due to the widely varying process designs and controlled and uncontrolled emission rates in this industry, and the resulting inability to define general baselines in advance of specific situations. Thus, the proposed standards do not provide general numerical bubble limits. However, the Agency has recently approved a new source performance standard (NSPS) bubble application. (52 FR 28946.) In doing this, the Agency made clear that we will receive case-by-case applications for NSPS compliance bubbles. The major factors that will influence decisions on whether to approve them were also described. The Agency will consider bubbles for polymer manufacturing facilities on a case-by-case basis in accordance with such factors.

III. Summary of Environmental, Energy, and Economic Impacts

Compared to the existing or anticipated "baseline" level of emissions, the proposed standards of performance would reduce process and fugitive emissions of VOC from new, modified, and reconstructed facilities that produce polypropylene, polyethylene, polystyrene, poly(ethylene terephthalate) and copolymers of these polymers from, on a plant-wide basis, approximately 2 percent, in several plants producing polypropylene or polyethylene, and up to 40 percent, in plants producing polystyrene using a continuous process. In the fifth year following implementation of the the proposed standards, VOC emissions from new plants have been estimated to be over 4.3 gigagrams (Gg), a reduction of slightly less than 3.0 Gg from the over 7.3 Gg of VOC emissions estimated to be emitted in the absence of the proposed standards. Emissions of VOC would also be reduced from modified and reconstructed facilities. This emission reduction is not expected to be significant as the Agency does not anticipate many existing facilities to become subject to the proposed standards. There would be no adverse water quality, solid waste, or noise impacts. The proposed standards would slightly increase energy usage at most new polymer production plants. Nationwide, however, energy usage would decrease due primarily to the energy savings resulting from implementation of fugitive emission controls, which generally offset any increase in energy usage associated with process and fugitive emission controls. In most polymer production plants, the magnitude of the increase in energy usage would be small.

The economic impact of the proposed standards would be minor. The proposed standards would cover the equivalent of about 27 new polymer production plants within 5 years and would result in an aggregate annualized cost of approximately $1.4 million in the fifth year following implementation of the proposed standards. In terms of individual polymer production plants, the annualized cost of the proposed standards would range from about $600 per process line in plants producing low viscosity poly(ethylene terephthalate) using a dimethyl terephthalate process to about $94,000 per process line in plants producing polypropylene using a liquid phase process.

The proposed standards would result in an aggregate capital cost of approximately $4.5 million in the fifth year following implementation of the proposed standards. In terms of individual polymer production plants, the capital cost of the proposed standards would range from about $1,500 per process line in plants producing poly(ethylene terephthalate) using a dimethyl terephthalate process to about $273,000 per process line in plants producing polypropylene using a liquid phase process.

The proposed standards would have a minimal impact on product prices. Assuming all costs were passed through to the customer, the maximum product price increase would be about 0.44 percent for plants producing polypropylene using a liquid phase process. The range of projected price increases for the other model plants is 0.0 to 0.13 percent. The proposed standards would not have any effect on the ability of firms owning and operating polymer production plants to raise capital. Little or no postponement of plant construction would occur. Finally, the proposed standards would have no significant aggregate adverse impacts on production, employment, competition, industry structure, productivity, or foreign trade.

IV. Rationale

A. Selection of Sources and Pollutants

The Priority List (40 CFR 60.16, 44 FR 49222, August 21, 1979) includes various major source categories that have been determined to contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare and for which standards are to be promulgated. Segments of the polymer production industry on the Priority List include polypropylene, polyethylene, polystyrene, and polyester resins.

The polymer production industry consists of operations that convert monomer or chemical intermediate materials obtained from the petroleum refining or basic petrochemical industry into polymers or copolymers. Many polymer production plants are located close to or in conjunction with petroleum refineries or petrochemical plants Other plants, such as poly(ethylene terephthalate) plants, are less tied to the raw material sources and are located close to their market areas. In either situation, most polymer production plants are located near urban populations.

In 1976, the polymer production industry is estimated to have emitted over 235,000 Mg of VOC to the atmosphere. This value represents about 16 percent of the estimated 1.5 million Mg of VOC emitted to the atmosphere from the entire organic chemical manufacturing industry. Currently, the polymer production industry, less the polyvinyl chloride segment which is regulated by national emission standards for hazardous air pollutants, is responsible for approximately 13 percent of the estimated VOC emissions from the organic chemical manufacturing industry.

There are many distinct segments within the polymer production industry. Polypropylene, high density and low density polyethylene, polystyrene, and polyester polymer segments of the industry have a significant growth rate

VOL
52
ISS
189
SE
30
1987
UMI

and are included on the Priority List. A typical plant in those four segments of the polymer manufacturing industry emits large quantities of VOC. These four segments account for approximately 75 percent of the total estimated VOC emissions from the industry.

Emissions of VOC contribute to the formation of ozone in the atmosphere. Ozone is a criteria pollutant for which ambient air quality standards exist. Since each of these four segments of the polymer production industry is considered a significant contributor of VOC emissions, each was selected for development of standards of performance (see 40 CFR 60.16).

Total potential VOC emissions from new polymer production plants in these four segments over the next 5 years have been projected to be over 7.3 Gg. Of this total, almost 4.8 Gg would be from process emission sources and over 2.5 Gg from fugitive emission sources.

These four segments of the polymer production industry include not only the production of the basic polymer (i.e., polypropylene, polyethylene, polystyrene, or poly(ethylene terephthalate)), but also the production of various copolymers. As increasing proportions of a second monomer are polymerized with the primary monomer in the production of a copolymer, the final product exhibits increasingly different characteristics. In addition, the production process required to manufacture copolymers containing high levels of the second monomer may differ substantially from the process utilized in the manufacture of the basic polymer.

It appears that as long as the proportion of propylene, ethylene, and bis-(2-hydroxylethyl)-terephthalate used in the production of polypropylene, polyethylene, and poly(ethylene terephthalate) copolymers is at least 50 percent by weight in the copolymer product, the production processes used to manufacture both the polymer and the copolymer are essentially the same. For the manufacture of polystyrene copolymers, as long as the proportion of styrene monomer used in the production of polystyrene copolymers is at least 80 percent by weight in the copolymer product, the production processes used to manufacture both the polymer and the copolymer are essentially the same. Consequently, polymer production plants that produce polypropylene, polyetnylene, or poly(ethylene terephthalate) copolymers containing 50 or more percent by weight of propylene, ethylene, or bis-(2-hydroxylethyl)-terephthalate monomer, and plants that produce polystyrene copolymers containing 80 percent or more by weight of styrene monomer would be covered by the proposed standards.

Polyester polymers may be either "saturated" or "unsaturated." Production of "saturated" polyester polymers results in significantly greater VOC emissions than production of "unsaturated" polyester polymers. In addition, "saturated" polyester polymers may be classified as one of two types: Poly(ethylene terephthalate) or nonpoly(ethylene terephthalate). Production volume of poly(ethylene terephthalate) is much larger than nonpoly(ethylene terephthalate). Consequently, consistent with the need to set priorities in establishing new source performance standards, development of standards of performance for polyester polymers has focused initially on production of saturated poly(ethylene terephthalate) polyester polymers.

In addition to VOC emissions, other criteria pollutants, such as nitrogen oxides, particulates, and sulfur oxides, are emitted from polymer production plants. These pollutants, however, are emitted at much lower quantities (VOC is by far the primary pollutant emitted from polymer production plants) and, as a result, standards development for this industry is focusing initially on limiting emissions of VOC.

B. Selection of Affected Facilities

Under section 111 of the Clean Air Act, standards of performance apply to "new sources," where "source" is defined as "any building, structure, facility, or installation which emits or may emit any air pollutant." Most industrial plants, however, consist of numerous pieces of equipment or operations that emit air pollutants. Consequently, although the particular kind of industrial plant that is covered by a given standard is designated as the source, the term "affected facility" is used to designate the actual equipment or operations, within the plant, that must comply with the standards.

The selection of affected facilities includes consideration of the expected impacts under section 111. Selection of the breadth of the definition of affected facilities will affect the degree to which replacement equipment is brought under the standards. If, for example, an entire plant was designated as the affected facility and a piece of equipment was replaced, no part of the plant would be covered by standards unless the replacement caused the plant, as a whole, to be "modified" or "reconstructed." Conversely, the plant, as a whole, could be considered reconstructed if the cost of the replacement exceeded 50 percent of the cost of an entirely new plant and, therefore, existing equipment would be covered by the standards. If, on the other hand, each piece of equipment or unit operation is designated as the affected facility, then as each piece of equipment or unit operation is replaced, the replacement equipment would be a new source subject to the standards regardless of the cost of the replacement or whether the replacement caused emissions from the plant, as a whole, to increase.

In general, narrowly defined affected facilities are designated under section 111 because more emission reduction can usually be obtained as it is presumed that plants are more likely to add one new item rather than a group of items. This practice ensures that new emission sources within plants will become subject to the standards as they are installed. This presumption can be overcome, however, if analysis concludes that a broader designation of the affected facility would result in greater emission reductions or avoid unreasonable impacts (i.e., costs, energy, or other environmental impacts).

1. Process Emissions

Four alternatives were considered in developing the proposed process emission standards for defining the affected facility: (1) Each individual emission point, (2) each process section (such as raw materials preparation, polymerization reaction), (3) each process line, and (4) the entire plant.

The first alternative is the designation of each individual emission point as an affected facility. If the affected facility is defined on this basis, any replacement of an equipment component would be considered a new source and would be subject to the new source standards. There are a large number of individual emission points within a polymer plant. For example, a typical plant producing low density polyethylene by the gas phase process may have as many as 40 individual process emission points. With this many individual sources, attempting to maintain records of which pieces of equipment were subject to standards of performance and which were not, as individual pieces of equipment in existing plants were upgraded or replaced, would be difficult for the owner/operator of existing polymer production plants and for EPA. Furthermore, using this definition would require setting separate standards for each process emission point, which would be administratively impracticable, and testing numerous separate emission points, which would be very costly.

The second alternative is designating each individual process section as the affected facility. A process section refers to a group of equipment designed to accomplish a general, but well-defined, task such as raw materials preparation, polymerization, or material recovery. For the example cited above, this alternative would reduce the potential number of affected facilities in a process line producing low density polyethylene by the gas phase process to five: raw materials preparation, polymerization reaction, material recovery, product finishing, and product storage. (The total number of affected facilities in the plant would depend on the number of process lines and the sharing of process sections by more than one process line.) This designation would reduce the number of affected facilities to an administratively manageable number and limit the facility that must actually be controlled to the process section. In addition, significant changes are more likely to be made at the process section level rather than the individual emission point level. Thus, this definition is likely to ensure the application of best demonstrated emission control at existing plants that undergo component replacement or addition.

The third alternative is designating each process line as the affected facility. A process line may be viewed as being comprised of the five basic process sections, from raw materials preparation through end product storage. This alternative would further reduce the number of affected facilities. However, there are formidable practical problems with using this definition. A process line cannot be delineated clearly where certain process equipment (e.g., that equipment used in raw materials preparation or material recovery) is shared by more than one process line. In general, existing polymer plants have multiple lines where each line consists of two or three process sections that are separate and independent for each line and two or three process sections that are shared by all or several lines at a plant. In addition, different plants producing the same basic polymer may have different line configurations, making it difficult to ensure application of best available control technology. Finally, this definition would not include as many new, modified, or reconstructed sources as the previous definitions and thus would result in less emission control.

The fourth alternative is to designate the entire plant as the affected facility. Using this definition, an existing plant would probably not be affected under the reconstruction and modification provisions. If an entire process line were replaced within an existing plant site, no emission increase would result and, therefore, the line and site would not be subject to the standards under modification considerations. If the plant site consisted of many process lines, the replacement of one line would probably not exceed 50 percent of the replacement cost of the affected facility (all process lines at the site) and, therefore, the line and site would not be subject to the standards under reconstruction considerations.

On the basis of the relative merits of each definition as it is applied to this particular industry, the Administrator has selected process section as the definition of affected facility for the proposed process emission standards. Designating each process section as the affected facility results in standards that would require best demonstrated technology. Although there may be existing facilities within the same line that may be controlled cheaper, it would be extremely difficult to consider all of the possible configurations to assess cost effectiveness of process lines.

For the purposes of the proposed standards, a process section is defined as equipment designed to accomplish a general, but well-defined task in polymer production. Process sections include raw materials preparation, polymerization reaction, material recovery, product finishing, and product storage. The number of affected facilities at a plant depends on the number of process lines and the extent to which process section equipment is shared by more than one process line. For example, a plant that is composed of four process lines may have, for example, four polymerization process sections but only one raw material preparation section that provides material for each of the four polymerization process sections; while another plant that also has four process lines, but in which there is no "sharing" of equipment between process lines, may have four raw materials preparation process sections and four polymerization process sections. The first plant would have, in this example, five affected facilities, while the second plant would have eight affected facilities.

2. Fugitive Emissions

As was done for the SOCMI fugitive VOC standards, three alternatives were considered for defining affected facility under these proposed fugitive emission standards: (1) Individual fugitive emission sources (equipment components), (2) groups of equipment components that are operated in conjunction with each other (process units), and (3) groups of process lines at one location (plant sites). In addition, the process section definition was also considered for fugitive emissions.

As discussed in the notice accompanying the proposed standards for control of fugitive emissions in the synthetic organic chemical manufacturing industry (SOCMI) (see January 5, 1981, **Federal Register**, pp. 1136 through 1165) and as promulgated for the SOCMI (see October 18, 1983, **Federal Register**, pp. 48328–48361), the definition of the affected facility included in those standards is the process unit. Due to the similarity between the SOCMI and polymer production industry, EPA believes that the reasoning supporting the process unit definition for the SOCMI standards supports the same definition for the polymer production industry. Using the process section definition instead could mean that the cost of fugitive emission control techniques required by the proposed standards (in particular, the leak detection and repair programs) may be unreasonable as applied to certain process sections (e.g., product finishing or storage) if the cost of controlling a very small proportion of the equipment components at a plant site is high in relation to the emission reduction achieved. Therefore, the process unit definition of the affected facility used in the SOCMI standards was also selected for the proposed standards for control of fugitive emissions in polymer production plants.

A process unit is very similar to a process section in that both refer to a group of equipment performing a certain task in the polymer production process. The key definitional difference is that equipment in a process unit can be operated independently from other process units if supplied with sufficient input material and storage facilities for the output product; while the equipment in a process section may not be able to be operated independently from equipment in other process sections even if supplied with sufficient input material and storage facilities. The result of the difference in the affected facility definition selected above is that equipment at a polymer plant may be grouped into a larger affected facility under the process unit definition for the fugitive emission standards than under the process section definition for the process emission standards.

Since the process emission standards would apply to "process sections" while the fugitive emission standards would apply to "process units," it follows that

a modification or replacement sufficient to trigger the process emission standard may not trigger the fugitive emission standard, and vice-versa. Whether modification or replacement of equipment (including fugitive emissions components) triggers the NSPS standard is determined independently in each case. For example, the replaced equipment may result in process emissions increasing, while fugitive emissions remain the same. Provided the modification requirements are met, the process emission standards would become applicable but not the fugitive emission standards. Another example is where the added or replaced fugitive emission components are only a small portion of the total fugitive emission components in the process unit that contains the added or replaced process section. In this situation, the requirements for triggering the fugitive emission standards under the reconstruction provisions may not be met, while the requirements that trigger the process emissions standards have been met.

3. Summary

For process emissions, the affected facility is defined as the process section. A process section is defined generally as that group of equipment designed to carry out one of the five steps in polymer production. All equipment, including fugitive emission sources, are to be included.

For fugitive emissions, the affected facility is defined as all fugitive emission sources in VOC service within a process unit. A process unit is defined as the equipment that is assembled to perform any of the physical and chemical operations within a polymer manufacturing plant and that can be operated independently if supplied with sufficient input material and storage facilities for output material. For fugitive emissions, the equipment is limited to those equipment components that are fugitive emission sources (valves, pumps, etc.).

C. Selection of Basis of the Proposed Standards

Section 111 of the Clean Air Act requires that standards of performance reflect the degree of emission control achievable through the application of the best technological system of continuous emission reduction which (taking into consideration the cost of achieving such emission reduction, any nonair quality health and environmental impacts, and energy requirements) has been adequately demonstrated. This requires analyzing emission control techniques that can be used to reduce emissions and the environmental, energy, and economic impacts of various levels of emission reduction achieved by different combinations of control techniques.

1. Control Techniques

Control of process emissions may be accomplished by a number of control technologies, which can be characterized as being either destruction or recovery techniques. Destruction techniques consist primarily of combustion technologies such as flares, thermal incinerators, catalytic incinerators, and boilers. Recovery techniques include condensers, absorbers, and adsorbers. Control of fugitive emissions from equipment leaks may be accomplished through leak detection and repair programs or through use of certain types of equipment, design, and operations.

Process emissions. Process emissions from the manufacture of polymers are diverse in composition and flow and may differ in temperature, pressure, heating value, miscibility, and economic value. This diversity can affect the availability and appropriateness of approaches to controlling different emission streams. For example, waste gas streams in polypropylene and polyethylene production are characterized by the presence of low boiling components, polymerizable monomers, and a mixture of VOC's. These characteristics tend to make recovery techniques impractical. Condensers, for example, are not cost effective for recovery of low boiling VOC's, such as propylene and ethylene, or VOC's in gas streams containing large quantities of inerts such as air or nitrogen. Recovery in such situations would require refrigerated condensers. While this approach would be technically viable (unless the gas stream also contained water or heavy organics which might freeze and foul the condenser), refrigeration increases the cost of condensation considerably. Controlling these waste gas streams, therefore, is more likely to involve combustion rather than recovery techniques.

In polystyrene and polyester production, on the other hand, emission streams tend to be single component streams (i.e., styrene, ethylene glycol) with relatively high boiling points. Such streams lend themselves to recovery. The proposed standards take these factors into account by assuming the use of recovery rather than combustion techniques where possible.

Of the four combustion technologies examined, flares are the most widely used control devices at polypropylene and polyethylene manufacturing plants. They are used to control emergency gas stream releases from process units and to combust various continuous VOC emission gas streams. Depending on the heat value of the VOC's contained in the gas stream, auxiliary fuel may be required to ensure proper combustion. Also, depending on gas composition and flare tip design, steam or air may be required to promote smokeless operation.

Thermal incinerators can be used to control a wide variety of continuous gas streams. They can control VOC in streams with a wide range of concentration and types of VOC. Although they can accommodate minor fluctuations in gas stream flow, incinerators cannot efficiently control intermittent gas stream flows because of the large auxiliary fuel requirements required to keep the incinerator in a state of readiness during periods when there is little or no gas stream flow.

Catalytic incinerators may also be used to control continuous gas emission streams. They are best suited for continuous gas streams that are low in VOC (higher VOC concentrations lead to higher catalyst temperatures, which can seriously damage the catalyst) and free from solid particulates and catalyst "poisons." Although most gas streams in the polymers production industry are sufficiently high in heating value to self-combust without using auxiliary fuel, catalytic incinerators may be favored for dilute streams because they can destroy the VOC at a lower temperature and, therefore, use less auxiliary fuel than thermal incinerators.

Despite potential problems and the need for certain modifications, boilers are used in several instances to combust continuous gas streams containing VOC emissions from polypropylene, polyethylene, and expandable polystyrene plants. The decision to use a boiler as a control device is predicated on the assumption that the plant generates some or all of its own steam, or the fuel value of the waste gas is sufficient to make the process an exporter of steam. Not all plants, however, have a boiler or the need for steam. In such instances, other control devices, such as thermal incinerators, have a cost advantage. If a plant has a boiler and the need for steam, however, boilers are more cost effective than either flares or thermal incinerators.

The four combustion devices (flares, thermal and catalytic incinerators, and boilers) are essentially equivalent in their VOC destruction efficiency when controlling continuous streams, capable of achieving at least 98 percent VOC

emission reduction under certain operating conditions. As reported in "A Report on a Flare Efficiency Study" (see Docket Reference No. II–I–107), a study conducted jointly by the Agency, the Chemical Manufacturers Association, and the John Zink Company, has shown that flares operated under certain conditions are capable of achieving 98 percent or greater VOC emission reduction. Thermal incinerator tests at a polyethylene facility and other similar facilities along with kinetic theory studies show that thermal incinerators can achieve 98 percent or greater VOC emission reduction with an operating temperature of 870 degrees Centigrade (1,600 °F) and a firebox residence time of 0.75 seconds. Catalytic incinerators may also be designed to achieve and maintain similar efficiencies. Boilers typically operate with higher temperatures and longer residence times than thermal incinerators; therefore, boilers are also considered capable of achieving a 98 percent reduction in VOC emissions.

Compared to destruction technologies such as combustion, recovery technologies, such as condensers, carbon adsorbers, and absorbers, offer the advantage of material recovery. Condensers are effective in recovering easily condensable VOC's such as styrene and, therefore, are common in the polystyrene industry.

Spray condensers are used in the poly(ethylene terephthalate) industry for the recovery of ethylene glycol that might otherwise be lost in emissions to the atmosphere. The waste gas from the polymerizers enters a spent ethylene glycol spray condenser prior to entering the vacuum system. The condensed ethylene glycol may then be recovered through a series of distillation columns, condensers, and reboilers for reuse in the process. This system is essentially the same whether applied to a plant using the dimethyl terephthalate process or one using the terephthalic acid process. Spray condensers may be used on process lines producing either low viscosity poly(ethylene terephthalate) or high viscosity poly(ethylene terephthalate).

Certain operating conditions on end finishers used in the production of high viscosity poly(ethylene terephthalate), however, make the application of spray condensers difficult, if not impossible. In an alternative, less efficient recovery system currently used in the poly(ethylene terephthalate) industry, the waste gas stream discharged from the polymerizers passes directly without condensation into the vacuum system, which consists of steam-jet ejectors. The ethylene glycol is carried into barometric intercondensers where it is condensed, entrained in the water, and passed to a cooling tower from which it is partially evaporated. The ethylene glycol remaining in the cooling water is then partially recovered through distillation. Finally, to complete the cycle, the water is recirculated through the steam-jet ejectors in the vacuum system and some "blowdown" water from the cooling tower is sent to a wastewater treatment plant.

Carbon adsorbers can effectively remove VOC emissions contained in gas streams in dilute concentrations. High VOC concentration gas streams, however, which are typical in the polymer production industry, require special precautions to prevent excessive temperatures within the adsorber due to the heat of adsorption. As a result, carbon adsorption systems are frequently impractical for high VOC concentration gas streams and generally are not employed in the polymer production industry.

Absorbers are generally limited to applications in which the spent absorbent can be reused directly or with minimum treatment. Absorption may not be practical if the waste gas stream contains a mixture of organics since all of the organics are not likely to be effectively controlled by one absorbent. Like carbon adsorbers, absorbers have found limited use as a VOC emission control device in the polymer production industry.

Recovery techniques, such as condensation as outlined above, can achieve VOC emission reductions of over 98 percent, provided they are properly designed, operated, and maintained on appropriate gas streams. The ethylene glycol spray condenser recovery system, for example, has been reported to remove around 99 percent of the ethylene glycol from the polymerizer offgas. The cooling tower recovery system is estimated to result in the recovery of about 80 percent of the ethylene glycol contained in the polymerizer offgas.

Fugitive emissions. Fugitive emissions of VOC are emitted from valves, pumps, compressors, open-ended lines, and other pieces of equipment. Fugitive VOC emission reduction may be accomplished through either a leak detection and repair program or equipment, design, and operational requirements. Leak detection and repair programs consist of monitoring potential fugitive emission sources to detect fugitive emissions of VOC and then repairing any leaks found.

The specific control techniques selected for fugitive emission sources in the polymers production industry include leak detection and repair programs for valves and pump seals, rupture disks for pressure relief devices, plugs and caps for open-ended lines, vented seal areas for compressors, and closed purge systems for sampling connections. Selection of these control techniques for analysis was based on the results of analyses conducted during development of new source performance standards for control of fugitive VOC emissions within the SOCMI.

SOCMI fugitive emission factors and control techniques are appropriate for the polymer production industry and are proposed to be used for this rule. Because the equipment and chemicals (monomers) used in the polymer production industry are the same as those used in the SOCMI, the basic parameters influencing fugitive emission rates, the effectiveness of controls, and the costs of these controls are essentially the same for the polymer production industry and the SOCMI. To the extent that the basic parameters are different, the average SOCMI estimates would tend to understate emission reduction because the major monomers used in the polymer production industry are among the chemicals found to have the highest leak rates and emission rates in the SOCMI fugitive data base. Application of these control techniques to the polymers production industry would also provide consistency and uniformity in regulating fugitive VOC emissions within these closely related industries, which should help to promote better understanding and reduce confusion.

Other potential fugitive VOC control techniques and a full analysis of the available regulatory alternatives for control of fugitive emission sources are contained in "VOC Fugitive Emission Sources in the Synthetic Organic Chemicals Manufacturing Industry—Background Information for Proposed Standards," EPA–450/3–80–033a; "Fugitive Emission Sources of Organic Compounds—Additional Information on Emissions, Emission Reductions, and Costs," EPA–450/3–82–010; January 5, 1981, **Federal Register**, pp. 1136 through 1165; "VOC Fugitive Emissions in Synthetic Organic Chemicals Manufacturing Industry—Background Information for Promulgated Standards," EPA–450/3–80–033b; and October 18, 1983, **Federal Register**, pp. 48328 through 48361.

VOL 52 ISS 189 SE 30 1987 UMI

2. Regulatory Alternatives

Regulatory alternatives represent various emission reduction schemes that could be selected as the basis for standards of performance. Regulatory alternatives provide a basis for analyzing environmental, energy, cost, and economic impacts associated with various standards of performance. The magnitude of these impacts are estimated by assessing the impact of each regulatory alternative on "model" plants, representative of plants found within the industry.

Twelve model plants were developed to analyze the impacts of various regulatory alternatives for standards of performance limiting process VOC emissions from the polymer production industry:

1. Polypropylene, liquid phase process;
2. Polypropylene, gas phase process;
3. Low density polyethylene, high pressure process;
4a. Low density polyethylene, low pressure process;
4b. High density polyethylene, gas phase process;
5. High density polyethylene, liquid phase slurry process;
6. High density polyethylene, liquid phase solution process;
7. Polystyrene, continuous process (general purpose and impact polystyrene);
8. Expandable polystyrene, batch post-impregnation suspension process;
9. Expandable polystyrene, batch in-situ suspension process;
10. Poly(ethylene terephthalate), dimethyl terephthalate process;
11. Poly(ethylene terephthalate), terephthalic acid process producing a low viscosity product or producing a high viscosity product with a single end finisher; and
12. Poly(ethylene terephthalate), terephthalic acid process producing a high viscosity product with multiple end finishers.

These model plants represent all known processes for making these polymers that are currently in commercial operation and are likely to be used in the future at new plants. Model plants and proposed regulations were not developed for the polystyrene batch process producing general purpose or impact grade polystyrene and for poly(ethylene terephthalate) batch processes because available information indicates that no new plants will be constructed using batch processes.

For fugitive VOC emissions, a single model plant was selected. Based on both equipment counts and VOC emission estimates for the 12 model polymer production plants, a single model plant, corresponding to the SOCMI Model Plant B analyzed in the SOCMI background information document (EPA–450/3–80–033a), was chosen to represent the fugitive emission characteristics of the polymer production industry (see Docket A–82–19, Item No. II–B–44). This model plant was used for regulatory analysis for each polymer production industry segment except poly(ethylene terephthalate). Plants producing poly(ethylene terephthalate) using the dimethyl terephthalate process are already regulated by the fugitive emission standards for the SOCMI because of their methanol by-product production. Plants producing poly(ethylene terephthalate) using the terephthalic acid process use only heavy liquids and solids, control of which has not been found to be cost effective. For example, the cost effectiveness of controlling fugitive emissions from pumps and valves in heavy liquid service is greater than $10,000 per megagram.

Following development of model plants, the regulatory baseline was identified. The regulatory baseline reflects the level of control that would typically be employed in new plants due to existing State regulations in the absence of new source performance standards and forms a basis for calculating national emission reduction benefits and impacts of the standard. Determination of the regulatory baseline for the polymer production industry, however, is difficult. Not all States regulate VOC emissions from polymer production plants and the States that do have regulations of varying stringency. Therefore, the following approach was followed to define the regulatory baseline.

For polypropylene and polyethylene plants, the following criteria were used to identify VOC emission streams likely to be controlled under the regulatory baseline:

1. Large intermittent gas streams;
2. Continuous streams containing large amounts of VOC emissions; and
3. Exceptions to the above based on specific information.

The first criterion focuses on the nature of the stream. There are a number of intermittent streams in the polymer manufacturing industry that have large flows and occur as a result of equipment breakdowns, process upsets, or process maintenance startup, shutdown, and purges. Those streams that result from equipment breakdowns or process upsets are typically known as emergency vents and, in most cases, are controlled already by flares for safety reasons. Consequently, control of these large intermittent streams is included in the regulatory baseline.

The second criterion focuses on the VOC content of various continuous streams. Continuous streams with VOC flow rates larger than 91 Mg per year (100 tons/year) are likely to be controlled under existing State regulations. Consequently, control of these streams is also included in the regulatory baseline. This criterion was based on requirements found in section 22.8 of the Louisiana State regulation governing waste gas disposal. Similar requirements were also found in regulations of several other States.

Although they appear to qualify for inclusion in the regulatory baseline according to the two general criteria mentioned above, some VOC emission streams have been excluded from the regulatory baseline. In these cases, specific industry information indicates that these streams are not currently being controlled and will not necessarily be controlled in new plants.

For the polystyrene model plants and the poly(ethylene terephthalate) model plants, a different approach was used to identify the regulatory baseline. Both industries currently use various VOC emission recovery technologies that achieve varying levels of control. Consequently, the regulatory baselines for polystyrene and poly(ethylene terephthalate) production were based primarily on current industry practice.

As described in the background information document, the source of the process VOC emissions from polystyrene production plants using a continuous process is the vacuum system in the material recovery section. In the past, steam-jet ejectors have generally been employed in this vacuum system to produce and maintain the necessary vacuum. Recently, however, a number of existing plants have replaced their steam-jet ejectors with vacuum pumps in order to reduce energy consumption and operating costs. As a result, it now appears that a new general purpose or impact polystyrene production plant using a continuous process would likely employ vacuum pumps in the vacuum system rather than steam-jet ejectors. The regulatory baseline for the regulatory analysis, therefore, reflects the use of vacuum pumps. As current industry practice in controlling emissions from plants producing expandable polystyrene varies considerably between plants, it was assumed for analysis purposes that there would be no baseline control for the expandable polystyrene model plants.

For poly(ethylene terephthalate) plants producing a low viscosity product or a high viscosity product with a single end finisher, the regulatory baseline reflects the use of spent ethylene glycol spray condensers that recover the ethylene glycol directly from the offgases from the polymerizers. For poly(ethylene terephthalate) plants producing a high viscosity product with multiple end finishers, the regulatory baseline reflects the use of spent ethylene glycol spray condensers that recover the ethylene glycol directly from the offgases from the initial end finishers only. The offgases from the remaining end finishers are assumed to pass directly to the vacuum system and into the cooling tower. The regulatory baseline also assumes that there is some recovery of ethylene glycol from the cooling tower using a distillation column. This system of ethylene glycol recovery is slightly different from the current system used in the industry for this process, but reflects the type of system industry indicates it would now use on new process lines with multiple end finishers.

For fugitive emissions, the regulatory baseline assumes that 75 percent of all gas pressure relief devices and sampling connections, most of the open-ended lines, and none of the other fugitive emission sources are currently subject to any sort of routine leak detection and repair program. These assumptions are consistent with those made in the analysis of fugitive emission control for the SOCMI.

Once the model plants and the regulatory baselines were defined, regulatory alternatives specific for each model plant were identified by applying various levels of VOC emission control to each model plant. The regulatory alternatives for the polypropylene and polyethylene model plants are based on the use of flares and incinerators (thermal and catalytic) to reduce process VOC emissions contained in gas streams discharged continuously from these plants. Although they may be used to comply with the proposed standards, boilers have not been considered as part of any regulatory alternative, because not all polypropylene and polyethylene plants employ boilers or have a need for steam. For control of VOC emissions contained in gas streams discharged intermittently from these plants, only flares were used to develop various regulatory alternatives. Flares are the only control device considered economically feasible for control of intermittent gas streams. The regulatory alternatives for the polystyrene continuous process and poly(ethylene terephthalate) plants are based on recovery techniques such as condensation to recover styrene monomer, ethylene glycol, and methanol and distillation to recover ethylene glycol.

The regulatory alternatives for the expandable polystyrene model plants are based on use of condensation for streams containing styrene monomer and on combustion for streams containing the blowing agent. Combustion devices examined were flares and incinerators (thermal and catalytic) for process VOC emissions contained in gas streams discharged continuously and flares for process VOC emissions discharged intermittently.

The regulatory alternatives were developed by first applying fugitive VOC emission controls and then process VOC emission controls. Fugitive controls were applied first simply because they were known beforehand, from the SOCMI standard for equipment leaks, and the placement of fugitive control in the regulatory alternative order would not make any difference in the analysis. In addition, by dealing with fugitive emission controls first, the succeeding regulatory alternative could focus on process emission controls exclusively and their relative costs and associated emission reductions. The order of the regulatory alternatives for process emissions was based, for the most part, on initially controlling the process section with the largest uncontrolled emissions, then adding sections down to the process section with the smallest uncontrolled emissions.

In generating the regulatory alternatives for process emissions, the VOC process emission control techniques were applied to each process section in a typical process line within each model plant. While some process sections may be shared by process lines, for the regulatory analysis a typical process line was assumed to be composed of its own dedicated process sections. (As discussed earlier, process section refers to a group of equipment designed to accomplish a well-defined task such as raw materials preparation or polymerization reaction.) Within each process section, continuously discharged gas streams were combined with other continuously discharged gas streams, or intermittently discharged gas streams were combined with other intermittently discharged gas streams, to provide overall estimates of emission control costs and emission reductions resulting from application of each regulatory alternative.

The analysis performed takes into account the fact that new growth can occur in several ways—individual process sections, process lines, new plants. The environmental, economic, and energy impacts of the proposed standards are different for each of these three potential growth scenarios. For example, new plants are likely to utilize single control devices, where possible, to control emissions from more than one process section. This analysis results in lower costs of control than if equivalent growth occurred on either an individual process section or process line basis. Each major polymer-process type combination, therefore, was examined individually to estimate the most likely manner in which the new growth would be distributed among the three ways mentioned above. Combining this distribution and the particular emission reduction impacts associated with new growth as process section, process line, and plant, average or typical capital, annual, and cost effectiveness impacts of the proposed standards were calculated. Secondary air quality, energy, and economic impacts associated with a worst case growth distribution (i.e., by process section only) were also calculated.

A summary of the regulatory alternatives for polypropylene and polyethylene production is presented in Table 1 and a summary of the regulatory alternatives for polystyrene and poly(ethylene terephthalate) production is presented in Table 2. In each case, Regulatory Alternative 1 represents the regulatory baseline. In addition, Regulatory Alternative 2 represents the regulatory baseline plus fugitive emission control, except for the poly(ethylene terephthalate) model plants. Each regulatory alternative is more stringent than the previous regulatory alternative and, in most cases, includes all the controls included in the previous regulatory alternative plus additional control of VOC emissions. (The details of this analysis are discussed in depth in the background information document.)

*Regulatory alternative selected as basis of proposed standard.

[a] Process Sections:
RMP—raw materials preparation (including esterification in poly(ethylene terephthalate) plants),
PR—polymerization reaction,
MR—material recovery,
PF—product finishing,
PS—product storage.

[b] Control Devices:
C=combustion devices including flares, incinerators, boilers.
R=recovery devices used under baseline as part of process.
RR=additional recovery devices or more efficient recovery system.

[c] From uncontrolled levels on a per line basis.

[d] Emissions from the polymerization reaction section are indirectly controlled as part of normal process operation (i.e., baseline) by condensers for the recovery of styrene. The control of the emissions from this material recovery is indicated in Regulatory Alternatives 3 through 7.

[e] The additional control is the application of a refrigerated condenser controlling emissions of 0.12 kg VOC per Mg of product from the material recovery section down to 0.012 kg VOC per Mg of product.

[f] Control by refrigerated condensers to 0.0072 kg VOC per Mg of product.

[g] Control by refrigerated condensers to 0.0036 kg VOC per Mg of product.

[h] Control by refrigerated condensers to 0.0024 kg VOC per Mg of product.

[i] Control by refrigerated condensers to 0.0018 kg VOC per Mg of product.

[j] Continuous streams.

[k] Non-emergency intermittent streams.

[l] As part of normal process operation, methanol emissions from raw materials preparation are recovered by condensers. The emissions from this methanol material recovery are controlled as indicated in Regulatory Alternatives 2 through 6. In addition, as part of normal process operation, ethylene glycol emissions from the polymerizers are recovered by spray condensers prior to the vacuum system evacuating the polymerizers. Additional control was evaluated for this section in Regulatory Alternative 7.

[m] N.A.=not applicable.

[n] Control by refrigerated condensers to 0.018 kg VOC per Mg of product.

[o] Control by refrigerated condensers to 0.0144 kg VOC per Mg of product.

[p] Control by refrigerated condensers to 0.0072 kg VOC per Mg of product.

[q] Control by refrigerated condensers to 0.0027 kg VOC per Mg of product.

[r] Control by refrigerated condensers to 0.0018 kg VOC per Mg of product.

[s] Control by distillation column on cooling water tower resulting in a 50 percent reduction in emissions from polymerization reaction section via the cooling water tower.

[t] These regulatory alternatives are for a low viscosity PET line or a high viscosity PET line with a single end finisher.

[u] As part of normal process operations, ethylene glycol is recovered from the process vessels using a spent ethylene glycol spray condensers. Additional control was evaluated under Regulatory Alternative 2.

[v] Additional control reflects the use of a distillation column on the cooling water tower that results in a 50 percent reduction of ethylene glycol emissions to the atmosphere from the polymerization reaction section via the cooling water tower.

[w] These regulatory alternatives are for a high viscosity PET line with multiple end finishers.

[x] As part of normal process operations, ethylene glycol is recovered from the process sections. Baseline control includes distillation columns on the esterifiers and cooling tower, and spent ethylene glycol spray condensers on the first end finisher.

[y] Additional control reflects the reduction in ethylene glycol concentration in the cooling water tower through an increase in the drawoff of cooling water to the distillation column that results in emission reductions ranging from 15 percent, under Regulatory Alternative 2, up to about 90 percent, under Regulatory Alternative 7.

As can be seen in Tables 1 and 2, certain process sections do not appear as part of the regulatory analysis (e.g., product storage for the polypropylene, liquid phase model plant). In most instances, such process sections were not analyzed because VOC emissions were not identified as being emitted from the process section to the atmosphere. In a few instances, a particular process section did not exist (e.g., there is no material recovery process section in either expandable polystyrene process). The extruder quench vent stream (product finishing) from the polystyrene, continuous process was excluded because a previous analysis had shown this very high flow, low styrene concentration emission stream to be not cost effective (greater than $12,000 per Mg of VOC) to control via a national standard for this industry. Similarly, in a separate analysis, the raw materials preparation vent from the polystyrene continuous process was found to be not cost effective (greater than $2,000 per Mg of VOC) to control via a national standard for this industry.

3. Selection of Best System of Continuous Emission Reduction

Based on an analysis of the average (or typical) VOC emission reduction impacts, annual and capital costs, and the cost-effectiveness values associated with the most likely growth distribution and on the secondary air quality, energy, and economic impacts associated with a worst case growth distribution, the regulatory alternatives presented in Tables 1 and 2 that are marked with an asterisk (*) were selected as the basis for the proposed standards. For several of the plants, the most stringent level of control was selected as the basis of the proposed standards. The proposed standards indicated by the selected regulatory alternatives would apply to individual process sections when the process section is constructed, modified, or reconstructed.

In determining which regulatory alternative for each model plant represents the best system of continuous emission reduction, EPA considered "the cost of achieving such emission, any nonair quality health and environmental impact and energy requirement . . ." (Section 111 of the Clean Air Act). On the basis of the history of the legislation and its past implementation, the EPA has set the levels of standards considering the cost-effectiveness of varying levels of emission reduction and has rejected some NSPS control options on the ground that their costs are unreasonably high in light of the emissions reductions they achieve for those specific industries. Since the purpose of cost-effectiveness analyses is to avoid such a disproportion, the annual cost of controlling VOC emissions and the resultant VOC emission reduction for each regulatory alternative in the average or typical situation were analyzed. In deciding which control alternatives are considered ineffective, EPA considered: (1) The cost effectiveness of such control in relation to the cost effectiveness of controlling VOC streams as prescribed in NSPS that EPA has already promulgated, and (2) the extent to which suspected or known toxic compounds are present in polymer manufacturing emission streams.

On the basis of these considerations, for each model plant, the cost-effectiveness values of the regulatory alternatives that are more stringent (i.e., provide greater VOC emission reduction) than the regulatory alternative selected as the basis of the proposed standard for that model plant were not considered reasonable. The incremental cost-effectiveness values for the more stringent regulatory alternatives immediately after the regulatory alternatives selected as the basis of the proposed standards range from $1,100 up to $184,000 per megagram of VOC reduced (see Docket A–82–19, Item II–B–92). The incremental cost of achieving the additional emission reduction that would result from the selection of any of these more stringent regulatory alternatives is not considered to be reasonable when compared to the additional emission reductions for the purposes of a national standard. Therefore, these more stringent regulatory alternatives were not selected. The noise, solid waste, water, energy, and economic impacts, as well

as the cost effectiveness, associated with the regulatory alternatives marked with an asterisk are considered reasonable. Therefore, the regulatory alternatives marked with an asterisk were selected as the basis for the proposed standards.

The impacts of the proposed standards for each model plant are summarized in Table 3.

Note: In summarizing the impacts of the proposed standards, the following paragraphs do not include the poly(ethylene terephthalate), terephthalic acid process using a single end finisher per process line since the proposed standards have no impacts above the regulatory baseline.

Under the regulatory alternatives selected as the basis for the proposed standards, annual emission reductions over the regulatory baseline range from more than 2 Mg per year for each process line in a poly(ethylene terephthalate) plant using a dimethyl terephthalate process to about 150 Mg per year for each process line in a polypropylene plant using a liquid phase process. Nationally, VOC emissions would be reduced in the fifth year following implementation of the proposed standards by about 3.0 Gg. This represents an emission reduction of approximately 42 percent from projected emission levels under the regulatory baseline.

[a] Impacts are over baseline levels for the selected regulatory alternatives marked with an asterisk (*) in Tables 1 and 2 and are on a per line basis.

[b] Does not include energy credits for the energy value of reduced VOC consumption or recovered VOC. When energy credits are accounted for there is a national decrease in energy consumption of about 34 terajoules per year.

[c] Based on a most likely growth distribution in each segment by combination of individual process sections, process lines, and whole plants. (See Docket Reference Number II-B-92, "Calculations of Average, or Typical, Cost-Effectiveness Values for the Regulatory Alternatives Selected as the Basis for the Proposed Standards and the Next More Stringent Regulatory Alternatives," in Docket Number A-82-19).

[d] Based on "worst case" (i.e., most costly) assumption that all new growth is by individual process section.

[e] The impact projections apply only to a process line using a single end finisher. There is no impact over baseline for these 13 PET lines.

[f] These impacts are for a process line using multiple end finishers.

BILLING CODE 6560-50-C

In most polymer production plants, the proposed standards would increase energy consumption slightly over the regulatory baseline. The largest amount of additional energy required under the proposed standards would be about 1.9 terajoules (1.8 billion Btu) per year for a process line producing a high intrinsic viscosity poly(ethylene terephthalate) product with multiple end finishers. This increase is offset partially when the heat value of the recovered ethylene glycol is considered.

Nationally, total energy consumption would decrease from the regulatory baseline by about 36 terajoules (34 billion Btu) per year in the fifth year after implementation of the proposed standards. This result is obtained by calculating the energy value of the VOC recovered as a result of the proposed standards and subtracting it from the increased energy usage due to the control devices associated with the proposed standards.

For individual plants, the average cost per megagram of VOC reduction of the proposed standards over the regulatory baseline ranges from about $205 per megagram of VOC reduced per process line-equivalent in plants producing polystyrene using a continuous process to about $930 per megagram of VOC reduced per process line-equivalent in plants producing expandable polystyrene using an in-situ suspension process (see Docket A–82–19, Item II–B–92, Table 6). The incremental cost effectiveness of the proposed standards over the next less stringent regulatory alternative ranges from about $115 per megagram of VOC reduced per process line-equivalent in plants producing polystyrene using a continuous process to a high of about $930 per megagram VOC reduced per process line-equivalent in plants producing expandable polystyrene using an in-situ suspension process.

Under the proposed standards, increased capital expenditures over the regulatory baseline would range from about $1,500 dollars per process line-equivalent in plants producing poly(ethylene terephthalate) using a dimethyl terephthalate process to about $273,000 per process line-equivalent in plants producing polypropylene using a liquid phase process. Annualized cost increases over the regulatory baseline range from about $600 per line-equivalent in plants producing poly(ethylene terephthalate) using a dimethyl terephthalate process to about $94,000 per line-equivalent in plants producing polypropylene using a liquid phase process. Total increased capital and annualized expenditures over the regulatory baseline in the fifth year after implementation of the proposed standards would be about $4.5 million and $1.4 million, respectively.

Finally, an analysis of the economic impacts associated with the proposed standards showed that the impacts would be minor. Based on the worst-case assumption that all costs are passed through to the customer, maximum price increases ranging from less than 0.01 percent, for plants producing poly(ethylene terephthalate) using a dimethyl terephthalate process, to about 0.44 percent, for polypropylene plants using a liquid phase process, were projected (see Chapter 9, p. 9–47, of the BID).

An analysis of the impact of the proposed standards on capital availability indicates that the increased costs associated with the proposed standards would not have any significant impact on the ability of the polymer production industry to raise capital (see Chapter 9 of the BID). Consequently, the proposed standards would not curtail or postpone plant construction or expansion. In addition, the proposed standards would have no significant adverse aggregate impacts on employment, competition, industry structure, productivity, or foreign trade.

D. Selection of Format for the Proposed Standards

Several formats could be selected for the proposed standards. Section 111 of the Clean Air Act requires, however, that standards of performance be written in terms of emission limits, unless such standards are not feasible. Under section 111(h)(2), such standards are not feasible if either the pollutants cannot be emitted through a capture system or the application of measurement technology is not practicable due to technological or economic limitations. In such cases, standards may be written in terms of equipment design, work practice, or operational practices.

1. Process Emissions

The alternative formats considered were emission limits expressed in terms of VOC concentration, mass of VOC emissions per unit of production, and percent VOC emission reduction.

For polypropylene and polyethylene production, the proposed standards are based on the use of combustion devices such as flares, thermal incinerators, catalytic incinerators, and boilers. For polystyrene and poly(ethylene terephthalate) production, however, the proposed standards are based primarily on the use of recovery techniques (condensation or distillation).

The emissions from incinerators, boilers, and condensers can be measured. Thus, standards structured in terms of emission limits are appropriate for these control technologies. Unlike boilers, heaters, and incinerators in which combustion takes place in an enclosed chamber, flaring is an open combustion process. Measurement of emissions from a flare to determine its efficiency is, therefore, very difficult. While emission measurement is technologically possible, the costs involved due to the necessity of hooding the flare and other equipment needs make measurement of emissions economically impracticable. As a result, emission limits for flares have been determined to be not feasible. As mentioned previously, 98 percent reduction is known to be achieved when flares are operated under certain specific conditions. Therefore, the proposed standards include these certain equipment, design, and operational requirements that apply when flares are used to control emissions.

For controls involving combustion in enclosed chambers, EPA has selected a percent reduction format. Structuring emission limits in terms of VOC concentration does not reflect the performance capability of incinerators or boilers, which are capable of achieving essentially the same high degree of emission reduction over a very wide range of uncontrolled VOC concentrations through complete combustion. The degree of emission reduction necessary to comply with an emission limit on the VOC concentration discharged to the atmosphere will vary depending on the VOC concentration in the uncontrolled gas stream. A concentration limit, therefore, could allow incomplete combustion to occur, which not only reduces the degree of emission reduction, but can also lead to increased ozone formation in the atmosphere due to the higher photochemical reactivity of partially combusted VOC's.

Emission limits in terms of percent reduction in VOC emissions avoid the variability of concentration limits and the potential for increased ozone from incomplete combustion. By requiring the same high degree of emission reduction regardless of the VOC concentration in the uncontrolled gas stream, a percent reduction format ensures complete combustion and reflects the performance capability of combustion.

For the proposed standards that are based on the use of condensation, emission limits expressed in terms of percent VOC reduction, mass of VOC

emissions per unit of production, and VOC concentration were considered. Emission limits in terms of percent reduction by themselves were not considered appropriate. Condensation technology reduces the concentration of VOC in the uncontrolled gas stream to a specific level, which depends on the vaporization and condensation properties of the VOC in question. This level is not particularly sensitive to the initial VOC concentration in the uncontrolled gas stream; that is, for any given VOC, the technology will reduce emissions to essentially the same concentration level over a relatively wide range of uncontrolled VOC concentrations. Since the degree of emission reduction achieved varies depending on the uncontrolled VOC concentrations, emission limits in terms of percent VOC reduction are not consistent with the performance capabilities of a condenser.

A format of mass of VOC emissions per unit of production reasonably reflects the performance capabilities of condensation technology. As mentioned above, condensers are essentially capable of reducing VOC concentrations to a specific level regardless of variations in uncontrolled VOC concentrations. The volume of the gas stream discharged to the atmosphere, on the other hand, varies directly with production rate (i.e., the greater the production rate the greater the volume of the gas stream discharged). Mass emissions, which are the product of multiplying the concentration of VOC in the gas stream discharged to the atmosphere from the condensers by the volume of the gas stream, also vary directly with production rate. As a result, where control technologies, such as condensation, that limit VOC concentrations in the gas streams discharged to the atmosphere are employed, the ratio of mass of VOC emissions divided by production rate is essentially constant. Condensation technology can thus be employed to achieve the same controlled emission rate.

As noted above, condensation technology reduces VOC concentration to a specific level depending on the vaporization and condensation properties of the VOC in question regardless of the uncontrolled VOC concentration. As a result, a concentration format can best represent the performance capabilities of condensers. There is one serious potential drawback to a standard based solely on VOC concentration. VOC concentrations depend to a large extent on the amount of dilution of the gas stream that occurs prior to measurement of emissions. This problem can be overcome in many cases by correcting all measurements of VOC concentrations to a common reference basis (i.e., essentially limiting the amount of dilution permitted). In the case of polymers production, however, selecting a common reference basis for this purpose is difficult. The amount of dilution present in the gas streams discharged from the steam-jet ejectors in poly(ethylene terephthalate) production plants, for example, varies depending on the degree of vacuum maintained in this system. For a specific VOC, however, concentration is directly proportional to outlet gas temperature; a given temperature will result in a given VOC concentration. Outlet gas temperature is easier to measure and monitor than concentration and cannot be "diluted" in the same way as can concentration.

A temperature requirement is easy to monitor and enforce, but does not encourage process improvements that reduce atmospheric emissions, because all systems are operated with the same outlet gas temperature regardless of the amount of emissions being released to the atmosphere. A mass emission rate VOC per unit of production standard, on the other hand, requires somewhat more effort to monitor and enforce, but does encourage process improvements that reduce atmospheric emissions. Both formats generally reflect the performance capability of best demonstrated technology (i.e., condensers). Therefore, based on these and the above considerations, the proposed standards for condensation technology allow an affected facility owner or operator to meet a standard based on the emission rate per unit of production format or as a surrogate, maintain a specified condenser outlet temperature.

Finally, the proposed standards for poly(ethylene terephthalate) production are based in part on the recovery of the ethylene glycol prior to its entering the steam-jet ejectors used to maintain a vacuum in the polymerizers and in part on the reduction of its concentration in the cooling tower through the drawing off of cooling water from the tower and recovering the ethylene glycol in a distillation column. An emission limit standard for these cooling tower VOC emissions is not practicable. There is no add-on technology for abating the ethylene glycol emissions in the air stream from a cooling tower. Furthermore, the various parameters affecting emission levels from cooling towers vary from one cooling tower to another making it impracticable to establish a measurement methodology upon which a percent reduction-, mass-, or concentration (in air)-based standard can be based. Therefore, it is infeasible, as that term is defined in section 111(h), to establish an emission limitation for cooling tower emissions.

Recovery of ethylene glycol from the polymerizer offgases prior to its entering the steam-jet ejectors controls VOC emissions of this material to the atmosphere from the cooling tower. Consequently, rather than placing a limit on emissions from the cooling tower, a section 111(h) operational limit is proposed in the form of a maximum concentration of ethylene glycol either in the cooling water in the cooling tower or in the cooling water exiting the vacuum system servicing the polymerization reaction section and then entering the cooling tower. Use of percent reduction or mass of VOC per unit of production for the ethylene glycol in the cooling tower water would not result in any greater reduction in VOC emissions from the cooling tower and would be more difficult to determine and enforce.

2. Fugitive Emissions

The proposed standards for fugitive emissions in the polymer manufacturing industry are the same as those promulgated for the SOCMI. The following paragraphs summarize the proposed standards.

For fugitive emissions from equipment leaks, it is generally not feasible to structure performance standards in terms of emission limits. Except in those cases where emission limits could be set at "no detectable level," the only way to measure emissions from fugitive emission sources, such as pumps and valves, would be to use a bagging technique for each source. "Bagging" means to enclose a fugitive emission source with a shroud in order to capture all of the emissions from the source. After an appropriate equilibration time, a sample of the effluent from the shroud is taken to determine the VOC concentration. The VOC mass emission rate is then calculated based on the low volumetric flow rate and VOC concentration. The great number of sources and their distribution over large areas would make such a requirement economically impracticable. Therefore, a VOC emissions limit format was not selected for the proposed fugitive emission standards.

A slightly different approach would be a limit on the number or percentage of fugitive emission sources that would be allowed to leak. This approach, which would add flexibility to the proposed

standards, would be more qualitative than an approach based on quantitative emission measurements such as bagging. This approach, however, would be potentially applicable to only valves. Other fugitive emission sources are too few in number for this approach to be meaningful. As a way to avoid imposing unreasonable impacts on operators who have facilities with very few leaking valves, the proposed standards incorporate this approach as an alternative for controlling fugitive emissions from valves. For other fugitive emission sources, except where a no detectable emission limit can be established, the proposed standards are structured solely in terms of equipment design, operational procedures, work practices, or performance standards. The specific format selected for each fugitive emission source is discussed in the next section.

E. Selection of Numerical Emission Limits, Equipment Design, Operational Procedures, or Work Practice Standards

1. Continuous Process Emissions

The proposed standards for continuous process emissions in polypropylene and polyethylene production plants are based on the use of combustion to control VOC emissions. The formats selected for the proposed standards that are based on the use of combustion are percent VOC emission reduction for combustion devices other than flares and an equipment standard for flares.

As described in the background information document, test data show that certain types of flares can achieve 98 percent VOC emission reduction under specific conditions and that only flares operating under these conditions achieve a 98 percent VOC emission reduction. The net heating value of the flared gas must not be less than 11.2 megajoules per standard cubic meter (300 Btu/scf) for a steam-assisted or air-assisted flare, or less than 7.45 megajoules per standard cubic meter (200 Btu/scf) for a nonassisted flare. In addition, the exit velocity of the flare gas at the flare tip must not exceed a maximum velocity, which is dependent on the net heating value of the flared stream, for steam-assisted or nonassisted flares. The maximum exit velocity is determined using an equation included in the regulation. If the net heating value of the gas stream being combusted is greater than 37.3 megajoules per standard cubic meter (1,000 Btu/scf), then the exit velocity of the flare gas at the flare tip must not exceed 122 meters per second (400 ft/sec) for steam-assisted or nonassisted flares. Air-assisted flares must also operate below a maximum exit velocity, which is dependent on the net heating value of the flared stream. The maximum exit velocity is determined using an equation included in the regulation.

In addition to the above conditions, the proposed standards require the use of a smokeless flare. According to the current knowledge of flare design, the best available flare design or state-of-the-art flare design is the smokeless flare. Smoking flares are environmentally less desirable because they emit particulates. The environmental impact associated with smoking flares is considered unreasonable, especially in light of the availability of smokeless flares capable of achieving the same destruction efficiency.

Another consideration in developing the equipment standards for flares is the need to adjust operation of a flare in response to flow surges. Surges in gas stream flow can cause a flare to smoke for short periods of time until the flare is adjusted. Five minutes is a reasonable period of time for alleviating the smoking condition by making the needed adjustments to a flare. Flow surges occur infrequently and generally do not occur more than once in a 2-hour period. Therefore, a limit on visible emissions of no more than 5 minutes within any 2-hour period is included in the proposed standards for flares.

Based on data summarized in the background information document, combustion devices such as thermal and catalytic incinerators, process heaters, and boilers can achieve a 98 weight percent VOC reduction. For thermal incinerators, the data show that 98 percent reduction is achieved when using a combustion temperature of 870 degrees Centigrade or more and a residence time of 0.75 seconds or more, provided the VOC concentration of the emission stream is greater than approximately 2,000 parts per million by volume (volume, by compound). For catalytic incinerators, 98 weight percent VOC reduction can be achieved at lower temperatures.

Destruction efficiencies of 98 percent VOC emission reduction are achievable in process heaters and boilers provided the waste stream is introduced into the flame zone where temperatures are highest. Unlike incinerators, in which firebox temperatures are fairly uniform, firebox temperatures in boilers and process heaters are highest in the flame zone with a distinct temperature gradient between the flame zone and the walls. Consequently, the proposed standards would require gas streams to be introduced directly into the flame zone where process heaters and boilers are used to comply with the standards.

Data summarized in the background information document show that 20 parts per million by volume (ppmv) is the lowest VOC concentration achievable by combustion of gas streams containing less than 2,000 ppmv VOC. Consequently, the proposed standards to be met by the use of combustion devices other than flares include a lower TOC concentration limit of 20 ppmv to allow for the drop in achievable destruction efficiency when combusting streams containing less than 2,000 ppmv VOC. The proposed emission limits, therefore, are a 98 percent TOC emission reduction, or TOC emission reduction to 20 ppmv (volume, by compound), whichever is less stringent. The proposed TOC concentration limit of 20 ppmv is referenced to an oxygen concentration of 3 percent by volume.

The proposed standards for continuous process emissions from general purpose or impact polystyrene production plants using a continuous process are based on the use of condensers to control VOC emissions. The formats selected for the proposed standards that are based on the use of recovery technologies, such as condensation, are a mass emission rate per unit of production and an operational limit on the outlet gas temperature.

Analysis indicates that the use of refrigerated condensers, cooling the gas stream discharged from the material recovery section to −26 degrees Centigrade (−15 °F), would reduce VOC emissions to 0.0036 kg VOC per megagram of product (see Docket A–82–19, Item II–B–91). Temperature monitors are required to have an accuracy of 1 percent of the temperature being measured expressed in degrees Celsius or ±0.5 °C, whichever is greater. Consequently, based on this analysis and taking into account allowable temperature monitor accuracy, an emission limit of 0.0036 kg TOC per megagram of polystyrene product or, as a subrogate, A limit of −25 °C (−13 °F) on the outlet gas temperature are included in the proposed standards limiting VOC emissions from the material recovery section of general purpose or impact polystyrene production plants using a continuous production process. As noted earlier, an affected facility owner or operator would be required to meet one limit or the other, not both.

The proposed standards for continuous process emissions from poly(ethylene terephthalate) production plants are based primarily on the use of spray condensers to reduce VOC emissions from the polymerization reactors in plants using either the terephthalic acid process or the dimethyl terephthalate process. For some high viscosity poly(ethylene terephthalate) plants, the proposed standards are based in part on the use of distillation columns. In addition, the proposed standards are also based on the use of condensers to control VOC emissions and recover methanol from the material recovery section in plants using the dimethyl terephthalate process and ethylene glycol from the raw materials preparation section (i.e., the esterifiers) in plants using the terephthalic acid process. As mentioned earlier, the formats selected for the proposed standards that are based on recovery technologies, such as condensation, are a mass emission per unit of production and an operational limit on the outlet gas temperature.

The spray condenser system mentioned above is actually composed of a spent ethylene glycol spray condenser and associated equipment, such as distillation columns, which further recover the condensed ethylene glycol for either recycle to the process or sale offsite. Emissions in this recovery system occur from the associated equipment and not from the spray condenser itself. The overheads from the spray condenser pass through a vacuum system composed of steam-jet ejectors and barometric intercondensers. Ethylene glycol in the overheads is condensed and entrained in the water from the vacuum system and carried to a cooling tower, from which VOC emissions occur.

Based on data summarized in the background information document, VOC emissions discharged from the recovery part of this system are 0.02 kilograms per megagram or less. Consequently, the proposed standards would limit TOC emissions from the recovery section of this system to 0.02 kilograms per megagram of poly(ethylene terephthalate) produced. The data available show that a well-operated spray condenser is capable of reducing the concentration of ethylene glycol in the cooling water exiting the vacuum system to 0.35 weight percent or less, based on a 14-day rolling average, in plants where a low viscosity product is produced or where a high viscosity product is produced using a single end finisher. The 14-day averaging period was selected because shorter averaging periods would not take into account adequately the cyclic nature of the concentration of ethylene glycol in the cooling tower water. A shorter time period (e.g., 1-hour, 24-hour) would require a higher concentration level, which would not require best demonstrated technology be applied at all times. Consequently, the proposed standards for these poly(ethylene terephthalate) plants would limit the concentration of ethylene glycol in the condensate exiting the vacuum system serving the polymerization reaction section to 0.35 weight-percent, based on a 14-day rolling average, on a daily basis. The daily average would be calculated by taking that day's concentration, adding it to the previous 13 operating days' concentrations, and dividing the sum by 14.

For high viscosity poly(ethylene terephthalate) plants using multiple end finishers, analysis shows that a well-operated spray condenser on the initial end finisher(s) and distillation column on the cooling tower are capable of reducing the concentration of ethylene glycol in the cooling tower to at least 1 weight percent or less; however, reduction beyond 6 percent by weight becomes unreasonable considering the additional costs and emission reduction (see Chap. 8, Table 8–42b, of the BID and Docket A–82–19, Item II–B–90, Table II–2). Consequently, the proposed standards for poly(ethylene terephthalate) plants producing a high viscosity product with multiple end finishers would limit the ethylene glycol concentration in the cooling tower to 6.0 weight percent, based also on a 14-day rolling average, on a daily basis.

As described in the background information document, the reaction of dimethyl terephthalate and ethylene glycol produces bis-hydroxyethyl terephthalate and methanol. The methanol by-product is recovered in a material recovery section through the use of condensers. Methanol emissons from the material recovery section are around 0.18 kg VOC per megagram of product. Analysis indicates that the use of refrigerated condensers, cooling the methanol stream to −25 °C (−13 °F), would reduce VOC emissions to 0.0027 kg VOC per megagram of product. Consequently, based on this analysis and the allowable temperature monitor accuracy (as noted earlier), an emission limit of 0.0027 kg TOC per megagram of product and an operational limit of −24 °C (−11 °F) for the outlet gas temperature are included in the proposed standards limiting VOC emissions from the material recovery section (i.e., methanol recovery) of poly(ethylene terephthalate) plants using a dimethyl terephthalate process. An affected facility owner or operator would be required to meet one limit or the other, not both.

Data summarized in the background information document show that the condensers controlling VOC emissions from the esterifiers in plants using the terephthalic acid process are capable of reducing emissions to 0.04 kilograms VOC per megagram of product or less. The proposed standards, therefore, limit VOC emissions from the raw materials preparation section (i.e., the esterifiers) to 0.04 kilogram TOC per megagram of poly(ethylene terephthalate) produced.

2. Intermittent Process Emissions

The proposed standards for intermittent process emissions from polypropylene plants and polyethylene plants are based on combustion by flares. The format selected for the proposed standards that are based on flares is equipment design and operation procedures. Intermittent gas streams differ from continuous gas streams in that the former are highly variable with much higher flow rates. These characteristics make it impossible to prescribe uniform equipment design and operating procedures that will ensure 98 percent VOC emission reduction. Flares controlling intermittent emissions, however, can be designed to operate smokelessly for most of the gas flow range they are expected to handle and with a stable flame. Although the degree of emission reduction achieved by combusting intermittent gas streams in a flare may be less than 98 percent in many cases, flaring of these gas streams does achieve a significant reduction in VOC emissions. Consequently, the proposed standards for intermittent process gas streams would require that these streams be combusted in a smokeless flare that is operated with a stable flame. To ensure smokeless operation, visible emissions would be limited to less than 5 minutes in any 2-hour period as determined by Method 22.

3. Threshold Emission Levels for Process Emissions

If uncontrolled emission levels are small, then the cost of controlling these small quantities of emissions may be unreasonable; that is, at some "threshold" emission level it may no longer be reasonable to require control. An analysis was undertaken, therefore, to identify for each process section for which standards are being proposed the uncontrolled emission level (i.e., threshold levels) below which the cost

BEST COPY AVAILABLE

of control is unreasonable in light of the small amount of VOC emission reduction (see Docket A–82–19, Items II–B–87 and II–B–95).

This analysis assumed that VOC emissions from each process section would be controlled by their own control device if the process section is constructed, modified, or reconstructed by itself or by a shared control device (i.e., a control device controlling emissions from the other process sections for which standards are being recommended) if the process section is part of a constructed, modified, or reconstructed process line or plant. Some process sections were assumed to have their own control device even when constructed as part of a new process line because of the flow characteristics of their VOC emissions. The distribution of new individual process sections, process lines, and plants was estimated for each model plant (as noted earlier under "Regulatory Alternatives") and represents the "most likely growth" distribution. The emissions from each process section were reduced by lowering the flow. (Where a shared control device was assumed, the flows and emissions from the other process sections were assumed to remain at their model plant levels.) At the same time, the cost of the control device was reduced to correspond to the process section's reduced flow and emissions. Emission levels were reduced for each process section until the incremental cost of control associated with the most likely growth distribution for that model plant became unreasonable with regard to the VOC emission reduction achieved.

On the basis of this analysis, the Administrator concludes that the cost of requiring control of any process section whose uncontrolled emission rate is at or below its respective threshold emission rate is unreasonably high compared to the emission reduction achieved. After allowance for these threshold levels, EPA believes the remaining costs are reasonable for the proposed standards.

The threshold levels calculated for each process section are included, as emission of TOC per unit of product, in the proposed standards. If a new, modified, or reconstructed affected facility (i.e., process sections for which standards are being proposed) has an uncontrolled TOC emission rate at or below the threshold level set for that process section, then the proposed standard (e.g., 98 percent reduction) for that process section does not apply.

For new affected facilities for which control is based on recovery techniques, such as condensation, no threshold levels were calculated because the standards provide an emission level that serves the same role as a threshold level. For modified or reconstructed affected facilities for which control is based on recovery, threshold levels were calculated because existing plants, which have "given" emission levels, may not be able to meet the emission level in the proposed standards at a reasonable cost. Thus, the proposed standards provide threshold levels for these existing affected facilities.

4. Compounds Used in Determining Compliance

The proposed standards are intended to reduce emissions of VOC through the application of the best system of continuous emission reduction (considering costs and other impacts), and the emission limits in the proposed standards are designed to reflect the performance of the best system of continuous emission reduction. The best systems of continuous emission reduction applicable to polymer production operations do not selectively control VOC (i.e., the proportion of the organics that is regarded as photochemically reactive), but rather these technologies control all organic compounds. Moreover, the numerical values of the emission limits were based on total organic data (excluding methane and ethane). To reflect accurately the performance of technologies selected as the best systems of continuous emission reduction and to make the emission limits consistent with the data and test methods from which the limits were derived, EPA has expressed the proposed standards in terms of total organic compounds minus methane and ethane. For the same reason, the test procedure in the proposed standards prescribes measurement of total organic compounds minus methane and ethane. In short, EPA is relying on control of total organic compounds minus methane and ethane as the best demonstrated surrogate for controlling volatile organic compounds, which react to form ozone in the atmosphere.

5. Fugitive Emissions

The emission limits, equipment design, operational procedures, or work practice requirements in the proposed standards for fugitive emissions vary for each fugitive emission source and are discussed for each source in this section. A discussion of the evaluation of the appropriate standards for fugitive emission sources is contained in "VOC Fugitive Emission Sources in the Synthetic Organic Chemicals Manufacturing Industry—Background Information for Proposed Standards," EPA–450/3–80–033a, November 1980 (Docket Item No. II–A–16); January 5, 1981, **Federal Register**, pp. 1136 through 1165; "Fugitive Emission Sources of Organic Compounds Additional Information on Emissions, Emission Reductions, and Costs," EPA–450/3–82–010, April 1982 (Docket Item No. II–A–32); "VOC Fugitive Emissions in Synthetic Organic Chemical Manufacturing Industry—Background Information for Promulgated Standards," EPA–450/3–80–033b; and October 18, 1983, **Federal Register**, pp. 48328 through 48361. That evaluation is the basis for the proposed standards for fugitive emission sources employed in the production of polypropylene, polyethylene, and polystyrene, and their copolymers.

Pressure relief devices. Rupture disks were selected as the basis for the proposed standards for gas service pressure relief devices. This control technique essentially eliminates VOC emissions from pressure relief devices. Consequently, an emission limit of "no detectable emissions" was selected for pressure relief devices. An instrument reading of less than 500 parts per million by volume (ppmv) above a background concentration using Method 21 represents "no detectable emissions."

As the function of pressure relief devices is to discharge process fluids, if necessary, to reduce dangerously high pressures within equipment, the "no detectable emission" limit would not apply to discharges through the pressure relief device during overpressure relief. Following a discharge, however, the proposed standards specify that the pressure relief device be returned to a state of "no detectable emissions" within 5 days. The proposed standards would further require an annual test to verify the "no detectable emissions" status of pressure relief devices.

As an alternative to the use of rupture disks and other techniques that achieve the "no detectable emission" limit, the proposed standards accommodate the venting of pressure relief devices to control devices that meet various requirements outlined below.

Leakless equipment. The proposed standards would not require the use of "leakless" equipment, such as sealed-bellows and diaphragm valves, canned and diaphragm pumps, and sealless compressors. This equipment is either not widely applicable, or the cost effectiveness of the emission reduction achieved through the use of this equipment is considered unreasonable. However, use of "leakless" equipment is

equivalent to the proposed standards, and the proposed standards accommodate the use of such equipment.

"Leakless" equipment would be required to operate with "no detectable emissions" at all times it is in service. The proposed standards would require that the "no detectable emissions" status of this equipment be verified annually.

Compressors. The proposed standards for compressors require either enclosure of the compressor seal area and venting of the captured emissions to a control device or the use of mechanical seals with barrier fluid systems and control of the degassing vents. Venting of the enclosure around the compressor seal area and control of the degassing vents would require use of control devices that meet various requirements outlined below.

Open-ended valves. The basis of the proposed standards is enclosure of the open-end of the valve. The proposed standards would require, therefore, that open-ended valves be equipped with a cap, plug, or a second valve. If a second valve is used to close the open end, the proposed standards would require the upstream valve to be closed first. After the upstream valve is completely closed, the downstream valve would be closed. This operational requirement is necessary in order to prevent trapping process fluid between the two valves, which could result in a situation equivalent to the uncontrolled open-ended valve.

Sampling connection systems. Closed-purge sampling was selected as the basis for the proposed standards for sampling connection systems. Although closed-purge sampling effectively eliminates VOC emissions due to purging, a "no detectable emissions" limit could not be selected because closed-purge systems may have detectable emissions. Thus, the use of closed-purge sampling itself was selected as the requirement for sampling connection systems. The proposed standards, however, would also allow the use of closed-vent vacuum systems connected to control devices and in-situ sampling systems as alternatives to closed-purge sampling.

Pumps and valves. Work practices consisting of periodic leak detection and repair programs were selected as the basis for the proposed standards for pumps and valves. Several factors influence the level of emission reduction that can be achieved by a leak detection and repair program. The three main factors are the monitoring interval, leak definition, and repair interval.

The monitoring interval is the frequency at which individual pumps and valves are checked for leaks. The proposed standards would require monthly monitoring for pumps and valves, although quarterly monitoring would be allowed for valves that have been found not to leak for 2 successive months.

Modified or reconstructed facilities would be permitted to monitor annually valves that are difficult to monitor. Valves that are difficult to monitor are defined as valves that would require elevating personnel more than 2 meters above any readily available support surface.

The proposed standards would also allow use of leak detection and repair programs tailored to the unique circumstances for valves that are considered unsafe to monitor. Valves considered unsafe to monitor would be those that the plant owner or operator demonstrates would place personnel in potentially hazardous situations.

The "leak definition" is the instrument reading observed during monitoring that defines which emission sources (e.g., pump, valve) require repair. The best leak definition would be the one that achieved the most emission reduction at reasonable costs. The EPA has determined that valves found leaking at levels of 10,000 ppm or greater can be brought to levels below 10,000 ppm with proper maintenance. A leak definition lower than 10,000 ppm may be practicable in the sense that leaks can be repaired to levels less than 10,000 ppm. However, EPA is unable to conclude that a leak definition lower than 10,000 ppm would provide additional emission reductions and would, therefore, be reasonable. In fact, using a lower leak definition, such as 1,000 ppm, may actually result in an increase in emissions as a result of attempted repair. It is unknown precisely at what "action level" maintenance efforts begin to result in increased emissions. Therefore, a leak definition lower than 10,000 ppm was not selected because EPA has determined that using a lower leak definition would not increase emission reduction significantly and the potential net benefit of a lower leak definition is questionable. Consequently, an emission level of 10,000 ppm was selected as the definition of a leak.

The repair interval is the length of time allowed between the detection of a leaking source and repair of the source. The proposed standards would require an initial attempt to repair a leaking pump or valve within 5 days and complete repair, except as discussed below, within 15 days.

Delay of repair beyond 15 days would be allowed for leaks that could not be repaired without shutting down a facility. In general, these leaks would have to be repaired at the next scheduled facility shutdown. Spare parts for pumps and valves can usually be stocked such that all leaks that could not be repaired without shutting down the affected facility could be repaired during the shutdown.

Several types of pumps with ancillary equipment can achieve emission reductions of VOC equivalent to that achieved by a monthly leak detection and repair program for pumps. This equipment includes dual mechanical seal systems that utilize a barrier fluid between the seals, sealless pumps, and enclosures of the pump seal areas.

Pumps with dual mechanical seal systems and sealless pumps, such as diaphragm or canned pumps, are not covered by the requirements for routine leak detection and repair programs contained in the proposed standards. In addition, the proposed standards would allow the use of enclosed seal areas that are connected to a control device by a closed vent system.

Alternative standards for valves. The cost effectiveness of leak detection and repair programs is considered unreasonable for process units having, on the average, fewer than 1.0 percent of their valves leaking over time. (See Chapter 14 in "VOC Fugitive Emissions in Synthetic Organic Chemicals Manufacturing Industry—Background Information for Promulgated Standards," EPA 450/3–80–033b, June 1982.) An average of 1.0 percent of valves leaking over time can be reflected by a maximum level of 2.0 percent of valves leaking at any point in time. The proposed standards pertaining to the required routine leak detection and repair program for valves include two alternatives that allow an owner or operator to comply with the 2.0 percent limit for valves leaking at any point in time.

The first alternative would limit the number of valves leaking within an affected facility to 2.0 percent at any point in time. Use of this alternative would require a minimum of one performance test per year. If more than 2.0 percent of the valves were found to be leaking, this would be an indication of noncompliance with the proposed standards.

In some cases, performance tests could be waived under the General Provisions of 40 CFR Part 60 where it could be shown that a routine leak detection and repair program for valves is not necessary to control fugitive VOC

VOL

UMI

emissions. Such cases might include facilities that use valves of a superior design due to the value or hazardous nature of the product, or facilities in which the valves simply do not "leak" for unexplained reasons. Demonstration that a leak detection and repair program is not necessary to control fugitive VOC emissions from valves would require, in most cases, a number of performance tests over a period of time that not only demonstrate the achievability of the 2.0 percent criteria for leaking valves, but that also indicate that this criteria will be achieved on a continuing basis.

The second alternative would allow the use of "skip-period" leak detection for valves. Under skip-period leak detection, the frequency of monitoring valves could decrease for valves that have shown a history of not leaking. A skip-period leak detection program could be used when fewer than 2.0 percent of the valves were found to be leaking over two consecutive quarters. The monitoring interval for valves could then become semi-annual. If fewer than 2.0 percent of the valves were found to be leaking over five consecutive quarterly leak detection periods, the monitoring interval could then become annual. When more than 2.0 percent of valves were found to leak on any test, the monitoring interval for valves would revert to monthly until sufficient data had been gathered to resume the skip-period program.

Fugitive emission control devices. Control devices used to control fugitive VOC emissions would be required by the proposed standards to achieve an emission reduction efficiency of 95 percent. In many cases, these control devices would not be new, but would be existing and would be designed to dispose of organic vapor streams from other sources in the plant. Establishing a higher percentage reduction standard based on the performance of combustion devices capable of achieving 98 percent control would require some source owners to install control devices achieving that higher level even though they have existing devices that achieve 95 percent control. This would impose unreasonable costs in light of the small additional emission reduction that it would achieve. Therefore, 95 percent reduction is considered the appropriate requirement, based on the performance of most existing vapor recovery systems, enclosed combustion devices, and flares.

Miscellaneous. Flanges, pressure relief devices in liquid service, equipment operated at subatmospheric pressures, and all components in "heavy liquid" VOC service (i.e., VOC fluids in which the total concentration of the pure components having a vapor pressure less than or equal to 0.3 kPa at 20 degrees Centigrade is less than 80 percent by weight) are excluded from the routine monitoring requirements of the proposed standards. Even though the proposed standards do not require monitoring these equipment for leaks, the proposed standards require that if indications of VOC leaks are visually or otherwise detected from these equipment, they must be monitored using Method 21 to detect leaks. If a leak is detected, it must be repaired within 15 days.

F. Modification/Reconstruction Considerations

An existing facility is a facility that was constructed or modified before the proposal date of standards of performance. However, an existing facility on which modification or reconstruction commenced after the date of proposal of the standards becomes an affected facility. Standards apply to all affected facilities that commence construction, modification, or reconstruction after the date of proposal of standards of performance.

Modification is defined in the General Provisions of 40 CFR Part 60 as any physical or operational change to an existing facility that increases the emission rate of any pollutant to which a standard applies. Exemptions to this definition include an increase in production rate, if such an increase can be made without capital expenditure; an increase in the hours of operation; the use of an alternative fuel or raw material, if the facility was designed to accommodate the alternate fuel or raw material prior to proposal of the standards; routine maintenance, repair, and replacement; and relocation or change in ownership.

Reconstruction is defined in the General Provisions of 40 CFR Part 60 as any replacement of components in an existing facility where the fixed capital cost of the new components exceeds 50 percent of the fixed capital cost that would be required to construct a comparable entirely new facility and the Administrator determines, on a case-by-case basis, that it is technologically and economically feasible to meet the applicable standards. Fixed capital cost means the capital needed to provide all depreciable components of the facility.

Based on available information, it is likely that some alterations that could be considered modifications and reconstructions will occur in existing polyethylene and polypropylene plants. However, it is unlikely that any such alterations will occur in existing polystyrene and polyester plants. (Conversion of existing batch process lines to continuous process lines in the polystyrene industry requires the complete replacement of the existing line (and therefore of process sections and process units) and would be considered a new facility rather than a modified or reconstructed facility (as to process sections and process units) under the proposed standards.) Potential alterations that could be considered modifications or reconstructions in polypropylene and polyethylene plants include use of new catalysts and conversion to copolymer production or new copolymer production.

Catalysts play a vital role in polypropylene and polyethylene manufacturing. For example, in polypropylene plants, a new catalyst may be employed to improve product mix, reduce operating costs, or increase conversion rates. Use of a new catalyst may increase VOC emissions. However, if the existing facility was designed to accommodate use of the new catalyst, then such an alteration to a process section or process unit would not be considered a modification. [See 40 CFR 60.14(e)(4)].

Some polyethylene and polypropylene manufacturers are diversifying their product lines by shifting to production of polypropylene and polyethylene copolymers. Production of copolymers could result in increased VOC emissions due to the presence of the new monomers employed to produce the copolymers. However, if the existing facility was designed to accommodate use of the new monomer, then production of the new copolymers would not be considered a modification. Simply shifting from polymer to copolymer production in an existing facility by itself would not constitute a modification.

If the use of new catalysts or shifting to the production of copolymers were to increase VOC emissions at a facility not designed to accommodate use of the new material, then such alterations would be considered a modification. The costs associated with controlling VOC emissions to comply with the proposed standards, however, would be of the same order of magnitude as those associated with control of emissions from new facilities. In many cases, the costs of controlling emissions from modified facilities would probably be less than controlling emissions from new facilities. To avoid being considered a modification, emissions from the affected facility would need to be controlled so that emissions after the alteration is made are no greater than

emissions before the alteration. In most cases, this requires less control and, as a result, lower costs than complete control of emissions that would be required to comply with the proposed standards if the existing facility became an affected facility through modification. Consequently, the costs associated with various alterations that could be considered modifications are considered reasonable, and no provisions have been included in the proposed standards exempting various alterations from consideration as modifications.

In order for alterations to an existing process section or process unit to be considered a reconstruction, the section unit must undergo sufficient replacement of components to exceed 50 percent of the fixed cost of a comparable new section or unit. For the most part, only a few facilities are expected to undergo such extensive replacement of components. The conversion of existing conventional low density polyethylene process lines to linear low density polyethylene process lines by replacement of existing equipment, however, is an example where the extent of equipment replacement may be sufficient to constitute a reconstruction of a process section or process unit.

G. Selection of Monitoring Requirements

Intermittent and continuous process emissions may be controlled through use of a flare. Continuous process emissions may also be controlled through the use of thermal or catalytic incinerators, boilers, process heaters, condensers, absorbers, and adsorbers. Each of these types of devices has different design and operating characteristics that influence the selection of monitoring requirements. Therefore, selection of the monitoring requirements is discussed individually for each type of device.

The typical method of monitoring the operation of a flare is observation for visible emissions. However, if a flare is operating smokelessly, it can be difficult to determine if a flame is present. The presence of a flame can be determined through the use of a heat sensing device on a flare's pilot flame, such as a thermocouple or ultraviolet (UV) beam sensor. One disadvantage of thermocouples is that they burn out if not installed properly. However, UV systems are not as accurate as thermocouples in indicating the presence of a flame. Since thermocouples are considered superior to UV systems for indicating the presence of a flame, the proposed standards would require installation of a thermocouple heat sensor to indicate the presence of a flame at each pilot to ensure proper operation and maintenance of the flare.

Among the criteria governing the use of flares under the proposed standards is a maximum exit gas velocity requirement. Compliance with this requirement is determined by performance testing. While continuous monitoring of the exit gas velocity is not required, it is important to ensure that the vent stream is continuously vented to the flare. Therefore, the proposed standards would require the owner or operator of an affected facility using a flare to comply with the proposed standards to install and operate a flow indicator that provides a record of vent stream flow to the flare for each vent stream.

Incinerators used to comply with the proposed standards need to be maintained and operated properly if a 98 percent reduction, or reduction to 20 ppm, is to be achieved on a continuing basis. Monitoring can generally be used to ensure that such proper operation and maintenance occurs. Two methods of monitoring to ensure proper operation and maintenance of incinerators used to comply with the proposed standards were considered. These methods were continuous monitoring of VOC emission reduction and continuous monitoring of various combustion parameters such as combustion temperature and vent stream flow rate.

Continuous monitoring of VOC emission reduction by monitoring inlet and outlet VOC emissions would be the preferred method of monitoring, because it would provide a continuous, direct measurement of actual emissions. However, operation of a continuous monitor measuring total organic compounds (minus methane and ethane) currently available is complex and labor-intensive, as well as relatively expensive since two monitors (inlet and outlet) could be required. Consequently, this approach to monitoring was not selected.

In terms of monitoring various combustion parameters, it is well accepted that low combustion temperatures can cause significant decreases in VOC destruction efficiency. Test results also indicate that temperature increases can adversely affect control device efficiency. In terms of cost, temperature monitors are relatively inexpensive, and are simple to operate. Consequently, requirements to monitor continuously the combustion temperature in incinerators are included in the proposed standards.

Where a device is used to combust waste VOC streams alone, flow rate can also be an important measure of VOC destruction efficiency since it relates directly to residence time in the combustion device. Gas stream flow rates from polymer production facilities may be small in comparison to the other streams that may be ducted to the same combustion device. As a result, flow rate of the gas stream may not always give a reliable indication of residence time of the VOC. It would, however, provide assurance that the gas streams are being routed to the combustion device for control of VOC emissions. Flow indicators are inexpensive and easy to operate. Therefore, the proposed standards would also require the use of flow indicators with incinerators.

These two combustion parameters (temperature and flow rate) would be measured during the original (or most recent) performance test. These parameters would then be monitored to determine if the combustion temperature deviated from the value measured during the performance test and to ensure that the gas stream is being routed to the control device.

For boilers and process heaters of less than 150 million Btu/hr heat input design, performance testing is required to ensure efficient VOC destruction. For these units, just as for incinerators, temperature would be required to be measured during the original (or most recent) performance test and to be monitored to determine if it deviated from the values measured during the original (or most recent) performance test. Monitoring of temperature would not be required for boilers or process heaters with a design heat input capacity of 150 million Btu/hr or greater.

For boilers or process heaters of any size, it is necessary, for the purpose of ensuring proper operation and maintenance, to know that the boiler or heater is operating and to know that the waste gas is being introduced into the boiler or heater. For boilers and process heaters of less than 150 million Btu/hr heat input design, the continuous temperature monitor provides a record of operation. However, for boilers and process heaters with a heat input design capacity of 150 million Btu/hr or greater, temperature monitoring is not required. Therefore, to ensure that these larger boilers and process heaters are operating, the proposed standards require the maintenance of records (e.g., steam production records) that would indicate the periods of operation of the boiler or process heater. The nature of the records to be kept to comply with this requirement is left to the discretion of the owner or operator of the facility, but they must be readily available for

VOL 52 ISS 189 SEP 30 1987 UMI

inspection. Finally, to ensure that the vent stream is being introduced into the boiler or heater, the proposed standards require owners or operators to install and operate a flow indicator that provides a record of vent stream flow to the boiler or heater (of any size) for each vent stream.

For condensation, the exit temperature of the gas stream from the condenser is the primary determinant of condenser performance and VOC emission control. Condenser temperature monitors are available at a reasonable cost and are simple to operate. Consequently, the proposed standards would require continuous monitoring of the condenser exit temperature of the gas stream.

For an absorber, two operating parameters were identified as the primary determinants of absorption performance and associated organic compound emission control: absorbing liquid temperature and specific gravity. Absorbing liquid temperature monitors and specific gravity measurement devices are available at a reasonable cost. Consequently, the proposed standards would require continuous monitoring of absorbing liquid temperature and specific gravity. The proposed standards would accommodate continuous monitoring of parameters other than absorbing liquid temperature and specific gravity to determine absorbing liquid saturation, provided these alternative parameters are approved, on a case-by-case basis, by the Administrator.

For carbon adsorption, the carbon bed temperature (after regeneration and completion of any cooling cycles), the amount of steam used to regenerate the adsorption bed, and the frequency of regeneration of the carbon bed are the primary determinants of adsorber performance and VOC emission control. Carbon bed temperature monitors and steam flow meters, which indicate the quantity of steam used over a period of time, are available at reasonable cost. However, these two variables do not ensure that the carbon bed is being regenerated with sufficiently frequent cycles to maintain control efficiency. Thus, monitoring of these two variables would have to be supplemented with data on the actual frequency of the cycles and the frequency necessary to maintain control efficiency.

A better, more direct monitoring technique is the use of organics concentration monitors on the gas stream discharged from adsorbers. Because performance specifications have not been developed for these monitors, the monitors would not be used to make continuous compliance determinations or to determine exact outlet concentrations. However, these monitors can be used to indicate the status of operation and maintenance practices for the carbon adsorber. Therefore, the proposed standards require the use of organics concentration monitors. A recording device would also be installed so that a record of the measurements is produced.

As mentioned previously, a number of streams other than those covered by the proposed standards could enter the control device being used to comply with the standards. The value of the various parameters that are required to be monitored could vary significantly depending on whether these other gas streams are routed through the device. As the control efficiency of the control device could also vary, the proposed standards would require the normal routing of all gas streams through any control device during the performance test. The value of the parameters that are required to be monitored would then be indicative of proper operation and maintenance during normal operation of the control device.

The proposed standards require the reporting of any process operation change that may result in the increase in the uncontrolled emission rate from process sections that have uncontrolled emission rates at or below the threshold level set for that process section. Although the owners or operators of such process sections do not have to meet the proposed standard (e.g., 98 percent reduction) for that process section, they will need to perform monitoring of process operation variables, whose change may result in emission increases, as is necessary (in the owner's or operator's judgement) to determine if such an increase in emissions may result. The Agency believes this provides sufficient monitoring of such process sections to ensure the appropriate applicability of the proposed standards, and thus no specific monitoring requirements have been included in the proposed standards for such process sections.

H. Selection of Test Methods

1. Process Emissions

When boilers or process heaters with a design heat input capacity of 150 million Btu per hour or greater are used to comply with the proposed standards, performance testing would not be required. Boilers and process heaters with a design heat input capacity of 150 million Btu per hour or greater have been shown to achieve consistently a VOC reduction efficiency of 98 percent or VOC reduction to 20 ppmv as long as the gas stream containing VOC emissions is introduced directly into the flame zone. Such boilers and heaters are generally operated at temperatures and residence times greater than 1,100 degrees Centigrade (2,012 °F) and 1 second, respectively. In some cases, the residence time is less than 1 second. However, in these cases, the firebox temperature is much greater than 1,100 degrees Centigrade (2,012 °F), and 98 percent reduction is still achieved. For these reasons, use of a boiler or heater with a design heat input capacity of 150 million Btu per hour or greater to combust gas streams containing VOC emissions is an acceptable means of demonstrating compliance with the proposed standards provided the vent stream is introduced into the flame zone. The requirement for a performance test on such devices, therefore, has been waived. In lieu of the performance test, however, an initial report describing the location at which the vent stream is introduced into the boiler or process heater is required.

Owners or operators that seek to use the threshold emission rate provision in the proposed standards would be required to perform an initial performance test to demonstrate that the uncontrolled emission rate for each such process section is at or below the threshold level.

Method 18 of Appendix A was selected as the emission test method for determining compliance with the proposed standards for continuous process VOC emissions. This method employs gas chromatography to measure VOC emissions. The primary advantage of this method over others is that individual components can be measured separately. In addition, emissions of methane and ethane, which are considered to have negligible photochemical reactivity, can be measured separately from other VOC emissions. This method was promulgated with the standards limiting equipment leaks of VOC emissions from the SOCMI. The method yields results in terms of concentrations of individual organic compounds.

Method 1 or 1A of Appendix A would be required, as appropriate, to be used for selection of the sampling site. To determine TOC mass emission rates per unit of polymer production, Method 2, 2A, 2C, or 2D of Appendix A would be required to determine the volumetric flow rate of the gas stream discharged to the atmosphere. Multiplying the volumetric flow rate by the TOC emission concentrations and the appropriate molecular weights yields the TOC mass emission rates. Dividing the

TOC mass emission rate by the polymer production rate yields TOC emissions in terms of mass per unit of production. Method 3 of Appendix A would be required to be used for an air dilution correction to 3 percent oxygen in the emissions.

To determine percent TOC emission reduction, mass emissions of TOC entering the control device may be determined as outlined above using Method 18 and Method 2. The difference between mass emissions of TOC entering the control device and mass emissions of TOC discharged to the atmosphere, divided by mass emissions of TOC entering the control device, and multiplied by 100, yields the percent TOC emission reduction.

As mentioned earlier, test methods for measuring VOC emissions from flares are quite complex and costly. Consequently, the proposed standards do not require measurement of VOC emissions from flares, and no test methods were selected for determining compliance with the proposed standards limiting VOC emissions from continuous and intermittent process gas streams controlled by flares. A visible emissions test would be required, however, to ensure compliance with the requirement for smokeless operation.

To determine compliance with the outlet gas temperature requirement for condensers, no specific test method has been selected. The proposed standards require each owner and operator of an affected facility to install a temperature monitor that is demonstrated to work at the temperatures required by the proposed standards, is equipped with a continuous recorder, and has an accuracy of 1 percent of the temperature being measured in degrees Celsius or ±0.5 °C, whichever is greater, on the exit side of the condenser.

To determine the ethylene glycol concentration in the water in the cooling tower or in the cooling water exiting the vacuum system servicing the polymerization reaction section in poly(ethylene terephthalate) plants, the procedures described in ASTM D2908–74, "Standard Practice for Measuring Volatile Organic Matter in Water by Aqueous-Injection Gas Chromatography," were selected to form the basis of a test method. The procedures in ASTM D2908–74 were selected over other potential procedures primarily due to reproducibility of results. In addition, grab sampling procedures of ASTM D3370–76, "Standard Practices for Sampling Water," were selected for collecting the cooling water samples to be tested.

2. Fugitive Emissions

The method selected for the detection of fugitive VOC emission equipment leaks is Method 21 of Appendix A. This method incorporates the use of a portable VOC analyzer to detect the presence of VOC emissions from various points, such as equipment seals, where direct leakage of VOC to the atmosphere could occur. Soaping can be used as a preliminary screening technique. If no bubbles are observed when the soap solution is applied to the potential leak surfaces, the source is presumed not to be leaking.

An additional procedure provided in Method 21 is for the determination of "no detectable emissions." The portable VOC analyzer is used to determine the local ambient VOC concentration in the vicinity of the emission source to be evaluated, and then a measurement is made at the surface of the potential leak interface. If a VOC concentration change of less than 500 ppm or 5 percent of the leak definition (i.e., 10,000 ppm) is observed, then a "no detectable emissions" condition exists. The 5 percent of leak definition was selected based on the readability of a meter scale graduated in 2 percent increments from 0 to 100 percent of scale, and not, necessarily on the performance of emission sources.

Performance test requirements under the General Provisions of 40 CFR Part 60 include a notification to the Agency 30 days before each performance test. For fugitive emission sources, tests to determine "no detectable emissions" may occur throughout a year and must occur after each overpressure relief. Requiring an owner or operator to notify the Agency is not considered reasonable for these proposed standards. Thus, the proposed standards exempt fugitive emission testing from this requirement included in the General Provisions.

Method 21 does not include identification of the organic compounds to use for instrument calibration. Based on the results of field tests and laboratory studies, however, methane or hexane are recommended as the reference instrument calibration gases.

I. Selection of Reporting and Recordkeeping Requirements

1. Process Emissions

The General Provisions of 40 CFR Part 60 require submittal of several one-time notifications for occurrences such as construction, modification, reconstruction, scheduled dates for performance tests, and performance test results. Owners and operators of boilers and process heaters with design heat input capacities of 150 million Btu per hour or greater and flares would not report performance test results, since the proposed standards would waive the requirement of such a test. Instead, for such boilers or process heaters, operators would be required to file a report describing the location at which the vent stream is introduced into the boiler (or heater) to be used. For flares where the gas stream being flared is a continuous process gas stream, operators would be required to include in the initial report the type of flare (e.g., steam-assisted), the results of performance testing to determine compliance with the visible emission requirements, and the heat content and the maximum exit gas velocity criteria.

In addition, records must be kept and semiannual reports would be required for exceedances of certain operating parameters for process sections with uncontrolled emissions over the threshold level, and for any change in process operations that increases the uncontrolled emission rate of the process line in which a process section complying with the threshold level provision is located, as applicable. These data are needed by the plant operator to ensure proper operation and maintenance and continuing compliance, and the reports are necessary in order for proper enforcement of the proposed standards. A semiannual basis is the minimum reporting frequency that will allow adequate enforcement. Semiannual reports are waived for affected sources in States where the program has been delegated if, in the course of delegation, different reporting requirements or an alternative means of source surveillance adopted by the State are approved. Such sources would be required to comply with the requirements adopted by the State.

The proposed standards would require maintenance of records of startup, shutdown, and malfunction. Also, maintenance of records indicating whether control equipment has been properly operated and maintained would be required. Records indicating proper operation and maintenance would be based on the monitoring of control device or product recovery device parameters discussed in the previous section.

2. Fugitive Emissions

The proposed standards would require recording general information pertaining to the leak detection and repair program required by the proposed standards. Each valve or pump found to leak would be marked with a readily visible, weatherproof identification. The

VOL
52
ISS
189
SE
30
1987
UMI

identification could be a tag attached to the valve or pump, or a number designation permanently marked on the valve or pump. The identification could be removed after a valve is repaired and found not to leak for the next 2 successive months and after a pump is repaired.

Under these requirements, a log would be maintained to record the efforts by an owner or operator pertaining to the leak detection and repair program. The log would contain the instrument and operator identification numbers, the leaking source identification number, the date of detection of the leaking source, the date of the first attempt to repair the leaking source, repair methods applied to repair the source, and the date of final repair. The log would be kept for 2 years following the survey. If the leaking component could not be repaired within 15 days, the reasons for unsuccessful repair and the date of anticipated successful repair would be recorded on the leak report form. Once the leaking source was successfully repaired, the date of repair would be recorded on the leak report form. These records would provide the information necessary to allow the owner or operator to evaluate the effectiveness of repair efforts and to allow enforcement personnel to assess compliance with the standards.

V. Public Hearing

A public hearing will be held, if requested, to discuss the proposed standards in accordance with section 307(d)(5) of the Clean Air Act. Persons wishing to make oral presentations should contact the individuals identified at the address given in the **ADDRESSES** section of this preamble. Oral presentations will be limited to 15 minutes each. Any member of the public may file a written statement with EPA before, during, or within 30 days after the hearing. Written statements should be addressed to the Central Docket Section address given in the **ADDRESSES** section of this preamble.

A verbatim transcript of the hearing and written statements will be available for public inspection and copying during normal working hours at EPA's Central Docket Section in Washington, DC (see the **ADDRESSES** section of this preamble).

VI. Docket

The docket is an organized and complete file of all the information submitted to or otherwise considered by EPA in the development of this proposed rulemaking. The principal purposes of the docket are: (1) To allow interested parties to identify and locate documents so that they can effectively participate in the rulemaking process and (2) to serve as the record in case of judicial review (except for interagency review materials [section 307(d)(7)(A)]).

VII. Miscellaneous

As prescribed by section 111, establishment of standards of performance for the polypropylene, polyethylene, polystyrene, and polyester [poly(ethylene terephthalate)] manufacturing industry was preceded by the Administrator's determination (40 CFR 60.16, 44 FR 49222, dated August 21, 1979) that polypropylene, polyethylene, polystyrene, and polyester contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. In accordance with section 117 of the Act, publication of this proposal was preceded by consultation with appropriate advisory committees, independent experts, and Federal departments and agencies. In addition, numerous meetings were held with industry representatives and trade associations during the development of the proposed standards. The Administrator will welcome comments on all aspects of the proposed regulation, including economic and technological issues, and on the proposed test methods.

The information provisions (reporting and recordkeeping requirements) associated with this proposed rule (40 CFR 60.565) have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq*). Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of OMB—marked "Attention: Desk Officer for EPA." The final rule package will respond to any OMB or public comments on the information collection provisions. For the purposes of OMB's review, EPA has estimated the labor-hour burden of the reporting and recordkeeping requirements. During the first 3 years of this regulation, the average annual burden of the reporting and recordkeeping requirements for the 16 polymer manufacturing respondents would be about 0.8 person-years. The supporting statement that documents the calculation of this burden is filed as item II–B–76 in docket A–82–19.

Comments are specifically invited on the reporting requirements of the proposed regulation. Any comments submitted should contain specific information and data pertinent to an evaluation of the magnitude and severity of any adverse impact and should suggest alternative courses of action to avoid this impact. Recommended alternative reporting requirements should contain complete instructions and should state all the reasons the recommended requirements would be considered an improvement.

This regulation will be reviewed 4 years from the date of promulgation as required by the Clean Air Act. This review will include an assessment of such factors as the need for integration with other programs, the existence of alternative methods, enforceability, improvements in emission control technology, and reporting requirements. The reporting requirements in this regulation will be reviewed as required under EPA's sunset policy for reporting requirements in regulations.

Section 317 of the Clean Air Act requires the Administrator to prepare an economic impact assessment for any new source standard of performance promulgated under section 111(b) of the Act. An economic impact assessment was prepared for the proposed regulations and for other regulatory alternatives. All aspects of the assessment were considered in the formulation of the proposed standards to ensure that the proposed standards represent the best system of emission reduction considering costs. The economic impact assessment is included in the background information document.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This proposed regulation is not major because the estimated annualized cost of 1.4 million dollars is well below the 100 million dollar per year criteria for major rules.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291. Any comments from OMB and any response to those comments are available for public inspection at EPA's Central Docket in Washington, DC (see the **ADDRESSES** section of this preamble).

The Regulatory Flexibility Act (Pub. L. 96–354, September 19, 1980) directs Federal agencies to pay close attention to minimizing any potentially adverse impacts of a standard on small businesses, small governments, and small organizations. It may affect some small businesses, but the impacts will be few and minor. Essentially, all firms that will be required to comply with the standard are either not small businesses, or are subsidiaries of large firms.

The businesses that are expected to own or operate polymers producing

plants during the first five years following proposal are those currently in the field. The Small Business Administration (SBA) classifies small businesses in SIC 2821 (polypropylene, polyethylene, polystyrene) as those with 750 or fewer employees and in SIC 2824 [poly(ethylene terephthalate)] as those with 1,000 or fewer. These levels were set as criteria for most SBA programs (13 CFR Part 121). Only two of the firms are believed to be small businesses, and both of these produce poly(ethylene terephthalate). Because of the competitive nature of the industries and the relatively high levels of capital required to construct polymer manufacturing plants, it is unlikely that any businesses constructing new plants would be small.

Furthermore, any potential adverse economic impacts on new plants, regardless of whether they are owned or operated by large or small businesses, would be minor. For example, the proposed standard would have a minimal impact on product prices even if all costs were passed through to the customer. The maximum product price increase would be about 0.44 percent for plants producing polypropylene using a liquid phase process.

Therefore, pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule, if promulgated, will not have a significant economic impact on a substantial number of small business entities because the number of small entities that would be affected is not substantial and the impact of the proposed rule is not significant.

List of Subjects in 40 CFR Part 60

Air pollution control, Incorporation by reference, Intergovernmental relations, Plastics materials, synthetic resins, and nonvulcanizable elastomers (SIC 2821), Reporting and recordkeeping requirements.

Date: September 18, 1987.

Lee M. Thomas,

Administrator.

It is proposed that 40 CFR Part 60 be amended as follows:

PART 60—[AMENDED]

1. The authority citation for Part 60 continues to read as follows:

Authority: Secs. 101, 111, 114, 116, 301, Clean Air Act as amended (42 U.S.C. 7401, 7411, 7414, 7416, 7601).

2. By adding a new subpart DDD to read as follows:

Subpart DDD—Standards of Performance for Volatile Organic Compound (VOC) Emissions From the Polymer Manufacturing Industry

Sec.

60.560 Applicability and designation of affected facilities.
60.561 Definitions.
60.562–1 Standards: Process emissions.
60.562–2 Standards: Equipment leaks of VOC.
60.563 Monitoring requirements.
60.564 Test methods and procedures.
60.565 Reporting and recordkeeping requirements.
60.566 Delegation of authority.

Subpart DDD—Standards of Performance for Volatile Organic Compound (VOC) Emissions From the Polymer Manufacturing Industry

§ 60.560 Applicability and designation of affected facilities.

(a) The provisions of this subpart apply to affected facilities involved in the manufacture of polypropylene, polyethylene, polystyrene, or poly(ethylene terephthalate).

(1) The affected facilities for purposes of the standards for process emissions emitted continuously are defined as each of the following process sections:

(i) For the manufacture of polypropylene using a liquid phase process: each raw materials preparation section, each polymerization reaction section, each material recovery section, and each product finishing section;

(ii) For the manufacture of polypropylene using a gas phase process: each material recovery section;

(iii) For the manufacture of low density polyethylene using a low pressure process or high density polyethylene using a gas phase process: each raw materials preparation section and each product finishing section;

(iv) For the manufacture of high density polyethylene using a liquid phase slurry process: each material recovery section and each product finishing section;

(v) For the manufacture of high density polyethylene using a liquid phase solution process: each raw materials preparation section and each material recovery section;

(vi) For the manufacture of polystyrene using a continuous process: each material recovery section;

(vii) For the manufacture of poly(ethylene terephthalate) using dimethyl terephthalate in a continuous process: each material recovery section and each polymerization reaction section; and

(viii) For the manufacture of poly(ethylene terephthalic acid in a continuous process: each raw materials preparation (i.e., esterification) section and each polymerization reaction section.

(2) The affected facilities for purposes of the standards for process emissions emitted intermittently are defined as each of the following process sections:

(i) For the manufacture of polypropylene using a liquid phase process: Each polymerization reaction section;

(ii) For the manufacture of polypropylene using a gas phase process: Each polymerization reaction section;

(iii) For the manufacture of low density polyethylene using a high pressure process: Each raw materials preparation section, each polymerization reaction section, each material recovery section, each product finishing section, and each product storage section;

(iv) For the manufacture of low density polyethylene using a low pressure process or high density polyethylene using a gas phase process: Each raw materials preparation section and each polymerization reaction section;

(v) For the manufacture of high density polyethylene using a liquid phase slurry process: Each raw materials preparation section; and

(vi) For the manufacture of high density polyethylene using a liquid phase solution process: Each raw materials preparation section, each polymerization reaction section, and each material recovery section.

(3) The affected facilities for purposes of the standards for equipment leaks of VOC are defined as follows:

(i) The group of all fugitive emissions equipment (as defined in § 60.561) within any process unit (as defined in § 60.561) except process units that manufacture poly(ethylene terephthalate).

(b) Any facility under paragraph (a) of this section that commences construction, modification, or reconstruction after September 30, 1987, is subject to the requirements of this subpart except as provided in paragraphs (c) and (d) of this section.

(c) Except for new polystyrene and poly(ethylene terephthalate) facilities, new, modified, or reconstructed affected facilities with uncontrolled emission rates at or below those identified in Table 1 are exempt from the requirements of § 60.562–1, except that owners or operators seeking to comply with this subpart by complying with the uncontrolled emissions rates in Table 1 are still required to conduct an initial performance test as required by § 60.8.

TABLE 1.—MAXIMUM UNCONTROLLED EMISSION RATES [a]

Production process	Process section	Uncontrolled emission rate, kg VOC/Mg product
Polypropylene, liquid phase process	Raw Materials Preparation	0.15[b]
	Polymerization Reaction	0.14[b], 0.24[c]
	Material Recovery	0.19[b]
	Product Finishing	1.57[b]
Polypropylene, gas phase process	Polymerization Reaction	0.12[c]
	Material Recovery	0.02[b]
Low Density Polyethylene, high pressure process	Raw Materials Preparation	0.41[d]
	Polymerization Reaction	(e)
	Material Recovery	(e)
	Product Finishing	(e)
	Product Storage	(e)
Low Density Polyethylene, low pressure process	Raw Materials Preparation	0.05[f]
	Polymerization Reaction	0.03[g]
	Production Finishing	0.01[b]
High Density Polyethylene, liquid phase slurry process	Raw Materials Preparation	0.25[c]
	Material Recovery	0.11[b]
	Product Finishing	0.41[b]
High Density Polyethylene, liquid phase solution process	Raw Materials Preparation	0.24[f]
	Polymerization Reaction	0.16[ch]
	Material Recovery	1.68[f]
High Density Polyethylene, gas phase process	Raw Materials Preparation	0.05[f]
	Polymerization Reaction	0.03[g]
	Product Finishing	0.01[b]
Polystyrene, continuous process	Material Recovery	0.016[b, h]
Poly(ethylene terephthalate), dimethyl terephthalate process	Material Recovery	0.06[b, h]
	Polymerization Reaction	1.80[h, i, j]
		3.92[h, i, k]
Poly(ethylene terephthalate), terephthalic acid process	Raw Materials Preparation	1
	Polymerization Reaction	1.80[h, j, m]
		3.92[h, k, m]

[a] "Uncontrolled" emissions refer to the emissions that would be emitted to the atmosphere in the absence of any add-on control devices but after any material recovery devices that constitute part of the normal material recovery operations in a process line where potential emissions are recovered for recycle or resale.
[b] Emission rate applies to continuous emissions only.
[c] Emission rate applies to intermittent emissions only.
[d] Total emission rate for non-emergency intermittent emissions from raw materials preparation, polymerization reaction, material recovery, product finishing, and product storage process sections.
[e] See footnote d.
[f] Emission rate applies to both continuous and intermittent emissions.
[g] Emission rate applies to non-emergency intermittent emissions only.
[h] Applies to modified or reconstructed affected facilities only.
[i] Includes emissions from the cooling tower.
[j] Applies to a process line producing low viscosity poly(ethylene terephthalate).
[k] Applies to a process line producing high viscosity poly(ethylene terephthalate).
[l] See footnote m.
[m] Applies to the sum of emissions to the atmosphere from the polymerization reaction section (including emissions from the cooling water tower) and the raw material preparation section (i.e., the esterifiers).

(d) No process section of an experimental process line is considered an affected facility for continuous or intermittent process emissions.

Note.—The numerical emission limits in these standards are expressed in terms of total organic compounds, measured as total organic compounds less methane and ethane.

§ 60.561 Definitions.

As used in this subpart, all terms not defined herein shall have the meaning given them in the Act, in Subpart A of Part 60, or in Subpart VV of Part 60, and the following terms shall have the specific meanings given them.

"Boiler" means any enclosed combustion device that extracts useful energy in the form of steam.

"Continuous emissions" means any gas stream containing VOC that is generated essentially continuously when the process line or any piece of equipment in the process line is operating.

"Continuous process" means a polymerization process in which reactants are introduced in a continuous manner and products are removed either continuously or intermittently at regular intervals so that the process can be operated and polymers produced essentially continuously.

"Control device" means an enclosed combustion device, vapor recovery system, or flare.

"Copolymer" means a polymer that has two different repeat units in its chain.

"Emergency vent stream" means, for the purpose of these standards, an intermittent emission that results from a decomposition, power failure, equipment failure, or other unexpected cause that requires immediate venting of gases from process equipment in order to avoid safety hazards or equipment damage.

"End finisher" means a polymerization reaction vessel operated

under very low pressures, typically at pressures of 2 torr or less, in order to produce high viscosity poly(ethylene terephthalate). An end finisher is preceded in a high viscosity poly(ethylene terephthalate) process line by one or more polymerization vessels operated under less severe vacuums, typically between 5 and 10 torr. A high viscosity poly(ethylene terephthalate) process line may have one or more end finishers.

"Expandable polystyrene" means a polystyrene bead to which a blowing agent has been added using either an in-situ suspension process or a post-impregnation suspension process.

"Experimental process line" means a polymer or copolymer manufacturing process line with the sole purpose of operating to evaluate polymer manufacturing processes, technologies, or products. An experimental process line does not produce a polymer or resin that is sold or that is used as a raw material for nonexperimental process lines.

"Flame zone" means that portion of the combustion chamber in a boiler occupied by the flame envelope.

"Fugitive emissions equipment" means each pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, valve, and flange or other connector in VOC service and any devices or systems required by Subpart VV.

"Gas phase process" means a polymerization process in which the polymerization process is carried out in the gas phase; i.e., the monomer(s) are gases in a fluidized bed of catalyst particles and granular polymer.

"High density polyethylene (HDPE)" means a thermoplastic polymer or copolymer comprised of at least 50 percent ethylene by weight and having a density of greater than 0.940 g/cm^3.

"High pressure process" means the conventional production process for the manufacture of low density polyethylene in which a reaction pressure of about 15,00O psig or greater is used.

"High viscosity poly(ethylene terephthalate)" means poly(ethylene terephthalate) that has an intrinsic viscosity of 0.9 or higher and is used in such applications as tire cord and seat belts.

"Incinerator" means an enclosed combustion device that is used for destroying VOC.

"In-situ suspension process" means a manufacture process in which styrene, blowing agent, and other raw materials are added together within a reactor for the production of expandable polystyrene.

"Intermittent emissions" means those gas streams containing VOC that are generated at intervals during process line operation and includes both planned and emergency releases.

"Liquid phase process" means a polymerization process in which the polymerization reaction is carried out in the liquid phase; i.e., the monomer(s) and any catalyst are dissolved, or suspended in a liquid solvent.

"Liquid phase slurry process" means a liquid phase polymerization process in which the monomer(s) are in solution (completely dissolved) in a liquid solvent, but the polymer is in the form of solid particles suspended in the liquid reaction mixture during the polymerization reaction; sometimes called a particle form process.

"Liquid phase solution process" means a liquid phase polymerization process in which both the monomer(s) and polymer are in solution (completely dissolved) in the liquid reaction mixture.

"Low density polyethylene (LDPE)" means a thermoplastic polymer or copolymer comprised of at least 50 percent ethylene by weight and having a density of 0.940 g/cm^3 or less.

"Low pressure process" means a production process for the manufacture of low density polyethylene in which a reaction pressure markedly below that used in a high pressure process is used. Reaction pressure of current low pressure processes typically go up to about 300 psig.

"Low viscosity poly(ethylene terephthalate)" means a polyethylene terephthalate that has an intrinsic viscosity of less than 0.75 and is used in such applications as clothing, bottle, and film production.

"Material recovery section" means the equipment that recovers unreacted or by-product materials from any process section for return to the process line, off-site purification or treatment, or sale, including equipment that treats recovered materials, but not including equipment that also treats raw materials. For the purposes of these standards, material recovery does not apply to the onsite recovery of ethylene glycol from poly(ethylene terephthalate) plants. This equipment in these plants is covered under the standards applicable to the polymerization reaction section.

"Operating day" means, for the purposes of these standards, any calendar day during which equipment used in the manufacture of polymer was operating for at least 8 hours or one labor shift, whichever is shorter. Only operating days shall be used in determining compliance with the standards specified in § 60.562–1(c)(1)(iv), (2)(ii), (3)(ii), and (4)(ii). Any calendar day in which equipment is used for less than 8 hours or one labor shift, whichever is less, is not an "operating day" and shall not be used as part of the rolling 14-day period for determining compliance with the standards specified in § 60.562–1(c)(1)(iv), (2)(ii), (3)(ii), and (4)(ii).

"Polyethylene" means a thermoplastic polymer or copolymer comprised of at least 50 percent ethylene by weight; see low density polyethylene and high density polyethylene.

"Poly(ethylene terephthalate) (PET)" means a polymer or copolymer comprised of at least 50 percent bis-(2-hydroxyethyl)-terephthalate (BHET) by weight.

"Poly(ethylene terephthalate) (PET) manufacture using dimethyl terephthalate" means the manufacturing of poly(ethylene terephthalate) based on the esterification of dimethyl terephthalate (DMT) with ethylene glycol to form the intermediate monomer bis-(2-hydroxyethyl)-terephthalate (BHET) that is subsequently polymerized to PET.

"Poly(ethylene terephthalate) (PET) manufacture using terephthalic acid" means the manufacturing of poly(ethylene terephthalate) based on the esterification reaction of terephthalic acid (TPA) with ethylene glycol to form the intermediate monomer bis-(2-hydroxyethyl)-terephthalate (BHET) that is subsequently polymerized to form PET.

"Polymerization reaction section" means the equipment designed to cause monomer(s) to react to form polymers, including equipment designed primarily to cause the formation of short polymer chains (oligomers or low polymers), but not including equipment designed to prepare raw materials for polymerization, e.g., esterification vessels.

"Polypropylene (PP)" means a polymer or copolymer comprised of at least 50 percent propylene by weight.

"Polystyrene (PS)" means a thermoplastic polymer or copolymer comprised of at least 80 percent styrene or para-methylstyrene by weight.

"Post-impregnation suspension process" means a manufacture process in which polystyrene beads are first formed in a suspension process, washed, dried, or otherwise finished and then added with a blowing agent to another reactor in which the beads and blowing agent are reacted to produce expandable polystyrene.

"Process heater" means a device that transfers heat liberated by burning fuel to fluids contained in tubular coils,

including all fluids except water that is heated to produce steam.

"Process line" means a group of equipment assembled that can operate independently if supplied with sufficient raw materials to produce polypropylene, polyethylene, polystyrene (general purpose, crystal, or expandable) or poly(ethylene terephthalate) or one of their copolymers. A process line consists of the equipment in the following process sections (to the extent that these process sections are present at a plant): raw materials preparation, polymerization reaction, product finishing, product storage, and material recovery.

"Process section" means the equipment designed to accomplish a general but well-defined task in polymer production. Process sections include raw materials preparation, polymerization reaction, material recovery, product finishing, and product storage and may be dedicated to a single process line or common to more than one process line.

"Process unit" means equipment assembled to perform any of the physical and chemical operations in the production of polypropylene, polyethylene, polystyrene (general purpose, crystal, or expandable), or poly(ethylene terephthalate) or one of their copolymers. A process unit can operate independently if supplied with sufficient feed or raw materials and sufficient storage facilities for the product. Examples of process units are raw materials handling and monomer recovery.

"Product finishing section" means the equipment that treats, shapes, or modifies the polymer or resin to produce the finished end product of the particular facility. Product finishing equipment may accomplish extruding and pelletizing, cooling and drying, blending, additives introduction, curing, or annealing. Product finishing does not include polymerization or shaping such as fiber spinning, molding, or fabricating, or modification such as fiber stretching and crimping.

"Product storage section" means the equipment that is designed to store the finished polymer or resin end product of the particular facility. Product storage does not include any intentional modification of the characteristics of any polymer or resin product or shipment of a finished polymer or resin product to another facility for further finishing or fabrication.

"Raw materials preparation section" means the equipment located at a polymer manufacturing plant designed to prepare raw materials such as monomers and solvents for polymerization. The raw materials preparation section may include equipment that accomplishes purification, drying, or other treatment of raw materials or of raw and recovered materials together, activation of catalysts, and esterification including the formation of some short polymer chains (oligomers), but does not include equipment that is designed primarily to accomplish the formation of oligomers, the treatment of recovered materials alone, or the storage of raw materials.

"Recovery system" means an individual unit or series of material recovery units, such as absorbers, condensers, and carbon absorbers, used for recovering volatile organic compounds (VOC).

"Total organic compounds (TOC)" means those compounds measured according to the procedures specified in § 60.564.

"Vent stream" means any gas stream released to the atmosphere from any polymers and resins process line.

"Volatile organic compounds (VOC)" means, for the purposes of these standards, any reactive organic compounds as defined in § 60.2 Definitions.

§ 60.562–1 Standards: Process emissions.

(a) *Polypropylene, low density polyethylene, and high density polyethylene.* On or before the date on which the performance test is required by § 60.8, each owner or operator of a polypropylene, low density polyethylene, or high density polyethylene process line containing a process section subject to the provisions of this subpart shall comply with the following:

(1) For each vent stream that emits continuous emissions in an affected facility as defined in § 60.560(a)(1) (i), (ii), (iii), (iv), and (v):

(i) Reduce emissions of total organic compounds (TOC) (minus methane and ethane) by 98 weight percent, or to a TOC (minus methane and ethane) concentration of 20 ppm by volume (ppmv), expressed as the sum of the actual compounds, not carbon equivalents, on a dry basis corrected to 3 percent oxygen, whichever is less stringent. If a boiler or process heater is used to comply with this paragraph, then the vent stream shall be introduced into the flame zone of the boiler or process heater; or

(ii) Combust the emissions in a flare as follows:

(A) Flares shall be designed for and operated with no visible emissions as determined by the methods specified in § 60.564(b)(1), except for periods not to exceed a total of 5 minutes during any 2 consecutive hours.

(B) Flares shall be operated with a flame present at all times, as determined by the methods specified in § 60.564(b)(2).

(C) Flares used to comply with provisions of this subpart shall be steam-assisted, air-assisted, or nonassisted.

(D) Flares shall be used only with the net heating value of the gas being combusted being 11.2 MJ/scm (300 Btu/scf) or greater if the flare is steam-assisted or air-assisted; or with the net heating value of the gas being combusted being 7.45 MJ/scm (200 Btu/scf) or greater if the flare is nonassisted. The net heating value of the gas being combusted shall be determined by the methods specified in § 60.564(c)(7).

(E)(*1*) Steam-assisted and nonassisted flares shall be designed for and operated with an exit velocity, as determined by the methods specified in § 60.564(c)(4), less than 18.3 m/sec (60 ft/sec), except as provided in paragraphs (a)(1)(ii)(E) (*2*) and (*3*) of this section.

(*2*) Steam-assisted and nonassisted flares designed for and operated with an exit velocity, as determined by the methods specified in § 60.564(c)(4), equal to or greater than 18.3 m/sec (60 ft/sec) but less than 122 m/sec (400 ft/sec) are allowed if the net heating value of the gas being combusted is greater than 37.3 MJ/scm (1000 Btu/scf).

(*3*) Steam-assisted and nonassisted flares designed for and operated with an exit velocity, as determined by the methods specified in § 60.564(c)(4), less than the velocity, V_{max}, as determined by the method specified in § 60.564(c)(b), and less than 122 m/sec (400 ft/sec) are allowed.

(F) Air-assisted flares shall be designed and operated with an exit velocity less than the velocity, V_{max}, as determined by the method specified in § 60.564(c)(6).

(2) For each vent stream that emits intermittent emissions in an affected facility as defined in § 60.560(a)(2), except for emergency vent streams in low density polyethylene plants using either a high pressure or low pressure process and high density polyethylene plants using a gas phase process:

(i) Combust the emissions in a flare:

(A) That is designed for and operated with no visible emissions as determined by the methods specified in § 60.564(b)(1), except for periods not to exceed a total of 5 minutes during any 2 consecutive hours.

(B) That is operated with a flame present at all times, as determined by the methods specified in § 60.564(b)(2).

(C) That is designed to maintain a stable flame.

(b) *Polystyrene.* On or before the date on which the performance test is required by § 60.8, each owner or operator of a polystyrene process line containing process sections subject to the provisions of this subpart shall comply with the following:

(1) For polystyrene process lines using a continuous process,

(i) Not allow continuous TOC emissions from the material recovery section to be greater than 0.0036 kg TOC/Mg product; or

(ii) Not allow the outlet gas stream from each final condenser in the material recovery section to exceed −25 °C (−13 °F).

(c) *Poly(ethylene terephthalate).* On or before the date on which the performance test is required by § 60.8, each owner or operator of a poly(ethylene terephthalate) process line containing process sections subject to the provisions of this subpart shall comply with the following:

(1) For poly(ethylene terephthalate) process lines producing a low viscosity product using the dimethyl terephthalate process,

(i) Not allow continuous TOC emissions from the material recovery section (i.e., methanol recovery) to be greater than 0.0027 kg TOC/Mg product, or

(ii) Not allow the outlet gas temperature from each final condenser in the material recovery section (i.e., methanol recovery) to exceed −24 °C (−11 °F).

(iii) Not allow continuous TOC emissions from the polymerization reaction section (including emissions from any equipment used to further recover the ethylene glycol, but excluding those emissions from the cooling tower) to be greater than 0.02 kg TOC/Mg product.

(iv) If steam-jet ejectors are used as vacuum producers for the polymerization reaction, maintain the concentration of ethylene glycol in the condensate from the ejectors at or below 0.35 percent by weight averaged on a daily basis over a rolling 14-day period of operating days as determined by the procedures specified in § 60.564(e).

(2) For poly(ethylene terephthalate) process lines producing a low viscosity product using the terephthalic acid process,

(i) Not allow continuous TOC emissions from the polymerization reaction section (including emissions from any equipment used to further recover the ethylene glycol, but excluding those emissions from the cooling tower) to be greater than 0.02 kg TOC/Mg product.

(ii) If steam-jet ejectors are used as vacuum producers for the polymerization reaction, maintain an ethylene glycol concentration in the condensate from the ejectors at or below 0.35 percent by weight averaged on a daily basis over a rolling 14-day period of operating days as determined by the procedures specified in § 60.564(d).

(iii) Not allow continuous TOC emissions from the esterification vessels in the raw materials preparation section to be greater than 0.04 kg TOC/Mg product.

(3) For poly(ethylene terephthalate) process lines producing a high viscosity product using a single end finisher,

(i) Not allow continuous TOC emissions from the polymerization reaction section (including emissions from any equipment used to further recover the ethylene glycol, but excluding those emissions from the cooling tower) to be greater than 0.02 kg TOC/Mg product.

(ii) If steam-jet ejectors are used as vacuum producers for the polymerization reaction, maintain an ethylene glycol concentration in the condensate from the ejectors at or below 0.35 percent by weight averaged on a daily basis over a rolling 14-day period of operating days as determined by the procedures specified in § 60.564(e).

(iii) If the terephthalic acid process is being used, not allow continuous TOC emissions from the esterification vessels in the raw materials preparation section to be greater than 0.04 kg TOC/Mg product.

(iv) If the dimethyl terephthalate process is being used, not allow continuous TOC emissions from the material recovery section (i.e., methanol recovery) to be greater than 0.0027 kg TOC/Mg product, or not allow the outlet gas temperature from each final condenser in the material recovery section (i.e., methanol recovery) to exceed −24 °C (−11 °F).

(4) For poly(ethylene terephthalate) process lines producing a high viscosity product with multiple end finishers,

(i) Not allow continuous TOC emissions from the polymerization reaction section (including emissions from any equipment used to recover further the ethylene glycol, but excluding those emissions from the cooling tower) to be greater than 0.02 kg TOC/Mg product.

(ii) If steam-jet ejectors are used as vacuum producers for the polymerization reaction, maintain an ethylene glycol concentration in the condensate from the ejectors at or below 6.0 percent by weight averaged on a daily basis over a rolling 14-day period of operating days as determined by procedures specified in § 60.564(e).

(iii) If the terephthalic acid process is being used, not allow continuous TOC emissions from the esterification vessels in the raw materials preparation section to be greater than 0.04 kg TOC/Mg product.

(iv) If the dimethyl terephthalate process is being used, not allow continuous TOC emissions from the material recovery section (i.e., methanol recovery) to be greater than 0.0027 kg TOC/Mg product, or not allow the outlet gas temperature from each final condenser in the material recovery section (i.e., methanol recovery) to exceed −24 °C (−11 °F).

(d) Closed vent systems and control devices used to comply with this subpart shall be operated at all times when emissions may be vented to them.

§ 60.562–2 Standards: Equipment leaks of VOC.

(a) Each owner or operator of an affected facility subject to the provisions of this subpart shall comply with the requirements specified in §§ 60.482–1 through 60.482–10 as soon as practicable, but no later than 180 days after initial startup.

(b) An owner or operator may elect to comply with the requirements specified in §§ 60.483–1 and 60.483–2.

(c) An owner or operator may apply to the Administrator for a determination of equivalency for any means of emission limitation that achieves a reduction in emissions of VOC at least equivalent to the reduction in emissions of VOC achieved by the controls required in this subpart. In doing so, the owner or operator shall comply with requirements specified in § 60.484.

(d) Each owner or operator subject to the provisions of this subpart shall comply with the provisions specified in § 60.485 except as follows:

(1) An owner or operator may use the following provision in addition to § 60.485(e): Equipment is in light liquid service if the percent evaporated is greater than 10 percent at 150 °C as determined by ASTM Method D–86 (incorporated by reference as specified in § 60.18).

(e) Each owner or operator subject to the provisions of this subpart shall comply with § 60.486 and § 60.487.

§ 60.563 Monitoring requirements.

(a) If an incinerator is used to comply with § 60.562–1, except § 60.562–1(a)(2), the owner or operator of an affected

VOL 52 ISS 189 SEP 30 1987 UMI

facility shall install, calibrate, maintain, and operate according to manufacturer's specifications the following equipment:

(1) A temperature monitoring device equipped with a continuous recorder and having an accuracy of 1 percent of the temperature being measured expressed in degrees Celsius or ±0.5 °C, whichever is greater.

(i) Where an incinerator other than a catalytic incinerator is used, this temperature monitoring device shall be installed in the firebox.

(ii) Where a catalytic incinerator is used, temperature monitoring devices shall be installed in the gas stream immediately before and after the catalyst bed.

(2) A flow indicator in each vent stream at a point closest to the inlet of each incinerator and before being joined with any other vent stream. Each flow indicator shall provide a record of vent stream flow to the incinerator at least once every hour for each affected facility.

(b) If a flare is used to comply with § 60.562–1, except § 60.562–1(a)(2), the owner or operator of an affected facility shall install, calibrate, maintain, and operate according to manufacturer's specifications the following equipment:

(1) A thermocouple or similar monitoring device at each pilot light in the flare to indicate the continuous presence of a flame, and

(2) A flow indicator that provides a record of vent stream flow to the flare at least once every hour for each affected facility.

(c) The owner or operator of an affected facility subject to § 60.562–1(a)(2) shall install, calibrate, maintain, and operate according to manufacturer's specifications the following equipment:

(1) A thermocouple or similar monitoring device at each pilot light in the flare to indicate the continuous presence of a flame, and

(2) A flow indicator that provides a record of vent stream flow to the flare for each affected facility.

(d) If a boiler or process heater is used to comply with § 60.562–1, except § 60.562–1(a)(2), the owner or operator of an affected facility shall install, calibrate, maintain, and operate according to the manufacturer's specifications the following equipment:

(1) At a point closest to the inlet of each boiler or process heater and before being joined with any other vent stream, a flow indicator that provides a record of vent stream flow to the boiler or process heater at least once every hour for each affected facility, and

(2) For boilers or process heaters with a heat input design capacity of less than 150 million Btu/hr, a temperature monitoring device equipped with a continuous recorder and having an accuracy of 1 percent of the temperature being measured expressed in degrees Celsius or ±0.5 °C, whichever is greater. For watertube boilers, the temperature monitoring device shall be installed between the radiant section and the convection zone. For firetube boilers, the temperature monitoring device shall be installed between the furnace (combustion zone) and the firetubes.

(3) For boilers or process heaters with a heat input design capacity of 150 million Btu/hr or greater, the owner or operator of an affected facility shall maintain such records to indicate the periods of operation of the boiler or process heater. The records must be readily available for inspection.

(e) Where an absorber, condenser, or adsorber is used to comply with § 60.562–1, except § 60.562–1(a)(2), the owner or operator of an affected facility shall install, calibrate, maintain, and operate according to manufacturer's specifications the following equipment, unless alternative monitoring procedures or requirements are approved for that facility by the Administrator:

(1) If an absorber is the final unit in a system,

(i) A scrubbing liquid temperature monitoring device having an accuracy of 1 percent of the temperature being measured expressed in degrees Celsius or ±0.5 °C, whichever is greater, and a specific gravity monitoring device having an accuracy of ±0.02 specific gravity unit, each equipped with a continuous recorder, or

(ii) An organic monitoring device used to indicate the concentration level of organic compounds based on a detection principle such as infrared, photoionization, or thermal conductivity, equipped with a continuous recorder, for the outlet of the absorber.

(2) If a condenser is the final unit in a system,

(i) A condenser exit (product side) temperature monitoring device equipped with a continuous recorder and having an accuracy of 1 percent of the temperature being measured expressed in degrees Cellsius or ±0.5 °C, whichever is greater, or

(ii) An organic monitoring device used to indicate the concentration level of organic compounds based on a detection principle such as infrared, photoionization, or thermal conductivity, each equipped with a continuous recorder, for the outlet of the condenser.

(3) If a carbon adsorber is the final unit in a system,

(i) An organic monitoring device used to indicate the concentration level of organic compounds based on a detection principle such as infrared, photoionization, or thermal conductivity, equipped with a continuous recorder, for the outlet of the carbon bed.

(f) Owners or operators of control devices used to comply with the provisions of this subpart shall monitor these control devices to ensure that they are operated and maintained in conformance with their designs.

(g) An owner or operator of an affected facility complying with the standards specified under § 60.562–1 with control devices other than an incinerator, boiler, process heater, flare, absorber, condenser, or carbon adsorber or by any other means shall provide to the Administrator information describing the operation of the control device and the process parameter(s) which would indicate proper operation and maintenance of the device. The Administrator may request further information and will specify appropriate monitoring procedures or requirements.

§ 60.564 Test methods and procedures.

(a) The test methods in Appendix A to this part, except as provided under § 60.8(b), shall be used as reference methods for determining TOC (minus methane and ethane) reduction efficiency or the TOC (minus methane and ethane) concentration at the outlet of the control device to determine compliance with the standards specified under § 60.562–1 when control devices other than flares are used, as follows:

(1) Method 1 or 1A, as appropriate, for selection of the sampling site. The sampling site for determination of offgas molar composition or TOC reduction efficiency shall be prior to the inlet of any combustion device and after all product recovery units.

(2) Method 2, 2A, 2C, or 2D, as appropriate, for determination of the volumetric flow rate.

(3) Method 3 for air dilution correction, based on 3 percent oxygen in the emission sample.

(4) Method 18 to determine the individual concentrations of all organics.

(5) The following equation shall be used to determine the TOC concentration (minus methane and ethane) in the emission sample:

$$C_{TOC} = \sum_{i=1}^{n} C_i$$

where:

C_{roc} = the concentration of total organic compounds (minus methane and ethane), ppm.
C_i = the concentration of sample component i, ppm.

(6) The following equation shall be used to determine the concentration corrected for oxygen, based on 3 percent oxygen in the emission sample:

$$C_{CORR} = C_{MEAS} \times \left(\frac{17.9}{20.9 - Y}\right)$$

where:
C_{CORR} = the concentration corrected for oxygen.
C_{MEAS} = the concentration uncorrected for oxygen.
Y = the measured 12-hour average volumetric oxygen concentration.

(7) The following equation shall be used to determine the percent emission reduction of TOC (minus methane and ethane):

$$P = \frac{E_{inlet} - E_{outlet}}{E_{inlet}} \times 100$$

where:
P = percent reduction.
E_{inlet} = mass emissions, kg TOC/Mg product, entering the control device.
E_{outlet} = mass emissions, kg TOC/Mg product, discharged to the atmosphere.

(8) Where a boiler or process heater with a design heat input capacity of 150 million Btu/hour or greater is used, the requirement for an initial performance test is waived, in accordance with § 60.8(b). However, the Administrator reserves the option to require testing at such other times as may be required, as provided for in § 114 of the Act.

(b) When a flare is used to comply with § 60.562–1:

(1) Method 22 shall be used to determine the compliance of flares with the visible emission provisions of this subpart. The observation period is 2 hours and shall be used according to Method 22.

(2) The presence of a flare pilot flame shall be monitored using a thermocouple or any other equivalent device to detect the presence of a flame.

(c) The test methods in Appendix A to this part, except as provided under § 60.8(b), shall be used as reference methods for determining the TOC (minus methane and ethane) emission rate in terms of kilogram emission per megagram of product, exit velocities, or net heating value of the gas combusted to determine compliance under § 60.560(c) and § 60.562–1, as follows:

(1) Method 1 or 1A, as appropriate, for selection of the sampling site. The sampling site for the molar composition and vent stream flow rate determination prescribed in §§ 60.564(c) (2) and (3) shall be prior to the inlet of any combustion device and prior to any dilution of the stream with air.

(2) The composition of the process vent stream shall be determined as follows:

(i) Method 18 and ASTM D2504–67 (reapproved 1977) (incorporated by reference—see § 60.17) to measure the concentration of TOC (minus methane and ethane) and concentration of all other compounds present except water vapor and carbon monoxide.

(ii) Method 4 to measure the content of water vapor.

(3) The volumetric flow rate shall be determined using Method 2, 2A, 2C, or 2D, as appropriate.

(4) The actual exit velocity of a flare shall be determined by dividing the volumetric flow rate (in units of standard temperature and pressure), as determined by Method 2, 2A, 2C, or 2D as appropriate, by the unobstructed (free) cross sectional area of the flare tip.

(5) The maximum permitted velocity, V_{max}, for flares complying with § 60.564(a)(1)(ii)(E)(iii) shall be determined using the following equation:

$$\text{Log}_{10}(V_{max}) = (H_T + 28.8)/31.7$$

where:
V_{max} = Maximum permitted velocity, m/sec.
28.8 = Constant.
31.7 = Constant.
H_T = The net heating value as determined in paragraph (c)(7) of this section.

(6) The maximum permitted velocity, V_{max}, for air-assisted flares shall be determined by the following equation:

$$V_{max} = 8.706 + 0.7084(H_T)$$

where:
V_{max} = Maximum permitted velocity, m/sec.
8.706 = Constant.
0.7084 = Constant.
H_T = The net heating value as determined in paragraph (c)(7) of this section.

(7) The net heating value of the process vent stream being combusted in a flare shall be calculated using the following equation:

$$H_T = K \left(\sum_{i=1}^{n} C_i H_i\right)$$

where:
H_T = Net heating value of the sample, MJ/scm, where the net enthalpy per mole of offgas is based on combustion at 25 °C and 760 mm Hg, but the standard temperature for determining the volume corresponding to one mole is 20 °C;

$$K = \text{Constant, } 1.740 \times 10^{-7} \frac{(1)}{\text{ppm}} \frac{(\text{g mole})}{\text{scm}} \frac{(\text{MJ})}{\text{kcal}},$$

where standard temperature for $\frac{(\text{g mole})}{\text{scm}}$ is 20 °C:

C_i = Concentration of sample component i in ppm on a wet basis, as measured for organics by Reference Method 18 and measured for hydrogen and carbon monoxide by ASTM D1946–82 (incorporated by reference as specified in § 60.17); and

H_i = Net heat of combustion of sample component i, kcal/g-mole at 25 °C and 760 mm Hg. The heats of combustion of process vent stream components may be determined using ASTM D2382–76 (reapproved 1977) (incorporated by reference as specified in § 60.17) if published values are not available or cannot be calculated.

(8) The emission rate of TOC (minus methane and ethane) in the process vent stream shall be calculated using the following equation:

$$E_{TOC} = K \left(\sum_{i=1}^{n} C_i M_i \right) Q_s$$

where:

E_{TOC} = Emission rate of total organic compounds (minus methane and ethane) in the sample, kg/hr.

K = Constant, 2.494×10^{-6} (1/ppm) (g-mole/scm) (kg/g) (min/hr), where standard temperature for (g-mole/scm) is 20 °C.

C_i = Concentration of sample component i, ppm.

M_i = Molecular weight of sample component i, g/g-mole.

Q_s = Vent stream flow rate (scm/min), at a standard temperature of 20 °C.

(9) The rate of polymer produced, P_p (kg/hr), shall be determined by dividing the weight of polymer pulled in kilograms (kg) from the process line during the performance test by the number of hours (hr) taken to perform the performance test. The polymer pulled, in kilograms, shall be determined by direct measurement or, subject to prior approval by the Administrator, computed from materials balance by good engineering practice.

(10) The emission rate of TOC (minus methane and ethane) in terms of kilograms of emissions per megagram of production shall be calculated using the following equation:

$$ER_{TOC} = \frac{E_{TOC}}{P_p \times \frac{1\ Mg}{1{,}000\ kg}}$$

where:

ER_{TOC} = Emission rate of total organic compounds (minus methane and ethane), kg TOC/Mg product.

E_{TOC} = Emission rate of total organic compounds (minus methane and ethane) in the sample, kg/hr.

P_p = The rate of polymer produced, kg/hr.

(d) For purposes of determining compliance with § 60.562–1(b)(1)(ii), (c)(1)(ii), (c)(3)(iv), or (c)(4)(iv), a condenser exit temperature monitor equipped with a continuous recorder and having an accuracy of 1 percent of the temperature being measured expressed in degrees Celsius or ±0.5 °C, whichever is greater, shall be used to calculate the average exit temperature, measured at least every 15 minutes and averaged over the performance test period while the vent stream is normally routed and constituted. Each 3-hour period constitutes a performance test.

(e) For purposes of determining compliance with § 60.562–1(c) (1)(iv), (2)(ii), (3)(ii), or (4)(ii), the ethylene glycol concentration in either the cooling tower or the condensate from steam-jet ejectors used to produce a vacuum in the polymerization reactors, whichever is applicable, shall be determined using procedures that conform to the methods described in ASTM D2908–74, "Standard Practice for Measuring Volatile Organic Matter in Water by Aqueous-Injection Chromatography" (incorporated by reference—see § 60.17). At least one sample per operating day shall be collected using the grab sampling procedures of ASTM D3370–76, "Standard Practices for Sampling Water" (incorporated by reference—see § 60.17). An average ethylene glycol concentration by weight shall be calculated on a daily basis over a rolling 14-day period of operating days. Each daily average ethylene glycol concentration so calculated constitutes a performance test.

(f) Each owner or operator of an affected facility shall conduct a performance test according to the procedures specified by § 60.546 (a) through (e), as appropriate, in order to determine compliance with § 60.562–1 whenever changes are made in production capacity, feedstock type or catalyst type, or whenever there is replacement, removal, or addition of a control device.

§ 60.565 Reporting and recordkeeping requirements.

(a) Each owner or operator subject to the provisions of this subpart shall keep an up-to-date, readily-accessible record of the following data measured during each performance test, and shall include the following data in the report of the initial performance test in addition to the written results of such performance tests as required under § 60.8. Where a boiler or process heater with a design heat input capacity of 150 million Btu/hour or greater is used to comply with § 60.562–1(a)(1)(i), a report containing performance test data need not be submitted, but a report containing the information in § 60.565(a)(2)(i) is required. The same data specified in this section shall be submitted in the reports of all subsequently required performance tests where either the emission control efficiency of a combustion device, or the outlet concentration of TOC (minus methane and ethane) is determined.

(1) When an incinerator is used to demonstrate compliance with § 60.562–1, except § 60.562–1(a)(2):

(i) The average firebox temperature of the incinerator (or the average temperature upstream and downstream of the catalyst bed), measured at least every 15 minutes and averaged over the performance test period, and

(ii) The percent reduction of TOC (minus methane and ethane) achieved by the incinerator, the concentration of TOC (minus methane and ethane) (ppmv, by compound) at the outlet of the control device on a dry basis corrected to 3 percent oxygen, or the emission rate in terms of kilograms TOC (minus methane and ethane) per megagram of product at the outlet of the control device, whichever is appropriate.

(2) When a boiler or process heater is used to demonstrate compliance with § 60.562–1, except § 60.562–1(a)(2):

(i) A description of the location at which the vent stream is introduced into the boiler or process heater, and

(ii) For boilers or process heaters with a design heat input capacity of less than 150 million Btu/hr, all 3-hour periods of operation during which the average combustion temperature was more than 28 °C (50 °F) below the average combustion temperature during the most recent performance test at which compliance was determined.

(3) When a flare is used to demonstrate compliance with § 60.562–1, except § 60.562–1(a)(2):

(i) All visible emission readings, heat content determination, flow rate measurements, and exit velocity determinations made during the performance test,

(ii) Continuous records of the flare pilot light flame heat-sensing monitoring, and

(iii) Records of all periods of operations during which the pilot flame is absent.

(4) For flares used to meet the requirements of § 60.562–1(a)(2):

(i) All visible emission readings made during the performance test,

(ii) Continuous records of the flare pilot light flame heat-sensing monitoring, and

(iii) Records of all periods of operation during which the pilot flame is absent.

(5) When an absorber is the final unit in a system to demonstrate compliance with § 60.562–1, except § 60.562–1(a)(2):

(i) The specific gravity (or alternative parameter that is a measure of the degree of absorbing liquid saturation, if approved by the Administrator), and average temperature, measured at least every 15 minutes and averaged over the performance test period, of the absorbing liquid (both measured while the vent stream is normally routed and constituted).

(6) When a condenser is the final unit in a system to demonstrate compliance with § 60.562–1, except § 60.562–1(a)(2):

(i) The average exit (product side) temperature, measured at least every 15 minutes and averaged over the performance test period while the vent stream is normally rated and constituted.

(7) Daily measurement and daily average 14-day rolling average of the ethylene glycol concentration in the condensate exiting the vacuum system servicing the polymerization reaction section, if an owner or operator is subject to § 60.562–1 (c)(1)(iv), (c)(2)(ii), or (c)(3)(ii), or of the ethylene glycol concentration in the cooling water in the cooling tower, if subject to § 60.562–1(c)(4)(ii).

(8) When a carbon adsorber is the final unit in a system to demonstrate compliance with § 60.562–1, except § 60.562–1(a)(2): the concentration level or reading indicated by the organics monitoring device at the outlet of the adsorber, measured at least every 15 minutes and averaged over the performance test period while the vent stream is normally routed and constituted.

(9) When an owner or operator seeks to comply with the requirements of this subpart by complying with the uncontrolled emission rate cutoff provision in § 60.560(c), each process operation variable (e.g., pressure, temperature, type of catalyst) that may result in an increase in the uncontrolled emission rate should such operating parameter or input be changed.

(b) Where an incinerator is used to comply with § 60.562–1, except § 60.562–1(a)(2), each owner or operator subject to the provisions of this subpart shall keep for at least 2 years up-to-date, readily accessible continuous records of the equipment operating parameters specified to be monitored under § 60.563 (a) and (g), as well as up-to-date, readily accessible records of periods of operation during which the parameter boundaries established during the most recent performance test are exceeded. Periods of operation during which the parameter boundaries established during the most recent performance test are exceeded are defined as follows:

(1) For thermal incinerators, all 3-hour periods of operation during which the average combustion temperature was more than 28 °C (50 °F) below the average combustion temperature during the most recent performance test at which compliance was demonstrated.

(2) For catalytic incinerators, all 3-hour periods of operation during which the average temperature of the vent stream immediately before the catalyst bed is more than 28 °C (50 °F) below the average temperature of the vent stream during the most recent performance test at which compliance was demonstrated. The owner or operator also shall record all 3-hour periods of operation during which the average temperature difference across the catalyst bed is less than 80 percent of the average temperature difference of the device during the most recent performance test at which compliance was demonstrated.

(c) Where a boiler or process heater is used to comply with § 60.562–1, except § 60.562–1(a)(2), each owner or operator subject to the provisions of this subpart shall keep for at least 2 years up-to-date, readily accessible continuous records of:

(1) The flow records specified under § 60.563(d)(1),

(2) All periods when there has been no flow rate for each vent stream,

(3) Where a boiler or process heater with a heat input design capacity of 150 million Btu/hr or greater is used, all periods of operation of the boiler or process heater. (Examples of such records could include records of steam use, fuel use, or monitoring data collected pursuant to other State or Federal regulatory requirements), and

(4) Where a boiler or process heater with a heat input design capacity of less than 150 million Btu/hr is used, each owner or operator shall also keep up-to-date, readily accessible records of periods of operation during which the parameter boundaries established during the most recent performance test are exceeded. Periods of operation during which the parameter boundaries established during the most recent performance test are exceeded are defined as all 3-hour periods of operation during which the average combustion temperature was more than 28 °C (50 °F) below the average combustion temperature during the most recent performance test at which compliance was demonstrated.

(d) Where a flare is used to comply with § 60.562–1, each owner or operator subject to the provisions of this subpart shall keep for at least 2 years up-to-date, readily accessible continuous records of:

(1) The flow records specified under § 60.563(b)(2) or, if complying with § 60.562–1(a)(2), under § 60.563(c)(2).

(2) All periods when there has been no flow rate at each vent stream,

(3) All periods of operations in which the pilot flame is absent, and

(4) The flare pilot light flame heat sensing monitoring specified under § 60.563(b) or, if complying with § 60.562–1(a)(2), under § 60.563(c).

(e) Each owner or operator subject to the provisions of this subpart shall keep for at least 2 years up-to-date, readily-accessible continuous records of the equipment operating parameters specified to be monitored under § 60.563 (e) and (g) as well as up-to-date, readily accessible records of periods of operation during which the parameter boundaries established during the most recent performance test are exceeded. Where an owner or operator seeks to comply with § 60.562–1, periods of operation during which the parameter boundaries established during the most recent performance tests are exceeded are defined as follows:

(1) Where an absorber is the final unit in a system:

(i) All 3-hour periods of operation during which the average absorbing liquid temperature was more than 11 °C (20 °F) above the average absorbing liquid temperature during the most recent performance test, and

(ii) All 3-hour periods of operation during which the average absorbing liquid specific gravity was more than 0.1 unit above, or more than 0.1 unit below, the average absorbing liquid specific gravity during the most recent performance test (unless monitoring of an alternative parameter that is a measure of the degree of absorbing liquid saturation is approved by the Administrator, in which case he or she will define appropriate parameter boundaries and periods of operation during which they are exceeded).

(2) Where a condenser is the final unit in a system:

(i) All 3-hour periods of operation during which the average condenser operating temperature was more than 6 °C (10 °F) above the average operating temperature during the most recent performance test.

(3) Where a carbon adsorber is the final unit in a system:

(i) All 3-hour periods of operation during which the average concentration of TOC (minus methane and ethane) in the carbon adsorber gases is more than 20 percent greater than the exhaust gas concentration level or reading measured

by the organics monitoring system during the most recent performance test.

(f) Each owner or operator of an affected facility subject to the provisions of this subpart and seeking to demonstrate compliance with § 60.562–1 shall keep up-to-date, readily accessible records of:

(i) Any changes in production capacity, feedstock type, or catalyst type, or of any replacement, removal or addition of product recovery equipment; and

(ii) The results of any performance test performed pursuant to the procedures specified by § 60.564 (b), (c), (d), or (e).

(g) Each owner or operator of an affected facility that seeks to comply with the requirements of this subpart by complying with the uncontrolled emission rate cutoff provision in § 60.560(c) shall keep for at least 2 years up-to-date, readily accessible records of any change in process operation that increases the uncontrolled emission rate of the process line in which the affected facility is located.

(h) Each owner and operator subject to the provisions of this subpart is exempt from § 60.7(c) of the General Provisions.

(i) The Administrator will specify appropriate reporting and recordkeeping requirements where the owner or operator of an affected facility complies with the standards specified under § 60.562–1 other than as provided under § 60.565 (a) through (e).

(j) Each owner or operator that seeks to comply with the requirements of this subpart by complying with the uncontrolled emission rate cutoff provision of § 60.560(c) or the requirements of § 60.562–1 shall submit to the Administrator semiannual reports of the following recorded information, as applicable. The initial report shall be submitted within 6 months after the initial start-up date.

(1) Exceedances of monitored parameters recorded under § 60.565 (b), (c)(4), and (e).

(2) All periods recorded under § 60.565(c) or § 60.565(d) when the vent stream has been diverted from the control device or has no flow rate.

(3) All periods recorded under § 60.565(c) when the boiler or process heater was not operating.

(4) All periods recorded under § 60.565(d) in which the pilot flame was absent.

(5) All periods recorded under § 60.565(a)(7) when the 14-day rolling average exceeded the standard specified in § 60.562–1(c) (1)(iv), (2)(ii), (3)(ii), or (4)(ii), as applicable.

(6) Any change in process operations that increases the uncontrolled emission rate of the process line in which the affected facility is located, as recorded in § 60.565(g).

(k) Each owner or operator subject to the provisions of this subpart shall notify the Administrator of the specific provisions of § 60.562 or § 60.560(c), as applicable, with which the owner or operator has elected to comply. Notification shall be submitted with the notification of initial startup required by § 60.7(a)(3). If an owner or operator elects at a later date to use an alternative provision of § 60.562 with which he or she will comply or becomes subject to § 60.562 for the first time (i.e., the owner or operator can no longer meet the requirements of this subpart by complying with the uncontrolled emission rate cutoff provision in § 60.560(c)), then the owner or operator shall notify the Administrator 90 days before implementing a change and, upon implementing a change, a performance test shall be performed as specified in § 60.564.

(l) The requirements of this subsection remain in force until and unless EPA, in delegating enforcement authority to a State under section 111(c) of the Act, approves alternative reporting requirements or means of compliance surveillance adopted by such State. In that event, affected sources within the State will be relieved of the obligation to comply with this subsection, provided that they comply with the requirements established by the State.

§ 60.566 Delegation of authority.

(a) In delegating implementation and enforcement authority to a State under section 111(c) of the Act, the authority contained in paragraph (b) of this section shall be retained by the Administrator and not transferred to a State.

(b) Authority which will not be delegated to States: § 60.562–2(c).

3. Section 60.17 is amended by revising paragraphs (a)(6), (a)(38), and (a)(39) and by adding paragraphs (a)(48) and (a)(49) to read as follows:

§ 60.17 Incorporation by reference.

* * * * *

Medicare Program; Monthly Actuarial Rates and Part B Premium Rates Beginning January 1, 1988

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice.

SUMMARY: This notice announces the monthly actuarial rates for aged (age 65 or over) and disabled (under age 65) enrollees in the Medicare Supplementary Medical Insurance (SMI) program for calendar year 1988. It also announces the montly SMI premium rate to be paid by all enrollees during calendar year 1988. The 1988 monthly Part B premium will be increased from $17.90 to $24.80.

The $6.90 increase in the SMI premium is a result of several factors. First, because the trust fund reserve at the end of 1986 was larger than necessary to provide an adequate program contingency, the actuarial rate, and hence the premium, promulgated for 1987 was, as for the two previous years, set at a level lower than would otherwise have been required to finance projected 1987 expenditures. This reduced the 1987 premium by $1.43. In contrast, because the trust fund has since been reduced to the minimum level, the 1988 premium is increased by 6.5 cents to replenish the trust fund reserves. The difference between the $1.43 negative contingency margin for 1987 and the positive margin of 6.5 cents of 1988 accounts for $1.50 of the premium increase. Second, our current estimate of 1987 expenditures is 12.1 percent higher than projected at the time we promulgated the 1987 premium. Finally, we estimate Part B expenditures to increase by 13.9 percent in 1988. Almost 60 percent of the premium increase is due to growth in physician expenditures; from 1984 through 1988, Part B spending for physicians' services is growing at 11.5 percent annually.

EFFECTIVE DATE: January 1, 1988.

FOR FURTHER INFORMATION CONTACT: Carter S. Warfield, (301) 594–2893.

SUPPLEMENTARY INFORMATION:

I. Background

The Medicare Supplementary Medical Insurance (SMI) program is the voluntary Medicare Part B program that pays all or part of the costs for physicians' services, outpatient hospital services, home health services, services furnished by rural health clinics, ambulatory surgical centers, and comprehensive outpatient rehabilitation facilities, and certain other medical and health services not covered by hospital insurance (Medicare Part A). The SMI program is available to individuals who are entitled to hospital insurance and to U.S. residents who have attained age 65 and are citizens, or aliens who were lawfully admitted for permanent residence and have resided in the United States for five consecutive years. This program requires enrollment and payment of monthly premiums, as provided in 42 CFR Part 405, Subparts B and I, respectively.

The Secretary of Health and Human Services is required by section 1839 of the Social Security Act (42 U.S.C. 1395r) to issue two annual notices relating to the SMI program.

One notice announces two amounts that, according to actuarial estimates, will equal respectively, one-half the expected average monthly cost of SMI for each aged enrollee (age 65 or over) and one-half the expected average monthly cost of SMI for each disabled enrollee (under age 65) during the calendar year beginning the following January. These amounts are called "monthly actuarial rates."

The second notice announces the monthly SMI premium rate to be paid by aged and disabled enrollees for the calendar year beginning the following January. (Although the costs to the program per disabled enrollee are higher than for the aged, the law provides that they pay the same premium amount.) Beginning with the passage of section 203 of Pub. L. 92–603, (the Social Security Amendments of 1972) and until the passage of section 124 of Pub. L. 97–248, (the Tax Equity and Fiscal Responsibility Act of 1982) the premium rate was limited to the lesser of the actuarial rate for aged enrollees, or the current monthly premium rate increased by the same percentage as the most recent general increase in monthly title II social security benefits. The difference between the premiums paid by all enrollees and total incurred costs is met from the general revenues of the Federal Government.

Section 124 of Pub. L. 97–248 changed the premium basis to 25 percent of program costs.

Section 606 of Pub. L. 98–21, section 2302 of Pub. L. 98–369 (the Deficit Reduction Act of 1984) and section 9313 of Pub. L. 99–272 (Consolidated Omnibus Reconciliation Act) amended section 1839 of the Social Security Act ("the Act") to extend through 1988 the provision that the premium be based on 25 percent of program costs. In January 1989, calculation of the premium rate will revert to the method in section 1839(a) of the Act used before the passage of Pub. L. 97–248, Pub. L. 98–21, Pub. L. 98–369 and Pub. L. 99–272, except that it will remain on a calendar year basis.

A further provision affecting the calculation of the SMI premium is section 1839(f) of the Act that was added by section 2302 of Pub. L. 98–369. This provision refers to section 215(i) of the Act, which provides for cost-of-living increases in social security benefits. Section 1839(f)(1) of the act, as amended by section 9313 of Pub. L. 99–272, states that if no cost-of-living increase under section 215(i) of the Act becomes effective in December 1985, 1986 or 1987, there will be no increase in the SMI monthly premium paid by the enrollees for the following year. Thus, the premium will remain at the December level. (However, those individuals who enroll in the SMI program after the expiration of their initial enrollment period, or reenroll after a termination of a coverage period, are still subject to the increase in premium described in section 1839(b) of the Act. That increase is a percentage of the premium and would be based on the new premium rate.)

Section 1839(f)(2) of the Act, as added by section 2302 of Pub. L. 98–369, and amended by section 3.(a)(4) of Pub. L. 98–617, section 9313 of Pub. L. 99–272, and section 9001(c) of Pub. L. 99–509, contains provisions that are applicable if there is a cost-of-living increase for 1986, 1987 or 1988. The law provides that if an individual is entitled to benefits under section 202 or 223 of the Act (the Old-Age and Survivors Insurance Benefit and the Disability Insurance Benefit, respectively) and has the SMI premiums deducted from these benefit payments, the premium increase would be reduced to avoid causing a decrease in the individual's benefit payment. This would occur if the increase in the individual's social security benefit due to the cost of living adjustment under section 215(i) of the Act is less than the increase in the premium amount applies of the individual is entitled to benefits under section 202 or 223 of the Act for November and December of a particular year and the individual's SMI premiums for December and the following January are deducted from the respective month's section 202 or 223 benefits.[1]

[1] Note: — A check for benefits under section 202 or 223 is received in the month following the month for which the benefits are due. The SMI premium that is deducted from a particular check is the SMI payment for the month in which the check is

Continued

Generally, the reduced SMI premium for the individual for that January and for each of the succeeding 11 months for which he or she is entitled to benefits under section 202 or 223 of the Act is the greater of the following:

(1) The monthly premium for January reduced as necessary to make the December monthly benefits, after the deduction of the SMI premium for January, at least equal to the preceding November's monthly benefits, after the deduction of the SMI premium for December.

(2) The monthly premium for that individual for that December.

Again, those individuals who have enrolled in the SMI program late or have reenrolled after the termination of a coverage period are subject to an increased premium under section 1839(b) of the Act. In these cases, the monthly premium would be calculated as specified in (1) and (2) above with the addition of the amount specified under the provisions of section 1839(b) of the Act. That increase is a percentage of the premium and would be based on the new premium rate.

In determining the premium limitations under section 1839(f)(2) of the Act, the monthly benefits to which an individual is entitled under section 202 or 223 do not include retroactive adjustments or payments and deductions on account of work. Also, once the monthly premium amount has been established under section 1839(f)(2) of the Act, it will not be changed during the calendar year even if there are retroactive adjustments or payments and deductions on account of work that apply to the individual's monthly benefits.

For calendar year 1988, the notices of the monthly actuarial rates and the monthly premium rate are as follows:

II. Notice of Monthly Actuarial Rates

As required by sections 1839(a)(1) and (4) of the Act (42 U.S.C. 1395r(a)(1) and (4)), as amended, I have determined that the monthly actuarial rates applicable for calendar year 1988 are $49.60 for enrollees age 65 and over, and $48.60 for disabled enrollees under age 65. The accompanying statement (section IV.) gives the actuarial assumptions and bases from which these rates are derived.

III. Notice of Monthly Premium Rate

As required by section 1839(a)(3), (e)(1) and (f) of the Act as amended (42 U.S.C. 1395r(a)(3), (e)(1) and (f)), I have determined that the standard monthly premium amount will be $24.80 during calendar year 1988. However, if monthly Social Security benefits are not increased for 1988, the premium will not be increased, but will remain at $17.90 monthly. The accompanying statement shows how the premium amount was derived.

IV. Statement of Actuarial Assumptions and Bases Employed in Determining the Monthly Actuarial Rates and the Standard Monthly Premium Rate for the Supplementary Medical Insurance Program Beginning January 1988

A. Actuarial Status of the Supplementary Medical Insurance Trust Fund

Under the law, the starting point for determining the monthly premium is the amount that would be necessary to finance the SMI program on an incurred basis, i.e., the amount of income that would be sufficient to pay for services furnished during that year (including associated administrative costs) even though payment for some of these services will not be made until after the close of the year. The portion of income required to cover benefits not paid until after the close of the calendar year is added to the trust fund and used when needed.

Because the rates are established prospectively, they are subject to projection error. As a result, the income to the program may not equal incurred costs. Therefore, trust fund assets should be maintained at a level that is adequate to cover a moderate degree of projection error in addition to the amount of incurred but unpaid expenses.

Table 1 summarizes the estimated actuarial status of the trust fund as of the end of the financing period for 1986 through 1987.

TABLE 1. ESTIMATED ACTUARIAL STATUS OF THE SMI TRUST FUND AS OF THE END OF THE FINANCING PERIODS, JANUARY 1, 1986–DECEMBER 31, 1987

[In millions of dollars]

Financing period ending	Assets	Liabilities	Assets less liabilities
Dec. 31, 1986	$8,291	$5,106	$3,185
Dec. 31, 1987	4,793	6,287	-,494

B. Monthly Actuarial Rate for Enrollees Age 65 and Older

The monthly actuarial rate is one-half of the monthly projected cost of benefits and administrative expenses for each enrollee age 65 and older, adjusted to allow for interest earnings on assets in the trust fund and a contingency margin. The contingency margin is an amount appropriate to provide for a moderate degree of projection error and to amortize unfunded liabilities.

The monthly actuarial rate for enrollees age 65 and older for calendar year 1988 was determined by projecting per-enrollee cost for the 12-month periods ending June 30, 1988 and June 30, 1989, by type of service. Although the actuarial rates are now applicable for calendar years, projections of per-enrollee costs were determined on a July to June period, consistent with the July 1 annual fee screen update used for benefits prior to the passage of section 2306(b) of Pub. L. 98–369. The values for the 12-month period ending June 30, 1985, were established from program data. Subsequent periods were projected using a combination of program data and data from external sources. The projection factors used are shown in Table 2. Those per-enrollee values are then adjusted to apply to a calendar year period. The projected values for financing periods from January 1, 1985, through December 31, 1988, are shown in Table 3.

TABLE 2—PROJECTION FACTORS,[1] 12-MONTH PERIODS ENDING JUNE 30 OF 1985–1989

[In percent]

TABLE 2—PROJECTION FACTORS,[1] 12-MONTH PERIODS ENDING JUNE 30 OF 1985–1989—Continued

[In percent]

12-month period ending June 30	Physicians' services		Outpatient hospital services	Home health agency services	Group practice prepayment plans	Independent lab services
	Fees [2]	Residual [3]				
1986	0.4	8.9	4.2	5.4	57.7	42.5
1987	6.8	9.5	21.7	10.8	38.0	13.1
1988	4.6	7.6	18.1	12.4	22.3	18.0
1989	3.4	5.8	18.3	10.7	19.0	17.6
Disabled:						
1985	0.8	1.7	8.3	0.0	26.4	14.8
1986	0.4	3.2	7.1	0.0	60.1	49.5
1987	6.8	9.1	13.4	0.0	18.7	9.0
1988	4.6	6.5	7.5	0.0	−1.1	−3.9
1989	3.4	6.0	10.1	0.0	30.9	14.2

[1] All values are per enrollee.
[2] As recognized for payment under the program.
[3] Increase in the number of services received per enrollee and greater relative use of more expensive services.

TABLE 3—DERIVATION OF MONTHLY ACTUARIAL RATE FOR ENROLLEES AGE 65 AND OVER, FINANCING PERIODS ENDING DECEMBER 31, 1985 THROUGH DECEMBER 31, 1988

	Financing periods			
	CY 1985	CY 1986	CY 1987	CY 1988
Covered services (at level recognized)				
Physicians' reasonable charges	$31 28	$35 45	$40 63	$45 06
Outpatient hospital and other institutions	7 34	8 30	9 94	11 75
Home health agencies	0 05	0 05	0 05	0 06
Group practice prepayment plans	1 43	2 08	2 67	3 22
Independent lab	0 77	0 96	1 11	1 31
Total services	40 87	46 84	54 40	61 40
Cost-Sharing:				
Deductible	2 63	2 69	− 2 69	2 68
Coinsurance	6 98	− 7 98	9 34	10 61
Total benefits	31 26	36 17	42 37	48 11
Administrative expenses	1 34	1 37	1 39	1 42
Incurred expenditures	32 60	37 54	43 76	49 53
Value of interest	− 1 17	0 92	− 0 34	− 0 06
Contingency margin for projection error and to amortize the surplus or deficit	0 43	− 5 62	7 62	0 13
Monthly actuarial rate	31 00	31 00	35 80	49 60

The projected monthly rate required to pay for one-half of the total of benefits and administrative costs for enrollees age 65 and over for calendar year 1988 is $49.53. The monthly actuarial rate of $49.60 provides an adjustment of −$0.06 for interest earnings and $0.13 for a contingency margin. Based on current estimates, it appears that the assets are not sufficient to cover the amount of incurred but unpaid expenses and to provide for a moderate degree of projection error. Thus, a positive contingency margin is needed to build assets toward an appropriate level.

C. Monthly Actuarial Rate for Disabled Enrollees

Disabled enrollees are those persons enrolled in SMI because of entitlement (before age 65) to disability benefits for more than 24 months or because of entitlement to Medicare under the end-stage renal disease program. Projected monthly costs for disabled enrollees (other than those suffering from end-stage renal disease) are prepared in a fashion exactly parallel to projection for the aged, using appropriate actuarial assumptions (see Table 2). Costs for the end-stage renal disease program are projected differently because of the complex demographic problems involved. The combined results for all disabled enrollees are shown in Table 4.

TABLE 4—DERIVATION OF MONTHLY ACTUARIAL RATE FOR DISABLED ENROLLEES, FINANCING PERIODS ENDING DECEMBER 31, 1985 THROUGH DECEMBER 31, 1988

	Financing periods			
	CY 1985	CY 1986	CY 1987	CY 1988
Covered services (at level recognized):				
Physicians' reasonable charges	$33.74	$37.45	$42.78	$47.23
Outpatient hospital and other institutions	19.97	20.93	22.21	23.46
Home health agencies	0.00	0.00	0.00	0.00
Group practice prepayment plans	0.08	0.11	0.12	0.13
Independent lab	0.91	1.11	1.17	1.25

TABLE 4—DERIVATION OF MONTHLY ACTUARIAL RATE FOR DISABLED ENROLLEES, FINANCING PERIODS ENDING DECEMBER 31, 1985 THROUGH DECEMBER 31, 1988—Continued

	Financing periods			
	CY 1985	CY 1986	CY 1987	CY 1988
Total services	$54.70	$59.60	$66.28	$72.07
Cost-Sharing:				
Deductible	−2.35	−2.40	−2.39	−2.38
Coinsurance	−9.85	−10.66	−11.90	−12.97
Total benefits	$42.50	$46.54	$51.99	$56.72
Administrative expenses	1.82	1.76	1.70	1.67
Incurred expenditures	$44.32	$48.30	$53.69	$58.39
Value of interest	−7.45	−8.13	−9.36	−9.79
Contingency margin for projection error and to amortize the surplus or deficit	15.83	0.63	8.67	−0.00
Monthly actuarial rate	$52.70	$40.80	$53.00	$48.60

The projected monthly rate required to pay for one-half of the total of benefits and administrative costs for disabled enrollees for calendar year 1988 is $58.39. The monthly actuarial rate of $48.60 provides an adjustment of −$9.79 for interest earnings and a $0.00 for a contingency margin.

D. Sensitivity Testing

Several factors contribute to uncertainty about future trends in medical care costs. In view of this, it seems appropriate to test the adequacy of the rates announced here using alternative assumptions. The most unpredictable factors that contribute significantly to future costs are outpatient hospital costs, physician residual (as defined in Table 2), and increases in physician fees as constrained by the program's reasonable charge screens and economic index. Two alternative sets of assumptions and the results of those assumptions are shown in Table 5. One set represents increases that are lower and is, therefore, more optimistic than the current estimate. The other set represents increases that are higher and is, therefore, more pessimistic than the current version. The values for the alternative assumptions were determined from a study on the average historical error in the respective increase factors. All assumptions not shown in Table 5 are the same as in Table 2.

TABLE 5—PROJECTION FACTORS AND THE ACTUARIAL STATUS OF THE SMI TRUST FUND UNDER ALTERNATIVE SETS OF ASSUMPTIONS FOR FINANCING PERIODS THROUGH DECEMBER 31, 1988

	This Projection			Low Cost Projection			High Cost Projection		
	12-month periods ending June 30,			12-month periods ending June 30,			12-month periods ending June 30,		
	1987	1988	1989	1987	1988	1989	1987	1988	1989
Projection Factors (in present): [1]									
Physician services—fees: [2]									
Aged	6.8	4.6	3.4	6.0	3.5	1.3	7.6	5.7	5.5
Disabled	6.8	4.6	3.4	6.0	3.5	1.3	7.6	5.7	5.5
Physician services—Residual: [3]									
Aged	9.5	7.6	5.8	7.9	5.2	3.4	11.1	10.0	8.3
Disabled	9.1	6.5	6.0	5.8	2.2	2.0	12.4	10.9	9.9
Outpatient hospital services:									
Aged	21.7	18.1	18.3	15.0	10.5	12.7	28.4	25.7	23.8
Disabled	13.4	7.5	10.2	2.5	−6.4	−1.6	24.3	21.3	21.9

	As of December 31,			As of December 31,			As of December 31,		
	1986	1987	1988	1986	1987	1988	1986	1987	1988
Actuarial status (in millions):									
Assets	$8,291	$4,793	$6,184	$8,291	$6,878	$12,190	$8,291	$2,573	(*)
Liabilities	$5,106	$6,287	$7,601	$3,726	$4,654	$5,605	$6,519	$7,981	$9,721
Assets Less Liabilities	$3,185	$−1,494	$−1,417	$4,565	$2,224	$6,585	$1,772	$−5,408	(*)

	As of December 31,			As of December 31,			As of December 31,		
1986	1987	1988	1986	1987	1988	1986	1987	1988	
Ratio of assets less liabilities to expenditures (in percent)[5]	9.6	−3.9	−3.3	14.7	6.5	17.2	5.0	−12.6	(4)

[1] All values are per enrollee.
[2] As recognized for payment under the program.
[3] Increase in the number of services received per enrollee and greater relative use of more expensive services.
[4] The trust fund will be depleted by December 31, 1988 under this set of assumptions.
[5] Ratio of assets less liabilities at the end of the year to total incurred expenditures during the following year, expressed as a percent.

Table 5 indicates that, under the assumptions used in preparing this report, the monthly actuarial rates will result in an excess of assets over liabilities of −$1,417 million by the end of December 1988. This amounts to −3.3 percent of the estimated total incurred expenditures for the following year. Assumptions which are somewhat more pessimistic (and, therefore, test the adequacy of the assets to accommodate projection errors) deplete the trust fund by the end of December, 1988. Under fairly optimistic assumptions, the monthly actuarial rates will result in a surplus of $6,585 million by the end of December, 1988, which amounts to 17.2 percent of the estimated total incurred expenditures for the following year.

E. Standard Premium Rate

For calendar years 1984 through 1988, the law provides that the standard monthly premium rate for both aged and disabled enrollees shall be 50 percent of the monthly actuarial rate for enrollees age 65 and older. Therefore, the standard monthly premium rate for both aged and disabled enrollees for calendar year 1988 is $24.80, which is 50 percent of the monthly actuarial rate for this period ($49.60).

V. Explanation of 1988 Premium Increase

In 1988, the Part B premium will increase from the current $17.90 monthly to $24.80 monthly, an increase of $6.90 or 38.5 percent. The increase can be attributed to these factors:

	Dollars	Percent
• Contingency margin difference	$1.50	8.4
• 1987 expenditures exceeding projections	2.40	13.4
• Projected expenditure increase, 1987–88	3.00	16.7
	6.90	38.5

Contingency reserve

Because the trust fund reserve at the end of 1984 was larger than necessary to provide an adequate program contingency, the actuarial rates, and hence premiums, promulgated during the period 1985 to 1987 were set at levels lower than otherwise would have been required to finance projected expenditures in each year. This reduced the trust fund reserve to the minimum level deemed adequate to protect the program. For example, in 1987 the premium was $1.43 lower than necessary to finance projected 1987 expenditures, had they not been funded partially by drawing down the contingency reserve. In contrast since the trust fund reserve now has been depleted relative to estimated expenditures, the premium in 1988 is increased by 6.5 cents (half of the 13 cents margin incorporated in the monthly actuarial rate) to replenish the reserve. The difference between the negative $1.43 contingency margin for 1987 and the positive 6.5 cents 1988 margin accounts for $1.50 of the premium increase.

Expenditures in 1987 exceed projections

Current actuarial estimates of 1987 expenditures are 12.1 percent higher than projected one year ago at the time of the premium promulgation for 1987. Based on these current estimates, the reestimated 1987 premium would be $2.40 higher; this difference accounts for 13.4 percentage points of the 38.5 percentage point increase in the premium for 1988. Components of the increase are:

	Percent
• Physicians' reasonable charges	12.1
• Group practice prepayment plans.....	2.2
• Other categories	−0.9
	13.4

Increases in physician expenditures account for more than 90 percent of the 13.4 percentage point increase.

Projected expenditure increase, 1987–88

Current actuarial estimates show Part B expenditures increasing 13.9 percent in 1988. This growth accounts for $3.00 of the $6.90 premium increase, or 16.7 of the 38.5 percentage point increase. Components of the increase are:

	Percent
• Physicians' reasonable charges	10.6
• Outpatient hospital & other institutions	4.3
• Group practice prepayment plans.....	1.3
• Independent lab.....	0.5
• Home health agencies.....	0.0
	16.7

Increases in payments for physicians' services account for more than 63 percent of the 16.7 percentage point increase arising from projected Part B spending growth from 1987 to 1988.

Summary

As shown in the summary table below, almost 60 percent of the premium increase ($4.05 of the $6.90) is due to growth in physician expenditures. From 1984 through 1988, Part B spending for physicians' services is growing at 11.5 percent annually.

SUMMARY OF COMPONENTS OF 1988 PREMIUM INCREASE

	Dollars	Percent	Percent
Growth in physician spending.....	4.05	22.7	58.7

SUMMARY OF COMPONENTS OF 1988 PREMIUM INCREASE—Continued

	Dollars	Percent	Percent
Contingency drawdown	1.50	8.4	21.7
Growth in all other Part B spending.....	1.35	7.5	19.6
	6.90	38.4	100.0

VI. Regulatory Impact Statement

The monthly SMI premium rate of $24.80 for all enrollees during calendar year 1988 is 38.5 percent higher than the $17.90 monthly premium amount for the previous financing period. The estimated cost of this increase over the current premium to the approximately 31.7 million SMI enrollees will be about $2,622 million for calendar year 1988.

This notice merely announces amounts required by section 1839 of the Social Security Act. This notice is not a proposed rule or a final rule issued after a proposal, and does not alter any regulations. Therefore, we have determined, and the Secretary certifies, that no analyses are required under Executive Order 12291 or the Regulatory Flexibility Act (5 U.S.C. 601 through 612).

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE

Mid-Atlantic
OCS Lease Sale 121
Call for Information and Nominations
and
Notice of Intent to Prepare an Environmental Impact Statement

CALL FOR INFORMATION AND NOMINATIONS

Purpose of Call

The purpose of the Call is to assist the Secretary of the Interior in carrying out his responsibilities under the Outer Continental Shelf Lands Act (OCSLA) (43 U.S.C. 1331-1356 (1982)), as amended by the OCSLA Amendments of 1985 (100 Stat. 147), and the regulations issued thereunder (30 CFR Part 256) with regard to proposed OCS Lease Sale 121 in the Mid-Atlantic Planning Area tentatively scheduled for October 1989.

As a preliminary step to the Call, the Minerals Management Service (MMS) published a Request for Interest in the Federal Register on May 29, 1987, requesting information on oil and gas industry interest in leasing and exploring within the Mid-Atlantic Planning Area. A number of companies provided information. Based on the information provided, it was determined that sufficient interest exists to proceed with the issuance of a Call at this time. This information, along with the information provided in response to this Call, will be used in decisions whether to proceed with the lease sale process. This Call does not indicate a preliminary decision to lease in the areas described below.

Information submitted in response to this Call will be used for several purposes. First, responses will be used to identify the areas of potential for oil and gas development. Second, comments on possible adverse effects and use conflicts will be used in the analysis of environmental impacts in and near the Call area. Together these two considerations will allow a preliminary determination of the potential advantages and disadvantages of oil and gas exploration and development to the region and the Nation. This will make possible key decisions in connection with the next step in the leasing process--Area Identification--to further resolve conflicts by deferring blocks where there is sufficient information to justify that action. However, the Area Identification represents only a preliminary step to select the area to be analyzed in the Environmental Impact Statement (EIS). The Area Identification is scheduled for December 1987.

A third purpose for this Call is to solicit comments as part of the scoping process for the EIS. Also included in the scoping process will be a series of public meetings and an additional formal written comment period. A Notice of Intent to Prepare an EIS and a more detailed description of the scoping process for this proposed sale is included below. As a result of the scoping process, a number of alternatives to the proposed action will be identified and analyzed in the EIS. Fourth, comments may be used in developing lease terms and conditions to assure safe offshore operations. Fifth, comments may be used in understanding and considering ways to avoid or mitigate potential conflicts between offshore oil and gas activities and the Coastal Management Plans (CMP's) of affected States.

The Call area includes blocks in several military operating areas, submarine transit lanes, and shipping traffic lanes. Presale consultation with the Department of Defense and the U.S. Coast Guard will occur during the comment period for this Call. Blocks presenting defense or navigation related multiple-use conflicts, which cannot be otherwise mitigated, may be deleted at the Area Identification stage.

Areas Deferred or Highlighted in the 5-Year Program Approval Process

- The U.S.S. Monitor National Marine Sanctuary and Buffer Zone (deferred)

- The National Aeronautics and Space Administration Wallops Island Flight Center operating area (deferred except 19 blocks of interest highlighted for special consideration (see p.4))

- A minimum of 15 nautical miles or, where further, offshore areas of low potential (deferred)

Previous Sale Related Activities

Mid-Atlantic acreage has been offered for lease in seven previous sales. Four of these were Mid-Atlantic sales. The first was Sale 40, held on August 17, 1976, and the last was Sale 76, held on April 26, 1983. Additionally, two South Atlantic OCS lease sales and one reoffering sale contained acreage now situated within the Mid-Atlantic Planning Area. The U.S. Treasury has received almost $2 billion for the 272 leases issued as a result of these lease sales. A total of 200 leases have been relinquished or have expired, leaving 72 active Mid-Atlantic leases.

The last proposed lease sale in this area, Sale 111, was cancelled on June 13, 1986, following a determination that there was little industry interest in a sale at that time.

There have been 32 exploratory wells drilled in this area resulting in 27 dry holes and five discoveries. In addition, two COST (Continental Offshore Stratigraphic Test) wells were drilled. The five discoveries were considered noncommercial and were not developed at that time. All 34 wells have been plugged and abandoned.

Description of the Area

The general area of this Call is offshore the States of Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, Virginia, and North Carolina. The area is shown in detail on the Call map available free from the Regional Supervisor, Leasing and Environment, Atlantic OCS Region, Minerals Management Service, 1951 Kidwell Drive, Suite 601, Vienna, Virginia 22180, telephone (703) 285-2165. The following list identifies the Official Protraction Diagrams and blocks comprising the Call area. Existing leases are included in the Call since they may expire or be relinquished before the proposed sale. These diagrams may be purchased for $2.00 each from the Regional Supervisor, Leasing and Environment, at the above address (checks or drafts payable to the U.S. Department of the Interior--MMS).

Instructions on Call

Respondents are asked to nominate blocks within the Call area that they would like to see included in proposed OCS Lease Sale 121. Although the identities of those submitting nominations become a matter of public record, the individual indications of interest are considered to be proprietary information. Those indicating such interest are required to do so on the Call map by outlining the area(s) of interest along block lines.

VOL 52 ISS 189 SE 30 1987 UMI

A detailed list of whole and partial blocks nominated (by Official Protraction Diagram designations) should be submitted to ensure correct interpretation of nominations. The telephone number and name of a person to contact in the respondent's organization for additional information should be included.

Respondents should rank areas in which they have expressed interest according to priority of their interest (e.g., priority 1 (high), 2 (medium), or 3 (low)). We encourage respondents to be specific in indicating blocks by priority. This information is very helpful in assessing the area to be identified for further study at future sale decision points. Blanket nominations on large areas are not as useful in providing information pertinent to analysis of industry interests. Areas where interest has been indicated but on which respondents have not indicated priorities will be considered priority 3. Information concerning both location and priority of interest submitted by individual respondents will be held proprietary. In addition to indications of interest by respondents, further consideration of areas for analysis in the EIS will be based on hydrocarbon potential and environmental, economic, and multiple-use conditions.

The Call map outlines the MMS interpretation of the area of hydrocarbon potential and identifies the highlighted area that will be subject to special consideration. While primary consideration will be given to the area of hydrocarbon potential (as outlined on the Call map), respondents may nominate and comment on any acreage within the Call area. Commenters who recommend that all or portions of the highlighted area or other parts of the Call area be deferred from Sale 121 should be as specific as possible in describing why they believe those areas are incompatible with offshore oil and gas drilling and production operations. Such information will be helpful in designing and analyzing deferral alternatives.

Comments or suggestions are requested on the following:

- -technology that is presently available or anticipated for exploration and development operations in deepwater areas.
- -procedures which may lead to enhanced understanding of the oil and gas resources of the Mid-Atlantic OCS.
- -particular geologic, environmental, biological, archaeological, or socioeconomic conditions or conflicts or other information which might bear upon potential leasing and development in particular areas.

VOL 52 ISS 189 SEP 30 1987 UMI

-potential conflicts that may result from future oil and gas activities resulting from this sale and approved State and local CMP's. If possible, these comments should identify specific CMP policies, the nature of the conflicts foreseen, and steps that MMS can take to avoid or mitigate potential conflict. Comments may either be in terms of broad areas or restricted to particular blocks. Those submitting comments are requested to outline the subject area on the standard Call map.

Indications of interest and comments should be received within 45 days following publication of this Call in the Federal Register to ensure inclusion in the decision process for Area Identification. Responses should be sent in envelopes labeled "Nominations for Proposed Lease Sale 121, Mid-Atlantic" or "Comments on the Call for Information and Nominations for Proposed Lease Sale 121, Mid-Atlantic," as appropriate.

The original Call map and indications of interest and/or comments must be submitted to the Regional Supervisor, Leasing and Environment, at the address stated under "Description of Area." A copy of the Call map showing interest and any comments should also be sent to the Chief, Offshore Leasing Management Division, U.S. Department of the Interior, MMS, Room 4230, 18th and C Streets, NW., Washington, D.C. 20240.

Tentative Schedule

Final delineation of the area for possible leasing will be made at a later date and in accordance with established departmental procedures and applicable laws, including all requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321) and the OCSLA, as amended. If a decision to offer blocks is made, a notice of Availability of the Proposed Notice of Sale and a final Notice of Sale will be published in the Federal Register detailing areas to be offered for competitive bidding, stating the terms and conditions for leasing, and announcing the location, date, and time bids will be received and opened.

The following is a list of tentative milestones which will precede the sale:

Milestones	Date
Comments Due on the Call	November 1987
Area Identification	December 1987
Draft EIS Published	September 1988

Public Hearings on Draft EIS	October 1988
Final EIS Published	March 1989
Proposed Notice of Sale Issued	May 1989
Governor's Comments Due on Proposed Notice	July 1989
Final Notice of Sale Published	September 1989
Sale	October 1989

Existing Information

Information already available for the Call area includes the results of studies and EIS analyses conducted in conjunction with previous sales and the results of past exploration activities in this planning area. Also available is information gathered during the EIS and decision processes for the 1980, 1982, and the current 5-Year OCS Oil and Gas Leasing Program. In addition, comments previously received by the Department of Interior (DOI) from State and local governments, other Federal Agencies, environmental groups, and the oil and gas industry concerning past OCS actions will be used.

An extensive environmental studies program has been underway in this area since 1973 (see Environmental Studies Program Information in the Atlantic OCS Region, below). Additional information will be available to the DOI for consideration regarding the proposed OCS Lease Sale 121. For example, six Atlantic OCS Indices (1975-1986), eight Summary Reports (1979-1986), and various geology reports have been prepared for this planning area.

Environmental Studies Program Information in the Atlantic OCS Region

The DOI initiated the Environmental Studies Program in 1973. The emphasis has been on geological mapping, environmental characterization of biologically sensitive habitats, physical oceanography, ocean circulation modeling, and ecological effects of oil and gas activities. These studies provide useful information for a number of environmental issues, including topographic features, deepwater biological communities on the continental slope, and major circulation patterns on the continental shelf and slope.

A complete listing of available studies reports and information on ordering copies can be obtained from the Atlantic OCS Region at the address stated under "Description of Area," or by telephone at (703)285-2728. In addition, a status

report for active studies in this area can be obtained from the Chief, Environmental Studies and Leasing Section, Atlantic OCS Region, at this same address.

NOTICE OF INTENT TO PREPARE AN ENVIRONMENTAL IMPACT STATEMENT

Purpose of Notice of Intent

Pursuant to the regulations implementing the procedural provision of the National Environmental Policy Act of 1969 (42 U.S.C. 4321), the MMS is announcing its intent to prepare an EIS, subsequent to Area Identification, regarding the oil and gas leasing proposal known as Mid-Atlantic OCS Lease Sale 121. The Notice of Intent also serves to announce the scoping process which will be followed for this EIS. Throughout the scoping process, Federal, State, and local governments and other interested parties aid the MMS in determining the significant issues and alternatives to be analyzed in the EIS.

The EIS analysis will focus on the potential environmental effects of leasing, exploration, and development of the blocks included in the area defined in the Area Identification procedure as the proposed area of the Federal action. Alternatives to the proposal which may be considered are to delay the sale, cancel the sale, or modify the sale.

Instructions on Notice of Intent

Federal, State, and local governments and other interested parties are requested to send their written comments on the scope of the EIS, significant issues which should be addressed, and alternatives which should be considered to the Regional Supervisor, Leasing and Environment, Atlantic OCS Region, at the address stated under Description of Area above. Comments should be enclosed in an envelope labeled "Comments on the Notice of Intent to Prepare an EIS on the proposed Mid-Atlantic Lease Sale 121." Comments are due no later than 45 days from publication of this notice. Also, scoping meetings will be held in appropriate locations for the purpose of obtaining additional comments and information regarding the

VOL 52 ISS 189 SE 30 1987 UMI

scope of the EIS. The times and locations of these scoping meetings will be announced at a future date in the Federal Register and by press release.

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Parts 1 and 5

[Docket No. 70754-7154]

Miscellaneous Amendments of Patent Rules

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Patent and Trademark Office proposes amendments to the rules of practice in patent cases, Parts 1 and 5 of Title 37, Code of Federal Regulations, (1) to bring the rule relating to swearing back of a reference into conformity with current interference practice; (2) to limit the length of the appellant's brief and reply brief in an *ex parte* appeal, and require that the brief contain certain specific items; (3) to reset the time period for requesting an oral hearing in *ex parte* appeals where the examiner's answer states a new ground of rejection; (4) to clarify the procedure following a final rejection after a remand to the examiner under § 1.196(b)(1); (5) to give the examiner-in-chief the authority to decide certain requests for access by an interference party; (6) to clarify the rule relating to access to pending or abandoned applications; (7) to modify the rules concerning requests for interference with an application or patent; (8) to amplify the rule concerning the requirements of a motion to declare an additional interference; (9) to more clearly define the application of interference estoppel; (10) to make more comprehensive the rule concerning the filing of a reissue application by a patentee involved in an interference; and (11) to conform the rule concerning applications under secrecy order to current interference practice.

DATES: Comments and suggestions should be received by December 1, 1987. A public hearing will be held on December 9, 1987, beginning at 9:00 a.m.; requests to make oral presentations at the hearing should be received on or before December 1, 1987.

ADDRESSES: Address written comments to Box Interference, Commissioner of Patents and Trademarks, Washington, DC 20231. The public hearing will be held in Room 11C10, Crystal Plaza Building 3, 2021 Jefferson Davis Highway, Arlington, Virginia. Written comments and a transcript of the public hearing will be available for public inspection in Room 10C01, Crystal Gateway II, 1225 Jefferson Davis Highway, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Saul I. Serota by telephone at (703) 557-4072 or Ian A. Calvert by telephone at (703) 557-4000 or by mail marked to the attention of either and addresed to Box Interference, Commissioner of Patents and Trademarks, Washington, DC 20231.

SUPPLEMENTARY INFORMATION:

(1) Swearing Back of a Reference

The Patent and Trademark Office published its notice of final rule amending the rules of practice in patent interference cases in the **Federal Register** of December 12, 1984 (49 FR 48416 through 48471) and in the Official Gazette of January 29, 1985 (1050 O.G. 385 through 440). Included in the rules adopted was § 1.601(n), which defines "same patentable invention."

Section 1.131(a), if amended as proposed, would insert "the same patentable invention, as defined in § 1.601(n), as" before the phrase "the rejected invention". The amendment does not change the present practice where the inventor of the rejected claim, the owner of a patent under reexamination, or the person qualified under §§ 1.42, 1.43 or 1.47 can swear behind a domestic patent which disclose but does not claim the same invention as the rejected invention, a foreign patent or a printed publication. Rather, the amendment is necessary to define precisely the term "does not claim the rejected invention." See *In re Eickmeyer*, 602 F.2d 974, 202 USPQ 655 at 661 (CCPA 1979) where the Court stated:

> * * * we conclude that the phrase "does not claim the rejected invention" should be construed favorably to an applicant, if possible, so that unless the applicant is clearly *claiming the same invention* as the U.S. patent reference, he will not lose his rights under Rule 131. [Emphasis added.]

and also expressed its dissatisfaction with the PTO for

> * * * leaving an applicant in a position where he cannot overcome the reference claims by a 131 affidavit because the PTO has decided that the reference claims his invention, while at the same time, he is denied an interference because the PTO has decided that the claims of his application and those of the reference are not for substantially the same invention.

Possibly because of this decision, some patent practitioners seem to have been of the opinion that an affidavit under 37 CFR 1.131 can be used to overcome a rejection on a domestic patent so long as there is no verbatim correspondence between the claims of the application or the patent under reexamination rejected on that domestic patent and the claims of the domestic patent.

Such an opinion is not in accord with the law expressed in such cases as *In re Clark*, 53 CCPA 954, 457 F.2d 1004, 173 USPQ 359 (1972); *In re Hidy*, 49 CCPA 1152, 303 F.2d 954, 133 USPQ 650 (1962); *In re Teague*, 45 CCPA 877, 254 F.2d 145, 117 USPQ 284 (1958); and *in re Ward*, 43 CCPA 1007, 236 F.2d 428, 111 USPQ 101 (1956). In *In re Hidy*, supra, 133 USPQ at 652, the Court stated:

> A Rule 131 affidavit is ineffective to overcome a United States patent, not only where there is a verbatim correspondence between claims of the application and of the patent, but also where there is no patentable distinction between the respective claims. *In re Wagenhorst*, 20 CCPA 829, 62 F.2d 831, 16 USPQ 126; *In re Teaque*, 45 CCPA 877, 254 F.2d 145, 117 USPQ 284.

If the application (or patent under reexamination) and the domestic patent contain claims which are identical, or which are not patentably distinct, then the application and patent are claiming the "same patentable invention," defined by § 1.601(n) as follows:

> Invention "A" is the "same patentable invention" as an invention "B" when invention "A" is the same as (35 U.S.C. 102) or is obvious (35 U.S.C. 103) in view of invention "B" assuming invention "B" is prior art with respect to invention "A".

As provided in § 1.601(i), an interference may be declared whenever an examiner is of the opinion that an application and a patent contain claims for the "same patentable invention." The purpose of the proposed amendment to § 1.131(a) is to insure that an applicant who is claiming an invention which is identical to, or obvious in view of, the invention claimed in a domestic patent cannot employ an affidavit under § 1.131 as a means for avoiding an interference with the patent. To allow an applicant to do so would result in the issuance of two patents to the same invention.

Section 1.131(b), if amended as proposed, would insert in the first sentence thereof the language, "prior to" before the words "said date". This amendment makes clear that the showing of facts under § 1.131(b) must establish due diligence from a date prior to the effective date of the reference to affiant's subsequent reduction to practice or to the filing of his application as set forth in *In re Mulder*, 716 F.2d 1542, 219 USPQ 189 (Fed. Cir. 1983).

(2) Appellant's Brief and Reply Brief

A. Limitation on Length

Section 1.192(a), if amended as proposed, would delete the last sentence and insert the following sentence after the first sentence: "If the brief exceeds

30 pages, in addition to the appendix required by paragraph (c)(7) of this section, it will be returned to the appellant."

Section 1.193(b), if amended as proposed, would insert the following as the third sentence: "If the reply brief exceeds 15 pages, or the examiner determines that it is not directed only to new points of argument raised in the examiner's answer, the examiner will so notify the appellant and at the same time return the reply brief to the appellant."

The last sentence of § 1.192(a) is proposed to be deleted in view of the proposed addition of paragraph (c), which would impose more specific requirements for the contents of the brief.

The sentences proposed to be added to §§ 1.192(a) and 1.193(b) would limit the length of an appellant's brief and reply brief in an *ex parte* appeal to 30 and 15 pages, respectively, by providing that briefs or reply briefs which exceed these limits will be returned. These numbers of pages are for pages which comply with the requirements of 37 CFR 1.52. In determining whether a brief exceeds the 30-page limit, the pages of the appendix required by proposed § 1.192(c)(7) would not be counted.

While the length of the majority of briefs and reply briefs filed in *ex parte* appeals is substantially less than the 30- and 15-page limits proposed, in some instances briefs and reply briefs greatly exceed these limits. In many instances, these lengthy briefs and reply briefs are unnecessary; rather than focusing upon the issues involved in the appeal, they are verbose and repetitious, beclouding the issues and taking up an inordinate amount of the time spent by the examiner and examiners-in-chief in considering the appeal. The page limits set in proposed §§ 1.192(a) and 1.193(b) are intended to eliminate such lengthy briefs and reply briefs while at the same time giving appellants adequate scope to fully develop their arguments.

The proposed amendment to § 1.193(b) would also provide for return of the reply brief to the appellant if the examiner determines that the reply brief did not comply with the requirement of § 1.193(b) that it be limited to any new points of argument raised in the examiner's answer.

B. Contents of the Main Brief

Section 1.192, if amended as proposed, would add paragraphs (c) and (d). Paragraph (c) lists a number of items which would have to be included in the appellant's brief, while paragraph (d) would permit dismissal of the appeal for failure to include any of the items required by paragraph (c), in the order specified in paragraph (c). Paragraph (d) would also add the following sentence: "Any arguments or authorities not included in the brief may be refused consideration by the Board of Patent Appeals and Interferences." This sentence emphasizes that all arguments and authorities which an appellant wishes the Board to consider must be included in the brief. It should be noted that arguments not presented in the brief and made for the first time at oral hearing are not entitled to consideration. *In re Chiddix*, 209 USPQ 78 (Comr. 1980); *Rosenblum v. Hiroshima*, 220 USPQ 383 (Comr. 1983).

Proposed paragraph (c) would require that the brief contain, in order, seven specific items. This proposed requirement arose from the recommendations of a committee which was appointed by the Commissioner of Patents and Trademarks in 1986 to study and report on alternatives for reducing the backlog of *ex parte* appeals at the Board of Patent Appeals and Interferences. One of the committee's recommendations was the § 1.192 be amended to require that the appellant's brief include certain items. Items (3), (4), (5) and (6) of proposed § 1.192(c) are based upon the committee's recommendations. The committee indicated that the inclusion of those items in the brief would crystallize the issues involved in the appeal. By eliminating inadequate briefs, the Board of Patent Appeals and Interferences would not need to engage in what might be called "*de novo*" examination of a patent application, but rather could confine its activities to review of the appealed rejections.

The committee also recommended that certain items be required to be included in the examiner's answer. It is expected that the Manual of Patent Examining Procedure will be amended to require that the examiner's answer contain these and other items, substantially as indicated in Appendix A.

In addition to the committee's recommendations, some of the proposed items are supported by the evaluation of selected practices conducted as a part of the PTO's Quality Reinforcement Program. A summary of the results of that evaluation is published at 1078 Official Gazette 22 (May 19, 1987).

The specific items required by proposed § 1.192(c) are:

(1) A statement of the status of all the claims in the application, or patent under reexamination, i.e., for each claim in the case, appellant should state whether it is cancelled, allowed, rejected, etc. Each claim on appeal must be identified.

(2) A statement of the status of any amendment filed subsequent to final rejection, i.e., whether or not the amendment has been acted upon by the examiner, and if so, whether it was entered, denied entry, or entered in part.

Items (1) and (2) are included in proposed § 1.192(c) because in the past confusion has sometimes arisen as to which claims are on appeal, and the precise wording of those claims, particularly where the appellant has sought to amend claims after final rejection. The inclusion of items (1) and (2) in the brief would advise the examiner of what the appellant considers the status of the claims and post-final rejection amendments to be, allowing any disagreement on these questions to be resolved before the appeal was taken up for decision by the Board of Patent Appeals and Interferences.

(3) A concise explanation of the invention defined in the claims involved in the appeal. This explanation would be required to refer to the specification by page and line number, and, if there were a drawing, to the drawing by reference characters. Where applicable, it would be preferable to read the appealed claims on the specification and any drawing.

(4) A concise statement of the issues presented for review. Each stated issue would correspond to a separate ground of rejection which appellant wished the Board of Patent Appeals and Interferences to review. While the statement of the issues would have to be concise, it could not be so concise as to omit the basis of each issue. For example, the statement of an issue as "Whether claims 1 and 2 are unpatentable" would not comply with proposed § 1.192(c)(4). Rather, the basis of the alleged unpatentability would have to be stated, e.g., "Whether claims 1 and 2 are unpatentable under 35 U.S.C. 103 over Smith in view of Jones", or "Whether claims 1 and 2 are unpatentable under 35 U.S.C. 112, first paragraph, as being based on a non-enabling disclosure." The statement would be limited to the issues presented, and should not include any argument concerning the merits of those issues.

(5) If an appealed ground of rejection applied to more than one claim and appellant considered the rejected claims to be separately patentable, proposed § 1.192(c)(5) would require appellant to state that the claims do not stand or fall together, and the reasons why they were considered separately patentable. The absence of such a statement would be

52
ISS
189
SE
30
1987
UMI

taken by the PTO as a concession by the applicant that, if the ground of rejection were sustained as to any one of the rejected claims, it would be equally applicable to all of them. Proposed § 1.192(c)(5) continues the current practice of the Board of Patent Appeals and Interferences, and is consistent with the practice of the Court of Appeals for the Federal Circuit indicated in such cases *In re Sernaker*, 702 F.2d 989, 217 USPQ 1 (Fed. Cir. 1983), and *In re King*, 801 F.2d 1324, 231 USPQ 136 (Fed. Cir. 1986).

(6) The appellant's contentions with respect to each of the issues presented for review in proposed § 1.192(c)(4), and the basis for those contentions, including citations of authorities, statutes, and parts of the record relied on. Included in this proposed paragraph are five subparagraphs, (i) to (v). Subparagraphs (i) to (iv) concern the grounds of rejection most commonly involved in *ex parte* appeals, namely, 35 U.S.C. 112, first and second paragraphs, 35 U.S.C. 102, and 35 U.S.C. 103. Subparagraph (v) is a general provision concerning grounds of rejection not covered by subparagraphs (i) to (iv).

The purpose of subparagraphs (i) to (iv) is to insure that the appellant's argument concerning each appealed ground of rejection will include a discussion of the questions relevant to that ground. It is believed that compliance with the requirements of the particular subparagraphs which are pertinent to the grounds of rejection involved in an appeal would be beneficial both to the PTO and to appellants. It would not only facilitate a decision by the Board of Patent Appeals and Interferences by enabling the Board to determine more quickly and precisely the appellant's position on the relevant issues but also would help appellants to focus their arguments on those issues.

For each rejection not falling under subparagraphs (i) to (iv), proposed subparagraph (v) provides that the argument should specify the specific limitations in the rejected claims, if appropriate, or other reasons, which cause the rejection to be in error. This proposed language recognizes that for some grounds of rejection, it may not be necessary to specify particular claim limitations; for example, a rejection under 35 U.S.C. 101, as in *Ex parte Hibberd*, 227 USPQ 443 (BPAI 1985), or a rejection for violation of the duty of disclosure under 37 CFR 1.56(d), as in *Ex part Harita*, 1 USPQ2d 1887 (BPAI 1986).

(7) An appendix containing a copy of the claims involved in the appeal.

C. Contents of Reply Brief

Section 1.193(b), if amended as proposed, would insert the following as the second sentence: "The new points of argument shall be specifically identified in the reply brief."

Since the reply brief must be limited to any new points of argument raised in the examiner's answer, compliance with the requirement of this proposed sentence would facilitate both preparation of the reply brief by appellant and consideration of the reply brief by the PTO.

The final sentence of § 1.193(b), if amended as proposed, would provide that the reply may be accompanied by, rather than include, any amendment or material appropriate to the new ground of rejection. This proposed change in the rule makes clear that the amendment or other material must be presented in a separate paper, rather than in the reply itself.

(3) Time Period for Requesting an Oral Hearing

Section 1.194(b), if amended as proposed, would add the following sentence after the first sentence: "If the examiner's answer states a new ground of rejection and if appellant files a reply as provided by § 1.193(b), then the written request must be made within three months after the date of the filing of the reply."

The present rule does not provide the appellant an additional time period for requesting an oral hearing in the event that the examiner's answer states a new ground of rejection. If an answer states a new ground of rejection, § 1.193(b) provides that appellant's reply may also include any amendment or material appropriate to the new ground of rejection. However, under § 1.194(b) appellant must file the request for oral hearing within one month after the date of the answer whereas the reply thereto must be filed within two months from the date of the answer. Consequently, appellant must file a request for oral hearing before having the benefit of the examiner's views, if any, with respect to the reply.

Although the examiner does not normally issue a supplemental answer in response to a reply, see Manual of Patent Examining Procedure § 1208.01 (5th Ed., Aug. 1983), the proposed amendment to § 1.194(b) would permit the appellant to postpone filing a request for an oral hearing until three months after the date the reply is filed. This will give the appellant time to receive the examiner's response, if any, to the reply before the appellant has to decide whether to request an oral hearing.

(4) Procedure Following Final Rejection, Remand Under § 1.196(b)

Section 1.196(b)(1), if amended as proposed, would add the following sentence as the penultimate sentence of the section: "Should the examiner make the rejection final the applicant may again appeal to the Board of Patent Appeals and Interferences."

Under § 1.196(b), the Board of Patent Appeals and Interference may, in its decision on an *ex parte* appeal, make a new rejection of one or more appealed claims, in which case the appellant has the option of (1) submitting an appropriate amendment of the rejected claims, and/or a showing of facts, (2) requesting reconsideration, or (3) treating the decision as a final decision. If the appellant elects option (1), the case is remanded to the examiner for consideration. If the examiner does not consider that the amendment and/or showing of facts overcome the rejection, he or she will make the rejection final.

An applicant in whose application such a final rejection has been made may mistakenly believe that he or she is entitled to review of the final rejection by the Board of Patent Appeals and Interferences by virtue of the fact that the application was previously on appeal. The proposed amendment would correct this belief by making clear that after such a final rejection, an applicant who desires further review of the matter must file a new appeal to the Board of Patent Appeals and Interferences. The language of the proposed amendment is similar to the fourth sentence of § 1.196(d).

(5) Request for Access by Interference Party

Section 1.612(a), if amended as proposed, would add the following sentence as the last sentence of the section: "A party seeking access to any abandoned or pending application referred to in the opposing party's involved application or access to any pending application referred to in the opposing party's patent must file a motion under § 1.635." The proposed amendment would require an interference party seeking access either to a pending or abandoned application referred to in an opposing party's involved application or to a pending application referred to in an opposing party's involved patent to file a motion under 37 CFR 1.635. Such a motion is decided by an examiner-in-chief (§ 1.640(b)).

Under the present practice, access can only be obtained by filing an *ex parte* petition to the Commissioner accompanied by the petition fee set forth in § 1.17(i) and normally no decision is rendered on the petition until after the opposing party has had an opportunity to respond to the petition. The proposed amendment would expedite the interference proceeding by eliminating the delays inherent in the petition process. By requiring the party seeking access to file a motion under § 1.635, that party would first have to confer with the opposing party in an effort to resolve the issue of access as required by § 1.637(b). The examiner-in-chief would not have to decide the issue unless it could not be resolved by the parties.

(6) Access to Applications

Section 1.14(e), if amended as proposed, would delete the word "of" from the phrase "or of any papers relating thereto" and would add a reference to § 1.612(a) by adding the following sentence as the last sentence thereof: "See § 1.612(a) for access by an interference party to a pending or an abandoned application."

Section 1.14(e) as presently worded appears to limit a request by a member of the public to copies of, but not access to, any papers relating to any pending or abandoned application. Any such limitation was unintentional. The amended language will permit a member of the public to request both access to and copies of those papers.

(7) Request for Interference with an application or Patent

Sections 1.604(a) and 1.607(a), if amended as proposed, would provide for the situation in which a patent applicant requests an interference with another application or patent, respectively, on the basis of one or more claims which are already present in his or her application. The present rules require that when an applicant seeks an interference with another application or an unexpired patent, he or she must present a claim corresponding to the proposed count. The proposed rules would eliminate this requirement if a claim or claims corresponding to the proposed count are already in the application, and the applicant identifies them as such.

(8) Motion to Declare Additional Interference

Section 1.637(e)(1)(vi), if amended as proposed, would clearly state that a motion to declare an additional interference under 37 CFR 1.633(e)(1) between an additional application not involved in the interference and owned by a party and an opponent's application or patent involved in the interference shall designate the claims of the opponent's application or patent which define the same patentable invention defined by the proposed count or if the opponent's application does not contain any such claim, the moving party shall propose a claim to be added to the opponent's application. The present section states that when the opponent is a patentee, the motion shall designate the patent claims which define the same patentable invention defined by the proposed count. The present section does not require, although such a requirement is inferred from § 1.637(e)(2)(vi), that when the opponent is an applicant, the motion shall designate the application claims which define the same patentable invention defined by the proposed count or, if the opponent's application does not contain any such claim, the moving party shall propose a claim to be added to the opponent's application.

(9) Interference Estoppel

Section 1.658(c), if amended as proposed, would insert in the first sentence the language "by a motion under § 1.633(e)" after the words "(3) could have been properly raised" and substitute the language "on an invention which was claimed during the pendency of the original interference either (i) in the winning party's involved application or patent or (ii) in a noninvolved application owned by a losing party" for the words "with a motion under § 1.633(e)". In the second sentence, the language "who could have properly moved, but failed to move, under §§ 1.633 or 1.634" appearing after the words "losing party" would be deleted. Also in the second sentence, the language "that party's failure to properly move" would be deleted and the language "the issues settled by the judgement" inserted in its place. The proposed amendment incorporates into § 1.658(c) the guidelines set forth in the interference rules correction notice (50 Fed. Reg. 23122, May 31, 1985, 1059 Official Gazette 27, October 22, 1985) for the application of the doctrine of interference estoppel under 37 CFR 1.658(c) with respect to a losing party's failure to move under 37 CFR 1.633(e) to declare an "additional interference" between an additional application not involved in the interference and owned by the party and an opponent's application or patent involved in the interference on a separate patentable invention. The correction notice states that generally a losing party will be estopped for failure to move when the spearate patentable invention (subject matter) which could have been the subject of the "additional interference" as *claimed* (during the pendency of the interference) (1) in the opponent's involved application or patent or (2) in a non-involved application owned by the party during the pendency of the interference. Should a losing party after the termination of the interference acquire an application which discloses or claims the separate patentable invention and which could have been the subject of the "additional interference", estoppel would not apply because the party did not own the application during the pendency of the interference.

The correction notice illustrates the general applicability of interference estoppel in certain situations where a losing party fails to move under § 1.633(e) to declare an "additional interference" on a separate patentable invention as follows:

Losing party's non-involved application	Winning opponent's involved application or patent	Estoppel
Claimed	Claimed	Yes
Disclosed	Claimed	Yes
Claimed	Disclosed (Application).	Yes
	(Patent)	No*
Disclosed	Disclosed	No

* An invention disclosed and not claimed in a winning opponent's *patent* would not form the basis for a count because the patent does not contain a claim which can be designated to correspond to the count. Thus, a motion to declare an additional interference under § 1.633(e) could not have been properly brought, and interference estoppel therefore would not apply.

(10) Filing of Reissue Application During Interference

Section 1.662(b), if amended as proposed, would insert a comma after § 1.633(h)" and add the language "or would not be appropriate" at the end of the last sentence. The present rule contemplates that a reissue application may be filed by a patentee involved in an interference only for one of two reasons: either for the purpose of avoiding the interference, or for some other purpose relating to the interference, e.g., to add claims corresponding to a proposed new count. In the first case, judgment would be entered against the patentee, and in the second case, a motion under § 1.633(h) to add the reissue application to the interference would be appropriate.

VOL
52
ISS
189
SE
30
1987
UMI

However, it has been found that a patentee involved in an interference may file a reissue application for some other reason not contemplated by the rule, and for which the entry of judgment or a motion under § 1.633(h) would not be appropriate. For example, the patentee might file a reissue application for the purpose of amending claims of the patent which are directed to an invention which is patentably distinct from the issue of the interference and which is not disclosed by the opposing party. In such a situation, addition of the reissue application to the interference would be unnecessary. The proposed amendment of § 1.662(b) would accommodate this third possibility by providing that, instead of filing a motion under § 1.633(h) to add the reissued application to the interference, a patentee could show good cause why such a motion would not be appropriate under the particular circumstances involved.

(11) Applications Under Secrecy Order

Section 5.3(b), if amended as proposed, would delete the language "under secrecy order copies claims from an issued patent" and insert in its place the language "is under secrecy order seeks to provoke an interference with an issued patent" to make the section's language consistent with that of § 1.607(d). In addition, it is proposed to correct the reference to "§ 1.205(c)" to read " § 1.607(d)"

Environmental, Energy and Other Considerations

The proposed rule change will not have a significant impact on the quality of the human environment or conservation of energy resources.

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, Executive Order 12291, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce certified to the Small Business Administration that the proposed rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)), because it is intended to expedite the disposition of appeals and to simplify by clarification and amplification certain of the rules governing the conduct of an interference. The expedited disposition of appeals will permit the small entity to make earlier business decisions which may be affected by a pending appeal. The effect of the clarification and amplification of the rules relating to interferences will be to reduce the costs associated with involvement in an interference.

The Patent and Trademark Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since no significant additional record keeping or reporting requirements are placed upon the public.

List of Subjects in 37 CFR Parts 1 and 5

Administrative practice and procedure, Authority delegations (government agencies), Conflict of interests, Courts, Inventions and patents, Lawyers.

Notice is hereby given that, pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, the patent and Trademark Office proposes to amend Title 37 of the Code of Federal Regulations as set forth below. It is proposed to amend 37 CFR, Parts 1 and 5, as follows with deletions indicated by brackets and additions by arrows.

PART 1—RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.14 is proposed to be amended by revising paragraph (e) to read as follows:

§ 1.14 Patent applications preserved in secrecy.

* * * * *

(e) Any request by a member of the public seeking access to, or copies of, any pending or abandoned application preserved in secrecy pursuant to paragraphs (a) and (b) of this section, or [of] any papers relating thereto, must (1) be in the form of a petition and be accompanied by the petition fee set forth in § 1.17(i) or (2) include written authority granting access to the member of the public in that particular application from the applicant or the applicant's assignee or attorney or agent of record. ►see § 1.612(a) for access by an interference party to a pending or abandoned application.◄

3. Section 1.131 is proposed to be revised to read as follows:

§ 1.131 Affidavit for declaration of prior invention to overcome cited patent or publication.

(a) When any claim of an application or a patent under reexamination is rejected on reference to a domestic patent which substantially shows or describes but does not claim ►the same patentable invention, as defined in § 1.601(n), as◄ the rejected invention, or on reference to a foreign patent or to a printed publication, and the inventor of the subject matter of the rejected claim, the owner of the patent under reexamination, or the person qualified under §§ 1.42, 1.43 or 1.47, shall make oath or declaration as to facts showing a completion of the invention in this country before the filing date of the application on which the domestic patent issued, or before the date of the foreign patent, or before the date of the printed publication, then the patent or publication cited shall not bar the grant of a patent to the inventor or the confirmation of the patentability of the claims of the patent, unless the date of such patent or printed publication is more than one year prior to the date on which the inventor's or patent owner's application was filed in this country.

(b) The showing of facts shall be such, in character and weight, as to establish reduction to practice prior to the effective date of the reference, or conception of the invention prior to the effective date of the reference coupled with due diligence from ►prior to◄ said date to a subsequent reduction to practice or to the filing of the application. Original exhibits of drawings or records, or photocopies thereof, must accompany and form part of the affidavit or declaration or their absence satisfactorily explained.

4. Section 1.192 is proposed to be amended by revising paragraph (a) and adding new paragraphs (c) and (d) to read as follows:

§ 1.192 Appellant's brief.

(a) The appellant shall, within 2 months from the date of the notice of appeal under § 1.191 in an application, reissue application, or patent under reexamination, or within the time allowed for response to the action appealed from, if such time is later, file a

brief in triplicate. ►If the brief exceeds 30 pages, in addition to the appendix required by paragraph (c)(7) of this section, it will be returned to the appellant.◄ The brief must be accompanied by the requisite fee set forth in § 1.17(f) and must set forth the authorities and arguments on which the appellant will rely to maintain the appeal. [The brief must include a concise explanation of the invention which should refer to the drawing by reference characters, and a copy of the claims involved.]

* * * * * *

►(c) The brief shall contain the following items under appropriate headings and in the order here indicated:

(1) *Status of claims.* A statement of the status of all the claims, pending or cancelled, and identifying the claims appealed.

(2) *Status of amendments.* A statement of the status of any amendment filed subsequent to final rejection.

(3) *Summary of invention.* A concise explanation of the invention defined in the claims involved in the appeal, which shall refer to the specification by page and line number, and to the drawing, if any, by reference characters.

(4) *Issues.* A concise statement of the issues presented for review.

(5) *Grouping of claims.* For each ground of rejection which appellant contests and which applies to more than one claim, it will be presumed that the rejected claims stand or fall together unless a statement is included that the rejected claims do not stand or fall together, accompanied by reasons as to why appellant considers the rejected claims to be separately patentable.

(6) *Argument.* The contentions of the appellant with respect to each of the issues presented for review in paragraph (c)(4) of this section, and the basis therefor, with citations of the authorities, statutes, and parts of the record relied on. Each issue should be treated under a separate heading.

(i) For each rejection under 35 U.S.C. 112, first paragraph, the argument shall specify the errors in the rejection and how the first paragraph of 35 U.S.C. 112 is complied with, including, as appropriate, how the specification and drawings, if any, (A) describe the subject matter defined by each of the rejected claims, (B) enable any person skilled in the art to make and use the subject matter defined by each of the rejected claims, and (C) set forth the best mode contemplated by the appellant of carrying out his or her invention.

(ii) For each rejection under 35 U.S.C. 112, second paragraph, the argument shall specify the errors in the rejection and how the claims particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(iii) For each rejection under 35 U.S.C. 102, the argument shall specify the errors in the rejection and why the rejected claims are patentable under 35 U.S.C. 102, including any specific limitations in the rejected claims which are not described in the prior art relied upon in the rejection.

(iv) For each rejection under 35 U.S.C. 103, the argument shall specify the errors in the rejection and, if appropriate, the specific limitations in the rejected claims which are not described in the prior art relied on in the rejection, and shall explain how such limitations render the claimed subject matter unobvious over the prior art. If the rejection is based upon a combination of references, the argument shall explain why the references, taken as a whole, do not suggest the claimed subject matter, and shall include, as may be appropriate, an explanation of why features disclosed in one reference may not properly be combined with features disclosed in another reference. A general argument that all the limitations are not described in a single reference does not satisfy the requirements of this paragraph.

(v) For any rejection other than those referred to in paragraphs (c)(6) (i) to (iv) of this section, the argument shall specify the errors in the rejection and the specific limitations in the rejected claims, if appropriate, or other reasons, which cause the rejection to be in error.

(7) *Claims appealed.* An appendix containing a copy of the claims involved in the appeal.

(d) Failure to comply with any of the requirements of paragraph (c) of this section may result in dismissal of the appeal. Any arguments or authorities not included in the brief may be refused consideration by the Board of Patent Appeals and Interferences.◄

5. Section 1.193 is proposed to be amended by revising paragraph (b) to read as follows:

§ 1.193 Examiner's answer.

* * * * *

(b) The appellant may file a reply brief directed only to such new points of argument as may be raised in the examiner's answer, within one month from the date of such answer. ►The new points of argument shall be specifically identified in the reply brief. If the reply brief exceeds 15 pages, or the examiner determines that it is not directed only to new points of argument raised in the examiner's answer, the examiner will so notify the appellant and at the same time return the reply brief to the appellant.◄ [However, if] ►If◄ the examiner's answer states a new ground of rejection appellant may file a reply thereto within two months from the date of such answer; such reply may [include] ►be accompanied by◄ any amendment or material appropriate to the new ground.

6. Section 1.194 is proposed to be amended by revising paragraph (b) to read as follows:

§ 1.194 Oral hearing.

* * * * *

(b) If appellant desires an oral hearing, appellant must file a written request for such hearing accompanied by the fee set forth in § 1.17(g) within one month after the date of the examiner's answer. ►If the examiner's answer states a new ground of rejection and if appellant files a reply as provided for by § 1.193(b), then the written request must be made within three months after the date of the filing of the reply.◄ If appellant requests an oral hearing and submits therewith the fee set forth in § 1.17(g), an oral argument may be presented by, or on behalf of, the primary examiner if considered desirable by either the primary examiner or the Board.

* * * * *

7. Section 1.196(b)(1) is proposed to be revised to read as follows:

§ 1.196 Decision by the Board of Patent Appeals and Interferences.

* * * * *

(b) * * *

(1) The appellant may submit an appropriate amendment of the claims so rejected or a showing of facts, or both, and have the matter reconsidered by the examiner in which event the application will be remanded to the examiner and the decision of the Board of Patent Appeals and Interferences shall not be considered final for the purpose of judicial review. The statement shall be binding upon the examiner unless an amendment or showing of facts not previously of record be made which, in the opinion of the examiner, overcomes the new ground for rejection stated in the decision. ►Should the examiner make the rejection final the applicant may again appeal to the Board of Patent Appeals and Interferences.◄ When appropriate, upon conclusion of proceedings on remand before the examiner, the Board of Patent Appeals

and interferences may enter an order otherwise making its decision final.

* * * * *

8. Section 1.604(a) is proposed to be revised to read as follows:

§ 1.604 Request for interference between applications by an applicant.

(a) An applicant may seek to have an interference declared with an application of another by—

(1) Suggesting a proposed count and presenting [a] ►at least one◄ claim corresponding to the proposed count ► or identifying at least one claim in his or her application that corresponds to the proposed count◄,

(2) Identifying the other application and, if known, a claim in the other application which corresponds to the proposed count, and

(3) Explaining why an interference should be declared.

* * * * *

9. Section 1.607(a) is proposed to be revised to read as follows:

§ 1.607 Request by applicant for interference with patent.

(a) An applicant may seek to have an interference declared between an application and an unexpired patent by—

(1) ►Identifying the patent,

(2)◄ Presenting a proposed count ►

(3) identifying at least one claim in the patent corresponding to the proposed count, (4) presenting at least one◄ [and a] claim corresponding to the proposed count ► or identifying at least one claim already pending in his or her application that corresponds to the proposed count,◄ and, if any claim of the patent or application ►identified as corresponding to the proposed count◄ does not correspond exactly to the proposed count, explaining why [an interference should be declared, (2) identifying the patent and indicating which claim in the application and which claim or claims of the patent correspond to the proposed count] ►each such claim corresponds to the proposed count◄, and [3] ►(5)◄ applying the terms of ►and◄ [the] application claim ►(i) identified as ◄ corresponding to the count and (ii) not previously in the application◄ to the disclosure of the application.

* * * * *

10. Section 1.612(a) is proposed to be revised to read as follows:

§ 1.612 Access to applications.

(a) After an interference is declared, each party shall have access to and may obtain copies of the files of any application set out in the notice declaring the interference, except for affidavits filed under § 1.131 and any evidence and explanation under § 1.608 filed separate from an amendment. ►A party seeking access to any abandoned or pending application referred to in the opposing party's involved application or access to any pending application referred to in the opposing party's patent must file a motion under § 1.635.◄

* * * * *

11. Paragraph (e)(1)(vi) of § 1.637 is proposed to be revised to read as follows:

§ 1.637 Content of motions.

* * * * *

(e) * * *

(1) * * *

(vi) [When the opponent is a patentee, designate the claims of the patent which define the same patentable invention defined by the proposed count] ►Identify all claims in the opponent's application or patent which should be designated to correspond to each proposed count; if the opponent's application does not contain any such claim, the motion shall propose a claim to be added to the opponent's application.◄ * * *

* * * * *

12. Paragraph (c) of § 1.658 is proposed to be revised to read as follows:

§ 1.658 Final decision

* * * * *

(c) A judgment in an interference settles all issues which (1) were raised and decided in the interference, (2) could have been properly raised and decided in the interference by a motion under § 1.633 (a) through (d) and (f) through (j) or § 1.634 and (3) could have been properly raised ► by a motion under § 1.633(e) ◄ and decided in an additional interference [with a motion under § 1.633(e)] ► on an invention which was claimed during the pendency of the original interference either (i) in the winning party's involved application or patent or (ii) in a non-involved application owned by a losing party ◄. A losing party [who could have properly moved, but failed to move, under §§ 1.633 or 1.634] shall be estopped to take *ex parte* or *inter partes* action in the Patent and Trademark Office after the interference which is inconsistent with [that party's failure to properly move] ► the issues settled by the judgment ◄, except that a losing party shall not be estopped with respect to any claims which correspond, or properly could have corresponded, to a count as to which that party was awarded a favorable judgment.

13. Paragraph (b) of § 1.662 is proposed to be revised to read as follows:

§ 1.662 Request for entry of adverse judgment; reissue filed by patentee.

* * * * *

(b) If a patentee involved in an interference files an application for reissue during the interference and omits all claims of the patent corresponding to the counts of the interference for the purpose of avoiding the interference, judgment may be entered against the patentee. A patentee who files an application for reissue other than for the purpose of avoiding the interference shall timely file a preliminary motion under §1.633(h)►,◄ or show good cause why the motion could not have been timely filed ► or would not be appropriate ◄.

* * * * *

PART 5—SECRECY OF CERTAIN INVENTIONS AND LICENSES TO EXPORT AND FILE APPLICATIONS IN FOREIGN COUNTRIES

14. The authority citation for 37 CFR Part 5 would continue to read as follows:

Authority: 35 U.S.C. 6, 41, 181–188 and the Export Administration Act of 1979, as amended, the Arms Export Control Act, as amended, the Atomic Energy Act of 1954, as amended, and the Nuclear Non-Proliferation Act of 1978, and the delegations in the regulations under these acts to the Commissioner (15 CFR 370.10(j), 22 CFR 125.04, and 10 CFR 810.7).

15. Paragraph (b) of § 5.3 is proposed to be revised to read as follows:

§ 5.3 Prosecution of application under secrecy orders; withholding patent.

* * * * *

(b) An interference will not be declared involving national applications under secrecy order. However, if an applicant whose application [under secrecy order copies claims from] ► is under secrecy order seeks to provoke an interference with ◄ an issued patent, a notice of that fact will be placed in the file wrapper of the patent. (See [§ 1.205(c)] ► § 1.607(d) ◄).

* * * * *

Date: July 16, 1987.

Donald J. Quigg,

Assistant Secretary and Commissioner of Patents and Trademarks.

Note: This Appendix A will not appear in the code of Federal Regulations.

Appendix A—Proposed Requirements for Examiner's Answer

Chapter 1200 of the Manual of Patent Examining Procedure would be amended to require that the examiner's answer include, in the order indicated, the following items:

(1) *Status of claims.* A statement of whether the examiner agrees or disagrees

with the statement of the status of claims contained in the brief and a correct statement of the status of all the claims pending or cancelled, if necessary.

(2) *Status of Amendments.* A statement of whether the examiner agrees or disagrees with the statement of the status of amendments contained in the brief, and an explanation of any disagreement.

(3) *Summary of invention.* A statement of whether the examiner agrees or disagrees with the summary of invention contained in the brief, an explanation of why the examiner disagrees, and correct summary of invention, if necessary.

(4) *Issues.* A statement of whether the examiner agrees or disagrees with the statement of the issues in the brief and an explanation of why the examiner disagrees, including:

(i) Identification of any issues which are petitionable rather than appealable, and

(ii) Identification of any issues or grounds of rejection which the examiner no longer considers applicable.

(5) *Grouping of Claims.* A statement of whether the examiner agrees or disagrees with any statement in the brief that certain claims do not stand or fall together, and, if the examiner disagrees, an explanation as to why those claims are not separately patentable.

(6) *Claims appealed.* A statement of whether the copy of the appealed claims contained in the appendix to the brief is correct and if not, a correct copy of any incorrect claim.

(7) *References of record.* A listing of the references of record relied on, including (where appropriate, and especially in the case of non-patent references) the page or pages in each reference relied on.

(8) *New references.* A statement of whether or not any new reference is being applied and a listing of each such reference being cited for a new ground of rejection in the examiner's answer, including (where appropriate, and especially in the case of non-patent references) the page or pages in each reference relied on.

(9) *Grounds of rejection.* For each ground of rejection applicable to the appealed claims, and explanation of the ground of rejection, or reference to a final rejection or other single prior action for clear exposition of the rejection.

(i) For each rejection under 35 U.S.C. 112, first paragraph, the examiner's answer, or the single prior action, shall explain how the first paragraph of 35 U.S.C. 112 is not complied with, including, as appropriate, how the specification and drawings, if any, (a) do not describe the subject matter defined by each of the rejected claims, (b) would not enable any person skilled in the art to make and use the subject matter defined by each of the rejected claims, and (c) do not set forth the best mode contemplated by the appellant of carrying out his or her invention.

(ii) For each rejection under 35 U.S.C. 112, second paragraph, the examiner's answer, or single prior action, shall explain how the claims do not particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(iii) For each rejection under 35 U.S.C. 102, the examiner's answer, or single prior action, shall explain why the rejected claims are anticipated or not patentable under 35 U.S.C. 102, pointing out where all of the specific limitations recited in the rejected claims are found in the prior art relied upon in the rejection.

(iv) For each rejection under 35 U.S.C. 103, the examiner's answer, or single prior action, shall state the ground of rejection and point out where each of the specific limitations recited in the rejected claims is found in the prior art relied on in the rejection, shall identify any difference between the rejected claims and the prior art relied on and shall explain how the claimed subject matter is rendered unpatentable over the prior art. If the rejection is based upon a combination of references, the examiner's answer, or single prior action, shall explain the rationale for making the combination.

(v) For each rejection under 35 U.S.C. 102 or 103 where there may be questions as to how limitations in the claims corresponds to features in the prior art, the examiner, in addition to the requirements of (9)(iii) and (iv) above, should compare at least one of the rejected claims feature by feature with the prior art relied on in the rejection. The comparison shall align the language of the claim side by side with a reference to the specific page, line number, drawing reference number and quotation from the prior art, as appropriate.

(vi) For each rejection, other than those referred to in paragraphs (i) to (v) of this section, the examiner's answer, or single prior action, shall specifically explain the basis for the particular rejection.

(10) *New ground of rejection.* A statement of whether or not any new ground of rejection is being made in the examiner's answer and a complete statement and explanation of any such new ground. The requirements of section (9) shall be complied with for any new ground of rejection.

(11) *Response to argument.* A statement of whether the examiner agrees or disagrees with each of the contentions of appellant in the brief with respect to the issues presented and an explanation of the reasons for disagreement with any such contention. If any ground or rejection is not argued and responded to by appellant, the response shall point out each claim affected.

(12) *Period of response to new ground of rejection.* A statement setting the period for appellant to file a reply to any new ground of rejection, if necessary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Public Health Service

42 CFR Parts 110 and 417

[OPH-2-F]

Medicare and Medicaid Programs; Redesignation of Rules Concerning Federal Requirements for Health Maintenance Organizations

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This rule moves the regulations that implement title XIII of the Public Health Service Act from 42 CFR Part 110 to a new Subpart A of 42 CFR Part 417. We are moving these regulations, which generally govern Federal qualification and Federal aid for health maintenance organizations (HMOs), to HCFA's regulations because the authority to administer these regulations has been transferred from the Public Health Service to HCFA.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Larry Sobel, (202) 245-0197.

SUPPLEMENTARY INFORMATION:

I. Background

Until recently, the authority for determining whether an entity is a Federally qualified health maintenance organization (HMO) within the meaning of section 1310(d) of the Public Health Service Act (42 U.S.C. 300e-9(d)) was delegated to the Assistant Secretary for Health of the Department of Health and Human Services (the Department). This delegation was published in the **Federal Register** on April 22, 1983 (48 FR 17395) and is set forth in regulations at 42 CFR 417.406. However, that authority was redelegated to the Administrator of HCFA, as described in the **Federal Register** on March 21, 1986 (51 FR 9894). That document states that the "* * * change in authority for the Federal HMO program was made in order to more closely coordinate the Health Maintenance Organization Program with the Medicare Program and improve the objectives of both programs to improve health care and the use of prepaid health care."

In a proposed rule (51 FR 30520), published on August 27, 1986, concerning charging application fees for Federal qualification of HMOs, we indicated our intention to move the regulations that implement title XIII of the Public Health Service Act from 42 CFR Part 110 to a new Subpart A of 42 CFR Part 417.

II. Redesignation

We are moving these regulations, which govern Federal qualification of, and Federal aid for, HMOs and which complement the regulations implementing the Medicare and Medicaid HMO programs, to HCFA's portion of the Code of Federal Regulations (that is, Title 42, Chapter IV). As explained above, the authority for administering these regulations has been transferred from the Assistant Secretary for Health in the Department to the Administrator of HCFA.

In making this redesignation, we have made some minor editorial changes. For example, references to "the Act" have been appropriately changed throughout the regulations text to read "the Public Health Service Act" to distinguish that Act from the Social Security Act.

Although we are not making any other changes now, we are reviewing these regulations in order to determine which technical changes need to be made (for example, correcting addresses) and whether any substantive changes need to be made. Any such changes will be published later in the **Federal Register**.

III. Regulatory Impact Statement

Since this rule is merely a redesignation and makes no substantive changes in current regulations, there is no need for the analysis required by Executive Order 12291 for rules that have a significant impact on the economy.

In addition, because this rule does not require a general notice of proposed rulemaking under the Administrative Procedure Act (5 U.S.C. 553(b)), it is not subject to the requirements for regulatory flexibility analysis imposed under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 through 612).

IV. Other Required Information

A. Paperwork Reduction Act

This final rule consists of a redesignation of regulations text and, as such, does not change in any way the requirements reflected in the regulations. Therefore, this rule need not be reviewed by the Executive Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501).

B. Waiver of Proposed Rulemaking

The changes in regulations text made as part of this redesignation are minor, and of an editorial nature. Because these changes do not alter any policies or procedures, the usual notice and opportunity for prior public comment are unnecessary and we find good cause to waive notice of proposed rulemaking.

C. Waiver of 30-day Delay in the Effective Date

As noted above, these redesignated regulations are effective October 1, 1987. If we were to provide the customary 30-day delay in the effective date, the next updated issue of Title 42 of the CFR, which will be revised as of October 1, 1987, would show two sets of extensive, essentially duplicative regulations text regarding HMOs. One set would continue to be located in 42 CFR Part 110 and would remain in effect through whatever portion of the 30 day period extends past October 1, 1987. The second set would be located in 42 CFR Part 417, which would become effective after the 30-day delay had expired. Such a confusing and perverse effect would be unintended but would result from the interaction of a 30-day delay in the effective date of this final rule and the annual date of revision of 42 CFR. Therefore, the usual delay in effective date is impractical. In addition, because we are not revising the regulations in any substantive way, but merely redesignating them, the delay is unnecessary.

Accordingly, we find good cause to waive the 30-day delay in the effective date of this final rule and to make it effective on October 1, 1987.

List of Subjects in 42 CFR Part 417

Administrative practice and procedures, Health maintenance organization (HMO), Medicare, Grant programs/health, Health care, Health facilities, Health insurance, Loan programs/health.

Title 42 would be amended as set forth below:

TITLE 42—PUBLIC HEALTH

PART 417—[AMENDED]

1. The authority citation for Subpart A of Part 417 is added to read as follows:

Authority: Sections 215 and 1301 through 1318 of the Public Health Service Act, as amended (42 U.S.C. 216 and 300e through 300e-17).

2. Part 110, Health Maintenance Organizations is redesignated as a new Subpart A, Federally Qualified Health Maintenance Organizations, of Part 417 and all internal cross-references are corrected accordingly. All subpart headings in Part 110 are revised to uncoded internal headings in Part 417, Subpart A. All references to "the Act" are revised throughout to read "the Public Health Service Act." All

references to "this part" are revised to read "this subpart." This redesignation is set forth in the table below:

Redesignation Table for 42 CFR Part 417, Subpart A

Old Section	*New Section*
110.101	417.100

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected),* the *Federal Register Index,* or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.

$24.00 per year

Federal Register Index

The Index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

$22.00 per year

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Title 3—

The President

Presidential Determination No. 87-20 of September 23, 1987

New Foreign Policy Export Controls on Iran

Memorandum for the Secretary of Commerce

Pursuant to Section 6(m) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2405(m)) (the "Act"), I hereby determine and certify that:

a) The Iran/Iraq war, together with Iran's intransigent attitude against peaceful resolution of that conflict and Iran's on-going support of acts of international terrorism, have resulted in a breach of peace posing a serious and direct threat to the strategic interests of the United States. Hostile Iranian policies and actions directed against vessels of neutral nations in the Persian Gulf have heightened the seriousness of that threat;

b) Iran has purchased a large shipment of U.S.-origin SCUBA gear in the United States;

c) Available information indicates that this type of equipment will be diverted to military use by Iran in attacks on oil rigs and possibly shipping or in support of other terrorist or military actions;

d) Prohibition of such shipments of equipment will be instrumental in remedying the direct threat posed by the use of this equipment against U.S. interests in the region and in our effort to persuade other potential sources of similar equipment to likewise prohibit its transfer to Iran; and

e) This export control shall remain in effect only so long as Iranian hostile actions and policy continue to pose a direct threat to U.S. strategic interests in the region.

You are hereby authorized and directed to report to Congress this determination and the report required under Section 6(f) of the Act. Based on the above determination, I am exercising my power under Section 6(m) of the Act to extend foreign policy controls to cover exports or reexports of SCUBA gear to Iran that are either in performance of a contract or agreement entered into prior to the date of the report of the Secretary of Commerce of his intent to impose such control or that are under a validated license or other authorization issued under the Act.

This determination shall be published in the **Federal Register**.

Federal Register
Vol. 52, No. 190
Thursday, October 1, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 545, 552, 561, 563, 563b, and 584

[No. 87-1012]

Miscellaneous Technical Amendments

September 24, 1987.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule; miscellaneous technical amendments.

SUMMARY: The Federal Home Loan Bank Board ("Board") is amending its regulations in order to remove obsolete and incorrect references within its regulations and to correct typographical and other technical errors contained in the Board's regulations.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Carol J. Rosa, Paralegal Specialist, Regulations and Legislation Division, Office of General Counsel, (202) 377-7037, Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: Pursuant to 12 CFR 508.11 and 508.14, the Board finds that, because of the minor, technical nature of these corrective amendments, notice and public procedure are unnecessary, as is the 30-day delay of the effective date.

List of Subjects in 12 CFR Parts 545, 552, 561, 563, 563b, and 584

Accounting, Bank deposit insurance, Consumer protection, Credit, Electronic funds transfers, Holding companies, Investments, Manufactured homes, Mortgages, Reporting and recordkeeping requirements, Savings and loan associations, Securities.

Accordingly, the Board hereby amends Parts 545 and 552, Subchapter C, Parts 561, 563 and 563b, Subchapter D, and Part 584, Subchapter F, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 545—OPERATIONS

1. The authority citation for Part 545 continues to read as follows:

Authority: Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec 5, 48 Stat. 132, as amended (12 US.C. 1464); secs. 402–403, 407, 48 Stat. 1256–1257, 1260, as amended (12 U.S.C. 1725–1726, 1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

§ 545.3 [Reserved]

2. Amend Part 545 by removing § 545.3 and reserving the section designation for future use.

3. In the **Federal Register** of Monday, March 9, 1987, at page 7122, in the second column, remove amendatory instruction #20 which incorrectly amended § 545.74(d)(4).

PART 552—INCORPORATION, ORGANIZATION, AND CONVERSION OF FEDERAL STOCK ASSOCIATIONS

4. The authority citation for Part 552 continues to read as follows:

Authority: Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–403, 405–407, 48 Stat. 1255–1257, 1259–1260, as amended (12 U.S.C. 1724–1726, 1728–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071.

5. In the **Federal Register** of Monday, March 9, 1987, at page 7122, in the second column, remove amendatory instruction #24 which incorrectly amended § 552.2–2(d).

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 561—DEFINITIONS

6. The authority citation for Part 561 continues to read as follows:

Authority: Sec. 1, 47 Stat. 725, as amended (12 U.S.C. 1421 *et seq.*); sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071.

§ 561.8 [Amended]

7. Amend § 561.8(b) by correcting the reference to "§ 563.13(g)(5)(i)" to read "§ 563.13(b)(4)(ii)(A)".

§ 561.15 [Amended]

8. In the **Federal Register** of Monday, March 9, 1987, at page 7123, in the first column, in amendatory instruction 37, to § 561.15, in the amendment to paragraph (j)(1), in the eighth line, "§ 545.45(a)(1)" (the letter l) should read "§ 545.45(a) (1)" (the number one).

PART 563—OPERATIONS

9. The authority citation for Part 563 continues to read as follows:

Authority: Sec. 1, 47 Stat. 725, as amended (12 U.S.C. 1421 *et seq.*); sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071.

§ 563.31 [Amended]

10. Amend § 563.31(b)(1) by adding the word "and" after the semicolon at the end of the paragraph.

PART 563b—CONVERSIONS FROM MUTUAL TO STOCK FORM

11. The authority citation for Part 563b is revised to read as follows:

Authority: Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); secs. 2, 5, 48 Stat. 128, 132, as amended (12 U.S.C. 1462, 1464); secs. 401–403, 405–407, 48 Stat. 1255–1257, 1259–1260, as amended (12 U.S.C. 1724–1726, 1728–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); secs. 3, 12–14, 23, Stat. 882, 892, 48894–895, 901, as amended (15 U.S.C. 78c, 1–n, w); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071.

12. Amend § 563b.101 Item 7 by revising the first sentence of paragraph (c)(1)(C) to read as follows:

VOL 52 ISS 190 OCT 1 1987 UMI

§ 563b.101 Form PS–Proxy Statements.

* * * * *

Item 7. Business of the applicant

* * * * *

(c) *Management's discussion and analysis of financial condition and results of operation.* (1) * * *

(C) *Results of operations.* (i) Describe any unusual or infrequent events or transactions or any significant economic changes that materially affected the amount or reported income from continuing operations and, in each case, indicate the extent to which income was affected.* * *

* * * * *

SUBCHAPTER F—REGULATIONS FOR SAVINGS AND LOAN HOLDING COMPANIES

PART 584—REGULATED ACTIVITIES

13. The authority citation for Part 584 continues to reads as follows:

Authority: Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–403, 405–407, 48 Stat. 1255–1257, 1259–1260, as amended (12 U.S.C. 1724–1726, 1728–1730; sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071.

14. Amend § 584.1 by revising paragraph (a)(4) to read as follows:

§ 584.1 Registration, examination and reports.

(a) *Filing of registration statements and other reports—** * *

(4) *General.* Registration statements, annual reports, and the H–(b)12 are filed with the Corporation by transmitting the original and requisite number of copies enumerated on the report to the Director, Office of Regulatory Policy, Oversight and Supervision; Federal Home Loan Bank System, 1700 G Street, NW., Washington, DC 20552, and by submitting the requisite number of copies to the Supervisory agent. Copies of forms to be used in submitting registration statements, annual reports, and the H–(b)12 may be obtained from any Supervisory Agent.

BILLING CODE 6720–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86–NM–211–AD; Amdt. 39–5736]

Airworthiness Directives; Airbus Industrie

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Airbus Industrie Model A300 B2 and B4 series airplanes, which requires inspections and replacement, if necessary, of certain flap ball screwjack no-back assemblies. This amendment is prompted by reports of excessive wear of the carbon friction discs in the screwjack no-back assemblies. This condition, if not corrected, could result in the screwjack becoming reversible and could lead to an asymmetrical flap condition in the event of a flap transmission shaft failure, which could cause a partial loss of controllability of the airplane.

EFFECTIVE DATE: November 3, 1987.

ADDRESSES: The applicable service information may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, which requires a jackhead backlash check to determine no-back condition, and describes procedures for flap screwjack replacement, if necessary, on certain Airbus Model A300 B2 and B4 series airplanes, was published in the **Federal Register** on November 26, 1986 (51 FR 42850).

Interested parties have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the two comments received.

The Air Transport Association (ATA) of America supported the proposal.

The manufacturer recommended acceleration of the initial compliance time for certain airplanes. The FAA has considered this recommendation, but has determined that such an action would be beyond the scope of this AD. The FAA may consider further rulemaking to address this change in compliance time for certain affected airplanes.

The manufacturer also recommended several editorial changes to clarify the description of the failure mode and certain wording in the preamble to the notice. The FAA concurs with the changes and, where appropriate, the final rule has been revised accordingly.

After careful review of the available data, including the comments listed above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes mentioned above.

It is estimated that 34 airplanes of U.S. registry will be affected by this AD, that it will take approximately 51 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $69,360.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because few, if any, Airbus Industrie Model A300 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directives:

Airbus Industrie: Applies to Model A300 B2 and B4 series airplanes, certificated in any category, equipped with the flap ball screwjack no-back mechanisms, listed in Airbus Industrie Service Bulletin A300–27–172, dated April 10, 1984, which have not been modified in accordance with Modification AI 5240 as described in Airbus Industrie Service Bulletin A300–27–173, dated May 2, 1984. Compliance required as indicated, unless previously accomplished.

To prevent excessive wear of the carbon friction disc of the no-back assemblies which could lead to an asymmetric flap condition in the event of flap transmission shaft failure, accomplish the following:

A. Prior to the accumulation of 13,000 landings or within the next 1,000 landings after the effective date of this AD, whichever occurs later, perform a jackhead axial backlash measurement on affected flap ball screwjacks in accordance with the accomplishment instructions of Airbus Industrie Service Bulletin A300–27–172, dated April 10, 1984.

B. Repeat the measurement required by paragraph A., above, at the following intervals:

1. If the backlash is less than or equal to 0.331 mm, prior to 3,000 landings after the last measurement.

2. If the backlash is more than 0.31 mm but less than or equal to 0.407 mm, prior to 2,000 landings after the last measurement.

3. If the backlash is more than 0.407 mm, but less than 0.560 mm, prior to 1,000 landings after the last measurement.

C. Replace the flap ball screwjack within the next 20 landings when a measurement required by paragraph A. or B., above, indicates the backlash is greater than or equal to 0.560 mm.

D. Incorporation of Airbus Industrie Modification 5240, described in Airbus Industrie Service Bulletin A300–27–173, dated May 2, 1984, constitutes terminating action for the requirements of this AD.

E. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective: November 3, 1987.

Issued in Seattle, Washington, on September 17, 1987.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 87–CE–16–AD; Amdt. 39–5739]

Airworthiness Directives; Piper

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to certain Piper Models PA–31, PA–31–300, PA–31–325, PA–31–350, PA–31P, PA–31P–350, PA–60–600, PA–60–601, PA–60–601P, PA–60–602P and PA–60–700P airplanes, equipped with reciprocating engines herein referred to a "PA–31 and PA–60 Series" airplanes. This AD requires the modification of the fuel filler ports to prevent inadvertent filling of the fuel tanks with jet fuel. The NTSB has reported eight accidents where airplane misfueling was found to have contributed to the accidents. The modification is necessary to prevent further misfueling and thereby preclude inflight engine failure.

DATES: *Effective Date:* November 2, 1987.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Piper Aircraft Corporation Service Bulletin No. 797B, dated September 1, 1987, applicable to this AD may be obtained from Piper Aircraft Corporation, 2926 Piper Drive, Vero Beach, Florida 32960; Telephone (305) 567–4366. This information may be examined in the Rules Docket, Federal Aviation Administration, Central Region, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Robert R. Goodall, Aerospace Engineer, Propulsion Branch, ACE–140A, Atlanta Aircraft Certification Office, FAA, 1669 Phoenix Parkway, Suite 210, Atlanta, Georgia 30349; Telephone (404) 991–3810.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring the modification of the fuel filler ports to prevent inadvertent filling of the fuel tanks with jet fuel on certain Piper "PA–31 and PA–60 Series" airplanes equipped with reciprocating engines was published in the **Federal Register** on June 8, 1987 (52 FR 21575). This proposal resulted from a recommendation by the NTSB reporting that there have been eight accidents as a result of inflight engine failure of Piper Aircraft Corporation Model PA–31 and PA–60 series airplanes with reciprocating engines in which misfueling with jet fuel was the cause. Further, the NTSB indicates that most cases of misfueling occur with light, twin-engine, piston-powered airplanes which are similar in appearance to turbine engine-powered airplanes. In recent years, the frequency of accidents involving misfueling with jet fuel has increased significantly despite efforts of the FAA and other interested parties. On September 17, 1982, and October 5, 1984, the FAA issued two Advisory Circular (AC) Nos. 20–116 and 20–122, "Marking Aircraft Fuel Filler Openings with Color Coded Decals," and "Anti-Misfueling Devices: Their Availability and Uses." Both recommend methods to prevent airplane misfueling. However, the level of response to these AC's appears low considering the nature of the problem and the number of airplanes involved. Therefore, in the interest of aviation safety, the modification of the fuel filler ports, recommended by the NTSB was proposed as a new Airworthiness Directive.

Interested persons have been afforded an opportunity to comment on the proposal. Due consideration has been given to the eleven comments received. Nine comments were in favor of the proposal. Several of these nine commenters suggested that other manufacturers' airplanes be added, which is beyond the scope of this rulemaking action. One additional commenter only concurred with the PA–31 Series airplanes being contained in the AD. He felt that since there are no turbine powered variants of the PA–60 Series airplanes and, according to him, only two misfueling accidents involving this airplane series have occurred since its production in 1969, its inclusion is not warranted. The FAA has determined that the service experience for the PA–60 series has been shown to warrant inclusion of this model airplane. The only commenter that disagreed totally with the proposal suggested that it was his belief that the government cannot legislate safety but that safety can be taught through the use of Fuel Training Seminars which he has developed. The FAA disagrees based on the adverse service experience that indicates

additional positive actions are necessary. Although well trained personnel should be the goal of all fueling facilities, it is not the only avenue to safe fueling that should be pursued. The FAA has determined that it is appropriate to require installation of fuel filler port restrictors on Piper PA-31 and PA-60 series airplanes.

Only one comment was received on the cost determination. In early 1986, the General Aviation Manufacturers Association petitioned the FAA to require that fueling ports in piston powered civil airplanes be restricted to less than 2.5 inches in diameter. In that petition, GAMA estimated the cost of the restrictor kit to be about $35 per fuel filler port. However, Piper's Service Bulletin No. 797A issued in April of 1985 listed the availability of their kits which averaged in cost from $35 to $93 per fuel filler port. Piper has decided to sell all the kits that they have in stock at the price listed on this Service Bulletin. However, as their stock is depleted and Piper must reorder their stock, the FAA has been advised that prices will increase to a range of $37.25 to $103.50 per fuel filler port depending upon the model of airplane. In addition, the FAA has been advised that since the NPRM was issued, the number of Piper airplanes involved has been revised to a lower number. Therefore, the final rule has been changed to reflect these increased costs and the reduction of the number of airplanes involved. However, this has not affected the FAA's certification that this rule is not a major or significant rule nor one which will have a significant economic impact on a substantial number of small entities.

Finally, one editorial change was made by listing the latest revision to the Piper Service Bulletin.

Therefore, after careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the following rule with the changes previously noted. The FAA has determined there are approximately 5400 airplanes affected by this AD. The estimated cost of modifying these airplanes depends on the number of fuel filler caps on the airplane. PA-31 series airplanes can have either two, four or six fuel ports. The approximate cost per fuel port for these airplanes to comply with this AD is $37.50, except for Model PA-31P-350 airplanes which is $103.50 per port. Most PA-60 series airplanes have three fuel ports but some are equipped with four. The approximate cost per fuel port for these airplanes to comply with this AD is $69. The approximate total cost to modify the fleet would be $894,000. The cost of complying with this AD therefore will not have a significant financial impact on any small entities owning affected airplanes.

Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

List of Subjects in 14 CFR Part 39

Air transportation, Aviation safety, Aircraft, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Piper: Applies to Models PA-31, PA-31-300, PA-31-325 (SN 31-1 thru 31-8312019), PA-31-350 (S/N 31-5001 thru 31-8452021), PA-31-350 (T1020) (S/N 31-8253001 thru 31-8553002), PA-31P (S/N 31P-1 thru 31P-7730012), PA-31P-350 (S/N 31P-8414001 thru 31P-8414050), PA-60-600, PA-60-601, PA-60-601P, PA-60-602P, PA-60-700P, (all S/N's) airplanes equipped with reciprocating engines certificated in any category.

Compliance: Required as indicated, unless already accomplished. To preclude misfueling of the airplane resulting in engine failure, accomplish the following:

(a) Within the next 12 calendar months after the effective date of this AD, unless already accomplished, modify the fuel filler opening(s) in accordance with the instructions contained in Piper Aircraft Corporation Service Bulletin No. 797B, dated September 1, 1987.

Note.—This AD does not apply to the PA-23-250 (Aztec F) or the PA-36 (Brave) which are also listed in Piper Service Bulletin No. 797B.

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(c) In accordance with FAR Part 43, Appendix A, item (c) 29, the modifications required by this AD are preventative maintenance and may be performed by the holder of a pilot certificate issued under FAR Part 61 on airplanes owned or operated by him, subject to the limitations of FAR 43.3(g). The maintenance record entries required by FAR 43.9 and FAR 91.173 must be accomplished.

(d) An equivalent means of compliance with this AD may be used if approved by the Manager, Altanta Aircraft Certification Office, ACE-115A, Federal Aviation Administration, 1669 Phoenix Parkway, Suite 210, Atlanta, Georgia 30349.

All persons affected by this directive may obtain copies of the document(s) referred to herein upon request to Piper Aircraft Corporation, 2926 Piper Drive, Vero Beach, Florida 32960; or may examine the document(s) referred to herein at the FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on November 2, 1987.

Issued in Kansas City, Missouri, on September 17, 1987.

Jerold M. Chavkin,

Acting Director, Central Region.

[FR Doc. 87-22722 Filed 9-30-87; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87-ANE-22; Amendment 39-5732]

Airworthiness Directives; Teledyne Continental Motors

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the **Federal Register** and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of certain TCM IO-520, IO-550, and TSIO-520 series engines by individual priority letters. The AD requires inspection of the starter adapter shaftgear, possible replacement of the starter adapter assembly, and the return to service of the air conditioner in all affected airplanes. The AD is needed to publish as a final rule priority letter AD 87-14-02, which superseded priority letter AD 87-12-12, the combination of which (a) requires the removal of the freon compressor drive belt on Piper PA 46-310P airplanes, (b) includes engines with freon compressors installed in Beech Bonanza and Baron airplanes, (c) replaces the starter adapter assembly in

certain of these airplanes, and (d) allows return of the air conditioner to service in all affected airplanes.

DATES: *Effective Date:* October 5, 1987, as to all persons except those persons to whom it was made immediately effective by priority letter AD No. 87–14–02, issued July 8, 1987, which contained this amendment.

Compliance schedule: As prescribed in the body of the AD.

ADDRESSES: The applicable service bulletin may be obtained from Teledyne Continental Motors, P.O. Box 90, Mobile, Alabama 36601, or may be examined in the Regional Rules Docket, Room 311, Federal Aviation Administration, New England Region, Office of the Regional Counsel, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Jerry C. Robinette, Aerospace Engineer, Propulsion Branch, ACE–140A, Atlanta Aircraft Certification Office, Federal Aviation Administration, Central Region, 1669 Phoenix Parkway, Suite 210, Atlanta, Georgia 30349; telephone (404) 991–3810.

SUPPLEMENTARY INFORMATION: On July 8, 1987, priority letter AD No. 87–14–02 was issued and made effective immediately as to all known U.S. owners and operators of certain TCM IO–520, IO–550, and TSIO–520 series engines. The AD requires inspection of the starter adapter shaftgear, possible replacement of the starter adapter asembly, and allow the return to service of the air conditioner in all affected airplanes. AD action was necessary to: (a) Supersede priority letter AD 87–12–12 which requires the removal of the freon compressor drive belt on Piper PA–46–310P airplanes, (b) include engines with freon compressors installed in Beech Bonanza and Baron airplanes, (c) replace the starter adapter assembly in certain of these airplanes, and (d) allow return of the air conditioner to service in all affected airplanes

Since it was found that immediate corrective action was necessary, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual priority letters issued July 8, 1987, to all known U.S. owners and operators of certain TCM IO–520, IO–550, and TSIO–520 series engines. These conditions still exist and the AD is hereby published in the **Federal Register** as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained from the Regional Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Engines, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration amends Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106 (g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive (AD):

Teledyne Continental Motors (TCM): Applies to IO–520, IO–550, and TSIO–520 series engines with starter adapter shaftgear P/N 649343, a freon compressor, and 25 hours or less time in service installed on the following engines:

	Serial Numbers
New	
IO–520BB	S/N 578239 thru 578250, 578255 thru 578261, 578271, 578272.
IO–550B	S/N 675329, 675330, 675334 thru 675336.
TSIO–520UB	S/N 527091, 527093.
TSIO–520BE	S/N 528383, 528389.
Rebuilt Engines:	
IO–520BA	S/N 249568 thru 249570, 249588 thru 249593.
IO–520BB	S/N 248585, 248586, 274505 thru 274520, 274522 thru 274526, 274529, 274532, 274536, 274537, 274540, 274544, 274545, 274549, 274550, 274552, 274554.
New	
IO–550B	S/N 249124 thru 249130, 249132.
TSIO–520UB	S/N 248867, 248869.
TSIO–520LB	S/N 237242, 237244, 237247, 241909, 241910.
TSIO–520WB	S/N 274004 thru 274008, 274012 thru 274018.
TSIO–520BE	S/N 273505 thru 273510.

Compliance is required before further flight unless already accomplished.

To prevent possible starter adapter shaftgear failure, which could result in loss of lubricating oil and subsequent complete loss of engine power, accomplish the following:

(a) Determine if the installed engine(s) has a freon compressor installed.

(1) If no freon compressor is installed, no further action is required, proceed to Paragraph (f).

(b) Engines in compliance with priority letter AD 87–12–12, but not included in the engine serial numbers listed in this AD, may re-install the air conditioner drive belt. Proceed to Paragraph (f).

(c) Determine the time in service of the starter adapter shaftgear P/N 649343 for each installed engine. If the time in service is greater than 25 hours with the freon compressor drive belt installed, no further action is required. Proceed to Paragraph (f). If the time in service is less than 25 hours, accomplish Paragraphs (d) or (e) as applicable.

(d) If the engine was new when installed, remove the starter adapter assembly P/N 642087, and return to the manufacturer for replacement. Install the replacement assembly, and proceed to Paragraph (f).

(e) If the installed engine is a rebuilt engine, gain access to the drive sheave mounted on the rear of the starter adapter shaftgear. Determine, using a light and mirror, if the drive sheave attaching nut is castellated.

(1) If the nut is castellated with a cotter key installed, no further action is required, proceed to Paragraph (f).

(2) If a steel lock nut is installed, inspect the center of the shaft to determine if the shaft has drilled cotter key holes (see TCM Service Bulletin M87–13, dated 29 June 1987, Figure 1).

(i) If the shaft has drilled holes, no further action is required, proceed to Paragraph (f).

(ii) If the shaft is undrilled, remove the starter adapter assembly P/N 642087 and return to the manufacturer for replacement. Install the replacement assembly.

(f) Make appropriate logbook entry showing compliance with this AD.

Notes: 1. Contact TCM for shipping instructions.

2. When replacing the starter adapter assembly, retain the drive sheave for re-installation on new assembly.

3. TCM Service Bulletin M87–13, dated 29 June 1987, refers to this subject.

Upon request, an equivalent means of compliance with the requirements of this AD

VOL 52 ISS 190 OCT 1 1987 UMI

may be approved by the Manager, Atlanta Aircraft Certification Office, Federal Aviation Administration, Central Region, 1669 Phoenix Parkway, Suite 210, Atlanta, Geogria 30349.

This amendment becomes effective October 5, 1987, as to all persons except those persons to whom it was made immediately effective by priority letter AD No. 87–14–02, issued July 8, 1987, which contained this amendment.

Issued in Burlington, Massachusetts, on September 14, 1987.

Robert E. Whittington,

Director, New England Region.

BILLING CODE 4910–13–W

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Parts 385 and 399

[Docket No. 70988–7188]

Foreign Policy Controls on Exports to Iran of Scuba Equipment

AGENCY: Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: In light of the threat to U.S. interests from the risk that the Government of Iran will conduct or support underwater attacks against shipping or installations in the Persian Gulf and elsewhere, this rule imposes a validated license requirement on exports to Iran of self-contained underwater breathing apparatus (scuba gear) and related equipment.

This regulation is issued in consultation with the Department of State and in compliance with the requirements of the Export Administration Act of 1979, as amended, 50 U.S.C. app. 2401 *et seq.* (the Act). Section 6 of the Act requires that a report be submitted to Congress whenever new foreign policy export controls are imposed; such a report was submitted by the Acting Secretary of Commerce on September 25, 1987. On September 23, 1987, the President made a determination and certification to the Congress under section 6(m) of the Act that permits this new control to be applied to shipments under preexisting contracts and to shipments that had previously been covered by a validated license or other authorization issued under the Act.

EFFECTIVE DATE: This rule is effective October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Joan Sitnik, Country Policy, Office of Technology and Policy Analysis, Telephone: (202) 377–4830.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2412(a)) exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Written comments (six copies) should be submitted to Vincent Greenwald, Regulations Branch, Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553), or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. This rule contains a collection of information subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). This collection of information has been approved by the Office of Management and Budget under control number 0625–0001.

List of Subjects in 15 CFR Parts 385 and 399

Accordingly, the Export Administration Regulations (15 CFR Parts 368–399) are amended as follows:

PARTS 385 AND 399—[AMENDED]

1. The authority citation for Parts 385 and 399 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended by Pub. L. 97–145 of December 29, 1981 and by Pub. L. 99–64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 95–223 of December 28, 1977 (50 U.S.C. 1701 *et seq.*); E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985) as affected by notice of September 4, 1986 (51 FR 31925, September 8, 1986); Pub. L. 99–440 of October 2, 1986 (22 U.S.C. 5001 *et seq.*); and E.O. 12571 of October 27, 1986 (51 FR 39505, October 29, 1986).

2. Section 385.4 is amended by designating the text following the italic heading as paragraph (e)(1); newly designated paragraph (e)(1) is amended by adding a heading before the first sentence; and adding a paragraph (e)(2), as follows:

§ 385.4 Country Group T and V.

* * * * *

(e) *Iran, Iraq, and Syria.* * * *

(1) *Restrictions on exports of chemicals to Iran, Iraq, and Syria.* * * *

(2) Restrictions on exports of self-contained underwater breathing apparatus to Iran. In support of U.S. foreign policy concerns, a validated license is required for the export to Iran of self-contained underwater breathing apparatus and related equipment, including the equipment listed in CCL entry 5398F, all of which is herein referred to as scuba gear. Applications for export to Iran of commodities subject to these controls will generally be denied.

* * * * *

§ 399.1 [Amended]

3. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group 3 (General Industrial Equipment), a new ECCN 5398F is added between ECCN 1391A and 6398G, reading as follows:

5398F Self-contained underwater breathing apparatus (scuba gear) and related equipment.

Controls for ECCN 5398F

Unit: Report in "$ value."
Validated License Required: Country Groups S and Z and Iran.
GLV $ Value Limit: $0.
Processing Code: TE.
Reason for Control: Foreign policy.
Special Licenses Available: None.

List of Equipment Controlled by ECCN 5398F Self-contained underwater breathing apparatus (scuba gear) and

related equipment, including, but not limited to, the following:

(a) Self-contained underwater breathing apparatus (scuba gear);

(b) Pressure regulators, air cylinders, hoses, valves and backpacks for the apparatus described in paragraph (a);

(c) Life jackets, inflation cartridges, compasses, wetsuits, masks, fins, weight belts, and dive computers;

(d) Underwater lights and propulsion equipment; and

(e) Air compressors and filtration systems specially designed for filling air cylinders.

Dated: September 28, 1987.

Vincent F. DeCain,

Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510-DT-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 101

[T.D. 87-123]

Consolidation of Cleveland and Akron, OH, Ports of Entry; Designation of Akron, OH, as a Customs Station

AGENCY: U.S. Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document consolidates the ports of entry of Cleveland and Akron, Ohio, and designates Akron as a Customs station. The consolidated port will be known as the Cleveland port of entry and be within the Cleveland District. The Akron Station will be supervised by the Cleveland Port. These changes will allow more efficient use of Customs personnel, facilities, and resources. This will be accomplished by transferring the administrative functions of the Akron Port to the Cleveland District Office, and by eliminating some positions from the Akron Port. The consolidated port boundaries consist of the total area within the existing boundaries of both ports.

EFFECTIVE DATE: November 2, 1987.

FOR FURTHER INFORMATION CONTACT: Bernie Harris, Office of Inspection and Control (202-566-9425).

SUPPLEMENTARY INFORMATION:

Background

As part of a continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to carriers, importers, and the public, Customs published a notice in the **Federal Register** on January 14, 1987 (52 FR 1470), requesting public comment on a proposal to amend §§ 101.3 and 101.4, Customs Regulations (19 CFR 101.3, 101.4), by consolidating the ports of entry of Cleveland and Akron, Ohio, and by designating Akron as a Customs station.

As explained in the notice, the proposal would permit relocation of the Akron Port administrative functions to the Cleveland District Office. The current Akron Port offices are located less than one hour's drive from the Cleveland District Office. The administrative staff at Akron is not currently fully utilized because of limited workload volume. The consolidated port boundary will consist of the total area within the existing boundaries of both ports. The Cleveland Port consists of all of Cuyahoga County, Ohio. The Akron Port consists of all of Summit County, Ohio, and lake Township in Stark County, Ohio. The port consolidation will result in savings of approximately $110,000 per year.

The staffing at the Akron Station will consist of two Customs inspectors, the same number currently assigned to the port. The positions of Port Director, Customs Aid, and Clerk Typist, will be eliminated. Elimination of these positions will have no immediate impact on any identifiable segment of the public; it is merely an administrative reorganization. Entry releases and entry summaries can still be filed at Akron.

Discussion of Comments

The primary concern raised in the few comments received in response to the notice was that the level of Customs service provided to the Akron area would decrease.

Customs does not agree with this prediction. The Akron workload does not currently justify the size of the assigned staff. Two inspectors will be able to provide an adequate level of service at this time. If the workload significantly increases, the staffing level can be increased.

Several commenters noted that the actions being considerted might hurt Akron's changes in its efforts to obtain a Foreign Trade Zone (FTZ). Also, it was feared the effect of adopting the proposal would generally hurt the reputation of Akron as a business center.

Customs does not believe the consolidation of Akron into the Cleveland Port will hinder Akron's chances of obtaining an FTZ. As for any damage to Akron's reputation in the business community, that is a subjective assessment over which Customs has no control. On Customs behalf, it can be stated that the actions being accomplished by this document in no way reflect any belief on Customs part that Akron is somehow undeserving of a singular port. Customs is merely making administrative changes to its field organization that will save the Federal government money and resources while leading to no decrease in Customs services to the Akron area.

Finally, in response to several comments, it is noted that no additional fees for services to importers at Akron will result from Akron's designation as a station.

Determination

After carefully analyzing the comments received, and further consideration of the matter, if has been determined to adopt the changes to the Customs field organization as proposed. The Cleveland port of entry consisting of all of Cuyahoga County, Ohio, and the Akron port of entry consisting of all of Summit County, Ohio, and Lake Township in Stark County, Ohio, are consolidated. Akron, Ohio, is designated as a Customs station.

Executive Order 12291 and Regulatory Flexibility Act

Because this document relates to agency organization it is not subject to E.O. 12291. Accordingly, a regulatory impact analysis and the review prescribed by that E.O. are not required. Similarly, this document is not subject to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Customs routinely makes adjustments to its field organization throughout the U.S. to accommodate the volume of Customs-related activity in various parts of the country. Although this amendment may have a limited effect upon some small entities in the areas affected, it is not expected to be significant because adjusting the field organization in other areas has not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Act. Nor is it expected to impose, or otherwise cause, a significant increase in the reporting, recordkeeping or other compliance burdens on a substanial number of small entities.

Authority

These changes are made under the authority vested in the President by section of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by E.O. No. 10289, September 17, 1951 (3 CFR 1949-1953 Comp. Ch. II),

VOL 52 ISS 190 OCT 1 1987 UMI

and pursuant to authority provided by Treasury Department Order No. 101–5, dated February 17, 1987 (52 FR 6282).

Drafting Information

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 101

Amendments to the Regulations

PART 101—GENERAL PROVISIONS

1. The authority citation for Part 101, Customs Regulations (19 CFR Part 101), continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 1, 66, 1202 (Gen. Hdnote. 11), 1624, Reorganization Plan 1 of 1965; 3 CFR 1965 Supp.

§ 101.3 [Amended]

2. To reflect the consolidation, the list of Customs regions, districts, and ports of entry in § 101.3(b) is amended by removing "77–232" from the "CLEVELAND, OHIO" listing in the "Ports of entry" column in the Cleveland, Ohio, Customs district of the North Central Region, and inserting, in its place "87–123".

3. Section 101.3(b) is further amended by removing the listing, "Akron, Ohio, E.O. 4597, Feb. 25, 1927, including the territory described in T.D. 77–732." from the "Ports of entry" column in the Cleveland, Ohio, Customs District of the North Central Region.

4. To reflect the designation of Akron, Ohio, as a Customs station, the list of Customs stations in § 101.4(c) is amended by inserting, in appropriate alphabetical order, in the listings for "Cleveland, Ohio" under the "District" column, "Akron, Ohio" in the column headed "Customs stations", and on the same line, "Cleveland, Ohio." in the column headed "Port of entry having supervision".

William von Raab,

Commissioner of Customs.

Approved: September 17, 1987.

John P. Simpson,

Acting Assistant Secretary of the Treasury.

BILLING CODE 4820–02–M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2610 and 2622

Late Premium Payments and Employer Liability Underpayments and Overpayments; Change in Interest Rate

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This amendment notifies the public of a change in the interest rate applicable to late premium payments and employer liability underpayments and overpayments beginning October 1, 1987. The interest rate is established by the Internal Revenue Service and is computed quarterly. This amendment is needed to notify pension plan administrators of the new interest rate.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: John Foster, Attorney, Corporate Policy and Regulations Department, Code 35100, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; telephone 202–778–8850 (2020–778–8859 for TTY and TDD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: As part of Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), the Pension Benefit Guaranty Corporation ("PBGC") collects premiums from on-going plans to support the single-employer and multiemployer insurance programs. Under the single-employer program, the PBGC also collects employer liability from those persons described in ERISA section 4062(a). Under ERISA section 4007 and 29 CFR 2610.7, the interest rate to be charged on unpaid premiums is the rate established under section 6601 of the Internal Revenue Code ("Code"). Similarly, under 29 CFR 2622.7, the interest rate to be credited or charged with respect to overpayments or underpayments of employer liability is the section 6601 rate.

Section 6601(a) of the Code imposes interest on the underpayment of taxes at the "underpayment rate established under section 6621." Section 6621(a)(2) prescribes this rate: the sum of the short-term Federal rate (average interest rate on Federal securities with a maturity of three years or less) plus three percentage points. This rate is computed quarterly by the Internal Revenue Service.

On August 26, 1987, the Internal Revenue Service announced that for the calendar quarter beginning October 1, 1987, the interest charged on the underpayment of taxes will be at the rate of ten percent. Accordingly, Appendix A to 29 CFR Part 2610 and Appendix A to 29 CFR Part 2622 are being amended to set forth this rate for the period beginning on October 1, 1987. This rate will be in effect for at least the three-month period ending on December 31, 1987, and will continue in effect after that time if the Internal Revenue Service, in its next quarterly review, determines that no change is needed.

The appendices to 29 CFR Part 2610 and 29 CFR Part 2622 do not prescribe the interest rates under these regulations; the rates prescribed by those parts are the rates found in Section 6601(a) of the Code. The appendices merely collect and republish the rates in a convenient place. Thus, the interest rates in the appendices are informational only. Accordingly, the PBGC finds that notice of and public comment on these amendments would be unnecessary and contrary to the public interest. For the above reasons, the PBGC also believes that good cause exists for making these amendments effective immediately.

The PBGC has determined that neither of these amendments is a "major rule" within the meaning of Executive Order 12291, because they will not have an annual effect on the economy of $100 million or more; nor create a major increase in costs or prices for consumers, individual industries, or geographic regions, nor have significant adverse effects on competition, employment, investment, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Because no general notice of proposed rulemaking is required for these amendments, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

List of Subjects

29 CFR Part 2610

Employee benefit plans, Penalties, Pension insurance, Pensions, Reporting and recordkeeping requirements.

29 CFR Part 2622

Business and industry, Employee benefit plans, Pension insurance, Pensions, Reporting and recordkeeping requirements, Small businesses.

In consideration of the foregoing, Appendix A to Part 2610 and Appendix A to Part 2622 of Chapter XXVI of Title 29, Code of Federal Regulations, are hereby amended as follows:

PART 2610—PAYMENT OF PREMIUMS

1. The authority citation for Part 2610 is revised to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1306, 1307, as amended by sec. 11005, Pub. L. 99–272, 100 Stat. 82, 240.

2. Appendix A to Part 2610 is amended by revising the July 1, 1986, entry and adding a new entry to read as follows. The introductory text is republished for the convenience of the reader and remains unchanged.

Appendix A—Late Payment Interest Rates

The following table lists the late payment interest rates under § 2610.7(a) for the specified time periods:

From	Through	Interest rate (percent)
•	•	•
July 1, 1986	Sept. 30, 1987	9
Oct. 1, 1987		10

PART 2622—EMPLOYER LIABILITY FOR WITHDRAWALS FROM AND TERMINATIONS OF SINGLE-EMPLOYER PLANS

3. The authority citation for Part 2622 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1362–1364, 1367–68, as amended by secs. 11011, 11016, Pub. L. 99–272, 100 Stat. 253, 268.

4. Appendix A to Part 2622 is amended by revising the January 1, 1987, entry and adding a new entry to read as follows. The introductory text is republished for the convenience of the reader and remains unchanged.

Appendix A—Late Payment and Overpayment Interest Rates

The following table lists the late payment and overpayment interest rates under § 2622.7 for the specified time periods:

From	Through	Interest rate (percent)
•	•	•
Jan. 1, 1987	Sept. 30, 1987	9
Oct. 1, 1987		10

Issued in Washington, DC, the 25th day of September, 1987.

BILLING CODE 7708–01–M

29 CFR Part 2644

Collection of Withdrawal Liability; Adoption of New Interest Rate

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Notice and Collection of Withdrawal Liability. That regulation incorporates certain interest rates published by another Federal agency. The effect of this amendment is to add to the appendix of that regulation a new interest rate to be effective from October 1, 1987, to December 31, 1987.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: John Foster, Attorney, Regulations Division, Corporate Policy and Regulations Department (35100), Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006; telephone 202–778–8850 (202–778–8859 or TTY and TDD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: Under section 4219(c) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), the Pension Benefit Guaranty Corporation ("the PBGC") promulgated a final regulation on Notice and Collection of Withdrawal Liability. That regulation, codified at 29 CFR Part 2644, deals with the rate of interest to be charged by multiemployer pension plans on withdrawal liability payments that are overdue or in default, or to be credited by plans on overpayments of withdrawal liability. The regulation allows plans to set rates, subject to certain restrictions. Where a plan does not set the interest rate, § 2644.3(b) of the regulation provides that the rate to be charged or credited for any calendar quarter is the average quoted prime rate on short-term commercial loans for the fifteenth day (or the next business day if the fifteenth day is not a business day) of the month preceding the beginning of the quarter, as reported by the Board of Governors of the Federal Reserve System in Statistical Release H.15 ("Selected Interest Rates").

Because the regulation incorporates interest rates published in Statistical Release H.15, that release is the authoritative source for the rates that are to be applied under the regulation. As a convenience to persons using the regulation, however, the PBGC collects and applicable rates and republishes them in an appendix to Part 2644. This amendment adds to this appendix the interest rate of 8¾ percent, which will be effective from October 1, 1987, through December 31, 1987. This rate is ½ percent higher than the rate in effect for the third quarter of 1987. See 52 FR 25007 (July 2, 1987). This rate is based on the prime rate in effect on September 15, 1987.

The appendix to 29 CFR Part 2644 does not prescribe interest rates under the regulation; the rates prescribed in the regulation are those published in Statistical Release H.15. The appendix merely collects and republishes the rates in a convenient place. Thus, the interest rates in the appendix are informational only. Accordingly, the PBGC finds that notice of and public comment on this amendment would be unnecessary and contrary to the public interest. For the above reasons, the PBGC also believes that good cause exists for making this amendment effective immediately.

The PBGC has determined that this amendment is not a "major rule" within the meaning of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; nor create a major increase in costs or prices for consumers, individual industries, or geographic regions, nor have significant adverse effects on competition, employment, investment, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

List of Subjects in 29 CFR Part 2644

Employee benefit plans, Pensions.

In consideration of the foregoing, Part 2644 of Subchapter F of Chapter XXVI of Title 29, Code of Federal Regulations, is amended as follows:

PART 2644—NOTICE AND COLLECTION OF WITHDRAWAL LIABILITY

1. The authority citation for part 2644 is revised to read as follows:

Authority: 29 U.S.C. 1302(b)(3) and 1399(c)(6).

Appendix A—[Amended]

2. Appendix A is amended by adding to the end of the table of interest rates therein the following new entry:

From	To	Date of quotation	Rate (percent)
•	•	•	•
10/01/87	12/31/87	09/15/87	8 75

Issued at Washington, DC, on this 25th day of September 1987.

Kathleen P. Utgoff,

Executive Director.

BILLING CODE 7708-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 5

[CGD 85-073]

Coast Guard Auxiliary Ensign and Auxiliary Patrol Boat Ensign

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is describing the design of the Coast Guard Auxiliary ensign and the Coast Guard Auxiliary Patrol Boat ensign. Both of these ensigns have been adopted by the Commandant of the Coast Guard and are currently in use. The intended effect of this rulemaking is consistency in the appearance and flying of these ensigns.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. Carlton Perry, Office of Boating, Public, and Consumer Affairs, (202) 267-0979.

SUPPLEMENTARY INFORMATION: In a directive dated July 19, 1984, the Commandant authorized reproduction and use of the Coast Guard Auxiliary emblem on Auxiliary ensigns, flags, pennants, and burgees. This rule expands the provisions of 33 CFR 5.47 concerning the Coast Guard Auxiliary ensign by describing the design of the Coast Guard Auxiliary ensign and adds a new § 5.48 describing the design of the Coast Guard Auxiliary Patrol Boat ensign.

This final rule was not preceded by a notice of proposed rulemaking and is being made effective in less than 30 days after publication in the **Federal Register**. This rule relates to the Coast Guards's management, procedures and practices, and merely formalizes the design descriptions of the ensigns currently manufactured and used. Nothing in this rulemaking requires the replacement of existing ensigns. Therefore, the Coast Guard has determined that notice and public procedure thereon are unnecessary under 5 U.S.C. 553(b)(3)(B). Since this rule has no substantive effect, good cause exists, under 5 U.S.C. 553(d), for making it effective in less than 30 days after publication in the **Federal Register**.

Drafting Information

The principal persons involved in drafing this rule are: Mr. Carlton Perry, Project Manager and Mrs. Christena Green, Project Attorney, Office of the Chief Counsel.

Regulatory Evaluation: This rulemaking is considered nonmajor under Exeuctive Order No. 12291 and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of the rulemaking has been found to be so minimal that further evaluation is unnecessary. These amendments merely formalize design descriptions of ensigns currently in use and apply to individuals and manufacturers of flags and pennants. Since the impact of the proposal is expected to be minimal, the Coast Guard certifies that this final rule will not have significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 5

Volunteers.

In consideration of the foregoing, the Coast Guard is amending Part 5 of Title 33, Code of Federal Regulations as set forth below.

PART 5—COAST GUARD AUXILIARY

1. The authority for Part 5 is revised to read as follows:

Authority: 14 U.S.C. 633; 49 CFR 1.46.

2. Section 5.47 is revised to read as follows:

§ 5.47 Auxiliary ensign.

(a) The Coast Guard Auxiliary ensign is a distinguishing mark, authorized by the Secretary, and may be displayed by any vessel, aircraft, or radio station at such times and under such circumstances as may be authorized by the Commandant. The penalty for the unauthorized flying of any ensign, flag or pennant of the Auxiliary is set forth in § 5.67 of this part.

(b) The field of the Auxiliary ensign is medium blue (Coast Guard blue) with a board diagonal white slash upon which a matching blue Coast Guard Auxiliary emblem is centered. The while slash shall be at a 70 degree angle, rising away from the hoist.

(c) The Auxiliary emblem consists of a disk with the shield of the Coat of Arms of the United States circumscribed by an annulet edged and inscribed "U.S. COAST GUARD AUXILIARY" all in front of two crossed anchors.

3. Section 5.48 is added to read as follows:

§ 5.48 Auxiliary Patrol Boat ensign.

(a) The Coast Guard Auxiliary Patrol Boat ensign is authorized to be flown on all Auxiliary Operational Facility vessels under orders. The penalty for the unauthorized flying of any ensign, flag or pennant of the Auxiliary is set forth in § 5.67 of this part.

(b) The field of the Auxiliary Patrol Boat ensign is white. A medium blue (Coast Guard blue) Coast Guard Auxiliary emblem is centered on a broad diagonal red (Coast Guard red) slash which is at a 70 degree angle, rising toward the hoist. The red (Coast Guard red) slash is followed, away from the hoist, by two narrow, parallel stripes, first a white stripe and then a medium blue (Coast Guard blue) stripe. The entire design is centered on the ensign.

Dated: September 24, 1987.

M.E. Gilbert,

Rear Admiral, U.S. Coast Guard, Chief, Office of Boating, Public and Consumer Affairs.

[FR Doc. 87-22729 Filed 9-30-87; 8:45 am]

BILLING CODE 4910-14-M

POSTAL SERVICE

39 CFR Part 111

Combined Presort and ZIP + 4 Presort First-Class Mail

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The rule adopted herein reimposes, effective December 20, 1987, the requirement that at least 85 percent of the pieces in a combined Presort and ZIP + 4 Presort First-Class mailing must bear a ZIP + 4 code. This action will terminate the exemption from the minimum ZIP + 4 coding requirement which has been in effect since the ZIP + 4 conversion transition period was initiated in April, 1985.

EFFECTIVE DATE: December 20, 1987.

FOR FURTHER INFORMATION CONTACT: William T. Alvis, (202) 268-2982.

SUPPLEMENTARY INFORMATION: On April 17, 1987, the Postal Service published in the **Federal Register** a proposal to reimpose the requirement that 85 percent of the pieces in a combined Presort and ZIP + 4 Presort First-Class mailing bear ZIP + 4 codes before the pieces bearing a ZIP + 4 code would be eligible for the ZIP + 4 Presort rate. 52 F.R. 12559. As noted in the proposal, the regulations which first authorized combined Presort and ZIP + 4 Presort mailings had required that at least 85 percent of the pieces in a combined

mailing bear ZIP + 4 codes. Early experience with the ZIP + 4 program indicated that mailers were having more difficulty converting their mailing lists to ZIP + 4 code usage than had been anticipated. In response, the Postal Service adopted a rule temporarily suspending the 85 percent requirement so that mailers could have a reasonable opportunity to convert their operations without losing ZIP + 4 discounts.

The proposal observed that approximately two years had passed since the suspension was adopted. Two years was considered ample time for mailers to convert to ZIP + 4 usage. Further, the proposal observed that combined mailings that have high proportions of mail that do not bear ZIP + 4 codes result in nonproductive handlings of mail that increase postal costs. The proposal concluded that a requirement that at least 85 percent of the pieces in a combined mailing bear ZIP + 4 codes was reasonably achievable by mailers and would hold down nonproductive handling costs. Finally, the proposal noted that there were some mailers who had recently begun the process of converting their mailing lists. To accommodate those mailers, the effective date would be delayed until October 18, 1987, to allow them to complete their conversion without having to face imminent loss of their ZIP + 4 code discounts. May 22, 1987, was set as the deadline for comments on the proposed rule.

Five comments were received by the deadline. Four comments were received late. Acceptance of the late comments would not prejudice the rights of any other commenters, so the late comments will be considered herein.

Six commenters, three presort service bureaus, an association of presort service bureaus, a financial services company, and a letter shop, opposed the reimposition of the 85 percent requirement. The association also urged that the effective date for the reimposition of the 85 percent requirement would not allow mailers who had recently converted to ZIP + 4 usage to recover their costs of conversion through Presort ZIP + 4 rate discounts. One commenter supported the reimposition of the 85 percent rule, but believed that the effective date should be sooner. Two commenters did not oppose the reimposition of the 85 percent requirement, but had other suggestions. One suggested that a lower minimum, 75 or 80 percent, be imposed for an interim period of one year. The second suggested that the proposed rule be amended to provide explicity that all pieces in a mailing which bear a ZIP + 4 code will be counted toward the 85 percent requirements regardless of whether the pieces otherwise qualified for the ZIP + 4 Presort rate.

Presort service bureaus collect unsorted mail, usually from many mailers, combine the mail, sort it to three- or five-digit ZIP Codes, and tender the mail to the Postal Service at Presort First-Class rates. As compensation for the work they do, bureaus typically receive from their customers part of the difference between what their customers would have paid as postage if the mail had been tendered as unsorted mail, and the postage that was paid after presortation by the bureaus. Generally, the bureaus rely on their customers to include ZIP + 4 codes on their mail. Bureaus may share part of any ZIP + 4 presort discounts with customers who put ZIP + 4 codes on their mail, or they may not. The presort service bureaus and the association state that bureaus simply cannot meet the 85 percent requirement. Thus, they say, reimposing the 85 percent requirement would mean that presort service bureaus could not receive the ZIP + 4 discount on the mail that they handle that has ZIP + 4 codes on it. Losing the discount would mean that they would lose the incentive to promote the ZIP + 4 program, so that reimposition of the 85 percent minimum would reduce ZIP + 4 volume. The association also states that the proposed effective date for reimposing the 85 percent requirement would be too soon for their customers who have recently converted to ZIP + 4 usage to recoup their investment by receiving postage savings on ZIP + 4 coded mail tendered for mailing through the facilities of presort service bureaus.

The letter shop commenter stated that it prepares ZIP + 4 mailings for its customers. It says that even after two years of experience it generally cannot achieve an 85 percent ZIP + 4 level for its mailings. Accordingly, this commenter says that if the 85 percent requirement were reimposed, it would not receive a ZIP + 4 discount for many of its pieces. This commenter also stated that it disagreed with the Postal Service's contention that commingling five-digit pieces with presorted ZIP + 4 pieces resulted in nonproductive handlings. This commenter also stated that increasing the requirement for ZIP + 4 coding to eliminate additional handlings of commingled five-digit mail would increase the amount of residual mail and the number of five- and three-digit packages that must be handled.

The financial services company also said that it was not achieving an 85 percent ZIP + 4 code level for its mailings. This mailer urged that the 85 percent requirement not be reimposed.

Another commenter was a large mailer who stated that the 85 percent requirement was acceptable and achievable for it. This commenter said, however, that it considered itself a reasonably sophisticated mailer, and questioned whether many mailers were capable of maintaining an 85 percent ZIP + 4 level. This commenter suggested that the Postal Service adopt a slightly lower requirement, 75 to 80 percent, for an interim period of one year.

The last commenter was also a large mailer who did not oppose the 85 percent requirement in principle. This mailer was concerned, however, that not all the pieces in a combined ZIP + 4 Presort mailing that contained a ZIP + 4 code would count toward the 85 percent requirement. This mailer apparently wants residual pieces on which regular ZIP + 4 postage is paid to count toward the 85 percent requirement the same as pieces which qualify for the ZIP + 4 Presort rate.

After careful consideration of all of the comments, the Postal Service has concluded that it will adopt the rule as proposed. We recognize that, under current operations, some presort service bureaus will no longer be able to obtain the ZIP + 4 discount or all the mail tendered to them that has a ZIP + 4 code on it. We do not believe that this would justify further delay in reimposing the 85 percent requirement, with the additional mail processing costs that delay would entail. Further, if a presort service bureau has sufficient amounts of ZIP + 4 mail, it can separate that mail from mail which bears only a five-digit ZIP Code and tender the ZIP + 4 coded mail as a separate mailing. Presort service bureaus can also take advantage of the provisions in Domestic Mail Manual (DMM) section 336 that permit some ZIP + 4 coded mail to be sorted only to three digits and still qualify for Presorted ZIP + 4 rates. In this regard, our analysis indicates that the cost of the additional handlings of five-digit presort mail commingled with Presort ZIP + 4 mail exceeds the cost of the handlings that would be incurred if that mail were not commingled.

With respect to service bureau customers who have only recently converted to ZIP + 4 usage and have not yet recouped their investment, we believe that the more than two years that the 85 percent requirement will have been suspended has given mailers in general an adequate amount of time to decide on whether to use ZIP + 4

BEST COPY AVAILABLE

codes, make their conversion, and recover their investment. While there might be some mailers who, because of the reimposition of the 85 percent requirement, will not recover all of their investment as quickly as they otherwise might have, we believe that they had ample notice that the 85 percent requirement would be reimposed at some time. We further have concluded that the interval between the proposal to reimpose the 85 percent requirement and the effective date of the new regulations is an appropriate period for bringing the suspension to an orderly end, without unduly penalizing mailers who have not already converted to ZIP + 4 usage.

Nonetheless, because of the time required to evaluate the comments and conduct appropriate investigations of some of the assertions made in the comments, and because in the time between the publication of the proposed rule and the decision to adopt the rule as proposed the Postal Service adopted a policy of making most changes in DMM regulations effective with the issuance of a new edition of the DMM each quarter, the Postal Service has decided to postpone the effective date of the new rule. In this instance, the next edition of the DMM is scheduled for December 20, 1987. Accordingly, the effective date for the new rule will be December 20, 1987.

The Postal Service has also decided that it will not adopt a ZIP + 4 qualification level of less than 85 percent. Our analysis in connection with the proposal to permit some ZIP + 4 coded mail to be presorted only to the three-digit level and still qualify for the ZIP + 4 Presort rate showed that the automation equipment operates more efficiently with the 85 percent qualification level than with any lower level. Our experience since then has not altered that conclusion.

In addition, based on the claimed inability of some of the commenters to meet the 85 percent requirement, the Postal Service counsulted with its sales personnel about customers' ability to achieve an 85 percent ZIP + 4 code level for their mailings. The sales personnel reported that the companies with which they spoke expected no difficulty in meeting the 85 percent requirement. The Postal Service's Address Information Center was also consulted because of its experience with ZIP + 4 code conversion and usage, and it confirmed that by using state-of-the-art software and equipment mailers should have no difficulty in meeting the 85 percent requirement. Accordingly, we believe that many mailers can achieve and will maintain a qualification level of 85 percent or greater. We will, however, monitor the situation, and will consider any evidence that shows that the 85 percent level should be changed.

We also reject the proposal to amend the proposed rule so as to state that all pieces in a mailing which bear a ZIP + 4 code will count toward the 85 percent requirement regardless of whether all of those pieces are paid at the ZIP + 4 Presort rate. The rule as proposed was intended to provide that 85 percent of the pieces of a combined mailing bear a ZIP + 4 code for the ZIP + 4 pieces in the mailing to qualify for the additional ZIP + 4 Presort discount. The proposed amendment would change that intent, so that carrier route presort and residual pieces bearing a ZIP + 4 code would also count toward the 85 percent requirement. No data have been presented which would warrant such a departure from the intent of the rule, or which would reliably inform the Postal Service of the possible cost and revenue consequences of such a departure.

The Postal Service hereby adopts the following final regulations on this subject as an amendment to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority for Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001–3011, 3201–3219, 3403–3406, 3621, 5001.

Part 365—Combined Presort Mailings

2. In 365, delete current 365.2, renumber 365.3 through 365.5 as 365.2 through 365.4 respectively, then renumber 365.22–.26 as 365.23–.27, and add a new 365.22 to read as follows:

365.2 Requirements for Combined Presort Mailings

* * * * *

.22 At least 85 percent of the pieces in a combined mailing must bear the correct ZIP + 4 code.

A transmittal letter making these changes in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. Notice of issuance of the transmittal letter will be published in the **Federal Register** as provided by 39 CFR 111.3.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

39 CFR Parts 952 and 964

Disposition of Mail Withheld From Delivery

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Judicial Officer of the Postal Service hereby issues the rules of practice in proceedings for administrative review of cases involving mail withheld from delivery pursuant to 39 U.S.C. 3003 and 3004. Such action is taken pursuant to authority delegated to the Judicial Officer by 39 CFR 224.1(c)(4)(ii)(A).

Present regulations governing rules of practice for mail withheld under section 3003 are contained in 39 CFR Part 952. Those rules of practice also cover false representation and lottery proceedings brought under 39 U.S.C. 3005. There presently are no rules of practice governing proceedings brought under 39 U.S.C. 3004.

It has been determined that a need exists for promulgation of rules of practice governing proceedings under 39 U.S.C. 3004. Due to the similarity of Postal Service enforcement procedures under 39 U.S.C. 3003 and 3004 the rules of practice for those two proceedings will be combined. Accordingly, 39 CFR 952.2 is amended to delete coverage of 39 U.S.C. 3003 proceedings and the new following rules are adopted as Part 964.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: James D. Finn, Jr., 202–268–2133.

List of Subjects in 39 CFR Parts 952 and 964

Administrative practice and procedure, Postal Service, Fraud, Lotteries.

PART 952—RULES OF PRACTICE IN PROCEEDINGS RELATIVE TO FALSE REPRESENTATION AND LOTTERY ORDERS

1. The authority citation for Part 952 is revised to read as set forth below, and the authority citations following all the sections in Part 952 are removed.

Authority: 39 U.S.C. 204, 401, 3005.

§ 952.2 [Amended]

2. In § 952.2, remove "3003 and".

3. New Part 964 is added to read as follows:

PART 964—RULES OF PRACTICE GOVERNING DISPOSITION OF MAIL WITHHELD FROM DELIVERY PURSUANT TO 39 U.S.C. 3003, 3004

Sec.

964.1 Authority for rules.
964.2 Scope of rules.
964.3 Customer petitions; notice of hearing; answer; summary judgment.
964.4 Hearings.
964.5 Election as to hearing.

Authority: 39 U.S.C. 204, 401, 3003, 3004.

§ 964.1 Authority for rules.

These rules of practice are issued by the Judicial Officer of the United Postal Service pursuant to authority delegated by the Postmaster General (39 CFR 224.1(c)(4)).

§ 964.2 Scope of rules.

The rules in this part provide for administrative review of cases in which the Chief Postal Inspector or his delegate, acting pursuant to 39 U.S.C. 3003(a), has withheld from delivery mail which he believes is involved in a scheme described in section 3003(a), and cases in which the Chief Postal Service Inspector or his delegate, acting pursuant to 39 U.S.C. 3004, determines that letters or parcels sent in the mail are addressed to places not the residence or regular business address of the person for whom they are intended to enable the person to escape identification.

§ 964.3 Customer petitions; notice of hearing; answer; summary judgment.

(a) *Petition.* Any addressee who receives notice from the Chief Postal Inspector or his delegate that his mail has been withheld pursuant to 39 U.S.C. 3003(a) or 3004 may oppose such action by filing with the Judicial Officer a written Petition stating the reasons for his or her opposition. The Petition, signed by the Petitioner or his attorney, shall be filed by sending the Petition via certified mail to the Recorder, Judicial Officer Department, U.S. Postal Service, Washington, DC 20260–6100. The Petition must be postmarked within 14 days of the date upon which the Petitioner received the notice.

(b) *Notice of hearing.* On receipt of the Petition, the Recorder shall schedule a hearing on a date not later than 28 days after the date of receipt. A Notice of Hearing shall be sent to the Petitioner. A copy of the Notice of Hearing and the Petition shall be sent to the General Counsel of the U.S. Postal Service.

(c) *Answer.* The General Counsel of the Postal Service shall file an Answer to the Petition within 10 days of receipt of the Petition from the Recorder.

(d) *Summary judgment.* Upon motion of either the General Counsel or the Petitioner, or upon his own initiative, the presiding officer may find that the Petition and Answer present no material issues of fact requiring an evidentiary hearing and thereupon may render an initial decision granting or dismissing the Petition. The initial decision shall become the final agency decision if a timely appeal is not taken pursuant to § 964.16 of this part.

§ 964.4 Hearings.

Hearings are held at the Headquarters of the U.S. Postal Service, Washington, DC, or such other location as may be designated by the presiding officer. Not later than 10 days prior to the date fixed for the hearing, a party may file a request that a hearing be held to receive evidence in his behalf at a place other than that designated for hearing in the notice. He shall support his request with a statement outlining:

(a) The evidence to be offered in such place;

(b) The names and addresses of the witnesses who will testify; and

(c) The reasons why such evidence cannot be produced at Washington, DC. The presiding officer shall give consideration to the convenience and necessity of the parties and the relevance of the evidence to be offered

§ 964.5 Election as to hearing.

If both parties elect, they may waive an oral hearing and submit the matter for decision on the basis of the Petition and Answer, subject to the authority of the presiding officer to require the parties to furnish such further evidence or such briefs as necessary. The request to waive oral hearing should be filed not later than 10 days prior to the date set for hearing.

§ 964.6 Default.

If a Petitioner fails to appear at the hearing without notice or without adequate cause the presiding officer may issue an order dismissing the Petition. An order of dismissal issued under this section may be appealed to the Judicial Officer within 10 days from the date of the order.

§ 964.7 Presiding officers.

(a) The presiding officer shall be an Administrative Law Judge qualified in accordance with law. The Judicial Officer shall assign cases upon rotation as far as practicable. The Judicial Officer may on his own initiative or for good cause shown, preside at the reception of evidence.

(b) The presiding officer has authority to:

(1) Administer oaths and affirmations;

(2) Examine witnesses;

(3) Rule upon offers of proof, admissibility of evidence and matters of procedure;

(4) Order any pleadings amended upon motion of a party at any time prior to the close of the hearing;

(5) Maintain discipline and decorum and exclude from the hearing any person acting in an indecorous manner;

(6) Require the filing of briefs or memoranda of law on any matter upon which he is required to rule;

(7) Order prehearing conferences for the purpose of the settlement or simplification of issues by the parties or for any other purpose he believes will facilitate the processing of the proceeding;

(8) Order the proceeding reopened at any time prior to his decision for the receipt of additional evidence;

(9) Render an initial decision, which becomes the final agency decision unless a timely appeal is taken: The Judicial Officer may issue a tentative or a final decision;

(10) Rule upon applications and requests filed under § 964.9 of this part.

§ 964.8 Subpoenas and witness fees not authorized.

The Postal Service is not authorized to issue subpoenas requiring the attendance or testimony of witnesses, nor to pay fees and expenses for a Petitioner's witnesses or for depositions requested by a Petitioner.

VOL 52 ISS 190 OCT 1 1987 UMI

§ 964.9 Discovery; interrogatories; admission of facts; production and inspection of documents.

(a) *General policy and protective orders.* The parties are encouraged to engage in voluntary discovery procedures. In connection with any discovery procedure permitted under this part, the presiding officer may issue any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense. Such orders may include limitations on the scope, method, time and place for discovery, and provisions for protecting confidential information or documents from unwarranted public disclosure. Each party shall bear its own expenses relating to discovery.

(b) *Depositions.* (1) After the issuance of a notice of hearing described in § 964.3 of this part, the parties may mutually agree to, or the presiding officer may, upon application of either party and for good cause shown, order the taking of testimony of any person by deposition upon oral examination or written interrogatories before any officer authorized to administer oaths at the place of examination, for use as evidence or for purposes of discovery. The application for order shall specify whether the purpose of the deposition is discovery or for use as evidence, or both.

(2) The time, place, and manner of taking depositions shall be as mutually agreed by the parties, or failing such agreement, governed by order of the presiding officer.

(3) No testimony taken by depositions shall be considered as part of the evidence in the hearing unless and until such testimony is offered and received in evidence at such hearing. Depositions will not ordinarily be received in evidence if the deponent is present and can testify personally at the hearing. In such instances, however, the deposition may be used to contradict or impeach the testimony of the witness given at the hearing. In cases submitted on the record, the presiding officer may, in his discretion, receive depositions as evidence in supplementation of the record.

(c) *Interrogatories to parties.* Not later than 5 days after the filing of the Answer described in § 964.3, a party may serve on the other party written interrogatories to be answered separately in writing, signed under oath and returned within 10 days. Upon timely objection by the party, the presiding officer will determine the extent to which the interrogatories will be permitted.

(d) *Admission of facts.* Not later than 5 days after the filing of the Answer described in § 964.3, a party may serve upon the other party a request for the admission of specified facts. Within 10 days after receipt of the request for admissions, the party served shall admit or answer each specified fact or file objections thereto. Any factual propositions set out in the request to which a party fails to respond shall be deemed admitted.

(e) *Production and inspection of documents.* Upon motion of any party showing good cause therefor, and upon notice, the presiding officer may order the other party to produce and permit the inspection and copying or photographing of any designated documents and or objects, provided that such documents and objects are not privileged, their relevance to the cause or causes in issue is explained, and they are reasonably calculated to lead to the discovery of admissible evidence. If the parties cannot themselves agree thereon, the presiding officer shall specify the terms and conditions for making the inspection and taking the copies and photographs.

§ 964.10 Evidence.

(a) In general, admissibility will hinge on relevancy and materiality. However, relevant evidence may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence.

(b) Testimony shall be given under oath or affirmation and witnesses shall be subject to cross-examination.

(c) Agreed statements of fact are encouraged and may be received in evidence.

§ 964.11 Transcript.

Testimony and argument at hearings shall be reported verbatim, unless the presiding officer orders otherwise. Transcripts or copies of the proceedings are supplied to the parties at such rate as may be fixed by contract between the reporter and Postal Service. Any party desiring a copy of the transcript shall order it from the contract reporter in a timely manner to avoid delay in filing briefs.

§ 964.12 Computation of time.

A designated period of time under these rules means calendar days, excludes the day the period begins, and includes the last day of the period unless the last day is a Saturday, Sunday, or legal holiday, in which case the period runs until the close of business on the next business day.

§ 964.13 Continuances and extensions.

Continuances and extensions will be granted by the presiding officer for good cause shown.

§ 964.14 Proposed findings of fact and conclusions of law.

(a) Each party to a proceeding, except one who fails to answer the Petition or, having answered, either fails to appear at the hearing or indicates in the answer that he does not desire to appear, may, unless at the discretion of the presiding officer such is not appropriate, submit proposed findings of fact, conclusions of law, orders and supporting reasons either in oral or written form in the discretion of the presiding officer. The presiding officer may also require parties to submit proposed findings of fact, conclusions of law, orders, and supporting reasons. Unless given orally, the date set for filing of proposed findings of fact, conclusions of law, orders and supporting reasons shall be within 15 days after the delivery of the official transcript to the Recorder who shall notify both parties of the date of its receipt. The filing date for proposed findings of fact, conclusions of law, orders and supporting reasons shall be the same for both parties. If not submitted by such date, unless extension of time for the filing thereof is granted, they will not be included in the record or given consideration.

(b) Except when presented orally before the close of the hearing, proposed findings of fact shall be set forth in serially numbered paragraphs and shall state with particularity all evidentiary facts in the record with appropriate citations to the transcript or exhibits supporting the proposed finding. Each proposed conclusion shall be separately stated.

§ 964.15 Decisions.

(a) *Initial decision by Administrative Law Judge.* A written initial decision shall be rendered by an Administrative Law Judge with all due speed. The initial decision shall include findings and conclusions with the reasons therefor upon all the material issues of fact or law presented in the record, and the appropriate orders or denial thereof. The initial decision shall become the final agency decision unless an appeal is taken in accordance with § 964.16.

(b) *Tentative or final decision by the Judicial Officer.* When the Judicial Officer presides at the hearing he shall issue a final or a tentative decision. Such decision shall include findings and conclusions with the reasons therefor upon all the material issues of fact or law presented in the record, and the

appropriate orders or denial thereof. The tentative decision shall become the final agency decision unless exceptions are filed in accordance with § 964.16.

§ 964.16 Appeal.

(a) Either party may file exceptions in a brief on appeal to the Judicial Officer within 15 days after receipt of the initial or tentative decision unless additional time is granted. A reply brief may be filed within 15 days after receipt of the appeal brief by the opposing party. The Judicial Officer has all powers of a presiding officer and is authorized to decide all issues *de novo*.

(b) Briefs upon appeal or in support of exceptions to a tentative decision by the Judicial Officer and replies thereto shall be filed in triplicate with the Recorder and contain the following matter in the order indicated:

(1) A subject index of the matters presented, with page references; a table of cases alphabetically arranged; a list of statutes and texts cited with page references.

(2) A concise abstract or statement of the case in briefs on appeal or in support of exceptions.

(3) Numbered exceptions to specific findings and conclusions of fact, conclusions of law, or recommended orders of the presiding officer in briefs on appeal or in support of exceptions.

(4) A concise argument clearly setting forth points of fact and of law relied upon in support of or in opposition to each exception taken, together with specific references to the parts of the record and the legal or other authorities relied upon.

§ 964.17 Final agency decision.

The Judicial Officer renders the final agency decision which will be served upon the parties and upon the postmaster at the office where the mail at issue is being held.

§ 964.18 Compromise and informal disposition.

Nothing in these rules precludes the compromise, settlement, and informal disposition of proceedings initiated under these rules at any time prior to the issuance of the final agency decision.

§ 964.19 Orders.

If an order is issued which prohibits delivery of mail to a Petitioner it shall be incorporated in the record of the proceeding. The Recorder shall cause notice of the order to be published in the *Postal Bulletin* and cause the order to be transmitted to such postmasters and other officers and employees of the Postal Service as may be required to place the order into effect.

§ 964.20 Modification or revocation of orders.

A party against whom an order or orders have been issued may file an application for modification or revocation thereof. The Recorder shall transmit a copy of the application to the General Counsel, who shall file a written reply within 10 days after receipt or such other period as the Judicial Officer may fix. A copy of the reply shall be sent to the applicant by the Recorder. Thereafter an order granting or denying such application will be issued by the Judicial Officer.

§ 964.21 Official record.

The transcript of testimony together with all pleadings, orders, exhibits, briefs, and other documents filed in the proceeding constitute the official record of the proceeding.

§ 964.22 Public information.

The Law Librarian of the Postal Service maintains for public inspection in the Law Library copies of all initial, tentative, and final agency decisions and orders. The Recorder maintains the complete official record of every proceeding.

§ 964.23 Ex parte communications.

The provisions of 5 U.S.C. 551(14), 556(d), and 557(d) prohibiting ex parte communications are made applicable to proceedings under these rules of practice.

James A. Cohen,

Judicial Officer.

BILLING CODE 7710-12-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 413

[BERC-428-F]

Medicare Program; Payment for Facility Services Related to Ambulatory Surgical Procedures Performed in Hospitals on an Outpatient Basis

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule sets forth the methodology that will be used to determine payments for hospital outpatient services furnished to Medicare beneficiaries in connection with ambulatory surgical procedures. This rule implements section 9343(a) of the Omnibus Budget Reconciliation Act of 1986.

EFFECTIVE DATE: This regulation is effective for hospital cost reporting periods beginning on or after October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Janet Wellham, (301) 597-1939.

SUPPLEMENTARY INFORMATION:

I. Background

On June 2, 1987, we published in the **Federal Register** (52 FR 20623) a notice of proposed rulemaking (the proposed rule) that solicited public comments on regulations to implement section 9343(a) of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99-509), enacted on October 21, 1986. Section 9343(a) of Pub. L. 99-509 set forth specific, new methodology to be used in determining Medicare payment for facility services furnished in a hospital on an outpatient basis in connection with covered ambulatory surgical center (ASC) procedures that have been specified by the Secretary in accordance with section 1833(i)(1)(A) of the Act and 42 CFR 416.65. Section 9343(a) of Pub. L. 99-509 amended section 1833(a)(4) of the Act and added a new section 1833(i)(3) to the Act to provide that, for hospital cost reporting periods beginning on or after October 1, 1987, payment for outpatient facility services in the aggregate is to be based on a comparison between two amounts. The payment is to be the lesser of the following:

The amount for the services that would be paid to the hospital under section 1833(a)(2)(B) of the Act (that is, the lower of the hospital's reasonable costs or customary charges for the services, reduced by deductibles and coinsurance); or

An amount based on a blend of—

The amount that would be paid to the hospital for the services under section 1833(a)(2)(B) of the Act (referred to below as the hospital-specific amount); and

The amount that would be paid to a free-standing ASC for the same procedure in the same geographic area, in accordance with section 1833(i)(2)(A) of the Act, which is equal to 80 percent of the standard overhead amount reduced by deductibles (referred to below as the ASC payment amount).

Section 1833(i)(3)(B) of the Act provides that for cost reporting periods beginning on or after October 1, 1987 but before October 1, 1988, the blended amount is based on 75 percent of the hospital-specific amount and 25 percent of the ASC payment amount attributable to the procedure. For cost reporting

VOL 52 ISS 190 OCT 1 1987 UMI

periods beginning on or after October 1, 1988, the blended payment amount is to be based on 50 percent of the hospital-specific amount and 50 percent of the ASC payment amount. In addition, section 1833(i)(3)(A) of the Act, as added by section 9343(a) of Pub. L. 99–509, requires that all covered ASC surgical procedures performed in a hospital on an outpatient basis during a cost reporting period be aggregated for purposes of determining the proper Medicare payment amount.

II. Summary of Provisions

In the proposed rule, we set forth changes to Subparts A and F of 42 CFR Part 413. Because the statute is very specific, we were unable to adopt any of the suggestions made by the commenters concerning the proposal. In section III below, we discuss the comments we received and provide our responses to them.

As proposed, in Subpart A, we are revising § 413.13(c), which provides for the aggregation of charges for purposes of determining the amount of payments to a provider if customary charges for services furnished are less than reasonable costs. As it currently reads, § 413.13(c) specifies that in comparing charges and costs, customary charges for items and services, and the reasonable cost of those items and services are to be aggregated without regard to whether the related services are payable under Part A (Hospital Insurance) or Part B (Supplementary Medical Insurance) of Medicare.

As we noted in the proposed rule, section 2308(a) of the Deficit Reduction Act of 1984 (Pub. L. 98–369), enacted on July 18, 1984, directs the Secretary to issue regulations, applicable to cost reporting periods beginning on or after October 1, 1984, to eliminate the aggregation method of calculating the lower cost or charges (LCC) and to require that LCC be calculated and reported separately for services furnished under Part A or Part B of the Medicare program.

This change was subject of a notice of proposed rulemaking we published on September 18, 1986 in the **Federal Register** (51 FR 33074), and we are in the process of developing a final rule. We expect to publish that rule shortly. However, in order to implement section 9343(a) of Pub. L. 99–509, we found it necessary to make a further refinement to the methodology mandated by section 2308(a) of Pub. L. 98–369 that requires a further disaggregation of customary charges. Effective for cost reporting periods beginning on or after October 1, 1987, it will be necessary that all reasonable costs and customary charges for those services that are subject to the new payment method for covered ASC surgical procedures performed in a hospital on an outpatient basis during a cost reporting period be aggregated and treated separately from the reasonable costs and customary charges for all other services furnished in the cost reporting period.

As also proposed on June 2, 1987, we are adding a new § 413.118 (in 42 CFR Part 413, Subpart F), to describe the payment methodology required by section 1833(i)(3) of the Act (as enacted by section 9343(a) of Pub. L. 99–509) that will be used to determine payment for facility services related to covered ASC surgical procedures performed in a hospital on an outpatient basis. In the new § 413.118, we define the terms "facility services," "blended payment amount" and "standard overhead amount." We define outpatient "facility services" using the same definition as used for facility services for ambulatory surgical centers (as described in § 416.61). We based the definitions of "blended payment amount" on the payment methodology required by section 1833(i)(3)(B) of the Act, as added by section 9343(a) of Pub. L. 99–509, and the definition of "standard overhead amount" on section 1833(i)(2)(A) of the Act, which requires payments to ASCs to be equal to 80 percent of the standard overhead amount (net of the Part B deductible) per procedure (as described in § 416.125).

The aggregate payment for outpatient facility services, as defined above, will be equal to the lesser of: (1) The hospital's reasonable costs or customary charges, as described in § 413.13, reduced by deductibles and coinsurance; or (2) a blended amount based on the lower of a hospital's reasonable cost or customary charges reduced by deductibles and coinsurance and 80 percent of the standard overhead amount (reduced by deductibles) paid to free-standing ASCs for the same procedure in the same geographic area. For cost reporting periods beginning on or after October 1, 1987 but before October 1, 1988, the blend is to be 75 percent hospital-specific (based on the lower of reasonable costs or customary charges reduced by deductibles and coinsurance) and 25 percent of the amount paid to a free-standing ASC for the same procedure in the same geographic area. As discussed in the proposed rule (52 FR 20624), the portion of the blend attributable to the ASC payment amount is determined based on the standard overhead amount (net of deductibles) multiplied by 80 percent. The 80 percent adjustment is in accordance with section 1833(i)(2)(A) of the Act, which requires payments to ASCs to be 80 percent of the standard overhead amount per procedure. For cost reporting periods beginning on or after October 1, 1988, the 75 percent/25 percent blend, discussed above, changes to a 50/50 blend.

As explained in the preamble of the June 2, 1987 proposed rule, in order to make this rule consistent with payment rules for free-standing ASC services, if more than one covered ASC surgical procedure is performed at one time, payment is to be based on the procedure with the highest standard overhead payment amount, and payment for the other procedures is to be based on fifty percent of the applicable standard overhead amounts, as provided in § 416.120. As noted in the proposed rule, ASCs operated by hospitals that have an agreement with HCFA to be paid in accordance with § 416.30(f) are unaffected by this rule. That is, these ASCs will continue to be paid in accordance with § 416.30.

In addition, we note that covered surgical procedures furnished by a hospital on an outpatient basis that are not included on the covered ASC surgical procedure listing, as updated in a final notice in the **Federal Register** on April 21, 1987 (52 FR 13176) and corrected on May 11, 1987 (52 FR 17678), are to be reimbursed under existing regulations without regard to the blended payment amount described in this rule. If any of these covered surgical procedures are subsequently included on the covered ASC surgical procedure listing, then the payment methodology described in this rule would be applied as of the effective date of the addition to the ASC surgical procedure listing.

III. Comments and Responses

We received 12 timely sets of comments concerning our proposal. These comments were from hospitals, hospital associations and others. A summary of the comments we received and our responses to them are presented below.

Comment: Some commenters stated that, since the implementation of the prospective payment system for hospital inpatient services, hospitals have been under extreme pressure to move certain surgical procedures from the inpatient setting to the outpatient setting. These commenters stated that under this new payment methodology hospitals will, in almost all cases, lose money because they will be reimbursed at either cost or less than cost regardless of how low their costs are. The point was also made that, unlike hospitals, most ASCs are physician owned and that their losses

are subsidized by the physician owners. Another statement made by these commenters was that the proposed payment methodology will have very detrimental effects on those hospitals whose outpatient surgery percentage is 25 percent or higher of the total surgical procedures performed in the hospital. These commenters pointed out that there have been no regulations proposed that would help those hospitals that have a disproportionately high share of outpatient surgical procedures to total surgical procedures. According to these commenters, hospitals that have done what HCFA has requested over the past few years (that is, transferred services to the outpatient setting) will now find themselves being forced out of business as the result of this new payment methodology. The commenters used the ASC payment rate for cataract surgery as an example. They stated that the cost for cataract surgery, when provided in a hospital outpatient setting, is substantially more than the amount that was announced for this procedure in the notice of ASC rates published on June 1, 1987 (52 FR 20466).

Response: The payment methodology for ambulatory surgical procedures performed in hospitals on an outpatient basis, as described in the June 2, 1987 proposed rule, is required by section 1833(i)(3) of the Act, as enacted by section 9343(a) of Pub. L. 99–509. We have no authority to provide any relief to hospitals generally or those that perform a disproportionate share of outpatient surgeries. We point out that the payment methodology contained in this rule is only applicable to those procedures that have been specified by the Secretary to be performed by an ambulatory surgical center. Section 1833(i)(3) of the Act specifically requires the use of ASC payment rates along with a hospital's actual cost and charge data for purposes of determining the amount of payment that is to be made for facility services related to ambulatory surgical procedures performed in hospital outpatient departments. Thus, the payment for cataract surgery like any other ASC procedure performed in a hospital on an outpatient basis must be limited to an amount based on the amount that would be paid to a freestanding ASC for the same procedure.

Comment: Two commenters stated that the methodologies implementing Pub. L. 99–509 will result in significantly increased expenses to hospitals because of the need to use the HCFA Common Procedure Coding System (HCPCS) and to make data processing, billing and accounting changes. The commenters stated that the proposed payment methodology will impose more stringent payment requirements on hospitals than are imposed on approved freestanding ASCs. These commenters further stated that, because under the proposed payment methodology hospitals will receive payments based on the lesser of two amounts (that is, the lower of cost or charges or the blended payment), there is no potential for hospitals to make a profit. One of these commenters specifically requested that we change the proposed payment methodology in order to remove the lower of cost or charges provision.

Response: We acknowledge that hospitals may incur increased expenses relating to data processing, billing and accounting changes that must be made in order to comply with this regulation. However, the payment methodology relating to ambulatory surgical procedures performed in hospitals on an outpatient basis was mandated by Congress when it enacted section 9343 of Pub. L. 99–509. Consequently, we have very limited discretion in implementing this methodology. We have no authority to remove the lower of cost or charges provision because section 1833(i)(3) of the Act specifically requires it.

Comment: One hospital maintained that hospital ambulatory surgical units are not the same as ASCs. In hospital outpatient settings, certain operating rooms, staff, supplies, teaching and capital resources are used and, although the end result is less costly than inpatient surgery, hospital outpatient surgery is not comparable to services performed in an ASC.

Response: Congress, in enacting section 1833(i)(3) of the Act, did not intend that hospitals be paid the full ASC amount at this time. The payment methodology required by section 1833(i)(3) of the Act is a temporary payment methodology that is to be used by hospitals until a prospective payment system for ambulatory surgical procedures performed in hospitals is developed. Section 9343(f) of Pub. L. 99–509 requires HCFA to submit an interim report to Congress by April 1, 1988 concerning the development of a prospective payment system for ambulatory surgical procedures performed on an outpatient basis by hospitals. (The final report is due by April 1, 1989.) In the interim report, we will address whether payments to hospitals for these services should be based on hospital costs/charges, or based on ASC payment rates or a blend of the two. Also, in that report we will make recommendations for developing and implementing an all-inclusive payment system for ambulatory surgery encompassing payment for facility services and all medical and other health services commonly furnished in connection with an ambulatory surgical procedure other than the physician's services. The payment methodology described in this rule, which is an interim payment system, attempts to account for the difference between the cost of hospital facility services and ASC services by providing for the use of a phased-in blended payment amount. As discussed earlier, for the first year that the methodology is in effect, that is, Federal fiscal year (FY) 1988, the blended amount is based on 25 percent of the applicable ASC payment rate and 75 percent of the hospital's actual costs or charges. In subsequent years until a prospective payment system is implemented, the amounts change to a 50/50 percent blend.

Comment: Two commenters stated that the payment methodology requires that costs related to ASC procedures performed by a hospital be aggregated and reported on the hospital's cost report. They further stated that, in most cases, the financial detail necessary to comply with this requirement does not exist and that development of aggregate cost data is going to be burdensome on hospitals.

Response: The Medicare intermediaries will accumulate the data needed by the hospital to compute costs related to ASC procedures as bills are processed throughout the year. They will provide hospitals with the data needed to prepare cost reports through the Provider Statistical and Reimbursement Report. Therefore, we do not believe that the requirement that cost/charge data be aggregated will be overly burdensome on hospitals.

Comment: Two commenters stated that as the result of financial losses and paperwork burden imposed by this new payment methodology, hospitals will be forced to scale down their ambulatory services. Five other commenters stated that it is more expensive to provide ambulatory surgery in a hospital than in an ASC because of overhead, back-up staff, latest technologies, and diagnostic/treatment resources. These commenters maintained that back-up resources in a hospital are necessary because the types of patients that hospitals generally treat are more seriously ill than the average ASC patient. Thus, these commenters concluded that, if hospitals find that they cannot compete with ASCs because of higher costs, the availability of hospital ambulatory surgical services

may decrease. This effect would be detrimental to the Medicare population.

Response: We recognize the possibility, as we stated in the proposed rule (52 FR 20626), that beneficiary access to care may be reduced if hospitals decide that they cannot compete effectively with ASCs under the revised payment methodology and discontinue their ambulatory surgical services. However, we made the statement as a practical observation. We have no evidence nor did the commenters offer any evidence that implementation of the payment methodology will actually force hospitals to cease providing ambulatory surgical services. In any case, we are setting forth the methodology in regulations that Congress prescribed in the law.

Comment: Five hospital associations suggested that further analyses of the impact of this provision along with an evaluation of current ambulatory surgery capacity be undertaken before implementation of this new and untested payment methodology. These commenters especially requested that implementation be delayed until the HCFA report to Congress on prospective payment for surgical procedures performed in hospitals on an outpatient basis, which is due April 1, 1988, is presented and studied. Another commenter recommended that HCFA delay implementation for a year in order to allow HCFA sufficient time to analyze ASC data for purposes of establishing fair and adequate payment rates. This commenter stated that a year's delay would allow hospitals adequate time to change data processing, billing and accounting systems and would allow adequate time to train personnel in HCPCS coding procedures.

Response: Section 9343(h)(1) of Pub. L. 99–509 specifically imposes an effective date of October 1, 1987 for implementation of the payment methodology. Therefore, we have no authority to delay the implementation beyond the statutory date.

Comment: One commenter pointed out that in calculating individual ASC payment rates HCFA will apply the wage index currently in use for ASCs, published in the June 30, 1981 **Federal Register**. The commenter objected to the use of an index that has not been updated and recommended that HCFA use the wage index proposed for hospitals under the FY 1988 prospective payment rates.

Response: Payments to ASCs are currently calculated by applying the wage index that was initially published on June 30, 1981 (46 FR 33641) and subsequently republished in the November 26, 1984 **Federal Register** (49 FR 46495). Section 1833(i)(3)(B) of the Act, as enacted by 9343(a) of Pub. L. 99–509, requires that the blended payment amount be based in part on, "the standard overhead amount payable with respect to the same surgical procedure as if it were provided in an ambulatory surgical center in the same area. . . ." Therefore, the wage index currently applicable to ASCs located in the same geographic area as the hospital must be used, not the wage index applicable to hospitals.

Comment: One commenter stated that since Medicare beneficiaries pay no deductibles or coinsurance when an ASC performs a procedure, but are liable for deductibles and coinsurance on procedures performed in hospitals, Medicare beneficiaries have an incentive to go to ASCs.

Response: Section 9343(e) of Pub. L. 99–509 repealed the prior law that provided for a waiver of the deductible and coinsurance requirements for procedures performed in ASCs. Thus, Medicare beneficiaries are liable for deductibles and coinsurance regardless of where the ambulatory surgical procedure is performed.

Comment: A hospital association commented that HCFA is not giving adequate recognition to requirements that hospitals install new coding systems, revise patient billing systems, and develop new cost reporting procedures. These new requirements will create problems for most hospitals, the commenter stated, especially hospitals with cost reporting periods that begin on October 1, 1987. The commenter recommended that HCFA adopt a transition period that would permit fiscal intermediaries to exercise substantial flexibility when a hospital makes a "good faith" effort to comply.

Response: As previously stated, the statutory date for implementation of this payment methodology is for hospital cost reporting periods beginning on or after October 1, 1987, and we do not have the authority to postpone the implementation. The most significant change that hospitals will have to make in order to comply with the requirements of section 9343 of Pub. L. 99–509 is the HCPCS requirement, which became effective on July 1, 1987. Thus, those hospitals whose next cost reporting periods begin on October 1, 1987 will have had at least three months to install the necessary coding under HCPCS before the method of payment for ambulatory surgical services will be affected.

Comment: A hospital association made an observation that because a large number of services are provided in hospitals on an outpatient basis, a significant amount of the medical education of interns and residents takes place in outpatient ambulatory settings. The commenter stated that ASC payment rates do not recognize medical education costs and recommends that HCFA treat medical education costs relating to ambulatory surgical procedures as a pass-through cost.

Response: The conference report on section 9343 of Pub. L. 99–509 (H.R. Rep. No. 1012, 99th Cong., 2nd Sess. 355 (1986)) specifically states that, "no 'pass-through' is required for direct medical education costs because of the payment methodology established for these costs under section 1886(h) of the Act." Section 1886(h) of the Act, as added by the Consolidated Omnibus Budget Reconciliation Act of 1985 (Pub. L. 99–272), enacted on April 7, 1986, sets forth a specific methodology regarding Medicare's payment for the direct graduate medical education costs of interns and residents. Thus, in the view of the Congress, the services of interns and residents performing services in outpatient ambulatory settings are adequately accounted for under section 1886(h) of the Act. That is, hospitals will be compensated for direct graduate medical education costs over and above the amounts paid for ambulatory surgical procedures under this rule.

Comment: One commenter recommended basing the cost portion of the blended payment amount on the hospital's previous year's costs in order to give hospitals an incentive to cut costs. This commenter believes that the legislative language permits the Secretary the discretion to determine the period on which the cost portion of the blend will be based.

Response: The payment methodology described in section 9343(a) of Pub. L. 99–509 is very specific. The accompanying conference report (H.R. Rep. No. 1012 at page 354) states that "Payments would be based on a comparison between the amount that would be paid to a hospital OPD [that is, an outpatient department] under section 1833(a)(2)(B) and a blended amount based on the amount that would be paid to an OPD under section 1833(a)(2)(B) and the payment that would be made to a free-standing ambulatory surgical center (ASC) under section 1833(i)(2)(A) * * *. Under section 1833(a)(2)(B), services provided by an OPD are paid at the lesser of the reasonable cost for the service or the hospital's customary charge for the service * * *." The reference to the amount that would be paid under section 1833(a)(2)(B) of the

Act can only be interpreted to mean current cost, since that is what "would be paid" absent the provisions of section 9343(a) of Pub. L. 99–509. If Congress had intended that costs other than the current period costs be used, then it could have provided that the hospital-specific portion of the blended payment amount be based on a prior period (base) amount as it did in the methodologies for the prospective payment system (section 1886(d) of the Act) and direct medical education costs (section 1886(h) of the Act).

Comment: A commenter recommended that we change the term "hospital-specific amount" to "current year cost amount" because the commenter concluded that the term "hospital-specific amount" is misleading and that the term is being used in an effort to create the impression that the payment methodology implementing section 9343(a) of the Pub. L. 99–509 is similar in operation to the inpatient hospital prospective payment system.

Response: The term "hospital-specific amount," as used in § 413.118 means the lesser of the hospital's reasonable cost or customary charges reduced by deductibles and coinsurance. This is specifically explained in § 413.118. To adopt the commenters suggestion that we use the term "current year cost amount" in place of "hospital-specific amount" would be inappropriate since we are referring to more than just costs. Furthermore, we intended no comparison with the hospital prospective payment system by use of the term.

Comment: A suggestion was made that the definition of "facility services" in § 413.118(b) should be clarified. The commenter believes that our definition of facility services, which references § 416.61 of the ASC regulations, is inadequate and will result in the improper inclusion of costs for services that are provided by a hospital that are unrelated to the ambulatory surgical procedure.

Response: Section 416.61 of our regulations defines "facility services" as those items and services provided by an ASC that would otherwise be covered under the Medicare program if furnished on an inpatient or outpatient basis in a hospital in connection with covered surgical procedures. We believe this definition is adequate. The Conference Committee report on section 9343 of Pub. L. 99–509 (at page 355) indicates that Congress anticipated that we would define the term "facility services" for purposes of hospital services in a manner that is comparable to the definition of the term in § 416.61. For purposes of § 413.118(b), we adopted the definition contained in § 416.61.

Comment: One commenter suggested that we withdraw the proposed rule because other provisions of section 9343 of Pub. L. 99–509, for example, the requirement for HCPCS coding (section 9343(g)) and the requirement for the bundling of hospital outpatient services (section 9343(c)), which are related to the ASC payment methodolgy, described in the proposed rule, have not been issued in the form of regulations. The commenter noted that HCFA has implemented these other provisions of section 9343 of Pub. L. 99–509 through the issuance of program instructions.

Response: Program instructions were issued to provide program guidance concerning the ASC payment method for hospital outpatient procedures and the outpatient bundling requirements, and to implement the HCPCS coding requirements contained in section 9343 of Pub. L. 99–509. In the case of the instructions for the outpatient bundling requirements, the instructions were issued as an interim measure pending the issuance of regulations. A proposed rule concerning outpatient bundling provisions of section 9343(c) of Pub. L. 99–509 is currently under development and should be published shortly. It was determined that section 9343(g) of Pub. L. 99–509, which requires hospitals to use HCPCS, was self-implementing and, thereofore, did not require implementing regulations. Program instructions were deemed the appropriate means to implement this provision of the law. We believe that implementation of the HCPCS coding requirements of section 9343(g) of Pub. L. 99–509 through program instructions is reasonable and consistent with rulemaking requirements. The use of program instructions provides guidance to hospital providers in order for them to comply with the law. In developing the program instructions for HCPCS, we consulted extensively with members of the hospital industry.

We see no reason to withdraw this rule and emphasize that proper rulemaking procedures have been followed.

The payment methodolgy provided in section 1833(i)(3) of the Act leaves very little room for discretion on our part. We again emphasize that we have no authority to delay implementing the payment methodology required by section 1833(i)(3) of the Act, which is effective for hospital cost reporting periods beginning on or after October 1, 1987.

Comment: One commenter questioned whether States would be required to comply with the proposed rule for purposes of applying the upper payment limits to Medicaid outpatient services. The commenter noted that, if States are required to comply with these requirements for purposes of applying the upper payment limit to outpatient services, formidable system problems could prevent timely compliance and result in some States requesting a waiver from these requirements.

Response: Section 447.321 of the Medicaid regulations provides that the State agency may not pay more for hospital outpatient services than the combined payments the hospital receives from beneficiaries and intermediaries for providing comparable services under comparable circumstances under Medicare. Thus, §§ 413.13 and 413.118, as published in this final rule, will affect the upper payment limit calculations for Medicaid outpatient services.

Comment: One hospital association stated that the definition of "covered ambulatory surgical procedures" adopted in the intermediary instructions issued in July 1987 is not consistent with § 416.65 of our regulations to which the proposed rule refers. The commenter pointed out that § 416.65(b)(3)(iv) specifically states that covered surgical procedures may not be of a type that are generally emergency or life-threatening in nature. Therefore, the commenter expressed an opinion that ASC procedures performed on an emergency basis by hospitals should not be subject to the payment methodology described in this rule.

Response: We agree with the commenter to the extent that surgical procedures included on the list of ASC procedures specified by the Secretary under section 1833(i)(1)(A) of the Act and § 416.16 of the regulations are those procedures that can be performed safely in an ASC. Generally, therefore, ASC procedures, whether performed in an ASC or in a hospital outpatient setting, are not the type that are performed in life-threatening or emergency situations. Furthermore, we have no evidence that indicates that ASC procedures are performed in hospitals on an emergency basis or that, if they are performed in those situations, hospitals incur greater costs. Accordingly, we believe there is no need for an exception at this time. However, if evidence concerning this matter becomes available in the future and indicates that an exception for emergency services would be appropriate, we will propose changes to the regulations.

VOL 52 ISS 190 OCT 1 1987 UMI

IV. Regulatory Impact Statement

A. Introduction

Executive Order (E.O.) 12291 requires us to prepare and publish a final regulatory impact analysis for any final rule that meets one of the E.O. criteria for a "major rule"; that is, that is likely to result in: an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In addition, we generally prepare a final regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that a final rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we treat all hospitals as small entities.

Section 9343(a) of Pub. L. 99–509 provides the specific framework regarding payment for facility services related to ambulatory surgical procedures performed in hospitals on an outpatient basis. Accordingly, we did not prepare a regulatory impact analysis for the proposed rule published in the **Federal Register** on June 2, 1987. However, because this rule establishes the precise mechanisms for implementing the payment methodology and because of the substantial amount of money spent for outpatient surgical procedures, we did present an initial regulatory flexibility analysis with the proposed rule. Based on our initial analysis and the comments received in response to that analysis, we have determined and the Secretary certifies that this final rule is likey to have a significant economic impact on a substantial number of small entities. Our discussion below of the likely effects of this rule, together with our responses to comments received on the initial analysis, constitutes a final regulatory flexibility analysis.

B. Responses to Comments

Of the comments we received on the proposed rule, two commenters specifically contended that the initial regulatory flexibility analysis did not fully examine the effect of this rule.

Comment: One commenter stated that the initial regulatory flexibility analysis severely underestimated the magnitude and cost of the changes that hospitals will have to make to their outpatient accounting, billing, and data processing systems in order to conform them to the HCPCS. This commenter argued that hospitals cannot implement these new procedures in the short timeframes allowed without risking significant disruption and cost to their operations.

Response: We disagree with the suggestion that our initial analysis 'glossed over' in any respect the substantial administrative costs that hospitals will incur in implementing HCPCS coding for reporting outpatient services. We devoted an entire section in the initial analysis (at 52 FR 20626), much of which is restated below at D, regarding the impacts of section 9343(g) of Pub. L. 99–509. We presented this discussion even though this rulemaking specifically concerns the implementation of section 9343(a) of Pub. L. 99–509. We did not describe the intricacies of the changes that hospitals will have to make to their systems, because we do not believe that the **Federal Register** is an appropriate forum for presenting that level of detail. Rather, we presented our analysis of the principal likely effects of HCPCS implementation. We also acknowledge that the timeframes that hospitals face in implementing this initiative are tight, although hospitals will have had at least 90 days to make these changes prior to the effective date of these rules. Finally, we believe that we have made a considerable effort to consult with the hospital industry and our intermediaries in order to implement HCPCS coding for outpatient services in the least burdensome manner possible. Our final instructions require no major rewriting of the internal financial accounting systems of hospitals. Nonetheless, we estimate the average implementation cost per hospital for HCPCS coding to be about $21,500, with much smaller ongoing costs.

Comment: One commenter alleged that several possible impacts of this rule were not fully acknowledged in the initial analysis. The commenter identified the following as possible effects of this rule:

- Hospitals (both urban and rural) will discontinue providing the procedures subject to this rule because the payment methodology guarantees that they will lose money;
- Some hospitals will hire surgeons in order to subsidize through collection of surgical professional fees the losses incurred due to HCFA's low facility payment rates;
- Surgeons will relocate to more heavily populated areas where they can set up high-volume, low-cost ASCs;
- The development of advanced medical technology will be stifled; and
- In those instances in which hospitals discontinue providing the outpatient surgical services in question, beneficiaries will have to travel further to ASCs to obtain care and may well opt to not have surgery.

Response: We do not believe that the payment methodology "guarantees" that hospitals will lose money, because these rules allow hospitals to be paid under section 1833(a)(2)(B) of the Act when appropriate. In general, to the extent that hospitals are able to economize and cut unnecessary costs in their outpatient departments, ensuring that their costs are below the blended amount (and thus competitive with ASCs), then hospitals will not lose money under the new methodology; they would in this case be paid in the same manner as before, based on the lower of their costs or charges.

It is possible that some hospitals will scale back their services somewhat, without completely discontinuing all outpatient surgical procedures. While we acknowledge that in some cases hospitals may discontinue providing ambulatory surgical services, we do not believe that this will generally prove to be the case. As noted above, we did state in the initial analysis (at 52 FR 20626) that, in such instances, beneficiaries could experience reduced access to care.

We acknowledge that hospitals may choose to hire surgeons for their outpatient facilities; they may do so already. Hospitals would, however, be compensated for these physicians' services under the regulations governing compensation for hospital-based physicians (§§ 405.550–405.551). In order to avoid that, a hospital might be able to create an ambulatory surgical center as a wholly-owned subsidiary—the facility costs of which might be reimbursed under the rules governing payment to ASCs. In fact, both of these options may currently be pursued by hospitals and, while this final rule may encourage one choice or the other in some instances, we believe these decisions are largely determined by external factors (for example, the availability of surgeons who are willing to work for a salary, etc.). Similarly, we believe that any incentives that physicians have to move to urban areas and set up high-volume ASCs are not the result of these rules.

Finally, we note that the incentives hospitals face to cut their outpatient facilities costs in response to this rule are not inconsistent with using more effective, low-cost alternative technologies in the outpatient setting.

C. Program Payments

The purpose of section 9343(a) of Pub. L. 99–509 is to bring Medicare payments for the facility component of covered ambulatory surgical procedures performed in a hospital on an outpatient basis more in line with facility payments made to freestanding ASCs. Prior to the changes described in this rule, the various providers of ambulatory surgical services have been paid under different methodologies and, consequently, have had different incentives to contain costs. While freestanding ASCs have been paid for their facility costs on the basis of set rates, and have thus had strong financial incentives to economize and cut costs, hospital outpatient departments have been paid based on reasonable costs. These costs have not been subject to any limitations comparable to the cost constraints imposed on services provided by hospital inpatient departments, skilled nursing facilities or home health agencies. Thus, hospitals have had little incentive to contain expenditure relating to outpatient services for the purpose of making improvements in the efficiency of their operations. Implementation of the various provisions of section 9343 of Pub. L. 99–509 should place the sources of ambulatory surgical services on a more equal, competitive footing, and introduce incentives for hospital economy and efficiency for outpatient services just as the prospective payment system did for inpatient hospital services.

Anecdotal evidence indicates that it is reasonable to assume that nearly all of the $1.18 billion expended in 1985 for surgical procedures performed in hospital outpatient departments were for services related to the procedures listed on the recently published list of covered ambulatory surgical procedures. The expanded list has been designed to exclude as much as possible those procedures that are most appropriately performed on an inpatient basis or that are doctors' office procedures.

The initial aggregate effect of this final rule upon hospitals will be a decrease in Medicare program payments. We are, however, not able to quantify this reduction precisely. Since hospital outpatient costs and charges for certain covered ambulatory surgical services will be compared to a blended amount based, in part, on ASC facility rates for the same services, a precise estimate would require an ability to identify existing differences between those rates and hospital costs or charges. However, ASC facility rates are paid only for certain services identified by the Physicians Current Procedural Terminology, Fourth Edition (CPT–4), which is incorporated into the HCFA Common Procedure Coding System code (HCPCS). Hospital outpatient costs and charges have not yet been reported or analyzed under this procedure coding system. Therefore, we cannot determine definitely either the portion of Medicare payments for outpatient hospital services attributable to covered ambulatory surgical procedures, or, more importantly, the difference in level of payment for given services based on site of service. For these same reasons, we cannot specifically identify what the impact of this payment change will be on rural hospitals.

The expected decrease in Medicare program payments will become more pronounced after October 1, 1988, when the increase in the ASC payment amount component of the blended payment amount, mandated by Pub. L. 99–509, takes effect. This change will result in intensified incentives for hospitals to contain costs, and, to the extent that hospitals reduce their costs to greater parity with the ASC facility prospective payment rates, the change should control the rate at which Medicare expenditures for these services are growing.

The reduction in Medicare payments to hospitals for outpatient surgical procedures will be somewhat lessened by the increase in ASC payment rates required by section 9343(b)(1) of Pub. L. 99–509 and published in the Federal Register in a notice with comment period on June 1, 1987 (52 FR 20466). The ASC payment rate updates became effective on July 1, 1987, and the law requires us to update them annually thereafter.

D. Administrative Costs

In order for this final rule to be fully implemented, it is first necessary to have section 9343(g) of Pub. L. 99–509 implemented. That section requires hospitals that report claims for payment for hospital outpatient services to use a HCFA common procedure coding system (HCPCS), which is the coding system in use by ASCs. In fulfilling the requirements set forth in section 9343(g) of Pub. L. 99–509, we will be concurrently fulfilling the requirement set forth in section 9343(a) of Pub. L. 99–509 that all covered ASC surgical procedures performed in a hospital on an outpatient basis during a cost reporting period be aggregated and treated separately from other services. We acknowledge that hospitals that provide surgical services in their outpatient departments and Medicare fiscal intermediaries will incur substantial administrative costs in implementing HCPCS, as noted earlier in our reponses to comments. So as to conform to the requirements of this rule, hospitals will need to make certain changes to their accounting and billing systems. The effect upon an individual hospital will vary depending upon its staff's ability to incorporate these changes into their accounting and outpatient billing systems, the overall adaptability of the hospital's accounting staff and outpatient personnel, and the hospital's size.

It can be reasonably assumed that the larger hospitals will experience a smaller overall administrative expense increase on a per case basis than will their smaller counterparts, because of economies of scale, relative resources, and sophistication of their accounting systems. Accordingly, the effect should be more pronounced among smaller hospitals, because the cost of these administrative changes will be allocated to a smaller number of cases. Similarly, because rural hospitals tend to be smaller hospitals, it may be that the administrative cost per case of these changes will be higher for rural hospitals than the average.

The effect upon an individual intermediary will vary depending on its staff's ability to expeditiously instruct the hospitals within its jurisdiction about these changes and to integrate these changes effectively and efficiently into their own operating environment. Also, the effect of these changes on intermediaries will be mitigated to the extent that HCFA reimburses them for the costs incurred. HCFA normally reimburses intermediaries for changes of this nature on a reasonable cost basis for cost contractors and through the change order process for fixed price contractors.

E. Impact on Beneficiaries

In the past, beneficiaries were not liable for Medicare Part B deductible and coinsurance amounts for ASC facility services, but they were liable for deductible and coinsurance amounts for hospital outpatient services. However, section 9343(e) of Pub. L. 99–509 provides that, effective July 1, 1987, coinsurance and deductibles are to apply to ASC facility services, too. Thus, for services furnished in either an ASC or a hospital outpatient department on or after July 1, 1987, a beneficiary will be liable for up to $75 of any unmet deductible obligation, plus 20 percent of either the applicable ASC facility rate or the hospital's customary charge. (If a hospital meets the collection effort requirements of our regulations at § 413.80, we will reimburse the hospital

for the uncollectible Medicare ban debts it incurs related to provision of covered ambulatory surgical services.)

This payment method reinforces the incentive that hospitals already have to set their charges at levels equal to or greater than costs, so that they do not experience disallowances of a portion of their costs under the LCC principle. However, this rule will introduce a new incentive for hospitals to cut their facility costs per case to a level that is competitive with the ASC facility payment rates. This may in turn lead to lower prices for covered ambulatory surgical procedures performed in hospitals to the benefit of Medicare beneficiaries. In addition, in order to increase their ambulatory surgery market share, hospitals can market their outpatient services effectively, partially competing on a price basis, but also marketing their patient-staff relationship, reputation, and convenience of access, rather than focusing on cost as the sole criterion. If this competition leads to improved levels of service, then beneficiaries will also benefit. However, if a hospital were to determine that it could not compete effectively, possibly causing it to discontinue or reduce its ambulatory surgical services, beneficiaries could experience reduced access to services in the affected locality.

F. Shifted Incentives and Market Effects

Ambulatory surgery is a dynamic and growing market that has grown because often it is more economical to furnish surgical services in settings other than hospital inpatient departments. The main participants in this market are ACSs, doctors' offices where these services are furnished, and hospitals that furnish these services on an outpatient basis. Increasingly, ASCs have been receiving a larger share of this overall market. They have shown explosive growth, beginning in September 1982 with 20 ASCs and growing to 690 ASCs by December 1986. This is a 3,310 percent increase in a four-year period.

Although we do not have systematic program data on comparative costs we believe that ASCs typically have lower fixed costs than do hosptials. The growth of ASCs appears to be partially attributable to this factor. If hospitals' fixed costs continue to rise relative to ASCs, they will be at a greater competitive disadvantage. If, on the other hand, hospitals can cut their fixed costs to a level approximating the facility rates which ASCs are paid when providing the same service, then hospitals may obtain a competitive advantage. This will occur because beneficiaries now have to pay deductibles and coinsurance for surgical services received in an ASC, which was not the case prior to July 1, 1987. Overall, it is difficult to determine how this rule will affect the outcome of this competition between ASCs and hospitals in any given case. Obviously, those hospitals in areas with few or no ASCs will not be subject to the same pressures as hospitals in other areas.

G. Conclusion

Although this final rule could adversely affect most hospitals in their immediate expectations of revenues, it will generally benefit the development of a healthy market for the delivery of ambulatory surgical services. Medicare beneficiaries should benefit as the result of lower prices for covered ASC surgical procedures performed in hospitals on an outpatient basis, although in some instances, beneficiaries may face reduced access to care in the event that some hospitals curtail their outpatient surgical services. The Medicare program itself would benefit as a result of program savings that would enhance the viability of the Medicare trust fund. In addition, we expect to gain additional knowledge regarding actual resource utilization for outpatient surgical services through implementation of this rule. This is a necessary step towards implementation of a prospective payment system for outpatient services performed in hospitals. In sum, we expect the advantages achievable as the result of this rule to outweigh any resulting costs or disadvantages.

V. Other Required Information

A. Paperwork Burden

This rule would not impose information collection requirements; consequently, it need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3511).

B. Waiver of 30-day Delay in the Effective Date

Generally, we publish rules and notices thirty days prior to their effective date. However, we may waive this procedure if it would be impractical, unnecessary or contrary to the public interest.

In this rule we are implementing section 9343(a) of Pub. L. 99–509, which sets forth the revised methodology that will be used to determine Medicare payment for facility services furnished in a hospital on an outpatient basis in connection with covered ASC surgical procedures. Section 9343(a) of Pub. L. 99–509 is very specific as to the methodology that is to be used to calculate these payments and requires that this methodology be effective for hospital cost reporting periods beginning on or after October 1, 1987. The regulatory changes issued in this final rule in §§ 413.113 and 413.118 conform our regulations to the statute. These changes are the same as those proposed on June 2, 1987. Because of the explicit Congressional direction contained in the statute and the need to implement these changes on October 1, 1987, we believe that a delay in the effective date of this final rule is unnecessary and would be contrary to the public interest. Therefore, we find good cause to waive the normal 30-day delay in the effective date.

List of Subjects in 42 CFR Part 413

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 413 is amended as set forth below:

PART 413—PRINCIPLES OF REASONABLE COST REIMBURSEMENT; PAYMENT FOR END-STAGE RENAL DISEASE SERVICES

A. The authority citation for Part 413 continues to read as follows:

Authority: Secs. 1102, 1122, 1814(b), 1815, 1833(a), 1861(v), 1871, 1881 and 1886 of the Social Security Act as amended (42 U.S.C. 1302, 1320a–1, 1395f (b), 1395g, 1395l(a), 1395x(v), 1395hh, 1395rr, and 1395ww).

B. In § 413.13, paragraph (c) is redesignated as paragraph (c)(1) and a new paragraph (c)(2) is added to read as follows:

Subpart A—Introduction and General Rules

§ 413.13 Amount of payments if customary charges for services furnished are less than reasonable costs.

* * * * *

(c) *Aggregation of charges.*

* * * * *

(2) *Hospital Cost reporting periods beginning on or after October 1, 1987.* Effective for hospitals with cost reporting periods beginning on or after October 1, 1987, reasonable costs and customary charges for those services relating to ambulatory surgical procedures that are subject to the payment methodology described in § 413.118 are aggregated and treated

separately from all other hospital costs and charges incurred during the cost reporting period.

* * * * *

C. Subpart F is amended as follows:

Subpart F—Specific Categories of Costs

1. The table of contents for Subpart F is amended by adding a title for a new § 413.118 to read as follows:

Subpart F—Specific Categories of Costs
Sec.

* * * * *

§ 413.118 Payment for facility services related to covered ASC surgical procedures performed in hospitals on an outpatient basis.

2. A new § 413.118 is added to read as follows:

§ 413.118 Payment for facility services related to covered ASC surgical procedures performed in hospitals on an outpatient basis.

(a) *Basis and Scope.* This section implements section 1833(a)(3) of the Act and establishes the method for determining Medicare payments for services related to covered ambulatory surgical center (ASC) procedures performed in a hospital on an outpatient basis. It does not apply to services furnished by an ASC operated by a hospital that has an agreement with HCFA to be paid in accordance with § 416.30 of this chapter. (For regulations governing ASCs see Part 416 of this chapter.).

(b) *Definitions.* For purposes of this section—

"Facility services" are those items and services, as specified in § 416.61 of this chapter, that are furnished by a hospital on an outpatient basis in connection with covered ASC surgical procedures, as described in § 416.65 of this chapter.

"Standard overhead amount" means an amount equal to the prospectively determined payment rate that would be paid for the procedure if it had been furnished by an ASC in the same geographic area.

(c) *Payment principle.* The aggregate amount of payments for facility services, furnished in a hospital on an outpatient basis, that are related to covered ASC surgical procedures (covered under § 416.65 of this chapter) is equal to the lesser of—

(1) The hospital's reasonable cost or customary charges, as determined in accordance with § 413.13, reduced by deductibles and coinsurance; or

(2) The blended payment amount as described in paragraph (d) of this section, which is based on hospital-specific cost and charge date and rates paid to free-standing ASCs.

(d) *Blended payment amount.* (1) For cost reporting periods beginning on or after October 1, 1987 but before October 1, 1988, the blended payment amount is equal to the sum of—

(i) 75 percent of the hospital-specific amount (the lesser of the hospital's reasonble cost or customary charges, reduced by deductibles and coinsurance); and

(ii) 25 percent of the ASC payment amount (that is, 80 percent of the result obtained by subtracting the deductibles from the sum of the standard overhead amounts.)

(2) For cost reporting periods beginning on or after October 1, 1988, the blended payment amount is equal to 50 percent of the hospital-specific amount and 50 percent of the ASC payment amount.

(e) *Aggregation of cost, charges, and the blended amount.* For purposes of determining the correct payment amount under paragraphs (c) and (d) of this section, all reasonable costs and customary charges attributable to facility services furnished during a cost reporting period are aggregated and treated separately from the reasonable costs and customary charges attributable to all other services furnished in the hospital.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 0

Amendment of Regulations Pertaining to Requests for Copies of Materials Which Are Available

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission is acting to administratively amend the regulations pertaining to copying materials which are available, or made available, for public inspection. The revisions correct inconsistencies between the text of the Commission's Rules and the language subsequently adopted in the interagency agreement negotiated with the National Technical Information Service, Department of Commerce, which implements the policy contained in this Rule.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Terry D. Johnson, (202) 634-1535.

SUPPLEMENTARY INFORMATION:

Order

In the matter of amendment of regulations pertaining to requests for copies of materials which are available, or made available, for public inspection.

Adopted: September 28, 1987.
Released: September 30, 1987.

By the Managing Director:

1. Pursuant to authority delegated to him under § 0.231(d) of the Commission's Rules, the Managing Director proposes to make a few nonsubstantive editorial amendments to § 0.465 of the Commission's Rules.

2. Section 0.465(d)(3) is being revised to correct inconsistencies between the text of the Commission's Rules and the language subsequently adopted in the interagency agreement negotiated with the National Technical Information Service, Department of Commerce, which implements the policy contained in this Rule.

3. Accordingly, *it is ordered,* that, pursuant to sections 4(i) and 4(j) of the Communications Act of 1934, as amended, 47 CFR Part 0 is amended as specified in the Appendix attached hereto, effective upon publication in the **Federal Register**.

List of Subjects in 47 CFR Part 0

Freedom of information, Organization and functions.

Alan R. McKie,

Deputy Managing Director.

Appendix

47 CFR Part 0 is amended as follows:

PART 0—COMMISSION ORGANIZATION

1. The authority citation for Part 0 continues to read:

Authority: 47 U.S.C. 154, 303, unless otherwise noted. Implement; 5 U.S.C. 552, unless otherwise noted.

2. Section 0.465 is amended by revising the text of paragraph (d)(3) to read as follows:

§ 0.465 Request for copies of materials which are available, or made available, for public inspection.

* * * * *

(d)(3) Copies of computer source programs and associated documentation produced by the Commission shall be obtained through the National Technical Information Service (NTIS), Department of Commerce. NTIS will forward each request to the Commission. If it can be determined that the requested program is available, the Commission will distribute the current edition to the requester. NTIS will act as billing agent for the Commission. NTIS will bill the requester for the direct costs of production plus their overhead based on billing information provided by the Commission. Estimates of the total cost may be obtained from NTIS in advance. NTIS will not stock Commission source programs and documentation, nor will they maintain a catalog of Commission computer programs that may be available due to the large volume of programs and the frequency with which they are revised. Requests shall be limited to computer source programs and associated documentation in existence when the request is submitted; requests which require the Commission to produce unique computer programs, data bases and documentation, which are not part of its inventory at the time of the request, will not be honored. Likewise, periodic updates of these materials, as they occur, will not be furnished.

DEPARTMENT OF DEFENSE

48 CFR Parts 204, 223, and 252

Defense Federal Acquisition Regulation Supplement; Physical Security of Sensitive Conventional Arms, Ammunition, and Explosives at Contractor Facilities

AGENCY: Department of Defene (DoD).

ACTION: Extension of interim rule and request for comments.

SUMMARY: The Defense Acquisition Regulatory Council has revised and extended the expiration date of the interim rule published in the **Federal Register** on November 21, 1986 (51 FR 42095), presently in effect, which pertains to security of arms, ammunition and explosives at contractor facilities.

DATES: This interim rule is effective October 1, 1987, and expires on September 30, 1988, unless sooner rescinded.

Comments: Interested parties are invited to submit written comments on or before November 30, 1987, to the Executive Secretary, DAR Council, at the address below. Comments received will be considered in revising the interim rule which will be implemented by Departmental guidance. Please cite DAR Case 85-102 in all correspondence related to this subject.

Note.—If commenters choose to hand-carry comments to the DAR Council Office at 1211 South Fern Street, Arlington, VA, arrangements for hand-carried comments must be made with the DAR Council Staff Members. Security Guards at this location are not permitted to accept or sign for hand-delivered comments of any kind.

ADDRESS: Interested parties should submit written comments to: Defense Acquisition Regulatory Council, ATTN: Mr. Charles W. Lloyd, Executive Secretary, ODASD(P)/DARS, c/o OUSD(A)(MRS), Room 3D139, The Pentagon, Washington, DC 20301-3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, telephone (202) 697-7266.

SUPPLEMENTARY INFORMATION:

A. Background

This document extends the expiration date and revises an interim rule published for public comment on November 21, 1986 (51 FR 42095), which requires that the physical security requirements of DoD Instruction 5220.30 be incorporated by reference in contracts involving manufacture or use of arms, ammunition, and explosives (AA&E). This extension is necessary to allow sufficient time to revise and publish a DoD Manual on this subject (DoD 5100.76-M, "Physical Security of Sensitive Conventional AA&E") which will contain AA&E physical security standards applicable to DoD contracts. It is anticipated that the manual will be published in June 1988 and made available to the public through the U.S. Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA 19120. Upon publication, this rule will be modified and final DFARS coverage adopted.

In response to a request by the Office of the Inspector General, DoD, the contract clause prescribed by the rule has been revised to permit access by representatives of that office to contractor facilities to review compliance. No other revisions to the rule were suggested by the public or by DOD agencies.

Although Pub. L. 98-577 does not require additional publication for public comment, interested parties may submit comments which will be considered in drafting a final rule.

B. Regulatory Flexibility Act

The interim rule incorporates by reference, in standard contract format, requirements which have been prescribed previously by the Treasury Department and by the DoD pursuant to statutory authority, and which have been applicable to DoD contracts since 23 September, 1980. However, recent investigations by the DoD IG revealed a lack of uniform compliance by DoD contracting officers in incorporating the appropriate physical security standards in contracts. This interim rule establishes uniform procedures for use by Government personnel in implementing these long standing procedures. Accordingly, the Department certifies that this rule will not have a significant economic impact upon a substantial number of small entities within the meaning of the Regulatory Flexibility Act of 1980, 5 U.S.C. 601 et seq. A regulatory flexibility analysis has therefore not been performed. Comments are invited from small entities and other interested parties.

C. Paperwork Reduction Act

The interim rule incorporates previously established information collection requirements within the meaning of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq., as implemented by regulations prescribed within 5 CFR Part 1320, and does not require additional information collection efforts by contractors. Accordingly, the Act is inapplicable and approval by OMB of the interim rule is not required. Notwithstanding the inapplicability of the Act, the interim rule has been adopted in a manner consistent with DoD policy of reducing paperwork burdens on the public by directing that contracting officers provide a copy of DoDI 5220.30 to contractors/offerors upon request. Additionally, the DoDI incorporates BATF standards published in 27 CFR Part 55 which are not otherwise readily available to contractors.

List of Subjects in 48 CFR Parts 204, 223 and 252

Government procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

Therefore, the DoD FAR Supplement contained in 48 CFR Parts 204, 223 and 252 is amended as set forth below.

1. The authority citation for 48 CFR Parts 204, 223 and 252 continues to read as follows:

Authority: 5 U.S.C. 301, U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

PART 204—ADMINISTRATIVE MATTERS

2. Section 204.202 is amended by adding to paragraph (c), paragraph (6) to read as follows:

204.202 DoD distribution requirements.

* * * * *

(c) * * *

(6) One copy or an extract to the cognizant Defense Investigative Service (DIS) office as listed in DoDI 5220.30, Physical Security of Sensitive Conventional Arms, Ammunition, and Explosives at Contractor Facilities whenever the clause prescribed at 223.7103 is included in the contract.

* * * * *

3. Section 204.470 is added to read as follows:

204.470 Physical security of conventional arms, ammunition, and explosives.

Policies and procedures regarding physical security requirements peculiar to selected Conventional Arms, Ammunition, and Explosives are addressed in Subpart 223.71.

PART 223—ENVIRONMENT, CONSERVATION, AND OCCUPATIONAL SAFETY

4. A new Subpart 223.71, consisting of §§ 223.7100 through 223.7105, is added to read as follows

Subpart 223.71—Safeguarding Conventional Arms, Ammunition, and Explosives Within Industry

Sec.

223.7100 Scope of subpart.
223.7101 Definitions.
223.7102 Policy.
223.7103 Preaward responsibilities.
223.7104 Notification to DIS.
223.7105 Clause.

Subpart 223.71—Safeguarding Conventional Arms, Ammunition, and Explosives Within Industry

223.7100 Scope of subpart.

This subpart prescribes policy, procedures, responsibilities and requirements for safeguarding Conventional Arms, Ammunition, and Explosives (AA&E) located at contractor or subcontractor facilities.

223.7101 Definitions.

Conventional arms, ammunition, and explosives as used in this subpart means only those items covered by DoDI 5220.30, Physical Security of Sensitive Conventional Arms, Ammunition, and Explosives at Contractor Facilities. In general, these items include sensitive (attractive to criminal elements), conventional (non-nuclear) material which are man portable and easily employed with little modification, or associated firing components.

223.7102 Policy.

The physical security requirements of DoDI 5220.30, "Physical Security of Sensitive Conventional Arms, Ammunition, and Explosives at Contractor Facilities," are to be applied to all contracts involving conventional AA&E.

223.7103 Preaward responsibilities.

(a) Technical or requirements organizations initiating purchase requests must identify when AA&E is involved and which physical security requirements in DoDI 5220.30 apply; and

(b) The contracting officer prior to award of a contract involving AA&E shall request the cognizant Defense Investigative Service (DIS) Industrial Security office to evaluate and certify the prospective contractor's ability to safeguard AA&E consistent with DoDI 5220.30. This should be accomplished as part of the normal Preaward Survey process by completing Item "G" Section III and Block 23 of the Standard Form 1403.

223.7104 Notification to DIS.

Whenever the clause at 252.223–7003 is included in a contract, the contracting activity shall provide an extract or a copy of the contract to the cognizant DIS office (see 204.202(c)(6)).

223.7105 Clause.

The contracting officer shall insert the clause at 252.223–7003, Safeguarding Arms, Ammunition, and Explosives in all solicitations and contracts involving an AA&E covered by DoDI 5220.30. The clause need not be included in contracts performed in Government-Owned Contractor Operated ammunition production facilities. The contracting officer shall provide a copy of DoDI 5220.30. to each contractor/offeror upon request.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

5. Section 252.223–7003 is added to read as follows:

252.223–7003 Safeguarding arms, ammunition, and explosives.

As prescribed at 223.7105, insert the following clause:

Safeguarding Arms, Ammunition, and Explosives (Oct 1987)

(a) The Contractor shall comply with the applicable requirements of Enclosure (2) to DoDI 5220.30, entitled "Physical Security of Sensitive Conventional Arms, Ammunition, and Explosives at Contractor Facilities," in effect on the date of award of this contract. A copy of the DoD Instruction is available from the contrating officer upon request.

(b) The Contractor shall allow representatives of the Defense Investigative Service (DIS) and the Office of the Inspector General, DoD, access, at all reasonable times, into its facilities for purposes of reviewing its compliance with the physical security standard applicable to this contract.

(c) The Contractor shall insert this clause, including this paragraph (c) with appropriate changes in the designation of the parties, in all subcontracts hereunder which involve Conventional Arms, Ammunition, and Explosives (AA&E) as defined in section 223.7101 of the DoD FAR Supplement.

(d) The Contractor shall provide a copy of any subcontract involving AA&E to the cognizant DIS office within ten (10) days after issuance of the subcontract.

(e) Nothing contained herein shall relieve the Contractor from complying with applicable Federal, state and local laws, ordinances, codes and regulations (including the obtaining of licenses and permits) in connection with performance of this contract. Nothing contained herein shall be construed as relieving the Contractor from its responsibilities for the physical security at contractor or subcontractor facilities.

(End of clause)

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Correction of Rules for Bay Checkerspot Butterfly and Cape Fear Shiner; Correction

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule; corrections.

SUMMARY: This notice corrects errors in two recent rules: (1) The Bay Checkerspot Butterfly determination as endangered on September 16, 1987 (52 FR 35366–35378) and (2) the Cape Fear Shiner determination as threatened and of critical habitat on September 25, 1987 (52 FR 36034—36039).

FOR FURTHER INFORMATION CONTACT: Mr. William Knapp, Acting Chief, Office of Endangered Species (500 Broyhill), U.S. Fish and Wildlife Service, Washington, DC 20240 (703–235–2771, FTS 235–2771).

SUPPLEMENTARY INFORMATION: The following corrections are made to these two documents.

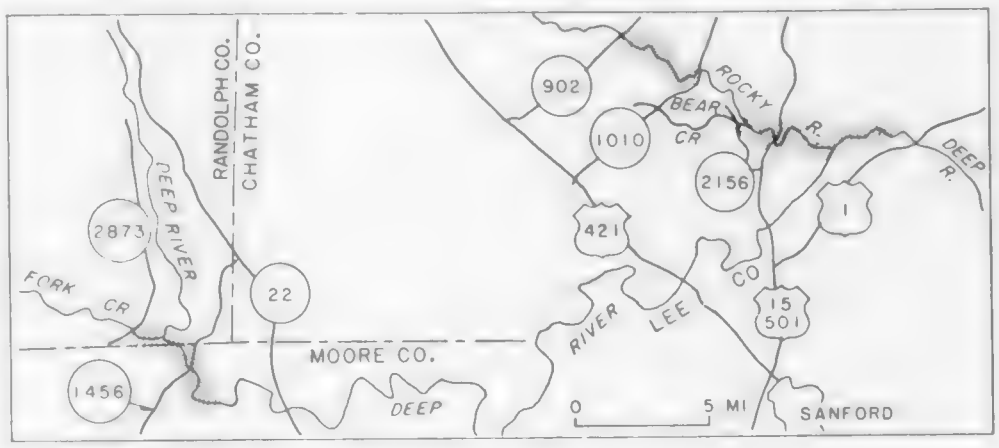
1. In rule document 87–21603 at page 35369 in the issue of Friday, September 18, 1987, the first sentence at the top of the page, first column, is correctly amended to read ". . . private property that is mostly closed to trespass . . .".

§ 17.11 [Amended]

2. The scientific name for the § 17.11(h) entry for the "Butterfly, bay checkerspot" is correctly added to read *"Euphydryas editha bayensis"*.

3. The column "Vertebrate population where endangered or threatened" for the § 17.11(h) entry for the "Butterfly, bay checkerspot" is correctly added by the insertion of "NA" for this invertebrate.

4. The map published in rule document 87–22268 in the issue of Friday, September 25, 1987, is correctly revised to appear as follows:



Dated: September 25, 1987.

Susan Recce,

Acting Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 87–22692 Filed 9–30–87; 8:45 am]
BILLING CODE 4310–55–M

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for the Hualapai Vole

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines endangered status for the Hualapai vole (*Microtus mexicanus hualpaiensis*), a small mammal found in northwestern Arizona. It is very rare and occupies small patches of suitable habitat that are threatened by livestock grazing, human recreation, and other problems. This rule implements the protection of the Endangered Species Act of 1973, as amended, for the Hualapai vole.

EFFECTIVE DATE: The effective date of this rule is November 2, 1987.

ADDRESS: The complete file for this rule is available for inspection, by appointment, during normal business hours at the Service's Regional Office of Endangered Species, 500 Gold Avenue SW., Room 4000, Albuquerque, New Mexico.

FOR FURTHER INFORMATION CONTACT: Alisa M. Shull, Endangered Species Biologist, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103 (505/766–3972 or FTS 474–3972).

SUPPLEMENTARY INFORMATION:

Background

The Mexican vole (*Microtus mexicanus)* occurs in Mexico and the southwestern United States; there are 12 subspecies (Hall 1981). It is a small, cinnamon-brown, mouse-sized mammal with a short tail and long fur that nearly covers its small, round ears. There are three subspecies in Arizona, including the Hualapai vole (*M. m. hualpaiensis*), which is the subject of this rule. The Hualapai vole is distinguished from *M. m. mogollonensis,* found to the east, by paler color of the dorsum, a shorter body, a shorter and broader skull, and a longer tail and hind foot. It is distinguished from *M. m. navaho,* found

to the northeast, by generally larger size, a longer and broader skull, and a longer tail, body, and hind foot.

Five adult specimens averaged 5.4 inches (137.2 millimeters) in head and body length, and 1.2 inches (30.2 millimeters) in tail length (Hoffmeister 1986).

Goldman (1938) described *M. m. hualpaiensis* on the basis of 4 specimens collected near the summit of Hualapai Peak in northwestern Arizona on October 1, 1923. Including these 4, a total of 15 individuals of the subspecies are now known to have been captured in the Hualapai Mountains. Nine of these are now preserved specimens. The 15 individauls were found in seven isolated localities over 61 years from 1923 through 1984.

Six voles that might possibly represent *M. m. hualpaiensis* have been collected from outside the Hualapai Mountains. Four were collected in 1981 in the Music Mountains, about 50 miles (80 kilometers) north of Hualapai Peak, but have not yet been subjected to taxonomic evaluation (Spicer *et al.* 1985). The population represented is small, and its habitat is isolated, restricted, and subject to the same degradation as habitat in the Hualapai Mountains. Hoffmeister (1986) tentatively (pending a larger sample size) reassigned two specimens collected in Prospect Valley in 1913, and previously classified as *M. m. mogollonensis*, to *M. m. hualpaiensis*. Prospect Valley is almost 90 miles (145 kilometers) northeast of the Hualapais. Reassignment was based on body and skull measurements that are closer to *M. m. hualpaiensis* than to the geographically closer *M. m. navaho*. Hoffmeister did suggest, however, that a larger sample from Prospect Valley might indicate that the two specimens ". . . are referable to *M. m. navaho* to which on a geographical basis they would seem referable." Due to the taxonomic uncertainty surrounding these two specimens, and their disjunct geographic distribution, their classification as *M. m. hualpaiensis* is tenuous. Even if the specimens are *M. m. hualpaiensis*, over 73 years have passed without additional records from that locality, and any represented population may no longer be extant. The Service will continue to investigate the possibility of additional specimens and localities. If the Music Mountains voles and/or the Prospect Valley voles are determined to be *M. m. hualpaiensis*, they would be covered by this rule determining endangered status for the subspecies.

The lands where *M. m. hualpaiensis* or its sign have been found consist of both publicly and privately owned areas. The Hualapai Mountains locations include Mohave County Parks lands, Santa Fe Pacific Railroad Company land, and other publicly or privately owned land. Except for the Mohave County Parks land, the sites are managed as part of larger grazing allotments by the Bureau of Land Management (BLM). That agency is giving consideration to the welfare of the vole and is attempting to acquire one of the key sites in the Hualapai Mountains that is now privately owned. The sites in the Music Mountains are already owned and managed by BLM.

In the Hualapai Mountains, *M. m. hualpaniensis* has been found between about 5,397 and 8,400 feet (1,645 and 2,560 meters) in elevation. *Microtus mexicanus* in the Southwest is primarily associated with dry, grass/forb habitats in ponderosa pine dominated forest. Although the Hualapai vole is now found only in moist, grass/sedge along permanent or semipermanent waters (such as springs and seeps) it may be capable of occupying drier areas when grass/forb habitats are available there. The populations of *Microtus* in the Hualapai Mountains and the Music Mountains are disjunct relicts from Pleistocene times. The Hualapai vole may have become isolated when North American glaciers were retreating and the climate was becoming warmer and drier (Spicer *et al.* 1985).

In its original Review of Vertebrate Wildlife, published in the **Federal Register** of December 30, 1982 (47 FR 58454–58460), the Service included the Hualapai vole in category 2, meaning that information then available indicated that a proposal to determine endangered or threatened status was possibly appropriate, but was not yet sufficiently substantial to support such a proposal. A subsequent Service-funded status survey (Spicer *et al.* 1985) gathered many new data, and in its revised Vertebrate Review of September 18, 1985 (50 FR 37958–37967), the Service included the Hualapai vole in category 1, meaning that substantial information was on hand to support the biological appropriateness of proposing to list as endangered or threatened. In the **Federal Register** of January 5, 1987 (52 FR 306–309), the Service published a proposed rule to determine endangered status for the Hualapai vole.

Summary of Comments and Recommendations

In the proposed rule of January 5, 1987 (52 FR 306–309), and associated notifications, all interested parties were requested to submit information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice was published in the *Mohave Daily Miner* on January 25, 1987, which invited general public comment.

Three comment letters were received and all supported the proposal; they were from the Bureau of Land Management (BLM), the Arizona Game and Fish Department (AGFD), and the Arizona Chapter of the Wildlife Society. Clarifications of several points were requested and have been incorporated into the final rule. In addition the commenters covered the following:

Comment 1: Several "typographical" errors were noted including an error under factor "A" of the "Summary of Factors Affecting the Species." The proposed rule said that in a Service-funded status survey voles were found in 12 places; this should read "2 places."

Service response: These were printing errors and did not occur in the copy of the proposed rule that was sent to the **Federal Register**.

Comment 2: Additional potential predators on the vole include the zone-tailed, Cooper's, and Sharp-shinned hawks, and the goshawk.

Service response: These species have been added to the list under factor "C" in the "Summary of Factors Affecting the Species."

Comment 3: Under available conservation measures, it should be mentioned that BLM is pursuing water rights acquisition to benefit public lands resources and uses, including the needs of the vole.

Service response: The final rule has been modified accordingly.

Comment 4: An additional vole site, based on sign only, has been located in the Hualapai Mountains by BLM biologists.

Service response: The Service is aware of this location, and this information has been added to the final rule. However, because of the low numbers and small amount of habitat, this information does not change the status of the Hualapai vole.

Summary of Factors Affecting the Species

After a thorough review and consideration of all available information, the Service has determined that the Hualapai vole (*Microtus mexicanus hualpaiensis*) should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR

Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Hualapai vole (*Microtus mexicanus hualpaiensis* are as follows) (information taken from Spicer *et al.* 1985, unless otherwise noted):

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

The Hualapai vole is extremely rare and has among the most restricted habitats of any North American mammal. From 1923 to the present, only 15 specimens are known to have been captured in the Hualapai Mountains. These individuals were taken at 7 localities, and sign alone was found at 3 other sites in that area. In addition, as noted above, 2 other specimens were collected in the Prospect Valley in 1913, but continued existence of any represented population is doubtful, and 4 other specimens were taken in the Music Mountains in 1981, but their identity is uncertain. The recent Service-funded status survey investigated 59 potential sites, but found voles in only 2 places and sign alone in 1 other place. These last 3 sites were characterized by isolated grass-forb vegetation in the immediate vicinity of open water or seeps, surrounded by drier, unsuitable habitat. Each site was only 3–5 yards (3–5 meters) across and 80–450 yards (75–400 meters) long. The total size of suitable vole habitat was estimated at about three-quarters of an acre (0.31 hectare), and this habitat was thought capable of supporting a minimum of 44 voles. Since the Service-funded survey, BLM biologists have located an additional site in the Hualapai Mountains. No voles were found there, but sign occurred intermittently in a drainage measuring about 1,968 feet (600 meters) long and 20 feet (6 meters) wide.

Even the few spots from which the Hualapai vole has been recorded are apparently not consistently or currently occupied. Past incompatible land management practices and periods of drought have combined to cause the deterioration of most of the habitat of the vole. The present main threat to the habitat appears to be the elimination of the ground cover of grasses, sedges, rushes, and forbs around open water and seeps, primarily by grazing and heavy recreational use, including camping and off-road vehicle activity.

Except for the Mohave County Parks land, the sites where the vole sign has been found are managed as part of larger grazing allotments by BLM. Although the Hualapai Mountain Park is not actually part of a BLM grazing allotment, it is adjacent to grazing allotments and is unfenced along part of this boundary. Therefore, cattle from the adjacent lands do heavily graze in the park. Creekbed habitats with their succulent green vegetation are more attractive to livestock than are the drier areas surrounding them. Livestock concentrates in these moist areas, greatly reducing, if not eliminating, ground cover by both grazing and trampling. In addition to causing the loss of food and cover, the reduction of green vegetation could have a negative effect on reproductive potential of the Hualapai vole by reducing breeding stimuli.

Human recreational users are also attracted to spring areas. Due to an increased demand for outdoor recreation, additional areas of the Hualapai Mountain Park will likely be opened up for public use. The Mohave County Parks Department is also exploring the possibility of developing a three-acre lake within historic vole habitat.

In addition, the soil on the slopes of the Hualapai Mountains is mostly shallow and subject to erosion. Locally, the erosional tendencies are exacerbated by many years of heavy land use (historic road construction, heavy long-term livestock overuse, and localized, concentrated recreation) that have contributed to reduced ground cover and concentration of runoff. Water development that pipes all available water to a downstream trough may also lead to the elimination of ground cover in stream bottoms.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

The Hualapai vole is neither sought for economic or sporting purposes nor persecuted as a pest or collected as a pet. However, because of the low number of animals, the easily accessible population areas, and the developing curiosity regarding the Hualapai vole, vandalism and taking could pose a threat. In addition, it is possible that an intensive snap trapping effort could eliminate a particular population.

C. Disease or Predation

Nothing is known about disease or predation in Hualapai vole populations. However, species of *Microtus* are usually a fundamental part of the base of the food pyramid, and many potential predators occur in the Hualapais. These predators include the coyote, gray fox, ringtail, raccoon, bobcat, striped skunk, hog-nosed skunk, red-tailed hawk, zone-tailed hawk, Cooper's hawk, sharp-shinned hawk, goshawk, great horned owl, screech owl, spotted owl, gopher snake, Arizona black rattlesnake, black-tailed rattlesnake, striped whipsnake, and Sonoran Mountain kingsnake. In addition, predation by domestic cats could be a potential threat in the northeastern part of Hualapai Mountain Park, where a residential area is expanding in and adjacent to potential vole habitat.

D. The Inadequacy of Existing Regulatory Mechanisms

The Hualapai vole is included in Group 2 of "Threatened Native Wildlife in Arizona." Group 2 contains species or subspecies whose continued presence in Arizona is in jeopardy because of substantial population decline (Arizona Game and Fish Commission 1982). However, this listing carries no enforcement authority and provides no protection for habitat. There are no statutes specifically authorizing State conservation of threatened or endangered species, but the State can control scientific and educational collecting, and can buy and manage land.

E. Other Natural or Manmade Factors Affecting its Continued Existence

The areas of habitat supporting the Hualapai vole are relatively small and isolated. This mammal is thus fragmented into tiny populations that are subject to inbreeding and reduced genetic viability. The populations may therefore be particularly vulnerable to artificial or natural disturbances in their habitat.

Drought is an additional threat to the Hualapai vole's habitat. The impacts of drought can include reduced water flow from springs and seeps, reduced new vegetative growth, and decreased ground cover, all of which can cause increased exposure of the soil and erosion. While drought is a natural phenomenon, the effects of drought are intensified by human-caused habitat degradation.

The Service has carefully assessed the best available scientific information regarding the past, present, and probable future threats to the species in determining to make this rule final. Based on this evaluation, the preferred action is to list the Hualapai vole as endangered. A decision to take no action would exclude the Hualapai vole from protection provided by the Endangered Species Act. A decision to propose only threatened status would not adequately reflect the very small

population and habitat sizes of this vole, its history of rarity and vulnerability, and the multiplicity of problems that confront it. For the seasons given below, critical habitat is not being designated.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, critical habitat be designated at the time a species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for the Hualapai vole at this time. Because of the rarity of the animal, its easily accessible populations, and the developing curiosity regarding it, publication of critical habitat descriptions and maps could be detrimental. No benefit can be identified that would outweigh the threats of vandalism or taking that might result from such publication. BLM is aware of the locations of the vole's populations, has acknowledged the threats to these populations, and already is actively considering them during planning. Should the Service receive additional information that would warrant reconsideration of this decision, critical habitat could be proposed in the future.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. Some actions may be initiated prior to listing, circumstances permitting. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species, the responsible Federal agency must enter into formal consultation with the Service.

The Hualapai vole is known to occur primarily on BLM lands. BLM is the surface managing agency and would be subject to section 7 consultation if any of its actions might affect the vole. Such actions include maintenance of existing grazing leases and water rights and developments. BLM would be required to consider protection of the vole's habitat while administering such leases, and to maintain habitat without violating individual water rights that may exist. As noted above under "Critical Habitat," BLM is aware of the situation and is giving consideration to the welfare of the vole. BLM is pursuing water rights acquisition to benefit public lands resources and uses, including the need of the vole. In addition, BLM plans to fence (with Service funding) around an important vole habitat area to exclude cattle grazing. Other measures to protect habitat from grazing and excessive recreational use might also facilitate recovery of the Hualapai vole, as might further investigations of population status and biological needs.

Section 9 of the Act, and implementing regulations found at 50 CFR 17.21, set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship that would be suffered if such relief were not otherwise available.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Regulation Promulgation

[PART 17—AMENDED]

Accordingly, Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, is amended as set forth below:

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93-205, 87 Stat. 884; Pub. L. 94-359, 90 Stat. 911; Pub. L. 95-632, 92 Stat. 3751; Pub. L. 96-159, 93 Stat. 1225; Pub. L. 97-304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*); Pub. L. 99-625, 100 stat. 3500 (1986), unless otherwise noted.

2. Amend § 17.11(h) by adding the following, in alphabetical order under "Mammals," to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 204 and 604

[Docket No. 60593-6093]

OMB Control Numbers for Information Collection Requirements

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: NOAA issues this housekeeping amendment which consolidates OMB control numbers for NOAA information collection requirements inadvertently codified at two locations. This should assist the reader, as well as reduce costs to the Federal government.

EFFECTIVE DATE: September 29, 1987.

FOR FURTHER INFORMATION CONTACT: Richard Schaefer (Director, Fisheries Conservation and Management Office), 202-673-5263.

SUPPLEMENTARY INFORMATION: OMB control numbers for NOAA information collection requirements were inadvertently codified at both 50 CFR Parts 202 and 604. By this rule, Part 604 is removed and Part 204 is revised to add to the table of OMB control numbers those now appearing at Part 604.

This action is taken in compliance with E.O. 12291 and does not conflict with other related laws since neither textual nor number changes are being made.

List of Subjects in 50 CFR Parts 204 and 604

Reporting and recordkeeping requirements.

Dated: September 29, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For the reasons set out in the preamble, the Administrator, under his authority at Department Organization Order 25-5A, dated August 26, 1985, amends 50 CFR Chapters II and VI as follows:

PART 204—OMB CONTROL NUMBERS FOR NOAA INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for Part 204 continues to read as follows:

Authority: Paperwork Reduction Act of 1980, 44 U.S.C. 3501-3520 (1982).

§ 204.1 [Amended]

2. Section 204.1(b) is amended by adding sequentially the entries from the table in § 604.1(b).

PART 604—[REMOVED AND RESERVED]

3. Part 604 is removed and reserved.

[FR Doc. 87-22764 Filed 9-29-87; 1:33 pm]

BILLING CODE 3510-22-M

50 CFR Part 254

[Docket No. 70900-7200]

Jellyfish Control

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA removes a part from the Code of Federal Regulations (CFR) pertaining to Federal funding of State projects to control jellyfish. Federal authority of these projects has not been and will not likely be used. The intended effect is to remove extraneous text from the CFR and effect a cost savings for the Agency.

EFFECTIVE DATE: September 29, 1987.

FOR FURTHER INFORMATION CONTACT: Donna D. Turgeon, 202-673-5313.

SUPPLEMENTARY INFORMATION: This final rule removes Part 254 from the CFR which pertains to Federal cooperative grant program to States under the Jellyfish Control or Elimination Act of 1966.

Although the Act, which is implemented by Part 254, has not been repealed, no funds have been allocated since 1977 to assist States for its purposes. It is unlikely that funds will be appropriated in the future. If funds should become available, the regulations would require substantial revision; a new rule would be proposed at that time. Part 254 is obsolete. Removing it from the CFR will save annual publication costs and will have no effect on any person or entity.

Classification

The Assistant Administrator for Fisheries, NOAA, has determined that this rule is a matter pertaining to grants, benefits and contracts and is therefore exempted from the requirements of the Administrative Procedures Act (APA) to be published in proposed form for public comment with delayed effective date under 5 U.S.C. 553(a)(2).

Notice and comment for this rule are not required by the APA or any other law. Therefore, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act (5 U.S.C. 603).

This rule is not a major rule under Executive Order 12291 requiring a regulatory impact analysis, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act (44 U.S.C. 3501).

List of Subjects in 50 CFR Part 254

Fish, Grant programs—natural resources.

Dated: September 29, 1987.

Bill Powell,

Executive Director,

National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR Chapter II is amended as follows:

PART 254—[REMOVED AND RESERVED]

50 CFR Part 254 is removed and reserved.

[FR Doc. 87–22763 Filed 9–29–87; 1:21 pm]

BILLING CODE 3510–22–M

---

50 CFR Parts 638, 641, and 654

[Docket No. 70994–7194]

Coral and Coral Reefs of the Gulf of Mexico and the South Atlantic, Reef Fish Fishery of the Gulf of Mexico, and Stone Crab Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendments.

SUMMARY: NOAA issues technical amendments to make modifications, correct typographical errors to scientific names, clarify text, and correct coordinates in Parts 638, 641, and 654. The intended effect is to assure clarity and consistency in the regulations.

EFFECTIVE DATE: September 28, 1987.

FOR FURTHER INFORMATION CONTACT: W. Perry Allen, Southeast Region, 813–826–3722.

SUPPLEMENTARY INFORMATION: Regulations implementing 50 CFR Parts 638, 641, and 654 contain errors that are longstanding. These technical amendments are being promulgated to correct these errors in time to be included in the next edition of the Code of Federal Regulations. They do not introduce new information or deviate from current agency procedure.

Classification

The Assistant Administrator for Fisheries finds that because the changes made by this technical amendment are only minor corrections in which the public is not particularly interested, it is unnecessary to seek prior public comment under 5 U.S.C. 553(b)(B) and there is good cause not to delay the effective date of this rule for 30 days under 5 U.S.C. 553(d). As no notice of proposed rulemaking is required this rule is also exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 603) and no Regulatory Flexibility Analysis has been prepared.

This rule does not contain a collection of information for purposes of the Paperwork Reduction Act (44 U.S.C. 3501).

This rule merely corrects minor errors; therefore it is not a major rule under Executive Order 12291 and its issuance is in compliance with the order. Because this rule will have no substantive effect on any person or fishing practice, there will be no change in the impacts analyzed in the regulatory impact reviews prepared for the implementing regulations.

This action is taken under the authority of 50 CFR Parts 638, 641, and 654.

List of Subjects in 50 CFR Parts 638, 641, and 654

Fisheries.

Dated: September 28, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For the reasons set forth above, 50 CFR Parts 638, 641, and 654 are amended as follows:

1. The authority citation for Parts 638, 641, and 654 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

§ 638.2 [Amended]

2. In § 638.2, in the definition for *Center Director*, the telephone number is revised to read "305–361–4200"; in the definition for *U.S. fish processors*, the word "processors" is made singular, the word "a" is added after the word "means", the word "facilities" is made singular and in line 3 the word "a" is added after "and", and "vessels" is made singular; and in the definition for *U.S.-harvested fish*, the word "a" is added between "by" and "vessels", and "vessels" is made singular.

§ 638.4 [Amended]

3. In § 638.4, in paragraph (a)(2), the phrase "State of" is removed before "Florida"; and in paragraph (h), the first word, "All" is revised to read "A"; "persons" is made singular; the word "a" is added between "holding" and "permits" which is made singular; the word "an" is added before "annual", the word "reports" is made singular, and the word "their" is revised to read "his or her".

§ 638.5 [Amended]

4. In § 638.5, introductory text, the dash is removed.

§ 638.6 [Amended]

5. In § 638.6(b)(2), after the word "blocks", the phrase "may be dropped" is added.

§ 638.22 [Amended]

6. In § 638.22, in paragraph (a)(2), the phrase "in the area less than 50 fathoms (300 feet) in depth" is removed; and in paragraph (c), the sentence beginning "The area . . ." is designated as "(1)", the phrase, "The following restrictions apply" is removed, the word "within" is capitalized and the sentence is designated as "(2)", and the colon is removed after "HAPC".

§ 641.2 [Amended]

7. In § 641.2, in the definition for *Person*, the word "corporate" is revised to read "corporation"; in the definition for *Reef fish*, in paragraph (a), the species name for Gulf red snapper is revised to read "*Lutjanus campechanus*", the species name for Yellowmouth grouper is revised to read *Mycteroperca interstitialis*", and the species name for Yellowfin grouper is revised to read "*Mycteroperca venenosa*", and in paragraph (b), the family name for Tilefishes is revised to read "*Malaeanthidae Family*", the species name for Tilefish is revised to read "*Caulolatilus* spp.", and the species name for Hogfish is revised to read "*Lachnolaimus maximus*". In § 641.8 (d)(1), in footnote[1], the word "Period" is added before "(.)" and in footnote [2], the word "Dash" is added before "(-)".

§ 654.2 [Amended]

8. In § 654.2 introductory text, the word "shall" is removed, an "s" is added to the word "meaning", and the final sentence (in parentheses) is removed; in the definition for *Center Director*, the telephone number is revised to read "305–361–4200"; in the definition for *Committee*, the words "staff of" are removed before "Florida"; in the definition for *Fishing*, the words "scientific research" are added between "a" and "vessel"; in the definition for *FMP*, the word "the" is added before "Stone Crab Fishery", and "of the Gulf of Mexico" is added after "Stone Crab Fishery"; in the definition for *Owner*, paragraph (3), the word "designation" is revised to read "destination"; in the definition for *State*, the words "the State of" are removed before "Florida".

§ 654.3 [Amended]

9. In § 654.3(b), the words "the State of" are removed before "Florida" in the fourth and eighth lines.

§ 654.4 [Amended]

10. In § 654.4(b)(2), the comma is removed after the word "documentation", and the word "or" is added between "documentation" and

"registration" and removed before "number".

§ 654.6 [Amended]

11. In § 654.6 (b), "this Act" is revised to read "the Magnuson Act".

§ 654.20 [Amended]

12. In § 654.20(c), the word "this" is added before "section".

§ 654.22 [Amended]

13. In § 6544.22, in paragraph (a)(2), the word "in" in the fifth line is revised to read "is" and the words "the State of" are removed before "Florida"; and in paragraph (b), the phrase "of this section" is added between "(a)" and "will".

§ 654.23 [Amended]

14. In § 654.23(a) the word "to" is removed before "the" in the eleventh line and the words "the State of" are removed before "Florida".

Proposed Rules

Federal Register
Vol. 52, No. 190
Thursday, October 1, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[INS Number: 1025–87]

8 CFR Part 214

Nonimmigrant Classes; Special Requirements for Admission, Extension and Maintenance of Status

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This notice announces the intent of the Immigration and Naturalization Service ("the Service") to set forth, in regulatory form, the special requirements for admission, extension and maintenance of status of nonimmigrant alien visitors for business and visitors for pleasure. Much of the Service's written policy relating to this subject is now contained in the Service's Operations Instructions at O.I. 214.2(b). Because it is more appropriate for interpretations and rules to be set forth in regulatory form, this information will become part of 8 CFR 214. In addition, the proposed rulemaking will clarify the criteria for according B–1 classification to members of certain occupations (such as participants in religious programs and members of foreign film crews). By issuing this advance notice, the Service is providing an opportunity to the public to submit comments and make suggestions at an earlier stage of the process. This will result in a proposed rule which is more comprehensive in its scope and more understandable to the public.

DATES: Comments on this notice of intent must be received on or before November 16, 1987.

ADDRESSES: Please submit written comments, in triplicate, to the Director, Office of Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street NW., Room 2011, Washington, DC 20536.

FOR FURTHER INFORMATION CONTACT: Micheal L. Shaul, Senior Immigration Examiner, Immigration and Naturalization Service, 425 I Street NW., Room 7122, Washington, DC 20536, Telephone: (202) 633–3946.

SUPPLEMENTARY INFORMATION: Under the Immigration and Nationality Act ("the Act"), there are 15 major classifications of noimmigrants under which an alien may be temporarily admitted to the United States, one of which deals with temporary visitors under section 101(a)(15)(B) of the Act (8 U.S.C. 1101(a)(15)(B)). This classification is divided by regulation at 8 CFR 214.2(b) into visitors for business ("B–1") and visitors for pleasure ("B–2"). Service policy instructions delineating the conditions under which aliens may qualify for the B–1 classification are listed in the Operations Instructions (O.I.s) of the Service at O.I. 214.2(b). Relating Department of State policy instructions are contained in notes to 22 CFR 41.25 in the Foreign Affairs Manual (FAM). Although the O.I.s and the FAM are generally in accord, there are few discrepancies which should be addressed. Because of the need of the public to have greater access to these instructions and rules, it is appropriate that they be contained in the regulations instead of O.I.s and the FAM. Therefore, the Service intends to move applicable portions of O.I. 214.2(b) to 8 CFR 214 and incorporate relevant items from the FAM.

At the same time, the Service seeks public comments on possible modifications of the instructions contained in the existing O.I.s, including those discussed below, which could be included in the proposed regulations. There are five areas in particular that have caused recurrent problems:

1. The Service has received many requests that B–1 classification be extended to certain members of religious denominations and/or recognized voluntary service programs, especially where the alien has already been employed by an overseas affiliates of the same denomination or service program. Such B–1 nonimmigrants could be admitted for longer periods and under different control procedures than those for other B–1 nonimmigrants.

2. The Service has also received a number of requests for B–1 classification for key personnel of foreign film crews coming to film commercials for foreign use. At the present time, the O.I. is being interpreted to exclude from B–1 classification most aliens connected with the entertainment industry, including those coming to film television commercials destined strictly for foreign consumption. The Service has received representations that this exclusion is too broad and is having an adverse impact on the United States economy and labor market. It is argued that allowing key pesonnel to enter the United States as B–1's under such circumstances would:

(a) Aid our industries related to tourism and film production (hotels, restaurants, equipment rental, motion picture supplies, etc.),

(b) Employ United States workers in support positions, and

(c) Encourage tourism in the United States by exposing foreign television viewers to our scenic attractions.

The Service is soliciting comments as to the criteria and definitions relating to the basis for denying or granting B–1 status to such key personnel. The Service is also seeking information as to the positive or negative impacts on the U.S. economy and labor market envisaged by the proponents or opponents of such a modification.

3. Another possible modification of the current language would allow an entertainer to be classified as a B–1 nonimmigrant if the alien either appears before a nonpaying audience or is an amateur entertainer appearing at an event organized by a nonprofit organization. In the latter case the alien could receive reimbursement for expenses from either the nonprofit organization or from the alien's government, but no other remuneration.

4. The standards may also be modified to allow warranty work to be performed at any time following the purchase of commercial or industrial equipment or machinery, as long as the relevant warranty agreement was completed at or prior to the time of purchase.

5. The current reference in the O.I.s to persons engaged in activities on the outer continent shelf under the jurisdiction of the Coast Guard would be deleted, since the Coast Guard regulations at 33 CFR 141.15 require that persons engaged in such activities be citizens or lawful permanent residents of the United States, or aliens admitted as "H–2" nonimmigrants.

The Service is seeking comments from interested parties as to the standards to be set for classification under each of the areas described in the O.I.s or the FAM. For the convenience of the public, the parts of O.I. 214.2(b) describing aliens eligible for classification as B–1 nonimmigrants are printed below, followed by excerpts from the FAM listing groups not discussed in the O.I.

Operation Instruction 214.2(b)

(b) *Visitors.* If found admissible, a B–2 shall be admitted for 6 months. The district director may delegate individual review of the minimum admission period no lower than a supervisory inspector. Referral of individual cases to the supervisor may occur when it is evident that the alien is admissible, but does not have sufficient resources available to maintain a 6-month visit. The Service does not require that an applicant for admission have with him funds to maintain a 6-month stay, but the applicant must demonstrate that he/she has access to sufficient resources. A B–1 shall be admitted for a period of time which is fair and reasonable for completion of the purpose of the trip. Any decision to reduce a B–1's admission form the time requested shall be authorized by a supervisor.

An alien who is coming temporarily to the United States to fill a position of a permanent nature is generally not admissible as a B or H–2 nonimmigrant. However, personnel of foreign airlines engaged in international transportation of passengers and freight who seek to enter the United States for employment with the airline in an executive, supervisory or highly technical capacity may be admitted as B–1 nonimmigrants, unless a treaty of commerce and navigation is in effect between the United States and the country of the applicant's nationality, in which case the alien should be documented as E–1 if he is otherwise qualified. Such B–1 airline personnel must meet the criteria established for employees of treaty traders as described in 22 CFR 41.40(a)(2). The notes to that regulation in Volume 9—Visas, Foreign Affairs Manual, contain information concerning the various treaties of trade entered into by the United States, and important information concerning certain limitations of treaty provisions. These notes must be consulted in considering matters involving this category of B–1 nonimmigrants.

Personal and domestic servants may be classified as B–1 nonimmigrants if they are accompanying or follows to join:

(1) United States citizen employers who can establish (a) that they are subject of frequent international transfers lasting two years or more as a condition of their employment, and that they are returning to the United States from such an assignment, (b) their current assignment in the United States will not be for over 4 years, (c) the personal or domestic servant has been employed by them abroad for at least six months prior to admission into the United States, (d) the servant will reside in their household and will be provided a private room and board, without cost to the servant, (e) the servant will work only for them; and (f) both the employer and employee have signed a contract which guarantees that the servant will receive at least the prevailing wage for domestics in the area of employment, that all other benefits normally given to U.S. workers in the area of employment will be granted to the servant; that round trip airfare will be provided to the servant; that the servant will not be required to give more than two weeks notice of intent to leave the employment; that the employer will give at least two weeks notice of intent to leave the employment; that the employer will give at least two weeks notice of intent to terminate the employment. Evidence to establish qualifications under this subparagraph may include personnel records and statements from the citizen's employer, and must include a signed and dated copy of the contract between the employer and servant; or,

(2) Nonimmigrant employers who seek admission to, or are already in the United States in B, E, F, H, I, J or L nonimmigrant status, provided the employee can show he has a residence abroad he does not intent to abandon (notwithstanding the employer himself may be in a nonimmigrant status which does not require such a showing), and further provided the employee has been employed abroad by the employer as a personal or household domestic servant for at least one year prior to the date of the employer's admission to the United State, or that the employer-employee relationship has existed prior to the time of application and the employer can demonstrate that he has regularly employed (either year-round or seasonally) a personal or domestic servant over a period of several years immediately preceding the time of application, and the employee can demonstrate at least one year's experience as a personal or domestic servant.

Persons engaged in activities on the *outer continental shelf* are under the jurisdiction of the United States Coast Guard. Any person inquiring about his or her right to engage in employment on the outer continental shelf should be referred to the Coast Guard. Nonimmigrants destined to the outer continental shelf normally will be classified B–1, and consular officers will annotate such visas "OCS" (see 235.1(m)(2)).

Each of the following may also be classified as a B–1 nonimmigrant if he/she is to receive no salary or other remuneration from a United States source (other than an expense allowance or other reimbursement for expense incidental to the temporary stay):

(1) An alien, otherwise classifiable as an H–1 nonimmigrant, who is coming to perform temporary services in the United States other than as an entertainer; however, an entertainer who is classifiable H–1 may be classified B–1 if coming to participate in a cultural program sponsored by his/her government, will be performing before a nonpaying audience, and all expenses, including per diem, will be paid by his/her government. (See Foreign Affairs Manual, Vol 9 visas, Note 4.2 at 22 CFR 41.25).

(2) An alien entertainer, even though not of H–1 caliber, who is a resident or national of Canada or Mexico and is coming to the border area of the United States to participate in a long-established religious festival or ceremony, or in a long-established bi-national civic celebration.

(3) An alien, otherwise classifiable as an H–3 nonimmigrant who is already employed abroad and will continue to receive his/her salary from the foreign employer on whose behalf he/she is coming to undertake training in the United States.

(4) An alien, otherwise classifiable as an H–3 nonimmigrant, who is a student at a foregn medical school and is coming to take an "elective clerkship" (practical experience and instruction in the various disciplines of the practice of medicine under the supervision and direction of faculty physicians) at a United States medical school's hospital as an approved part of the foreign medical education.

(5) An alien coming to install, service, or repair commercial or industrial equipment or machinery purchased from a company outside the U.S. or to train U.S. workers to perform such service, provided: the contract of sale specifically requires the seller to perform such services or training, the alien possesses specialized knowledge essential to the seller's contractual obligation to provide services or training, the alien will receive no remuneration from a U.S. source, and

the trip is to take place within the first year following the purchase.

(6) An alien member of a religious denomination coming temporarily and solely to do missionary work in behalf of that denomination, if such work does not involve the selling of articles or the solicitation or acceptance of donations.

(7) An alien coming temporarily to particpate in a voluntary service program conducted by a recognized religious body. The alien shall present to the examining officer a written statement issued by the appropriate religious organization. The statement must contain the following items of information:

(i) Identity of the volunteer including name, date and place of birth;

(ii) Name and address of initial destination in U.S.;

(iii) Name and address of project in U.S. to which assigned; and

(iv) Anticipated duration of assignment.

(8) An alien, who is coming temporarily to the United States to attend an executive seminar.

(9) An alien, who has been invited to participate in the training of Peace Corps Volunteers or who is coming to the United States under contract pursuant to sections 9 and 10(a)(4) of the Peace Corps Act (75 Stat. 612). Aliens admitted under this provision may be paid a salary for service performed in accordance with the Peace Corps Act.

(10) An alien, coming temporarily to perform service for his foreign employer as a jockey, sulkey driver, trainer or groom. The alien may not work in this country for any other foreign or United States employer.

(11) An alien, who is coming to the United States to seek an investment which would be qualifying for status as an E–2 investor, provided that the alien does not perform productive labor or actively particpate in the management of the business prior to receiving a grant of E–2 status.

(12) An alien, who is coming to the United States to open or be employed in a new branch, subsidiary, or affiliate of the foreign employer, if the alien will become eligible for status as an L–1 upon securing the evidence required in 8 CFR 214.2(1) regarding proof of acquisition of physical premises.

(13) An alien athlete or team member who meets all of the following criteria;

"A" The player seeks to enter the U.S. as a member of a foreign based team in order to compete with another sports team.

"B" The foreign sports team and the foreign athlete have their principal place of business or activity in a foreign country.

"C" The income of the foreign based team and the salary of its players are principally accrued in a foreign country.

"D" The foreign based sports team is a member of an International Sports League or the sporting activities involved have an international dimension.

In all other instances, an alien classified as an H–2 nonimmigrant may not be classified as a B–1 nonimmigrant even if the salary is paid by a source outside the United States. A visa petition must be filed on behalf of such nonimmigrant alien accompanied by a certification from the Secretary of Labor or designated representative or by a notice that such certification cannot be made, to enable the Service to determine among other things whether any unemployed persons capable of performing the same services are available in this country.

Foreign Affairs Manual Notes to 22 CFR 41.25 (excerpts)

(a) Aliens coming to engage in commercial transactions which do not involve gainful employment in the United States (such as a diamond merchant from Amsterdam who takes orders in New York City for rough or cut diamonds available in the Netherlands or a representative of a computer manufacturer located in Japan who takes orders throughout the United States for computers manufactured abroad), to negotiate contracts, to consult with business associates, to litigate, to participate in scientific, educational, professional or business conventions, or conferences, or to undertake independent research.

(e) An alien invited to participate in any program to furnish technical information and assistance under section 635(f) of the Foreign Assistance Act of 1961 (75 Stat. 424).

(f) Ministers of religion who temporarily exchange pulpits with their American counterparts, who continue to be reimbursed by their own church and will draw no salary from the host church in the United States.

(g) A minister of religion desiring to proceed to the United States to engage in an evangelical tour who does not plan to take an appointment with any one church, and who will be supported by offerings contributed at each evangelical meeting.

(k) Professional athletes, such as golfers and race drivers, who receive no salary or payment other than prize money for their participation in a tournment or sporting event.

(m) Members of the crew of a private yacht which will be cruising in United States waters for more than twenty-nine days who are able to establish that they have a residence abroad which they do not intend to abandon.

(o) An alien who is a member of the board of directors of a United States corporation and seeks to enter the United States to attend a meeting of the board or to perform other functions resulting from membership of the board.

(q) Coasting Officers.

(r) Participants in United Nations Institute for Training and Research (UNITAR) internship program who are not employees of foreign governments.

The Service requests that interested persons submit their views and relevant information as comments on this notice. These comments will help the Service to fashion a policy that will correctly interpret the Act and serve the public interest. This rule contains information collection requirements under the Paperwork Reduction Act which will be submitted to the Office of Management and Budget.

Dated: August 31, 1987.

Richard E. Norton,

Associate Commissioner, Examinations Immigration and Naturalization Service.

BILLING CODE 4410–10–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–NM–109–AD]

Airworthiness Directives: Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to amend an existing airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, which currently requires that the FAA-approved maintenance inspection program include inspections which will give no less than the required damage tolerance rating (DTR) for each Structural Significant Item (SSI) listed in Boeing Supplemental Structural Inspection Document (SSID) No. D6–37089. As a result of a structural reassessment of the aft pressure bulkhead, the document has been revised to include some additional SSI's. This proposal would require that operators of the candidate fleet airplanes include in their FAA-approved maintenance program, inspections

VOL 52 ISS 190 OC 1 1987 UMI

which will give no less than the required DTR's for the additional SSI's listed in Revision B. of the SSID.

DATES: Comments must be received no later than November 2, 1987.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–109–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Owen E. Schrader, Airframe Branch, ANM–12OS; telephone (206) 431–1923. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–109–AD, 17900 Pacific Highway South, C—68966, Seattle, Washington 98168.

Discussion

On November 2, 1984, the FAA issued AD 84–21–06, Amendment 39–4933 (49 FR 42445; October 23, 1984), to require incorporation of a revision to the FAA-approved maintenance program for certain Boeing Model 737 series airplanes. The AD requires that Structural Significant Items (SSI) listed in Boeing Supplemental Structure Inspection Document (SSID) No. D6–37089, initial release, be inspected on candidate fleet airplanes so as to render at least a specified damage tolerance rating (DTR). The Boeing document includes instructions on how DTR's are determined. Since issuance of the AD, Boeing has reassessed the aft pressure bulkhead and has revised the document.

The FAA has reviewed and approved Revision B. to Boeing Document No D6–37089, which includes additional SSI's. Since, by definition, failure of an SSI can lead to structural failure, it is necessary that the maintenance program of the airplanes in the candidate fleet include adequate inspections of the SSI's. Other changes included in Revisions A. and B. to Boeing Document No. D6–37089 are basically clarifying or corrective in nature.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would amend AD 84–21–06 to require that the FAA-approved maintenance program include the required DTR's for each SSI, in accordance with the revised Boeing document previously mentioned. The FAA proposes to incorporate by reference in this amendment Boeing Supplemental Structure Inspection Document (SSID) No. D6–37089, Revision B, dated February 18, 1987.

It is estimated that 27 operators have 92 airplanes of U.S. registry that would be affected by this AD, that it would take approximately 50 manhours per airplane to accomplish the required actions, and 100 manhours per operator to update its maintenance program. Estimating the average labor cost to be $40 per manhour, the cost to amend the maintenance program would be $108,000, and the cost to accomplish the inspections would be $184,000. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $292,000.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Model 737 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation Safety, Aircraft, Incorporation by reference.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89

§ 39.13 [Amended]

2. By amending AD 84–21–06, Amendment 39–4933 (49 FR 42556; October 23, 1984), paragraph A. and paragraph E. to read as follows:

A. Within three months after the effective date of this Amendment, incorporate a revision into the FAA-approved maintenance inspection program which provides no less than the required damage tolerance rating (DTR) for each Structural Significant Item (SSI) listed in Boeing Document No. D6–37089, Revision B, dated February 18, 1987, or later FAA-approved revisions. The required DTR value for each SSI is listed in the document. The revision to the maintenance program shall include and be implemented in accordance with the procedures in Sections 5.0 and 6.0 of the SSID.

E. Operators who have acceptably incorporated Boeing Document No. D6–37089, Revision B, dated February 18, 1987, or later FAA-approved revisions, into their approved maintenance program are exempt from the provisions of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 26, 1987.

Frederick M. Isaac,

Deputy Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 87-CE-29-AD]

Airworthiness Directives; SIAI Marchetti S.p.A.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This Notice proposes to adopt a new Airworthiness Directive (AD), applicable to SIAI Marchetti S.p.A. Models F260, F260B, F260C, and F260D airplanes, which would require initial and recurrent visual or dye-penetrant inspection of the main wing spar root area and, if cracks are found, modification of the main wing spar. Cracks in the main wing spar have been found during inspection of over 38 airplanes. If this condition is left uncorrected, the structural integrity of the wing may be compromised, resulting in loss of the airplane. The inspection and modification will detect cracks and prevent crack growth from compromising the wing structural integrity.

DATES: Comments must be received on or before December 1, 1987.

ADDRESSES: SIAI Marchetti Mandatory Service Bulletin (S/B) No. 260-B50, dated November 12, 1986, applicable to this AD may be obtained from SIAI Marchetti S.p.A. via Indipendenza, 2, 21018 Sesto Calende, Varese, Italy. This information may be examined at the Rules Docket at the address below. Send comments on the proposal in duplicate to Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 87-CE-28-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. John P. Dow, Sr., Aerospace Engineer, ACE-109, Aircraft Certification Division, 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 374-6932; or Mr. Munro Dearing, Aerospace Engineer, AEU-100, Aircraft Certification Office, Europe, Africa, and Middle East Office, c/o American Embassy, B-1000 Brussels, Belgium; Telephone 513.38.30.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Director before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. Comments are specifically invited on the overall regulatory, economic, environmental and energy aspects of the proposed rule. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain in copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 87-CE-28-AD, Room 1558, 601 12th Street, Kansas City, Missouri 64106.

Discussion

Inspections of over 70 SIAI Marchetti S.p.A. F260 airplanes having between 1,500 to 5,500 hours time-in-service (TIS) revealed 38 cracks in the main wing spar web root lower side. These cracks originated in the corners of the spar web. If this condition remains uncorrected, structural integrity of the wing will be compromised. As a result, SIAI Marchetti S.p.A. has issued S/B No. 260-B50, dated November 12, 1986, which describes initial and recurring inspection and modification of the main spar web root. The Registro Aeronautico Italiano (RAI), which has responsibility and authority to maintain the continuing airworthiness of these airplanes in Italy, has classified this S/B and subsequent issuance of RAI AD 86-199/ F260-32, dated December 22, 1986, and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under Italian registration, this action has the same effect as an AD on airplanes certified for operation in the United States. The FAA relies upon the certification of RAI combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness conformity of products of this type design certificated for operation in the United States. The FAA has examined the available information related to the issuance of S/B No. 260-B50, dated November 12, 1986, and the mandatory classification of ths S/B by th RAI. Based on the foregoing, the FAA believes that the condition addressed by SIAI Marchetti S.p.A. S/B No. 260-B50, dated November 12, 1986, is an unsafe condition that may exist on other products of this type design certificated for operation in the United States. Consequently, the proposed AD would require initial and repetitive visual or dye-penetrant inspection of the main wing spar web root and modification when cracks are detected.

The FAA has determined there are approximately 90 airplanes affected by the proposed AD. The cost of compliance with the proposed Ad is estimated to be an annual cost for inspection of $70 per airplane. The total annual fleet cost is estimated to be $6,300 to the private sector.

The cost of compliance with the proposed Ad is so small that the expense of compliance will not be a significant impact on small entities operating these airplanes.

Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the public docket. A copy of it may be obtained by contracting the Rules Docket at the location provided under the caption **"ADDRESSES"**.

List of Subjects in 14 CFR Part 39

Air transportation, Aviation safety. Aircraft, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the FAR as follows:

VOL
52
ISS
190
OC
1
1987
UMI

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Siai Marchetti S.p.A.: Applies to all Model F260, F260B, F260C, and F260D (all airplanes whose data plate shows manufacture before 1986 serial numbers (S/N) 1 through S/N 735) airplanes certificated in any category.

Compliance: Required as indicated after the effective date of this AD, unless already accomplished.

To prevent failure of the main wing spar, accomplish the following:

(a) Unless modified as described in (b) below, perform visual or dye-penetrant inspection on the main spar web root as described in SIAI Marchetti S/B No. 260–B50, dated November 12, 1986, "Instructions—Inspection Steps 1–5."

(i) Initially within 500 hours time-in-service (TIS) of the effective date of this AD for airplanes (wings) with 1,000 to 3,000 hours TIS.

(ii) Initially within 100 hours TIS of the effective date of this AD for airplanes (wings) with over 3,000 hours TIS.

(iii) Recurring inspection at 500 hours TIS interval, or at each annual inspection thereafter.

(b) If cracks are found in the lower web of the main wing spar as described in SIAI Marchetti S/B No. 260–B50, dated November 12, 1986, prior to further flight, modify the wing structure as described in SIAI Marchetti S/B No. 260–B50, dated November 12, 1986, "Instructions—Modification Steps 1–14."

(c) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(d) An equivalent means of compliance with this AD may be used if approved by the Manager, Brussels Aircraft Certification Office, Europe, Africa, and Middle East Office, c/o American Embassy, B–1000 Brussels, Belgium; Telephone 513.38.30.

All person affected by this directive many obtain copies of the document(s) referred to herein upon request to SIAI Marchetti S.p.A., via Indipendenza, 2, 21018 Sesto Calende, Varese, Italy; or may examine the document(s) referred to herein at FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on September 17, 1987.

Jerold M. Chavkin,

Acting Director, Central Region.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 6

Designation of New Hanover County Airport, Wilmington, NC for private aircraft reporting

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: This document announces a proposal to amend the Customs Regulations by adding New Hanover County Airport, Wilmington, North Carolina, to the list of designated airports at which private aircraft arriving in the U.S. from the southern portion of the Western Hemisphere via the U.S./Mexican border, or via the Atlantic, Pacific or Gulf of Mexico coasts, must land for Customs inspection. This proposal is made to help relieve congested air traffic over southern Florida; a condition which makes it difficult to effectively conduct Customs private aircraft enforcement program. Public comments are invited on the proposal for consideration before a final decision is reached on this matter.

DATE: Comments must be received on or before November 30, 1987.

ADDRESS: Comments (preferably in triplicate) should be submitted to and may be inspected at the Regulations Control Branch, Room 2324, Customs Service Headquarters, 1301 Constitution Avenue NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Glenn Ross, Office of Inspection and Control (202–566–5607).

SUPPLEMENTARY INFORMATION:

Background

As part of Customs efforts to combat the problem of drug smuggling by air, in 1975 the Customs Regulations were amended to add a new § 6.14 (19 CFR 6.14), that provides in part that private aircraft arriving in the U.S. via the U.S./Mexican border must provide a notice of intended arrival with Customs (T.D. 75–201; 40 FR 33203). The section further provides that these private aircraft must land at any one of the designated airports near the U.S./Mexican border. The purpose of this regulation was to provide Customs with increased enforcement efficiency by providing tight control over air traffic arriving from the direction of countries that are major sources of illegal drugs destined for the U.S.

In our diligence to fight the national epidemic of illegal drugs, Customs has amended § 6.14, Customs Regulations, several times since 1975. Amendments have included extending coverage to private aircraft arriving via the Pacific, Gulf of Mexico, or Atlantic coasts (T.D. 83–192; 48 FR 41381); expanding coverage by modifying the definition of private aircraft (T.D. 84–236; 49 46885); extending the coverage to include some flights arriving from Puerto Rico and all flights arriving from the U.S. Virgin Islands, increasing from 15 minutes to one hour the minimum time required for notice to be given prior to penetrating U.S. air space, and requiring aircraft seeking exemption from landing requirements to be equipped with functioning transponders (T.D. 86–72; 51 FR 11004); and removing San Diego International Airport (Lindbergh Field) from the list of designated airports in § 6.14 because Lindbergh Field's distance from the U.S./Mexican border was permitting smugglers to operate in the area (T.D. 86–146; 51 FR 27836).

Most recently, Customs amended § 6.14(f) concerning the overflight exemption program for private aircraft. If exempted, private aircraft arriving in the U.S. from foreign countries in the Western Hemisphere south of the U.S. may overfly a Customs designated airport along the southern U.S. border and proceed to another, typically more interior, airport where Customs inspectional services are available. The amendments allowed for continuing the overflight program but with more stringent application procedures, and new restrictions on the actual conduct of overflights such as equipment necessary on the aircraft and minimum flying altitudes. These actions were taken to facilitate radar tracking of aircraft using overflight exemptions and thereby enhance narcotics enforcement efforts (T.D. 87–42; 52 FR 10047).

Customs is now proposing to amend § 6.14(g), which lists designated airports at which subject aircraft must land for Customs inspection, by adding New Hanover County Airport, Wilmington, North Carolina, to that list. The congested air traffic presently experienced over southern Florida is making it difficult to effectively monitor the arrival of private aircraft using that airspace. If aircraft needing to land at a designated airport could fly to New Hanover it would lessen the congestion now plaguing more southern designated airports. There is a direct trackable Federal Aviation Administration airway from the Caribbean into New Hanover which should make it a popular destination of pilots, as well as easing the burden on Customs of tracking arrivals from a known drug source area.

This proposed designation is a continuation of Customs recent efforts to improve our private aircraft enforcement program.

Comments

Before making a determination on this matter, consideration will be given to any written comments timely submitted. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. to 4:30 p.m. at the Regulations Control Branch, Room 2324, Customs Service Headquarters, 1301 Constitution Avenue NW., Washington, DC 20229.

Executive Order 12291

Because this proposal relates to the organization of Customs it is not a regulation or rule subject to E.O. 12291.

Regulatory Flexibility Act

It is certified that the provisions of the Regulatory Flexibility Act ("Act") relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604), are not applicable to this proposal because it will not have a significant economic impact on a substantial number of small entities. Customs routinely makes adjustments to its field organization to accommodate the volume of Customs related activity throughout the country. Although the proposal may have a limited effect upon some small entities in the area affected, it is not expected to be significant because adjusting the Customs field organization in other areas has not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Act. Nor is it expected to impose, or otherwise cause a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

List of Subjects in 19 CFR Part 6

Customs duties and inspection, Imports, Air carriers, Aircraft, Airports.

Proposed Amendment

It is proposed to amend Part 6, Customs Regulations (19 CFR Part 6), as set forth below.

PART 6—AIR COMMERCE REGULATIONS

1. The authority citation for Part 6 would continue to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (Gen. Hdnote. 11), 1624; 49 U.S.C. 1474, 1509.

§ 6.14 [Amended]

2. It is proposed to amend § 6.14(g) by inserting, in appropriate alphabetical order, "Wilmington, NC," in the column headed "Location", and on the same line, "New Hanover County Airport" in the column headed "Name".

Drafting Information

The principal author of this document was John Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

Michael H. Lane,

Acting Commissioner of Customs.

Approved: September 17, 1987.

John P. Simpson,

Acting Assistant Secretary of the Treasury.

19 CFR Part 177

Tariff Classification of Wire Rope With Becket Attachments

AGENCY: U.S. Customs Service, Treasury.

ACTION: Proposed interpretive rule; Solicitation of public comments.

SUMMARY: Customs is reviewing its position regarding the tariff classification of certain imported wire rope with end attachments. The product in question is wire rope from one to five inches in diameter either in material lengths or in specific cut lengths, sometimes in excess of 500 feet. The wire rope has end preparations, called beckets, on one or both ends. The beckets are used to facilitate installation of wire rope into heavy machinery. Such products are now classified under the tariff provision for wire rope fitted with fittings or made up into articles. Customs is now of the opinion that the beckets are not "fittings" as that word is used in the Tariff Schedules, nor do they "fit" the rope, and the existence of beckets on one or both ends of wire rope does not dedicate that rope to a use or identify it as dedicated to a particular use.

It is proposed to classify the product under the Tariff Schedule item number for wire rope not fitted with fittings and not made up into articles. If reclassified, the wire rope would be subject to a lower rate of duty. However, it would also become subject to Voluntary Restraint Agreements on steel that the U.S. has with a number of countries.

This document invites comments for consideration before any final determination is made.

DATE: Comments (preferably in triplicate) must be received on or before November 30, 1987.

ADDRESSES: Comments should be submitted to and may be inspected at the Regulations Control Branch, U.S. Customs Service, Room 2324, 1301 Constitution Avenue NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: James A. Seal, Classification and Value Division (202–566–8181).

SUPPLEMENTARY INFORMATION:

Background

Customs is reviewing its position regarding the tariff classification of certain imported wire rope from one to five inches in diameter either in material lengths or in specific cut lengths, sometimes in excess of 500 feet. The wire rope has end preparations, called beckets, on one or both ends. Beckets come in several configurations and are used to allow another rope to be attached to the wire rope so the wire rope may be installed in a piece of heavy machinery. The current tariff classification for such wire rope is under the tariff provision for "ropes * * * of wire * * * fitted with fittings, or made up into articles", in item 642.20, Tariff Schedules of the United States (19 U.S.C. 1202; TSUS). That classification carries a column 1 rate of duty of 5.7% ad valorem, and is not subject to any Voluntary Restraint Agreement (VRA). VRA's are steel arrangements negotiated between the U.S. Trade Representative on behalf of the U.S. and other countries, which dictate that basic steel products from these other countries cannot be entered into the U.S. for consumption unless accompanied by a valid export certificate.

Examples of that classification being applied to imports of wire rope include Customs Ruling 036046, November 1, 1974, holding that wire rope with a pad eye and becket loop attached to the pad eye was classifiable under item 642.20, TSUS, and Customs Ruling 808452, March 23, 1984, holding that wire rope with becket loops attached was classifiable under the same tariff item number.

Customs now believes that these rulings are wrong and should be revoked. The rationale leading to the decision to revoke these previous rulings was articulated in a Customs Service Headquarters decision on Application for Further Review of Protest No. 2304–2–000108, dated April 23, 1984, to the

District Director of Customs, Laredo Texas (file no. 072959). In that instance, some 7-wire prestressed concrete strand with a chuck at each end had been classified under item 642.11, TSUS, as "rope * * * of wire * * * not fitted with fittings and not made up into articles * * * other". The protestant claimed the proper classification was under item 642.20, TSUS, because the chucks were "fittings" "fitted" on the strand.

In denying the protestant's claim, it was stated that the chucks facilitate further processing of the strand but do not dedicate the strand to a specific use. In that sense, the strand was not "fitted" or made suitable for a particular purpose. Also, it was noted that in the heading to item 642.11 and 642.20, TSUS, the fittings mentioned are of a class or kind of functional attachments, not temporary, facilitating attachments like a chuck.

The tariff classification Customs now believes should apply to the wire rope in question is "rope * * * of wire * * * not fitted with fittings and not made up into articles", in item 642.16, TSUS. That classification carries a column 1 rate of duty of 4% ad valorem, and is subject to VRA's. Therefore, even though the proposed change in tariff classification, if adopted, would result in the assessment of a lower rate of duty, it would result in import restrictions on the quantity of wire rope which could be entered into the U.S. for consumption.

In order to assist in our determination of this issue, Customs is requesting the views of the public on the proposed classification of the wire rope in item 642.16, TSUS, as opposed to classification in item 642.20, TSUS. If, after reviewing comments received in response to this notice, Customs decides to adopt this change in position, an effective date for the change must be determined. To assist in determining this date, written comments are also invited regarding an appropriate time frame within which the change in position should occur and reasons why such a time frame is appropriate.

Comments

Before making any determination on this matter, Customs will consider any written comments timely submitted. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), between 9:00 a.m. and 4:30 p.m. on normal business days, at the Regulations Control Branch, Room 2324, U.S. Customs Service Headquarters, 1301 Constitution Avenue NW., Washington, DC 20229.

BILLING CODE 4820-02-M

RAILROAD RETIREMENT BOARD

20 CFR Part 355

Implementation of Program Fraud Civil Remedies Act of 1986

AGENCY: Railroad Retirement Board.

ACTION: Proposed rule.

SUMMARY: This proposed rule is required under the Program Fraud Civil Remedies Act of 1986 (PFCRA) because the Railroad Retirement Board (Board) is an authority within the meaning of that Act. The PFCRA establishes an administrative remedy against persons who make, submit or present fraudulent claims or statements to various federal authorities. This proposed rule is necessary for the Board to implement the provisions of the PFCRA.

DATE: Comments must be received on or before November 2, 1987.

ADDRESS: Secretary to the Board, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

FOR FURTHER INFORMATION CONTACT: Stanley Jay Shuman, General Attorney, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611, (312) 751-4568, FTS 386-4568.

SUPPLEMENTARY INFORMATION: The PFCRA requires the promulgation of regulations by authorities in order to implement its provisions (31 U.S.C. 3809). The Board is an authority within the meaning of the PFCRA. These regulations are adopted from the final model regulations prepared by the President's Council on Integrity and Efficiency.

The Board has determined that this is not a major rule for purposes of Executive Order 12291. Therefore, no Regulatory Impact Analysis is required. In addition, this part does not impose any requirement for the collection of information within the meaning of the Paperwork Reduction Act of 1980.

List of Subjects in 20 CFR Part 355

Administrative practice and procedure, Fraud, Investigations, Organizations and functions (Government Agencies), Penalties.

For the reasons set out in the Preamble, Chapter II, Title 20 of the Code of Federal Regulations is proposed to be amended as follows:

1. Subchapter E, consisting of Part 355 is added to read as follows:

Subchapter E—Administrative Remedies for Fraudulent Claims or Statements

PART 355—REGULATIONS UNDER THE PROGRAMS FRAUD CIVIL REMEDIES ACT OF 1986

Sec.

355.1 Basis and purpose.
355.2 Definitions.
355.3 Basis for civil penalties and assessments.
355.4 Investigation.
355.5 Review by the reviewing official.
355.6 Prerequisites for issuing a complaint.
355.7 Complaint.
355.8 Service of complaint.
355.9 Answer.
355.10 Default upon failure to file an answer.
355.11 Referral of complaint and answer to the ALJ.
355.12 Notice of hearing.
355.13 Parties to the hearing.
355.14 Separation of functions.
355.15 Ex parte contacts.
355.16 Disqualification of reviewing official or ALJ.
355.17 Rights of parties.
355.18 Authority of the ALJ.
355.19 Prehearing conferences.
355.20 Disclosure of documents.
355.21 Discovery.
355.22 Exchange of witness lists, statements and exhibits.
355.23 Subpoenas for attendance at hearing.
355.24 Protective order.
355.25 Fees.
355.26 Form, filing and service of papers.
355.27 Computation of time.
355.28 Motions.
355.29 Sanctions.
355.30 The hearing and burden of proof.
355.31 Determining the amount of penalties and assessments.
355.32 Location of hearing.
355.33 Witnesses.
355.34 Evidence.
355.35 The record.
355.36 Post-hearing briefs.
355.37 Initial decision.
355.38 Reconsideration of intitial decision.
355.39 Appeal to authority head.
355.40 Stays ordered by the Department of Justice.
355.41 Stay pending appeal.
355.42 Judicial review.
355.43 Collection of civil penalties and assessments.

Sec.
355.44 Right to administrative offset.
355.45 Deposit in Treasury of United States.
355.46 Compromise or settlement.
355.47 Limitations.

Authority: 31 U.S.C. 3809.

§ 355.1 Basis and purpose.

(a) *Basis.* This part implements the Program Fraud Civil Remedies Act of 1986, Pub. L. No. 99–509, 6101–6104, 100 Stat. 1874 (October 21, 1986), to be codified at 31 U.S.C. 3801–3812. 31 U.S.C. 3809 of the statute requires each authority head to promulgate regulations necessary to implement the provisions of the statute.

(b) *Purpose.* This part—

(1) Establishes administrative procedures for imposing civil penalties and assessments against persons who make, submit, or present, or cause to be made, submitted, or presented, false, fictitious, or fraudulent claims or written statements to authorities or to their agents, and

(2) Specifies the hearing and appeal rights of persons subject to allegations of liability for such penalties and assessments.

§ 355.2 Definitions.

ALJ means an Administrative Law Judge detailed to the authority pursuant to 5 U.S.C. 3344.

Authority means Railroad Retirement Board.

Authority head means the three-member Railroad Retirement Board.

Benefits means, except as the context otherwise requires, anything of value, including but not limited to any advantage, preference, privilege, license, permit, favorable decision, ruling, status, or loan guarantee.

Board means Railroad Retirement Board.

Claim means any request, demand, or submission—

(a) Made to the authority for property, services, or money (including money representing grants, loans, insurance, or benefits);

(b) Made to a recipient of property, services, or money from the authority or to a party to a contract with the authority—

(1) For property or services if the United States—

(i) Provided such property or services;

(ii) Provided any portion of the funds for the purchase of such property or services; or

(iii) Will reimburse such recipient or party for the purchase of such property or services; or

(2) For the payment of money (including money representing grants, loans, insurance, or benefits) if the United States—

(i) Provided any portion of the money requested or demanded; or

(ii) Will reimburse such recipient or party for any portion of the money paid on such request or demand; or

(c) Made to the authority which has the effect of decreasing an obligation to pay or account for property, services, or money.

Complaint means the administrative complaint served by the reviewing official on the defendant under § 355.7.

Defendant means any person alleged in a complaint under § 355.7 to be liable for a civil penalty or assessment under § 355.3.

Government means the United States Government.

Individual means the natural person.

Initial decision means the written decision of the ALJ required by § 355.10 or § 355.37, and includes a revised initial decision issued following a remand or a motion for reconsideration.

Investigating Official means the Inspector General of the Railroad Retirement Board or an officer or employee of the Office of the Inspector General designated by the Inspector General and serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS–16 under the General Schedule.

Knows or has reason to know means that a person, with respect to a claim or statement—

(a) Has actual knowledge that the claim or statement is false, fictitious, or fraudulent;

(b) Acts indeliberate ignorance of the truth or falsity of the claim or statement; or

(c) Acts in reckless disregard of the truth or falsity of the claim or statement.

Makes, wherever it appears, shall include the terms presents, submits, and causes to be made, presented, or submitted. As the context requires, *making* or *made* shall likewise include the corresponding forms of such terms.

Persons means any individual, partnership, corporation, association, private organization, State, political subdivision of a State, municipality, county, district, and Indian tribe, and includes the plural of that term.

Presiding officer means ALJ.

Representative means an attorney who is a member in good standing of the bar of any state, territory, or possession of the United States or of the District of Columbia.

Reviewing official means the General Counsel of the Board or his or her designee who is—

(a) Not subject to supervision by, or required to report to, the investigating official; and

(b) Not employed in the organizational unit of the authority in which the investigating official is employed; and

(c) Is serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS–16 under the General Schedule.

Statement means any representation, certification, affirmation, document, record, or accounting or bookkeeping entry made—

(a) With respect to a claim or to obtain the approval or payment of a claim (including relating to eligibility to make a claim); or

(b) With respect to (including relating to eligibility for)—

(1) A contract with, or a bid or proposal for a contract with; or

(2) A grant, loan, or benefit from the authority, or any State, political subdivision of a State, or other party, if the United States Government provides any portion of the money or property under such contract or for such grant, loan, or benefit, or if the Government will reimburse such State, political subdivision, or party for any portion of the money or property under such contract or for such grant, loan, or benefit.

§ 355.3 Basis for civil penalties and assessments.

(a) *Claims.* (1) Except as provided in paragraph (c) of this section, any person who makes a claim that the person knows or has reason to know—

(i) Is false, fictitious, or fraudulent;

(ii) Includes or is supported by any written statement which asserts a material fact which is false, fictitious, or fraudulent;

(iii) Includes or is supported by any written statement that—

(A) Omits a material fact;

(B) Is false, fictitious, or fraudulent as a result of such omission; and

(C) Is a statement in which the person making such statement has a duty to include such material fact; or

(iv) Is for payment for the provision of property or services which the person has not provided as claimed, shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than $5,000 for each such claim.

(2) Each voucher, invoice, claim form, or other individual request or demand for property, services, or money constitutes a separate claim.

(3) A claim shall be considered made to an authority, recipient, or party when such claim is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on

VOL 52 ISS 190 OCT 1 1987 UMI

behalf of such authority, recipient, or party.

(4) Each claims for property, services, or money is subject to a civil penalty regardless of whether such property, services, or money is actually delivered or paid.

(5) If the Government has made any payment (including transferred property or provided services) on a claim, a person subject to a civil penalty under paragraph (a)(1) of this section shall also be subject to an assessment of not more than twice the amount of such claim or that portion thereof that is determined to be in violation of paragraph (a)(1) of this section. Such assessment shall be in lieu of damage sustained by the Government because of such claim. However, such assessment shall not be in lieu of any recovery of erroneous payment as authorized by section 10 of the Railroad Retirement Act or section 2(d) of the Railroad Unemployment Insurance Act.

(b) *Statements.* (1) Except as provided in paragraph (c) of this section, any person who makes a written statement that—

(i) The person knows or has reason to know—

(A) Asserts a material fact which is false, fictitious, or fraudulent; or

(B) Is false, fictitious, or fraudulent because it omits a material fact that the person making the statement has a duty to include in such statement; and

(ii) Contains or is accompanied by an express certification or affirmation of the truthfulness and accuracy of the contents of the statement,

shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than $5,000 for each such statement.

(2) Each written representation, certification, or affirmation constitutes a separate statement.

(3) A statement shall be considered made to an authority when such statement is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of such authority.

(c)(1) In the case of any claim or statement made by any individual relating to any of the benefits listed in paragraph (c)(2) of this section received by such individual, such individual may be held liable for penalties and assessments under this section only if such claim or statement is made by such individual in making application for such benefits with respect to such individual's eligibility to receive such benefits.

(2) For purposes of this paragraph, the term "benefits" means—

(i) any annuity or other benefit under the Railroad Retirement Act of 1974;

which are intended for the personal use of the individual who receives the benefits or for a member of the individual's family.

(d) No proof of specific intent to defraud is required to establish liability under this section.

(e) In any case in which it is determined that more than one person is liable for making a claim or statement under this section, each such person may be held liable for a civil penalty under this section.

(f) In any case in which it is determined that more than one person is liable for making a claim under this section on which the Government has made payment (including transferred property or provided services), an assessment may be imposed against any such person or jointly and severally against any combination of such persons.

§ 355.4 Investigation.

(a) If an investigating official concludes that a subpoena pursuant to the authority conferred by 31 U.S.C. 3804(a) is warranted—

(1) The subpoena so issued shall notify the person to whom it is addressed of the authority under which the subpoena is issued and shall identify the records or documents sought;

(2) He or she may designate a person to act on his behalf to receive the documents sought; and

(3) The person receiving such subpoena shall be required to tender to the investigating official or the person designated to receive the documents a certification that the documents sought have been produced, or that such documents are not available and the reasons therefor, or that such documents, suitably identified, have been withheld based upon the assertion of an identified privilege.

(b) If the investigating official concludes that an action under the Program Fraud Civil Remedies Act may be warranted, the investigating official shall submit a report containing the findings and conclusions of such investigation to the reviewing official.

(c) Nothing in this section shall preclude or limit an investigating official's discretion to refer allegations directly to the Department of Justice for suit under the False Claims Act or other civil relief, or to preclude or limit such official's discretion to defer or postpone a report or referral to avoid interference with a criminal investigtion or prosecution.

(d) Nothing in this section modifies any responsibility of an investigating official to report violations of criminal law to the Attorney General.

§ 355.5 Review by the reviewing official.

(a) If, based on the report of the investigating official under § 355.4(b), the reviewing official determines that there is adequate evidence to believe that a person is liable under § 355.3 of this part, the reviewing official shall transmit to the Attorney General a written notice of the reviewing official's intention to issue a complaint under § 355.7.

(b) Such notice shall include—

(1) A statement of the reviewing official's reasons for issuing a complaint;

(2) A statement specifying the evidence that supports the allegations of liability;

(3) A description of the claims or statements upon which the allegations of liability are based;

(4) An estimate of the amount of money or the value of property, services, or other benefits requested or demanded in violation of § 355.3 this part;

(5) A statement of any exculpatory or mitigating circumstances that may relate to the claims or statements known by the reviewing official or the investigating official; and

(6) A statement that there is a reasonable prospect of collecting an appropriate amount of penalties and assessments. Such a statement may be based upon information then known or an absence of any information indicating that the person may be unable to pay such an amount.

§ 355.6 Prerequisites for issuing a complaint.

(a) The reviewing official may issue a complaint under § 355.7 only if—

(1) The Department of Justice approves the issuance of a complaint in a written statement described in 31 U.S.C. 3803(b)(1), and

(2) In the case of allegations of liability under § 355.3(a) with respect to a claim, the reviewing official determines that, with respect to such claim or a group of related claims submitted at the same time such claim is submitted (as defined in paragraph (b) of this section), the amount of money or the value of property or services demanded or requested in violation of § 355.3(a) does not exceed $150,000.

(b) For the purposes of this section, a related group of claims submitted at the same time shall include only those claims arising from the same transaction (*e.g.*, grant, loan, application, or contract) that are submitted simultaneously as part of a single request, demand, or submission.

(c) Nothing in this section shall be construed to limit the reviewing official's authority to join in a single complaint against a person claims that are unrelated or were not submitted simultaneously, regardless of the amount of money or the value of property or services demanded or requested.

§ 355.7 Complaint.

(a) On or after the date the Department of Justice approves the issuance of a complaint in accordance with 31 U.S.C. 3803(b)(1), the reviewing official may serve a complaint on the defendant, as provided in § 355.8.

(b) The complaint shall state—

(1) The allegations of liability against the defendant, including the statutory basis for liability, an identification of the claims or statements that are the basis for the alleged liability, and the reasons why liability allegedly arises from such claims or statements;

(2) The maximum amount of penalties and assessments for which the defendant may be held liable;

(3) Instructions for filing an answer to request a hearing, including a specific statement of the defendant's right to request a hearing by filing an answer and to be represented by a representative; and

(4) That failure to file an answer within 30 days of service of the complaint may result in the imposition of the maximum amount of penalties and assessments without right to appeal.

(c) At the same time the reviewing official serves the complaint, he or she shall serve the defendant with a copy of these regulations.

§ 355.8 Service of complaint.

(a) Service of a complaint must be made by certified or registered mail or by delivery in any manner authorized by Rule 4(d) of the Federal Rules of Civil Procedure.

(b) Proof of service, stating the name and address of the person on whom the complaint was served, and the manner and date of service, may be made by—

(1) Affidavit of the individual making service;

(2) An acknowledged United States Postal Service return receipt card; or

(3) Written acknowledgment of the defendant or his representative.

§ 355.9 Answer.

(a) The defendant may request a hearing by filing an answer with the reviewing official within 30 days of service of the complaint. An answer shall be deemed to be a request for hearing.

(b) In the answer, the defendant—

(1) Shall admit or deny each of the allegations of liability made in the complaint;

(2) Shall state any defense on which the defendant intends to rely;

(3) May state any reasons why the defendant contends that the penalties and assessments should be less than the statutory maximum; and

(4) Shall state the name, address, and telephone number of the person authorized by the defendant to act as defendant's representative, if any.

§ 355.10 Default upon failure to file an answer.

(a) If the defendant does not file an answer within the time prescribed in § 355.9(a), the reviewing official may refer the complaint to the ALJ.

(b) Upon the referral of the complaint, the ALJ shall promptly serve on defendant in the manner prescribed in § 355.8, a notice that an intitial decision will be issued under this section.

(c) If the defendant has failed to answer the complaint, the ALJ shall assume the facts alleged in the complaint to be true and, if such facts establish liability under § 355.3, the ALJ shall issue an initial decision imposing the maximum amount of penalties and assessments allowed under the statute.

(d) Except as otherwise provided in this section, by failing to file a timely answer, the defendant waives any right to further review of the penalties and assessments imposed under paragraph (c) of this section, and the initial decision shall become final and binding upon the parties 30 days after it is issued.

(e) If, before such an initial decision becomes final, the defendant files a motion with the ALJ seeking to reopen on the grounds that extraordinary circumstances prevented the defendant from filing an answer, the initial decision shall be stayed pending the ALJ's decision on the motion.

(f) If, on such motion, the defendant can demonstrate extraordinary circumstances excusing the failure to file a timely answer, the ALJ shall withdraw the intitial decision in paragraph (c) of this section, if such a decision has been issued, and shall grant the defendant an opportunity to answer the complaint.

(g) A decision of the ALJ denying a defendant's motion under paragraph (e) of this section is not subject to reconsideration under § 355.38.

(h) The defendant may appeal to the authority head the decision denying a motion to reopen by filing a notice of appeal with the authority head within 15 days after the ALJ denies the motion. The timely filing of a notice of appeal shall stay the intitial decision until the authority head decides the issue.

(i) If the defendant files a timely notice of appeal with the authority head, the ALJ shall forward the record of the proceeding to the authority head.

(j) The authority head shall decide expeditiously whether extraordinary circumstances excuse the defendant's failure to file a timely answer based solely on the record before the ALJ.

(k) If the authority head decides that extraordinary circumstances excused the defendant's failure to file a timely answer, the authority head shall remand the case to the ALJ with instructions to grant the defendant an opportunity to answer.

(l) If the authority head decides that the defendant's failure to file a timely answer is not excused, the authority head shall reinstate the intitial decision of the ALJ, which shall become final and binding upon the parties 30 days after the authority head issues such decision.

§ 355.11 Referral of complaint and answer to the ALJ.

Upon receipt of an answer, the reviewing official shall file the complaint and answer with the ALJ.

§ 355.12 Notice of hearing.

(a) When the ALJ receives the complaint and answer, the ALJ shall promptly serve a notice of hearing upon the defendant in the manner prescribed by § 355.8. At the same time, the ALJ shall send a copy of such notice to the representative for the Government.

(b) Such notice shall include—

(1) The tentative time and place, and the nature of the hearing;

(2) The legal authority and jurisdiction under which the hearing is to be held;

(3) The matters of fact and law to be asserted;

(4) A description of the procedures for the conduct of the hearing;

(5) The name, address, and telephone number of the representative of the Government and of the defendant, if any; and

(6) Such other matters as the ALJ deems appropriate.

§ 355.13 Parties to the hearing.

(a) The parties to the hearing shall be the defendant and the authority.

(b) Pursuant to 31 U.S.C. 3730(c)(5), a private plaintiff under the False Claims Act may participate in these proceedings to the extent authorized by the provisions of that Act.

§ 355.14 Separation of functions.

(a) The investigating official, the reviewing official, and any employee or agent of the authority who takes part in

VOL 52 ISS 190 OCT 1 1987 UMI

investigating, preparing, or presenting a particular case may not, in such case or a factually related case—

(1) Participate in the hearing as the ALJ;

(2) Participate or advise in the initial decision or the review of the initial decision by the authority head, except as a witness or a representative in public proceedings; or

(3) Make the collection of penalties and assessments under 31 U.S.C. 3806.

(b) The ALJ shall not be responsible to, or subject to the supervision or direction of the investigating official or the reviewing official.

(c) Except as provided in paragraph (a) of this section, the representative for the Government may be employed anywhere in the authority, including in the offices of either the investigating official or the reviewing official.

§ 355.15 Ex parte contracts.

No party or person (except employees of the ALJ's office) shall communicate in any way with the ALJ on any matter at issue in a case, unless on notice and opportunity for all parties to participate. This provision does not prohibit a person or party from inquiring about the status of a case or asking routine questions concerning administrative functions or procedures.

§ 355.16 Disqualification of reviewing official or ALJ.

(a) A reviewing official or ALJ in a particular case may disqualify himself or herself at any time.

(b) A party may file with the ALJ a motion for disqualification of a reviewing official or an ALJ. Such motion shall be accompanied by an affidavit alleging personal bias or other reason for disqualification.

(c) Such motion and affiavit shall be filed promptly upon the party's discovery of reasons requiring disqualification, or such objections shall be deemed waived.

(d) Such affidavit shall state specific facts that support the party's discovery of such facts. It shall be accompanined by a certificate of the representative of record that it is made in good faith.

(e) Upon the filing of such a motion and affidavit, the ALJ shall proceed no further in the case until he or she resolves the matter of disqualification in accordance with paragraph (f) of this section.

(f)(1) If the ALJ determines that a reviewing official is disqualified, the ALJ shall dismiss the complaint without prejudice.

(2) If the ALJ disqualifies himself or herself, the case shall be reassigned promptly to another ALJ.

(3) If the ALJ denies a motion to disqualify, the authority head may determine the matter only as part of his or her review of the initial decision upon appeal, if any.

§ 355.17 Rights of parties.

Except as otherwise limited by this part, all parties may—

(a) Be accompanied, represented, and advised by a representative;

(b) Participate in any conference held by the ALJ;

(c) Conduct discovery;

(d) Agree to stipulations of fact or law, which shall be made part of the record;

(e) Present evidence relevant to the issues at the hearing;

(f) Present and cross-examine witnesses;

(g) Present oral arguments at the hearing as permitted by the ALJ; and

(h) Submit written briefs and proposed findings of fact and conclusions of law after the hearing.

§ 355.18 Authority of the ALJ.

(a) The ALJ shall conduct a fair and impartial hearing, avoid delay, maintain order, and assure that a record of the proceeding is made.

(b) The ALJ has the authority to—

(1) Set and change the date, time, and place of the hearing upon reasonable notice to the parties;

(2) Continue or recess the hearing in whole or in part for a reasonable period of time;

(3) Hold conferences to identify or simplify the issues, or to consider other matters that may aid in the expeditious disposition of the proceeding;

(4) Administer oaths and affirmations;

(5) Issue subpoenas requiring the attendance of witnesses and the production of documents at depositions or at hearings;

(6) Rule on motions and other procedural matters;

(7) Regulate the scope and timing of discovery;

(8) Regulate the course of the hearing and the conduct of representatives and parties;

(9) Examine witnesses;

(10) Receive, rule on, exclude, or limit evidence;

(11) Upon motion of a party, take official notice of facts;

(12) Upon motion of a party, decide cases, in whole or in part, by summary judgment where there is no disputed issued of material fact;

(13) Conduct any conference, argument, or hearing on motions in person or by telephone; and

(14) Exercise such other authority as is necessary to carry out the responsibilities of the ALJ under this part.

(c) The ALJ does not have the authority to decide upon the validity of Federal statutes or regulations.

§ 355.19 Prehearing conferences.

(a) Upon the motion of any party, the ALJ shall schedule at least one prehearing conference at a reasonable time in advance of the hearing.

(c) The ALJ may use prehearing conferences to discuss the following:

(1) Simplification of the issues;

(2) The necessity or desirability or amendments to the pleadings, including the need for a more definite statement;

(3) Stipulations, admissions of fact or as to the contents and authenticity of documents;

(4) Whether the parties can agree to submission of the case on a stipulated record;

(5) Whether a party chooses to waive appearance at an oral hearing and to submit only documentary evidence (subject to the objection of other parties) and written argument;

(6) Limitation of the number of witnesses;

(7) Scheduling dates for the exchange of witness lists and of proposed exhibits;

(8) Discovery;

(9) The time and place for the hearing; and

(10) Such other matters as may tend to expedite the fair and just disposition of the proceedings.

(d) The ALJ may issue an order containing all matters agreed upon by the parties or ordered by the ALJ at a prehearing conference.

§ 355.20 Disclosure of documents.

(a) Upon written request to the reviewing official, the defendant may review any relevant and material documents, transcripts, records, and other materials that relate to the allegations set out in the complaint and upon which the findings and conclusions of the investigating official under § 355.4(b) are based unless such documents are subject to a privilege under Federal law. Upon payment of fees for duplication, the defendant may obtain copies of such documents.

(b) Upon written request to the reviewing official, the defendant also may obtain a copy of all exculpatory information in the possession of the reviewing official or investigating official relating to the allegations in the complaint, even if it is contained in a document that would otherwise be privileged. If the document would otherwise be privileged, only that

portion containing exculpatory information must be disclosed.

(c) The notice sent to the Attorney General from the reviewing official as described in § 355.5 is not discoverable under any circumstances.

(d) The defendant may file a motion to compel disclosure of the documents subject to the provisions of this section. Such a motion may only be filed with the ALJ following the filing of an answer pursuant to § 355.9.

§ 355.21 Discovery.

(a) The following types of discovery are authorized:

(1) Requests for production of documents for inspection and copying;

(2) Requests for admissions of the authenticity of any relevant document or of the truth of any relevant fact;

(3) Written interrogatories; and

(4) Depositions.

(b) For the purpose of this section and §§ 355.22 and 355.23, the term "documents" includes information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence. Nothing contained herein shall be interpreted to require the creation of a document.

(c) Unless mutually agreed to by the parties, discovery is available only as ordered by the ALJ. The ALJ shall regulate the timing of discovery.

(d) *Motions for discovery.* (1) A party seeking discovery may file a motion with the ALJ. Such a motion shall be accompanied by a copy of the requested discovery, or in the case of depositions, a summary of the scope of the proposed deposition.

(2) Within ten days of service, a party may file an opposition to the motion and/or a motion for protective order as provided in § 355.24

(3) The ALJ may grant a motion for discovery only if he finds that the discovery sought—

(i) Is necessary for the expeditious, fair, and reasonable consideration of the issues;

(ii) Is not unduly costly or burdensome;

(iii) Will not unduly delay the proceeding; and

(iv) Does not seek privileged information.

(4) The burden of showing that discovery should be allowed is on the party seeking discovery.

(5) The ALJ may grant discovery subject to a protective order under § 355.24.

(e) *Depositions.* (1) If a motion for deposition is granted, the ALJ shall issue a subpoena for the deponent, which may require the deponent to produce documents. The subpoena shall specify the time and place at which the deposition will be held.

(2) The party seeking to depose shall serve the subpoena in the manner prescribed in § 355.8.

(3) The deponent may file with the ALJ a motion to quash the subpoena or a motion for a protective order within ten days of service.

(4) The party seeking to depose shall provide for the taking of a verbatim transcript of the deposition, which it shall make available to all other parties for inspection and copying.

(f) Each party shall bear its own costs of discovery.

§ 355.22 Exchange of witness lists, statements and exhibits.

(a) At least 15 days before the hearing or at such other time as may be ordered by the ALJ, the parties shall exchange witness lists, copies of prior statements of proposed witnesses, and copies of proposed hearing exhibits, including copies of any written statements that the party intends to offer in lieu of live testimony in accordance with § 355.33(b). At the time the above documents are exchanged, any party that intends to rely on the transcript of deposition testimony in lieu of live testimony at the hearing, if permitted by the ALJ, shall provide each party with a copy of the specific pages of the transcript it intends to introduce into evidence.

(b) If a party objects, the ALJ shall not admit into evidence the testimony of any witness whose name does not appear on the witness list or any exhibit not provided to the opposing party as provided above unless the ALJ finds good cause for the failure or that there is not prejudice to the objecting party.

(c) Unless another party objects within the time set by the ALJ, documents exchanged in accordance with paragraph (a) of the section shall be deemed to be authentic for the purpose of admissibility at the hearing.

§ 355.23 Subpoenas for attendance at hearing.

(a) A party wishing to procure the appearance and testimony of any individual at the hearing may request that the ALJ issue a subpoena.

(b) A subpoena requiring the attendance and testimony of an individual may also require the individual to produce documents at the hearing.

(c) A party seeking a subpoena shall file a written request therefor not less than 15 days before the date fixed for the hearing unless otherwise allowed by the ALJ for good cause shown. Such request shall specify any documents to be produced and shall designate the witnesses and describe the address and location thereof with sufficient particularity to permit such witnesses to be found.

(d) The subpoena shall specify the time and place at which the witness is to appear and any documents the witness is to produce.

(e) The party seeking the subpoena shall serve it in the manner prescribed in § 355.8. A subpoena on a party or upon an individual under the control of a party may be served by first class mail.

(f) A party or the individual to whom the subpoena is directed may file with the ALJ a motion to quash the subpoena within ten days after service or on or before the time specified in the subpoena for compliance if it is less than ten days after service.

§ 355.24 Protective order.

(a) A party or a prospective witness or deponent may file a motion for a protective order with respect to discovery sought by an opposing party or with respect to the hearing, seeking to limit the availability or disclosure of evidence.

(b) In issuing a protective order, the ALJ may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, including one or more of the following:

(1) That the discovery not be had;

(2) That the discovery may be had only on specified terms and conditions, including a designation of the time or place;

(3) That the discovery may be had only through a method of discovery other than that requested;

(4) That certain matters not be inquired into, or that the scope of discovery be limited to certain matters;

(5) That discovery be conducted with no one present except persons designated by the ALJ;

(6) That the contents of discovery or evidence be sealed;

(7) That a deposition after being sealed be opened only by order of the ALJ;

(8) That a trade secret or other confidential research, development, commercial information, or facts pertaining to any criminal investigation, proceeding, or other administrative investigation not be disclosed or be disclosed only in a designated way; or

(9) That the parties simultaneously file specified documents or information enclosed in sealed envelopes to be opened as directed by the ALJ.

VOL 52 ISS 190 OCT 1 1987 UMI

§ 355.25 Fees.

The party requesting a subpoena shall pay the cost of the fees and mileage of any witness subpoenaed in the amounts that would be payable to a witness in a proceeding in United States District Court. A check for witness fees and mileage shall accompany the subpoena when served, except that when a subpoena is issued on behalf of the authority, a check for witness fees and mileage need not accompany the subpoena.

§ 355.26 Form, filing and service of papers.

(a) *Form.* (1) Documents filed with the ALJ shall include an original and two copies.

(2) Every pleading and paper filed in the proceeding shall contain a caption setting forth the title of the action, the case number assigned by the ALJ, and a designation of the paper (*e.g.*, motion to quash subpoena).

(3) Every pleading and paper shall be signed by, and shall contain the address and telephone number of the party or the person on whose behalf the paper was filed, or his or her representative.

(4) Papers are considered filed when they are mailed. Date of mailing may be established by a certificate from the party or its representative or by proof that the document was sent by certified or registered mail.

(b) *Service.* A party filing a document with the ALJ shall, at the time of filing, serve a copy of such document on every other party. Service upon any party of any document other than the complaint or notice of hearing shall be made by delivering or mailing a copy to the party's last known address. When a party is represented by a representative, service shall be made upon such representative in lieu of the actual party.

(c) *Proof of service.* A certificate of the individual serving the document by personal delivery or by mail, setting forth the manner or service, shall be proof of service.

§ 355.27 Computation of time.

(a) In computing any period of time under this part or in an order issued thereunder, the time begins with the day following the act, event, or default, and includes that last day of the period, unless it is a Saturday, Sunday, or legal holiday observed by the Federal government, in which event it includes the next business day.

(b) When the period of time allowed is less than seven days, intermediate Saturdays, Sundays, and legal holidays observed by the Federal government shall be excluded from the computation.

(c) Where a document has been served or issued by mail, an additional five days will be added to the time permitted for any response.

§ 355.28 Motions.

(a) Any application to the ALJ for an order or ruling shall be by motion. Motions shall state the relief sought, the authority relied upon, and the facts alleged, and shall be filed with the ALJ and served on all other parties.

(b) Except for motions made during a prehearing conference or at the hearing, all motions shall be in writing. The ALJ may require that oral motions be reduced to writing.

(c) Within 15 days after a written motion is served, or such other time as may be fixed by the ALJ, any party may file a response to such motion.

(d) The ALJ may not grant a written motion before the time for filing responses thereto has expired, except upon consent of the parties or following a hearing on the motion, but may overrule or deny such motion without awaiting a response.

(e) The ALJ shall make a reasonable effort to dispose of all outstanding motions prior to the beginning of the hearing.

§ 355.29 Sanctions.

(a) The ALJ may sanction a person, including any party or representative for—

(1) Failing to comply with an order, rule, or procedure governing the proceeding;

(2) Failing to prosecute or defend an action; or

(3) Engaging in other misconduct that interferes with the speedy, orderly, or fair conduct of the hearing.

(b) Any such sanction, including but not limited to those listed in paragraphs (c), (d), (e) of this section, shall reasonably relate to the severity and nature of the failure or misconduct.

(c) When a party fails to comply with an order, including an order for taking a deposition, the production of evidence within the party's control, or a request for admission, the ALJ may—

(1) Draw an inference in favor of the requesting party with regard to the information sought;

(2) In the case of requests for admission, deem each matter of which an admission is requested to be admitted;

(3) Prohibit the party failing to comply with such order from introducing evidence concerning, or otherwise relying upon testimony relating to the information sought; and

(4) Strike any part of the pleadings or other submissions of the party failing to comply with such request.

(d) If a party fails to prosecute or defend an action under this part commenced by service of a notice of hearing, the ALJ may dismiss the action or may issue an initial decision imposing penalties and assessments.

(e) The ALJ may refuse to consider any motion, request, response, brief or other document which is not filed in a timely fashion.

§ 355.30 The hearing and burden of proof.

(a) The ALJ shall conduct a hearing on the record in order to determine whether the defendant is liable for a civil penalty or assessment under § 355.3 and, if so, the appropriate amount of any such civil penalty or assessment considering and aggravating or mitigating factors.

(b) The authority shall prove defendant's liability and any aggravating factors by a preponderance of the evidence.

(c) The defendant shall prove any affirmative defenses and any mitigating factors by a preponderance of the evidence.

(d) The hearing shall be open to the public unless otherwise ordered by the ALJ for good cause shown.

§ 355.31 Determining the amount of penalties and assessments.

(a) In determining an appropriate amount of civil penalties and assessments, the ALJ and upon appeal, the authority head, should evaluate and circumstances that mitigate or aggravate the violation and should articulate in their opinions the reasons that support the penalties and assessments they impose. Because of the intangible costs of fraud, the expense of investigating such conduct, and the need to deter others who might be similarly tempted, ordinarily double damages and a significant civil penalty should be imposed.

(b) Although not exhaustive, the following factors are among those that may influence the ALJ and the authority head in determining the amount of penalties and assessments to impose with respect to the misconduct (*i.e.*, the false, fictitious, of fraudulent claims or statements) charged in the complaint:

(1) The number of false, fictitious, or fraudulent claims or statement;

(2) The time period over which such claims or statements were made;

(3) The degree of the defendant's culpability with respect to the misconduct;

(4) The amount of money or the value of the property, services, or benefit falsely claimed;

(5) The value of the Government's actual loss as a result of the misconduct, including foreseeable consequential damages and the costs of investigation;

(6) The relationship of the amount imposed as civil penalties to the amount of the Government's loss;

(7) The potential or actual impact of the misconduct upon national defense, public health or safety, or public confidence in the management of Government programs and operations, including particularly the impact on the intended beneficiaries of such programs;

(8) Whether the defendant has engaged in a pattern of the same or similar misconduct;

(9) Whether the defendant attempted to conceal the misconduct;

(10) The degree to which the defendant has involved others in the misconduct or in concealing it;

(11) Where the misconduct of employees or agents in imputed to the defendant, the extent to which the defendant's practices fostered or attempted to preclude such misconduct;

(12) Whether the defendant cooperated in or obstructed an investigation of the misconduct;

(13) Whether the defendant assisted in identifying and prosecuting other wrongdoers;

(14) The complexity of the program or transaction, and the degree of the defendant's sophistication with respect to it, including the extent of the defendant's prior participation in the program or in similar transactions;

(15) Whether the defendant has been found, in any criminal, civil, or administrative proceeding to have engaged in similar misconduct or to have dealt dishonestly with the Government of the United States or of a State, directly or indirectly; and

(16) The need to deter the defendant and others from engaging in the same or similar misconduct.

(c) Nothing in this section shall be construed to limit the ALJ or the authority head from considering any other factors that in any given case may mitigate or aggravate the offense for which penalties and assessments are imposed.

§ 355.32 Location of hearing.

(a) The hearing may be held—

(1) In any judicial district of the United States in which the defendant resides or transacts business;

(2) In any judicial district of the United States in which the claim or statement in issue was made; or

(3) In such other place as may be agreed upon by the defendant and the ALJ.

(b) Each party shall have the opportunity to present argument with respect to the location of the hearing.

(c) The hearing shall be held at the place and at the time ordered by the ALJ.

§ 355.33 Witnesses.

(a) Except as provided in paragraph (b) of this section, testimony at the hearing shall be given orally by witnesses under oath or affirmation.

(b) At the discretion of the ALJ, testimony may be admitted in the form of a written statement or deposition. Any such written statement must be provided to all other parties along with the last known address of such witness, in a manner which allows sufficient time for other parties to subpoena such witness for cross-examination at the hearing. Prior written statements of witnesses proposed to testify at the hearing and deposition transcripts shall be exchanged as provided in § 355.22(a).

(c) The ALJ shall exercise reasonable control over the mode and order of interrogating witnesses and presenting evidence so as to—

(1) Make the interrogation and presentation effective for the ascertainment of the truth,

(2) Avoid needless consumption of time, and

(3) Protect witnesses from harassment or undue embarrassment.

(d) The ALJ shall permit the parties to conduct such cross-examination as may be required for a full and true disclosure of the facts.

(e) At the discretion of the ALJ, a witness may be cross-examined on matters relevant to the proceeding without regard to the scope of his or her direct examination. To the extent permitted by the ALJ, cross-examination on matters outside the scope of direct examination shall be conducted in the manner of direct examination and may proceed by leading questions only if the witness is a hostile witness, an adverse party, or a witness identified with an adverse party.

(f) Upon motion of any party, the ALJ shall order witnesses excluded so that they cannot hear the testimony of other witnesses. This rule does not authorize exclusion of—

(1) A party who is an individual;

(2) In the case of a party that is not an individual, an officer or employee of the party designated by the party's representative; or

(3) An individual whose presence is shown by a party to be essential to the presentation of its case, including an individual employed by the Government engaged in assisting the representative for the Government.

§ 355.34 Evidence.

(a) The ALJ shall determine the admissibility of evidence.

(b) Except as provided herein, the ALJ shall not be bound by the Federal Rules of Evidence. However, the ALJ may apply the Federal Rules of Evidence where appropriate, *e.g.*, to exclude unreliable evidence.

(c) The ALJ shall exclude irrelevant and immaterial evidence.

(d) Although relevant, evidence may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or by considerations of undue delay or needless presentation of cumulative evidence.

(e) Although relevant, evidence may be excluded if it is privileged under Federal law.

(f) Evidence concerning offers of compromise or settlement shall be inadmissible to the extent provided in Rule 408 of the Federal Rules of Evidence.

(g) The ALJ shall permit the parties to introduce rebuttal witnesses and evidence.

(h) All documents and other evidence offered or taken for the record shall be open to examination by all parties, unless otherwise ordered by the ALJ pursuant to § 355.24.

§ 355.35 The record.

(a) The hearing will be recorded and transcribed. Transcripts may be obtained following the hearing from the ALJ at a cost not to exceed the actual cost of duplication.

(b) The transcript of testimony, exhibits and other evidence admitted at the hearing, and all papers and requests filed in the proceeding constitute the record for the decision by the ALJ and the authority head.

(c) The record may be inspected and copied (upon payment of a reasonable fee) by anyone, unless otherwise ordered by the ALJ pursuant to § 355.24.

§ 355.36 Post-hearing briefs.

The ALJ may require the parties to file post-hearing briefs. In any event, any party may file a post-hearing brief. The ALJ shall fix the time for filing such briefs, not to exceed 60 days from the date the parties receive the transcript of the hearing or, if applicable, the stipulated record. Such briefs may be accompanied by proposed findings of fact and conclusions of law. The ALJ

VOL 52 ISS 190 OC 1 1987 UMI

may permit the parties to file reply briefs.

§ 355.37 Initial decision.

(a) The ALJ shall issue an initial decision based only on the record, which shall contain findings of fact, conclusions of law, and the amount of any penalties and assessments imposed.

(b) The findings of fact shall include a finding on each of the following issues:

(1) Whether the claims or statements identified in the complaint, or any portions thereof, violate § 355.3;

(2) If the person is liable for penalties or assessments, the appropriate amount of any such penalties or assessments considering any mitigating or aggravating factors that he or she finds in the case, such as those described in § 355.31.

(c) The ALJ shall promptly serve the initial decision on all parties within 90 days after the time for submission of post-hearing briefs and reply briefs (if permitted) has expired. The ALJ shall at the same time serve all defendants with a statement describing the right of any defendant determined to be liable for a civil penalty or assessment to file a motion for reconsideration with the ALJ or a notice of appeal with the authority head. If the ALJ fails to meet the deadline contained in this paragraph, he or shall notify the parties of the reason for the delay and shall set a new deadline.

(d) Unless the initial decision of the ALJ is timely appealed to the authority head, or a motion for reconsideration of the initial decision is timely filed, the initial decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after it is issued by the ALJ.

§ 355.38 Reconsideration of initial decision.

(a) Except as provided in paragraph (d) of this section, any party may file a motion for reconsideration of the initial decision within 20 days of receipt of the initial decision. If service was made by mail, receipt will be presumed to be five days from the date of mailing in the absence of contrary proof.

((b) Every such motion must set forth the matter claimed to have been erroneously decided and the nature of the alleged errors. Such motion shall be accompanied by a supporting brief.

(c) Responses to such motions shall be allowed only upon request of the ALJ.

(d) No party may file a motion reconsideration of an initial decision that has been revised in response to a previous motion for reconsideration.

(e) The ALJ may dispose of a motion for reconsideration by denying it or by issuing a revised initial decision.

(f) When a motion for reconsideration is made, the time periods for appeal to the authority head contained in § 355.38, and for finality of the initial decision in § 355.36(d), shall begin on the date the ALJ issues the denial of the motion for reconsideration or a revised initial decision, as appropriate.

§ 355.39 Appeal to authority head.

(a) Any defendant who has filed a timely answer and who is determined in an initial decision to be liable for a civil penalty or assessment may appeal such decision to the authority head by filing a notice of appeal with the authority head in accordance with this section.

(b)(1) No notice of appeal may be filed until the time period for filing a motion for reconsideration under § 355.38 has expired.

(2) If a motion for reconsideration is timely filed, a notice of appeal must be filed within 30 days after the ALJ denies the motion or issues a revised initial decision, whichever applies.

(3) If no motion for reconsideration is timely filed, a notice of appeal must be filed within 30 days after the ALJ issues the initial decision.

(4) The authority head may extend the initial 30 day period for an additional 30 days if the defendant files with the authority head a request for an extension within the initial 30 day period and shows good cause.

(c) If the defendant files a timely notice of appeal with the authority head, the ALJ shall forward the record of the proceeding to the authority head.

(d) A notice of appeal shall be accompanied by written brief specifying exceptions to the initial decision and reasons supporting the exceptions.

(e) The representative for the Government may filed a brief in opposition to exceptions within 30 days of receiving the notice of appeal and accompanying brief.

(f) There is no right to appear personally before the authority head.

(g) There is no right to appeal any interlocutory ruling by the ALJ.

(h) In reviewing the initial decision, the authority head shall not consider any objection that was not raised before the ALJ unless a demonstration is made of extraordinary circumstances causing the failure to raise the objection.

(i) If any party demonstrates to the satisfaction of the authority head that additional evidence not presented at such hearing is material and that there were reasonable grounds for the failure to present such evidence at such hearing, the authority head shall remand the matter to the ALJ for consideration of such additional evidence.

(j) The authority head may affirm, reduce, reverse, compromise, remand, or settle any penalty or assessment, determined by the ALJ in any initial decision.

(k) The authority head shall promptly serve each party to the appeal with a copy of the decision of the authority head. At the same time authority head shall serve the defendant with a statement describing the defendant's right to seek judicial review.

(l) Unless a petition for review is filed as provided in 31 U.S.C. 3805 after a defendant has exhausted all administrative remedies under this part and within 60 days after the date on which the authority head serves the defendant with a copy of the authority head's decision, a determination that a defendant is liable under § 355.3 is final and is not subject to judicial review.

§ 355.40 Stays ordered by the Department of Justice.

If at any time the Attorney General or an Assistant Attorney General designated by the Attorney General transmits to the authority head a written finding that continuation of the administrative process described in this part with respect to a claim or statement may adversely affect any pending or potential criminal or civil action related to such claim or statement, the authority head shall stay the process immediately. The authority head may order the process resumed only upon receipt of the written authorization of the Attorney General.

§ 355.41 Stay pending appeal.

(a) An initial decision is stayed automatically pending disposition of a motion for reconsideration or of an appeal to the authority head.

(b) No administrative stay is available following a final decision of the authority head.

§ 355.42 Judicial review.

Section 3805 of title 31, United States Code, authorizes judicial review by an appropriate United States District Court of a final decision of the authority head imposing penalties or assessments under this part and specifies the procedures for such review.

§ 355.43 Collection of civil penalties and assessments.

Sections 3806 and 3808(b) of title 31, United States Code, authorize actions for collection of civil penalties and assessments imposed under this part and specify the procedures for such actions.

§ 355.44 Right to administrative offset.

The amount of any penalty or assessment which has become final, or for which a judgment has been entered under § 355.42 or § 355.43, or any amount agreed upon in a compromise or settlement under § 355.46, may be collected by administrative offset under 31 U.S.C. 3716, except that an administrative offset may not be made under this subsection against a refund of an overpayment of Federal taxes, then or later owing by the United States to the defendant.

§ 355.45 Deposit in Treasury of United States.

All amounts collected pursuant to this part shall be deposited as miscellaneous receipts in the Treasury of the United States, except as provided in 31 U.S.C. 3806(g).

§ 355.46 Compromise or settlement.

(a) Parties may make offers of compromise or settlement at any time.

(b) The reviewing official has the exclusive authority to compromise or settle a case under this part at any time after the date on which the reviewing official is permitted to issue a complaint and before the date on which the ALJ issues an initial decision.

(c) The authority head has exclusive authority to compromise or settle a case under this part at any time after the date on which the ALJ issues an initial decision, except during the pendency of any review under § 355.42 or during the pendency of any action to collect penalties and assessments under § 355.43.

(d) The Attorney General has exclusive authority to compromise or settle a case under this part during the pendency of any review under § 355.42 or of any action to recover penalties and assessments under 31 U.S.C. 3806.

(e) The investigating official may recommend settlement terms to the reviewing official, the authority head, or the Attorney General, as appropriate. The reviewing official may recommend settlement terms to the authority head, or the Attorney General, as appropriate.

(f) Any compromise or settlement must be in writing.

§ 355.47 Limitations.

(a) The notice of hearing with respect to a claim or statement must be served in the manner specified in § 355.8 within 6 years after the date on which such claim or statement is made.

(b) If the defendant fails to file a timely answer, service of a notice under § 355.10(b) shall be deemed a notice of hearing for purposes of this section.

(c) The statute of limitations may be extended by agreement of the parties.

Dated: September 24, 1987.

BILLING CODE 7905-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD5 87-065]

Drawbridge Operation Regulations; Mullica River, NJ

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the Burlington County Board of Chosen Freeholders, and with the concurrence of Atlantic County, the Coast Guard is considering a change to the regulations governing the Lower Bank and Green Bank bridges, at miles 15.0 and 18.0, over the Mullica River at Lower Bank and Green Bank, New Jersey. The proposal requires advance notice for openings during the late evening hours of the boating season, from 1 April through 30 November, and at all times during the winter months. This proposal is based on the relative infrequent requests for bridge openings at night during the boating season and the limited use of the waterway during the winter. This action should relieve bridge owner's burden of having a person constantly available to open the draw at times of limited waterway use. It should still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before November 16, 1987.

ADDRESSES: Comments should be mailed to Commander, Fifth Coast Guard District, c/o Commander (obr), First Coast Guard District, Bldg. 135A, Governors Island, New York 10004-5098. The comments and other material referenced in this notice will be available for inspection and copying at that address. Normal office hours are between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: William C. Heming, Bridge Administrator, First Coast Guard District, (212) 668-7170.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal.

The Commander, Fifth Coast Guard District, will evaluate all communications received and determine a final course of action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information: The drafters of these regulations are Waverly W. Gregory, Jr., project manager, and CDR Robert J. Reining, project attorney, Fifth Coast Guard District Legal Staff.

Discussion of Proposed Regulations

The Mullica River is primarily a recreational waterway. The Lower and Green Bank bridges are presently required to open on signal at all times. The proposed regulations would require at least 4 hours advance notice from 11:00 p.m. to 7:00 a.m. during the boating season and at all times during the winter months.

The Lower and Green Bank bridges have been operating contrary to the published regulations. The bridges have regularly been left unmanned during the night except when opening requests have been received in advance. The drawtender for the Lower Bank Bridge resides less than a mile from the bridge. The Green Bank drawtender resides adjacent to the bridge. Both respond upon telephone requests and vessel whistle signals, when heard. After 11 p.m., openings have only been provided by telephone requests to the drawtenders or New Jersey Department of Transportation. However, the phone numbers for contacting the drawtenders have not been posted at the bridges.

A review of the bridge opening logs for the years 1983, 1984, and 1985 show infrequent openings at night and during the winter. Only 82, 92, and 49 openings were logged during the months of December, January, February, and March of 1983, 1984, 1985. Nighttime transits during the boating seasons comprised less than five per cent of the transits.

However, marine interests indicate that one reason for the reduced openings at night are the past restrictions on openings placed by drawtenders. Visits to the marinas and facilities surrounding Mullica River revealed that the primary reason for the low number of transits at night are the potential hazards of navigating the waterway at night and

during periods of reduced or poor visibility.

Preliminary discussions with habitual users of the waterway revealed that, outside daylight and peak hours during the boating season of 1 April through 30 November, four hours notice for bridge openings would be feasible.

The proposal requires the draws to open on signal, except that the draws need not open unless at least four hours notice is given from 11 p.m. until 7 a.m., from 1 April through 30 November, and at all times from 1 December through 31 March. A sign indicating the operating hours and telephone number for the notice will be prominently displayed on the bridges. The proposal also provides for expeditious openings for public vessels and vessels in distress.

If the proposed regulations are issued, the owner has assured the Coast Guard that the bridges will be manned continuously, except during the periods when advance notice is required.

In conjunction with these proposed regulations, the bridge owner has agreed to install marine radios to facilitate improved communications between the drawtenders and mariners.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation, and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary.

This waterway is used primarily by recreational vessels. Only one facility would be minimally affected by the winter restrictions. The facility works from 7 a.m. to 6 p.m. during the winter months and insisted that openings be provided on signal during this period of time. However, the number of openings that are in fact required by that facility is insignificant. It is the Coast Guard's position that the requirement for four hours advance notice would not impose an unreasonable burden upon that facility.

Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

Bridges.

Proposed Regulations

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations is proposed to be amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.731a added to read as follows:

§ 117.731a Mullica River.

The draws of the Lower Bank and Green Bank bridges, miles 15.0 and 18.0, at Lower Bank and Green Bank, New Jersey, shall open on signal, except that:

(a) The draws need not open unless at least four hours notice is given—

(1) from 11 p.m. to 7 a.m., from 1 April through 30 November and

(2) at all times from 1 December through 31 March.

(b) The draws shall open as soon as possible during the periods when four hours notice is required for vessels in distress and public vessels of the United States, state, or local vessels used for public safety purposes.

Dated: September 10, 1987.

A.D. Breed,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

47 CFR Part 73

[MM Docket No. 87–380; RM–5732]

Radio Broadcasting Services; Thief River Falls, MN

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by Northern Minnesota Associates, proposing the allotment of FM Channel 257A to Thief River Falls, Minnesota, as that community third FM broadcast service. Canadian concurrence is necessary for the allotment of Channel 257A at Thief River Falls. Channel 257A was removed from the Table of Allotments in MM Docket 85–370, 51 FR 27552, August 1, 1986, but is still utilized by Station KSNR(FM), Thief River Falls. Station KSNR(FM) has since filed an acceptable application to change its facility to Channel 262C1.

DATES: Comments must be filed on or before November 19, 1987, and reply comments on or before December 4, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioners, or its counsel or consultant, as followers: Eugene T. Smith, 715 G Street SE., Washington, DC 20003, (Counsel for the petitioner).

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 87–380, adopted August 25, 1987, and

released September 28, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibted in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

47 CFR Part 73

[MM Docket No. 87–382, RM–5904]

Radio Broadcasting Services; Colonial Heights, Petersburg, and Charlottesville, VA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a joint petition by EPVA, Inc., licensee of Station WKHK(FM), Channel 237A, Colonial Heights, Virginia and Chariottesville Broadcasting Corporation, licensee and Station WQMC(FM), Channel 237A, Charlottesville, Virgina, proposing the substitution of Channel 237B1 for Channel 237A at Colonial Heights and modification of the license of Station WKHK(FM) to reflect the higher frequency. In order to accomplish this channel substitution it is necessary to substitute Channel 236A for 237A at Charlottesville, Virginia. The substitution could provide Colonial Heights with its first wide coverage area FM station. We also propose to reallot Channel 237A from Petersburg, Virginia, to reflect is actual usage at Colonial Heights.

DATES: Comments must be filed on or before November 19, 1987, and reply comments on or before December 4, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioners, of their counsel or consultant, as follows:

Alan C. Campbell, Esquire, a. Kimberly Mathews, Esquire, Dow, Lohnes & Albertson, 1255 23rd Street NW., Suite 500, Washington, DC 20037 (Counsels for WPVA, Inc.

Benjamin F.P. Ivins, Esquire, Covington & Burling, 1201 Pennsylvania Ave. NW., P.O. Box 7566, Washington, DC 20044, (Counsel for Charlottesville Broadcasting Corporation).

47 CFR Part 76

[MM Docket No. 84-1296; FCC 87-307]

Cable Television; Implementation of Cable Communications Policy Act of 1984

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The U.S. Court of Appeals for the District of Columbia Circuit decision in *American Civil Liberties Union v. FCC* remanded to the Commission the signal availability standard in the effective competition test for a reasoned explanation of the chosen standard or the development of a new standard. This Further Notice of Proposed Rule Making discusses alternative solutions to the court's concerns with respect to the measures of signal availability, the degree of signal coverage, and the waiver standards.

DATE: Comments due November 4, 1987; replies due November 19, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Judith Herman, Mass Media Bureau, (202) 632-6302.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Further Notice of Proposed Rule Making in MM Docket No. 84-1296, adopted September 17, 1987, and released September 28, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Summary of the Further Notice of Proposed Rule Making

1. The Cable Communications Policy Act of 1984 (Cable Act) requires the Commission to define the circumstances and conditions under which franchising authorities are to be permitted to regulate the rates charged by cable operators for "basic cable service." Section 623 of the Cable Act instructs the Commission to permit local rate regulation in those circumstances where cable systems do not face effective competition. In the *Report and Order* in this proceeding (50 FR 18637 (1985)), the Commission determined that effective competition for a cable system would exist where any three "off-the-air" broadcast signals were available in the cable community. The Commission also ruled that a broadcast signal would be deemed available in either of the following circumstances: (1) The signal places a predicted Grade B contour over any portion of the cable community; or, (2) the signal is "significantly viewed."

2. Upon review, the U.S. Court of Appeals for the District of Columbia Circuit concluded that, for the most part, the rules adopted by the Commission are reasonable and consistent with the Cable Act. The court did, however, find several portions of the *Report and Order* to be arbitrary or inconsistent with the Cable Act and remanded these to the Commission for further action. One of these concerns the effective competition test used in determining where local authorities will be permitted to regulate rates for basic cable service. The court remanded to the Commission for a reasoned explanation of the chosen standard or the development of a new standard the issue of how much of a community had to be covered by a broadcast signal for that signal to be considered available for purposes of meeting the effective competition test. The court found unacceptable the Commission's decision to count every signal that covers any portion of the cable community and also indicated that there are potential difficulties with the significant viewing aspect of the standard. In addition, it noted with concern the substantial barrier the current waiver system may place on franchising authorities.

3. In this Further Notice of Proposed Rule Making (Further Notice) the Commission discusses alternative solutions to the court's concerns with respect to the measures of signal availability, the degree of signal coverage, and the waiver standards. The Commission specifically proposes to use its Grade B contour and significant viewing in the cable community standards as the measures of signal availability; to establish that a cable system faces effective competition if at least 75 percent of the cable community is covered by three or more off-the-air signals; and, to modify the field strength measurement requirements and use other factors, such as cable penetration, in the waiver procedure to decrease the burden placed on both franchising authorities and cable operators.

4. This is a non-restricted notice and comment rule making proceeding. *See* § 1.1231 of the Commission's Rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

5. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, this proceeding proposes to revise the signal availability standard in the effective competition test, in accordance with the requirements of the decision in *ACLU*. The rules proposed herein will increase the number of cable systems that could be subject to rate regulation by franchising authorities, relative to the number of cable systems affected by our existing standard.

6. This proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose new or modified requirements of burdens on the public. Implementation of any new or modified requirements will be subject to approval by the Office of Management and Budget as prescribed by the Act.

7. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before November 4, 1987; and reply comments on or before November 19, 1987. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 27

[Docket 45162 Notice No. 87-19]

Nondiscrimination on the Basis of Handicap in Department of Transportation Financial Assistance Programs

AGENCY: Office of the Secretary, DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Department of Transportation is considering whether it would be advisable to amend its regulation on nondiscrimination on the basis of handicap in DOT-assisted programs, as that regulation affects mass transit services, to require transit operators to provide additional accommodations or services to persons with developmental disabilities, other mental impairments, or visual impairments on their service for the general public. This Department seeks views and information from interested persons on this matter.

DATES: *Comment closing date:* Comments should be received by December 30, 1987. Late-filed comments will be considered to the extent practicable.

ADDRESS: Comments should be sent to the Docket Clerk, Docket No. 45162, Room 4107, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. Commenters wishing the receipt of their comments to be acknowledged should enclose a stamped, self-addressed postcard with their comment. The docket clerk will time and date stamp the card and return it to the commenter.

FOR FURTHER INFORMATION CONTACT: Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, Department of Transportation, 400 Seventh Street SW., Room 10424, Washington, DC 20590. (202) 366-9306 (voice); 202-755-7687 (TDD).

SUPPLEMENTARY INFORMATION: This advance notice of proposed rulemaking (ANPRM) concerns accommodations for persons with developmental disabilities or other mental impairments on the mass transit services for the general public operated by recipients of Federal financial assistance from the Urban Mass Transit Administration (UMTA). The notice also seeks comment on accommodations on mainline mass transit services for persons with impaired vision or hearing. This notice concerns ways of assisting persons with these kinds of disabilities who are otherwise able to use mainline transit services. This notice does not focus on special service systems established to provide transportation for persons who, by reason of a disability, are physically incapable of using the mainline services.

If rulemaking is undertaken as a result of this notice, the rulemaking would involve an amendment to the Department's rule on nondiscrimination on the basis of handicap in federally-assisted programs (49 CFR Part 27). Because the issues involved in this notice pertain to individuals who are physically able to use mainline transit systems, the Department does not anticipate that the costs of complying with new regulatory requirements resulting from this section would be eligible expenses in the calculation of the limit on required expenditures under § 27.99 of that rule. Eligible expenses for purposes of § 27.99 are intended to be those specifically incurred for service to persons who, by reason of handicap, are physically unable to use mainline transit systems.

It is likely that there are a number of persons with developmental disabilities or other mental impairments who (1) are not, because of a disability, physically incapable of using mainline mass transit services; (2) function at levels sufficient to make independent travel possible; and (3) may need some accommodations or assistance to make independent travel on mainline transit systems feasible on a regular basis. In the Regulatory Impact Analysis for the Department's May 23, 1986, final rule on mass transit services for persons with disabilities, the Department estimated that there could be up to four million people nationwide in this category. The Department is interested in learning from commenters if there are more precise estimates of this population available.

At the present time, 49 CFR Part 27 does not include any specific provision for special accommodations to assist persons with developmental disabilities or other mental impairments in using mainline transit services. The Department and UMTA have never interpreted any of their regulations as requiring such accommodations. Consequently, it is the Department's view that, in order to impose such requirements, it would be necessary to amend its regulations. This notice seeks comment on whether such an amendment is appropriate and, if so, what it should provide.

There are, in the Department's regulations, some provisions concerning persons with vision and hearing impairments. For example, 49 CFR 27.87(b)(4) requires recipients to make information about routes and schedules available in a form that such persons can use. The Department has also noted that, in some circumstances, the absence of accommodations for blind persons on the regular bus system (e.g., calling out stops on a regular basis), could make blind persons eligible for special service under 49 CFR 27.95(b)(1). However, there are no explicit requirements for special accommodations for persons with vision impairments on mainline transit vehicles.

The first area in which special accommodations might be made is the provision of information to riders. Blind riders, as well as persons with developmental disabilities or other mental impairments whose cognitive ability to recognize stops is limited, may need a reliable, regular system for announcing upcoming stops in order to make regular, independent use of mainline transit service feasible.

For example, often, two or three buses will stop at the same time at the same bus stop. Persons with these disabilities may need assistance in recognizing the proper bus to enter. Announcements, or some other means of letting passengers who, as the result of a disability, cannot see or read the route signs on the bus, may be necessary in order to allow such persons to get on the right bus consistently.

The Department seeks comment on the merits of a requirement for accommodations of this kind. Are accommodations of this sort really needed, or are persons with disabilities of these kinds able (with or without special training) to use regular transit services in the absence of the accommodations? Would announcements of this kind be effective in assisting persons with visual or mental impairments to use regular mainline transit systems? What modifications to existing vehicles and practices would be necessary to make these accommodations? What differences between different types of transit systems (e.g., bus vs. commuter rail) are relevant for this purpose? What are the costs and benefits of various approaches likely to be?

Another area of concern is training. First, it is possible that additional training for vehicle operators and other public contact personnel could be useful in helping the employees recognize the needs of people with visual and mental disabilities and respond appropriately to those needs. Second, it is possible that training for disabled passengers would enable them to use the system more easily.

In both cases, what should the content of the training be? How effective would it be in helping drivers and other public

VOL
52
ISS
190
OC
1
1987
UMI

contact personnel to assist disabled passengers or helping disabled passengers cope with the system? What benefits could be expected? Who should be trained, for how long, and how often? Are there existing models for such training on which the Department could build in establishing a training requirement? Who should provide and pay for the training and how much would it cost? Should there be Federal standards for such training? Would a brochure or pamphlet designed to assist persons with mental disabilities in using the system be a useful device, either in addition to or in place of training?

With respect to persons with vision impairments, developmental disabilities, or other mental impairments, it is possible that some alteration in the signage or graphics on vehicles or bus and rail stops might be useful in facilitating ridership. The Department has very little information on this point. Are there any studies that indicate what sorts of changes to signage or graphics, if any, would facilitate the use of transportation systems by such persons? What incremental benefits in the use of mainline transportation systems would enhanced signage or graphics have for persons with developmental or other mental disabilities? Are such changes feasible on the scale of an urban mass transit system? What are the likely costs of making them?

The Department is aware that there may be other accommodations which would facilitate the use of mainline transit systems by persons with developmental disabilities, other mental disabilities, or vision impairments. The Department seeks comment on what such other accommodations are, as well as on their necessity, effectiveness, feasibility, benefits and costs. The Department also seeks comment on what accommodations might be needed for persons with other kinds of disabilities (e.g., hearing impairments) who are able to use mainline transit services.

The Department has concluded, tentatively, that a proposed rule resulting from this ANPRM would not be a major rule under Executive Order 12291 or a significant rule under the Department of Transportation's Regulatory Policies and Procedures. Based on comments received, the Department will determine whether the economic impacts of such a proposal would be sufficient to warrant the preparation of a regulatory evaluation or regulatory flexibility analysis, should a notice of proposed rulemaking be issued.

Notices

Federal Register
Vol. 52, No. 190
Thursday, October 1, 1987

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Regulation; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Regulation of the Administrative Conference of the United States, to be held at 2:00 p.m. on Tuesday, October 13, 1987, at the office of Steptoe and Johnson, 4th floor conference room, 1330 Connecticut Avenue, NW., Washington, DC.

The Committee will meet to discuss the report by Professor Eleanor Kinney, "National Coverage Policy Under the Medicare Program: Problems and Proposals for Change."

For further information concerning this meeting, contact Sara Gordon, Office of the Chairman, Adminstrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, DC. (Telephone: 202–254–7020)

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify Ms. Gordon at least one day in advance. The Committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the Committee before, during or after the meeting. Minutes of the meeting will be available on request.

Jeffrey S. Lubbers,
Research Director.
September 29, 1987.

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Meat Import Limitations; Fourth Quarterly Estimate

Public Law 88–482, enacted August 22, 1964, as amended by P.L. 96–177 (hereinafter referred to as the "Act"), provides for limiting the quantity of fresh, chilled, or frozen meat of cattle, sheep except lambs, and goats (TSUS 106.10, 106.22, and 106.25), and certain prepared or preserved beef and veal products (TSUS 107.55, 107.61, and 107.62) which may be imported into the United States in any calendar year. Such limitations are to be imposed when the Secretary of Agriculture estimates that imports of articles provided for in TSUS 106.10, 106.22, 106.25, 107.55 and 107.62 (hereinafter referred to as "meat articles"), in the absence of limitations under the Act during such calendar year, would equal or exceed 110 percent of the estimated aggregate quantity of meat articles prescribed for calendar year 1987 by subsection 2(3) as adjusted under subsection 2(d) of the Act.

As published on January 5, 1987 (52 FR 311), the estimated aggregate quantity of meat articles prescribed by subsection 2(c), as adjusted by subsection 2(d) of the Act, for calendar year 1987 is 1,309 million pounds.

In accordance with the requirements of the Act, I have determined that the fourth quarterly estimate for 1987 of the aggregate quantity of meat articles which would, in the absence of limitations under the Act, be imported during calendar year 1987 is 1,439 million pounds.

Done at Washington, DC, this 28th day of September, 1987.

Richard E. Lyng,
Secretary of Agriculture.

[FR Doc. 87–22697 Filed 9–30–87; 8:45 am]
BILLING CODE 3410–10–M

Commodity Credit Corporation

Milk Price Support Program Through December 31, 1987

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of milk price support level and Commodity Credit Corporation purchase prices.

SUMMARY: This notice announces that the support price for milk containing 3.67 percent milkfat shall be $11.10 per hundredweight (cwt.) for the period October 1, 1987, through December 31, 1987. The prices at which butter, cheese and nonfat dry milk will be purchased by the Commodity Credit Corporation (CCC) in order to support the price of milk at that level are also set forth in this notice.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Indulis Kancitis, Dairy Division, ASCS–USDA, 5747 South Building, P.O. Box 2415, Washington, DC 20013 (202)–447–3385.

The Final Regulatory Impact Analysis regarding the actions of this Notice of Determination will be available from Charles N. Shaw, Dairy/Sweeteners Group, ASCS–USDA, P.O. Box 2415, Washington, DC 20013: (202)–447–7601.

SUPPLEMENTARY INFORMATION: This Notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "major" since the provisions of this notice will have an effect on the economy exceeding $100 million.

The title and number of the Federal Assistance Program to which this notice applies are: Title—Commodity Loans and Purchases; Number—10.051 as found in the Catalog of Federal Domestic Assistance.

The Regulatory Flexibility Act is not applicable to this notice since CCC is not required to publish a notice of proposed rulemaking with respect to level of price support and prices paid to producers of milk. Pursuant to sections 102 and 1017 of the Food Security Act of 1985 (Pub. L. 99–198) (the "1985 Act") the provisions of section 201(d) of the Agricultural Act of 1949, as amended (the "1949 Act"), may be implemented without regard to the provisions requiring notice and other public procedures for public participation in rulemaking as set forth in 5 U.S.C. 553 or in any directive of the Secretary of Agriculture.

It has been determined by an Environmental Evaluation that the determination set forth in this notice is not expected to have any significant impact on the quality of the human environment. In addition, this action will

not adversely affect environmental factors such as water quality or air quality. Accordingly, neither an Environmental Assessment nor an Environmental Impact Statement is required.

This program/activity is not subject to the provisions of Executive Order No. 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

Section 201(d) of the 1949 Act provides that, effective for the period beginning October 1, 1987, and ending December 31, 1990, the price of milk shall be supported at a rate equal to $11.10 per cwt. for milk containing 3.67 per centum milkfat. This is a reduction in the support price for milk which has been $11.35 per cwt. since January 1, 1987.

Section 201(d) of the 1949 Act also provides for an increase or decrease of 50 cents per cwt. in the price support level for milk from that in effect on January 1, 1988, 1989, and 1990, on the basis of the Secretary of Agriculture's estimates of net surplus purchases of dairy products under the milk price support program for the respective calendar years 1988, 1989, and 1990.

It has been determined that the purchase by CCC of butter, cheese and nonfat dry milk produced on or after October 1, 1987, at the prices set forth in this notice will support the price of milk, during the period October 1, 1987, through December 31, 1987, at a rate equivalent to $11.10 per cwt. for milk containing 3.67 percent milkfat.

Determinations

Accordingly:

(1) The level of price support for the period October 1, 1987, through December 31, 1987, shall be $11.10 per cwt. for milk containing 3.67 percent milkfat.

(2) The purchase of butter, cheese and nonfat dry milk produced on or after October 1, 1987, at the prices set forth below will support the price of milk at a rate equivalent to $11.10 per cwt. for milk containing 3.67 per centum milkfat. Therefore, effective October 1, 1987, through December 31, 1987, Commodity Credit Corporation (CCC) purchase prices for butter, cheese and nonfat dry milk shall be as follows:

[Dollars per pound]

	Products produced before October 1, 1987, and Graded and offered by October 15, 1987	Products produced on or after October 1, 1987, or not graded and offered by October 15, 1987
Butter, 64. & 68-lb. blocks (U.S. Grade A or higher)	1.3775	1.3575
Nonfat dry milk (spray), 50-lb. bags (U.S. Extra Grade, but not more than 3.5 percent moisture):		
Nonfortified	.7875	.7675
Fortified (Vitamins A and D)	.7975	.7775
Cheddar cheese, standard moisture basis:[1]		
40- and 60-pound blocks, U.S. Grade A or higher (No vat shall contain more than 38.5 percent moisture)	1.2250	1.2000
500 lb. in fiber barrels, U.S. Extra Grade (No vat shall contain more than 36.5 percent moisture)	1.1825	1.1575

[1] The cheese price will be adjusted for moisture content, except that the price adjustment for cheese with a moisture content of less than 34 percent will not exceed that for cheese with a moisture content of 34 percent.

(3) Further terms and conditions for CCC price-support purchases of butter, cheese, and nonfat dry milk will be set forth in CCC purchase announcements with respect to such purchases.

Authority: Sec. 201(d) of the Agricultural Act of 1949, as amended, 63 State. 1042, as amended (7 U.S.C. 1446(d)); and secs. 4 and 5 of the Commodity Credit Corporation Charter Act, as amended, 62 Stat. 1070, as amended, 62 Stat. 1072 (15 U.S.C. 714b and 714c).

Signed at Washington, DC, on September 15, 1987.

Peter C. Myers,

Acting Secretary of Agriculture.

[FR Doc. 87-22643 Filed 9-30-87; 8:45 am]

BILLING CODE 3410-05-M

Office of Energy

Change in Date of Meeting; USDA National Panel on Cost Effectiveness of Fuel Ethanol Production

AGENCY: Office of Energy, USDA.

ACTION: Notice of Change in meeting date.

SUMMARY: In accordance with Federal Advisory Committee Act, Pub. L. 92-463, as amended, the Office of Energy, USDA announces a change in the date of a forthcoming meeting of the National Panel on Cost Effectiveness of Fuel Ethanol Production.

The meeting scheduled for October 14, 1987, as previously announced in the **Register Register** (52 FR 32821) has been cancelled. A new date for the meeting has been scheduled

DATE AND TIME: October 22, 1987, 8:30 a.m. to 4:30 p.m.

ADDRESS: Main Conference Room, 4300 King Street, Alexandria, Va. 22302.

FOR FURTHER INFORMATION CONTACT: Earle E. Gavett, Office of Energy, USDA, Washington, DC 20250-2600, 202-447-2634.

SUPPLEMENTARY INFORMATION: The USDA National Panel on Cost Effectiveness of Fuel Ethanol Production was established under section 13 of the Farm Disaster Assistance Act of 1984 (Pub. L. 100-45) to conduct a study of the cost effectiveness of fuel ethanol production for Congress and the Secretary of Agriculture. The Panel is comprised of seven members representing various agricultural, fuel ethanol and government interests.

The meeting will be open to the public

Agenda: October 22, 1987.

8:30 a.m.—Review and approve Final Report.

4:30 p.m.—Adjourn.

Earle E. Gavett,

Director, Office of Energy.

AGENCY: Federal Grain Inspection Service (Service), USDA.

ACTION: Notice.

SUMMARY: This notice announces the designation renewal of the Hastings Grain Inspection, Inc. (Hastings) and New York State Department of Agriculture and Markets (New York), as official agencies responsible for providing official services under the U.S. Grain Standards Act, as Amended (Act).

EFFECTIVE DATE: November 1, 1987.

ADDRESS: James R. Conrad, Chief, Review Branch, Compliance Division, FGIS, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090–6454.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

The Service announced that Hastings' and New York's designations terminate on October 31, 1987, and requested applications for official agency designation to provide official services within specified geographic areas in the May 1, 1987, **Federal Register** (52 FR 15967). Applications were to be postmarked by June 1, 1987. Hastings and New York were the only applicants for designation in their geographic area and each applied for designation renewal in the area currently assigned to that agency.

The Service announced the applicant names in the July 1, 1987, **Federal Register** (52 FR 24489) and requested comments on the designation renewal of Hastings and New York. Comments were to be postmarked by August 17, 1987; none were received.

The Service evaluated all available information regarding the designation criteria in section 7(f)(1)(A) of the Act; and, in accordance with section 7(f)(1)(B), determined that Hastings and New York are able to provide official services in the geographic area for which the Service is renewing their designations. Effective November 1, 1987, and terminating October 31, 1990, Hastings and New York will provide official inspection service in their entire specified geographic area, previously described in the May 1 **Federal Register**.

A specified service point, for the purpose of this notice, is a city, town, or other location specified by an agency for the performance of official inspection or Class X or Class Y weighing services and where the agency and one or more of its inspectors or weighers is located. In addition to the specified service points within the assigned geographic area, an agency will provide official services not requiring an inspector or weigher to all locations within its geographic area.

Interested persons may receive a listing of an agency's specified service points by contacting either the Review Branch, Compliance Division, at the address listed above or the agencies at the following addresses: Hastings Grain Inspection, Inc., 306 East Park Street, Hastings, NE 68901, and New York State Department of Agriculture and Markets, State Campus, Building 8, Albany, NY 12235.

(Pub. L. 94–582, 90 Stat. 2867, as amended, 7 U.S.C. 71 et seq.)

Date: September 16, 1987.

J.T. Abshier,

Director, Compliance Division.

BILLING CODE 3410–EN–M

Request for Comments on Designation Applicants in the Geographic Area Currently Assigned to the States of California and Washington

AGENCY: Federal Grain Inspection Service (Service), USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for official agency designation in the geographic area currently assigned to the California Department of Food and Agriculture (California) and Washington Department of Agriculture (Washington).

DATE: Comments to be postmarked on or before November 16, 1987.

ADDRESS: Comments must be submitted in writing to Lewis Lebakken, Jr., Information Resources Staff, FGIS, USDA, Room 1661 South Building, P.O. Box 96454, Washington, DC 20090–6454.

Telemail users may respond to [IRSTAFF/FGIS/USDA] telemail.

Telex users may respond as follows:

To: Lewis Lebakken
TLX: 7607351, ANS:FGIS UC.

All comments received will be made available for public inspection at the above address located at 1400 Independence Avenue, SW., during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382–1738.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

The Service requested applications for official agency designation to provide official services within specified geographic areas in the August 3, 1987, **Federal Register** (52 FR 28738). Applications were to be postmarked by September 2, 1987. California and Washington were the only applicants for designation in their geographic area and

VOL 52 ISS 190 OCT 1 1987 UMI

each applied for designation in their geographic area and each applied for designation renewal in the area currently assigned to that agency.

This notice provides interested persons the opportunity to present their comments concerning the designation of the applicants. Commenters are encouraged to submit reasons for support or objection to these designation actions and include pertinent data to support their views and comments. All comments must be submitted to the Information Resources Staff, Resources Management Division, at the above address.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the **Federal Register**, and the applicants will be informed of the decision in writing.

(Pub. L. 94–582, 90 Stat. 2867, as amended, 7 U.S.C. 71 *et seq.*)

Date: September 16, 1987.

BILLING CODE 3410–EN–M

Request for Designation Applicants To Provide Official Services in the Geographic Area Currently Assigned to the Gibson City (IL) and Indianapolis (IN) Agencies and State of Wyoming

AGENCY: Federal Grain Inspection Service (Service), USDA.

ACTION: Notice.

SUMMARY: Pursuant to the provisions of the U.S. Grain Standards Act, as Amended (Act), official agency designations shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act. This notice announces that the designation of three agencies will terminate, in accordance with the Act, and requests applications from parties interested in being designated as the official agency to provide official services in the geographic area currently assigned to the specified agencies. The official agencies are the Gibson City Grain Inspection Department (Gibson City), Indianapolis Grain Inspection & Weighing Service, Inc. (Indianapolis), and Wyoming Department of Agriculture (Wyoming).

DATE: Applications to be postmarked on or before November 2, 1987.

ADDRESS: Applications must be submitted to James R. Conrad, Chief, Review Branch, Compliance Division, FCIS, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090–6454. All applications received will be made available for public inspection at this address located at 1400 Independence Avenue, SW., during regular business hours.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

Section 7(f)(1) of the Act specifies that the Administrator of the Service is authorized, upon application by any qualified agency or person, to designate such agency or person to provide official services after a determination is made that the applicant is better able than any other applicant to provide official services in an assigned geographic area.

Gibson City, located at 207 East 8th Street, P.O. Box 20, Gibson City, IL 60936; Indianapolis, located at 4804 East Michigan Street, Indianapolis, IN 46201; and Wyoming, located at 2219 Carey Avenue, Cheyenne, WY 82001–0010, were each designated under the Act as an official agency to provide inspection functions on April 1, 1985.

Each official agency's designation terminates on March 31, 1988. Section 7(g)(1) of the Act states that designations of official agencies shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act.

The geographic area presently assigned to Gibson City, in the State of Illinois, pursuant to section 7(f)(2) of the Act, which may be assigned to the applicant selected for designation is as follows:

Bounded on the North by the northern Livingston County line from the ICG Railroad line;

Bounded on the East by the Livingston County line; the Ford County line; the southern Ford County line west to Interstate 57; Interstate 57 south to State Route 136;

Bounded on the South by State Route 136 west to a point approximately 10 miles west of the eastern McLean County line; and

Bounded on the West from this point through Arrowsmith to Pontiac along a straight line running north and south which intersects with the ICG Railroad line northeast to the northern Livingston County line.

The following location, outside of the foregoing contiguous geographic area is presently assigned to Gibson City and is part of this geographic area assignment: Farm Service, Arrowsmith, McLean County.

An exception to the described geographic area is the following location situated inside Gibson City's area which has been and will continue to be serviced by Bloomington Grain Inspection Department: Bunge Corporation, Pontiac, Livingston County.

The geographic area presently assigned to Indianapolis, in the State of Indiana, pursuant to section 7(f)(2) of the Act, which may be assigned to the applicant selected for designation is as follows:

Bartholomew; Brown; Hamilton, south of State Route 32; Hancock; Hendricks; Johnson; Madison, west of State Route 13 and south of State Route 132; Marion; Monroe; Morgan; and Shelby Counties.

The geographic area presently assigned to Wyoming, pursuant to section 7(f)(2) of the Act, and which is the area that may be assigned to the applicant selected for designation, is the entire State of Wyoming, except the geographic area assigned to Denver Grain Inspection, which is as follows: Goshen County, Platte County, and these locations in Laramie County: Albin Elevator, Albin; Farmers Coop, Burns; Carpenter Elevator, Carpenter; Pillsbury Company, Egbert; and Pine Bluffs Feed and Grain, Pine Bluffs.

Interested parties, including Gibson City, Indianapolis, and Wyoming, are hereby given opportunity to apply for official agency designation to provide the official services in the geographic area, as specified above, under the provisions of section 7(f) of the Act and § 800.196(d) of the regulations issued thereunder. Designation in each specified geographic area is for the period beginning April 1, 1988, and ending March 31, 1991. Parties wishing to apply for designation should contact the Review Branch, Compliance Division, at the address listed above for forms and information.

Applications and other available information will be considered in determining which applicant will be designated to provide official services in a geographic area.

(Pub. L. 94–582, 90 Stat. 2867, as amended, 7 U.S.C. 71 *et seq.*)

Dated: September 16, 1987.

BILLING CODE 3410–EN–M

Request for Comments on Designation Applicants in the Kankakee, IL, Geographic Area

AGENCY: Federal Grain Inspection Service (Service), USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for official agency designation in the Kankakee, Illinois, geographic area.

DATE: Comments to be postmarked on or before November 16, 1987.

ADDRESS: Comments must be submitted in writing to Lewis Lebakken, Jr., Information Resources Staff, FGIS, USDA, Room 1661 South Building, P.O. Box 96454, Washington, DC 20090–6454.

Telemail users may respond to [IRSTAFF/FGIS/USDA] telemail.

Telex users may respond as follows:

To: Lewis Lebakken
TLX:7607351, ANS:FGIS UC.

All comments received will be made available for public inspection at the above address located at 1400 Independence Avenue, SW., during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382–1738.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

The Service announced the cancellation of designation of Kankakee Grain Inspection Bureau, Inc., effective January 31, 1988, and requested applications for official agency designation to provide official services within a specified geographic area in the August 3, 1987, **Federal Register** (52 FR 28739). Applications were to be postmarked by September 2, 1987. There were two applicants for designation in the Kankakee, Illinois, geographic area. Michael J. Fegan, Kankakee, Illinois, proposing to establish a new corporation with the name Kankakee Grain Inspection Bureau, Inc., applied for designation in the entire area available for assignment. Mark A. Beaupre, St. Anne, Illinois, proposing to do business as Illinois Valley Inspection, applied for designation in the entire area available for assignment.

This notice provides interested persons the opportunity to present their comments concerning the designation of the applicants. Commenters are encouraged to submit reasons for support or objection to this designation action and include pertinent data to support their views and comments. All comments must be submitted to the Information Resources Staff, Resources Management Division, at the above address.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the **Federal Register**, and the applicants will be informed of the decision in writing.

(Pub. L. 94–582, 90 Stat. 2867, as amended 7 U.S.C. 71 *et seq.*)

Date: September 16, 1987.

BILLING CODE 3410–EN–M

Food and Nutrition Service

Food Stamp Program; Thrifty Food Plan

AGENCY: Food and Nutrition Service, USDA.

ACTION: General notice.

SUMMARY: The Department of Agriculture is updating the Thrifty Food Plan which determines the maximum amount of food stamps which participating households receive in the 48 States and DC. The Department is also updating the standard deduction and the maximum amounts for the excess shelter deduction available to certain households. These adjustments, required by law, take into account changes in the cost of living.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Thomas O'Connor, Supervisor, State Management Section, Administration and Design Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302, (703) 756–3385. Copies of the Regulatory Impact Analysis, which is summarized in this preamble, are also available from Mr. O'Connor.

SUPPLEMENTARY INFORMATION:

Publication

State agencies must implement this action on October 1, 1987, and need advance notice of the new amounts to meet the implementation deadline. Based on regulations published at 47 FR 46485–46487 (October 19, 1982) annual statutory adjustments to the Thrifty Food Plan and deductions are issued by General Notices published in the **Federal Register** and not through rulemaking proceedings.

Classification

Executive Order 12291

This action has been reviewed under Executive Order 12291 and Secretary's Memorandum 1512–1. The Department considers it a major action because it will increase the Food Stamp Program's cost by more than $100 million. It will not result in a major increase in costs or prices except to the Federal Government, nor will it affect competition, productivity, employment, investment, or innovation.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the Final rule related Notices(s) to 7 CFR Part 3015, Subpart V (Cite 48 FR 29115, June 24, 1983; or 48 FR 54317, December 1, 1983, as appropriate, and any subsequent notices that may apply), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

Anna Kondratas, Administrator of the Food and Nutrition Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. The action will increase the amount of money spent on food through food stamps. However, this money will be distributed among the nation's food vendors, so the effect on any one vendor will not be significant.

Paperwork Reduction Act

This action does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB).

Regulatory Impact Analysis

Need for Action

This action is required by sections 3(o) and 5(e) of the Food Stamp Act of 1977, as amended. Section 3(o) requires that the October 1, 1987 change in food stamp allotments be based upon the June 1987 cost of the Thrifty Food Plan for a family of four persons consisting of a man and woman ages 20–50 and children 6–8 and 9–11. Adjustments are made to take into account household size, economies of scale, and a requirement to round the final results down to the nearest dollar increments. Section 5(e), as amended by Pub. L. 100–

77, requires that the standard deduction be adjusted on October 1, 1987 to the nearest lower dollar increments to reflect certain changes for the twelve months ending June 30, 1987.

Section 5(e), as amended by Pub. L. 100–77, also requires that the maximum amounts for the maximum excess shelter expense deduction be increased to $164 for households in the 48 States and DC, whose certification periods begin on or after October 1, 1987. Households whose certification periods begin before October 1, 1987 will have their shelter deductions adjusted on October 1, 1987 to the nearest lower dollar increments to reflect certain changes for the twelve months ending June 30, 1987. (This reflects the statutory provisions existing prior to the amendments made by Pub. L. 100–77.) When these households are recertified on or after October 1, 1987, they will have their maximum excess shelter expense deduction increased to $164 in the 48 States and DC. There would be comparable increases for households in Alaska, Hawaii, Guam, and the Virgin Islands.

Benefits

This action increases maximum food stamp allotments and deductions based on the rising cost of living.

Costs

It is estimated that this action will increase the cost of the Food Stamp Program by approximately $1,210 million in Fiscal Year 1988.

Background

Thrift Food Plan (TFP)

The TFP is a plan for the consumption of foods of different types (food groups) that families might use to provide nutritious meals and snacks for family members. The plan suggests amounts of food for men, women, and children of different ages, and it meets all dietary standards. The cost of the TFP is adjusted annually to reflect changes in the costs of the food groups.

The TFP also constitutes the basis for allotments for food stamp households. As such, the cost of the TFP is the maximum benefit level payable to a household of a particular size. The maximum benefit is paid to households which have no net income. For households which have some income, their allotment is determined by reducing the TFP for their household size by 30 percent of the household's net income.

The cost of the TFP is adjusted periodically to reflect changes in cost levels. Section 3(o) of the Food Stamp Act of 1977, as amended, provides that the next adjustment will take place on October 1, 1987, based upon June 1987 TFP costs for a family of four persons consisting of a man and woman ages 20–50 and children 6–8 and 9–11. In June 1987, this TFP value was $290.40 in the 48 States and DC. June 1987 TFPs and allotments for Alaska, Hawaii, Guam, and the Virgin Islands will be published in a separate Notice in the **Federal Register**.

To obtain the maximum food stamp benefit for each household size, the TFP costs for the four-person household were divided by four, multiplied by the appropriate household size and economy of scale factor, and the final result was rounded down to the nearest dollar.

The following table shows the new allotments for the 48 States and DC.

THRIFTY FOOD PLAN AMOUNTS [1]—OCTOBER 1987, AS ADJUSTED

Household size	48 States and District of Columbia
1	$87
2	159
3	228
4	290
5	344
6	413
7	457
8	522
Each additional member	+65

[1] Adjusted to reflect the cost of food in June, adjustments for each household size, economies of scale, and rounding.

Deductions

Food stamp benefits are calculated on the basis of an individual household's net income. Deductions serve to lower household net income. The standard deduction is available to all households. The excess shelter expense deduction is available to those with extremely high shelter costs. There is a maximum amount for the excess shelter deduction for households with no elderly members.

Adjustment of the Standard Deduction

Section 5(e) of the Food Stamp Act of 1977, as amended, provides that in computing household income, households shall be allowed a standard deduction. The Act also requires that these deductions be adjusted periodically. These deductions were last adjusted effective October 1, 1986. Pub. L. 100–77 provides that the adjustment in the level of the standard deduction shall take into account changes in the Consumer Price Index for All Urban Consumers (CPI-U) published by the Bureau of Labor Statistics (BLS) for items other than food. The adjustments are, by law, rounded to the nearest lower dollar. The following table shows the deductions resulting from the last adjustment, the unrounded result of updating this adjustment, and the new deduction amounts that go into effect on October 1, 1987.

STANDARD DEDUCTIONS FOR ALL HOUSEHOLDS

	Previous deductions (Effective 10–1–86)	New unrounded Nos. (10–1–87)	Deductions effective 10/1/87
48 States and DC	$99	$102.62	$102
Alaska	169	175.04	175
Hawaii	140	144.88	144
Guam	198	205.22	205
Virgin Islands	87	90.53	90

Adjustment of the Shelter Deduction

Section 5(e) of the Food Stamp Act of 1977, as amended, also provides that in computing household income, households shall be allowed a deduction for certain excess shelter expenses. There is a maximum amount for the excess shelter deduction, unless the household has an elderly or disabled member, in which case there is no maximum. Pub. L. 100–77 provides new amounts for the maximum excess shelter expense deductions. According to that statute, these amounts will be phased-in as households' certification periods become effective on or after October 1, 1987. These amounts are $164 a month in the 48 States and DC, $285 in Alaska, $234 in Hawaii, $199 in Guam, and $121 in the Virgin Islands. The statutory provisions existing prior to the amendments made by Pub. L. 100–77 would remain in effect for households whose certification periods begin before October 1, 1987, until the household is recertified. Under that prior existing statutory provision, the maximum amount for the excess shelter expense deduction is adjusted annually each October 1, based on changes in the shelter (exclusive of homeowners' costs and maintenance and repair component of shelter costs), fuel and utilities components of housing costs in the CPI-U published by BLS. Under Pub. L. 100–77, the maximum amount for the excess shelter expense deduction will be adjusted annually beginning October 1, 1988, based on changes in the shelter, fuel, and utilities components of the CPI-U.

The following table shows the shelter deductions resulting from the last adjustment, the shelter deductions for participating households whose certification periods begin before October 1, 1987, and the shelter deductions for new applicants and recertifications on or after October 1, 1987.

SHELTER DEDUCTIONS FOR HOUSEHOLDS WITHOUT ELDERLY OR DISABLED MEMBERS

	Shelter deductions (Effective 10/1/86)	Shelter deductions for households whose certification periods begin before 10/1/87	Shelter deductions for households whose certification periods begin on or after 10/1/87
48 States and DC	$149	152	164
Alaska	257	261	285
Hawaii	213	217	234
Guam	182	185	199
Virgin Islands	111	112	121

Dependent Care Deduction

Section 5(e) of the Food Stamp Act of 1977, as amended, also provides that in computing household income, households shall be allowed a deduction for certain dependent care expenses. The maximum amount for the dependent care deduction is $160 a month. This amount is not adjusted to take into account changes in the cost of living so it will not be affected by this action.

(91 Stat. 958 (7 U.S.C. 2011, et seq.))

Dated: September 25, 1987.

Suzanne S. Harris,

Deputy Assistant Secretary Food and Consumer Services.

BILLING CODE 3410–30–M

Forest Service

Suitability Studies for Twelve Rivers Being Considered for National Wild and Scenic River Status

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an environmental impact statement (EIS) for a proposal to study the suitability or non-suitability of twelve rivers on the Ozark National Forest in Arkansas for inclusion in the National Wild and Scenic Rivers System. The agency invites written comments and suggestions on the suitability of these twelve rivers. In addition, the agency gives notice of the environmental analysis and decisionmaking process that will occur on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATE: Comments concerning the suitability of these twelve rivers must be received by October 30, 1987.

ADDRESS: Submit written comments and suggestions concerning the suitability of these rivers to Lynn C. Neff, Forest Supervisor, or Jack Fortin, Forest Planner, Ozark-St. Francis National Forest, P.O. Box 1008, Russellville, Arkansas 72801.

FOR FURTHER INFORMATION CONTACT: Direct questions about the proposed action and environmental impact statement to Jack Fortin, Forest Planner, Ozark-St. Francis National Forest, P.O. Box 1008, Russellville, Arkansas 72801, phone 501–968–2354.

SUPPLEMENTARY INFORMATION: The Ozark-St. Francis National Forests Land and Resource Management Plan, with amendments, determined the eligibility of segments of these 12 rivers, which were initially identified in the 1982 Nationwide Rivers Inventory, and recommended that suitability studies be conducted later. The planned EIS is in response to this direction.

The suitability study and EIS will consider the following rivers or river segments:

	Miles
Buffalo River (head to Forest boundary)	15.8
East Fork of Little Buffalo River (head to Forest boundary)	6.7
Illinois Bayou (Bayou Bluff to Forest boundary)	4.4
Illinois Bayou, North Fork (entire length)	22.6
Illinois Bayou, East Fork (entire length)	14.9
Illinois Bayou, Middle Fork (entire length)	21.4
Mulberry River (head to Forest boundary)	56.0
Big Piney Creek (head to Forest boundary)	45.2

Richland Creek (head to Forest boundary)	22.7
Falling Water Creek (entire length)	10.6
North Sylamore Creek (entire length)	20.4
Cole Fork Branch (entire length)	5.5

The area of consideration for each stream is a minimum of ¼ mile from each stream bank for the entire length of the stream within the Ozark National Forest boundary.

Donald B. Hurlbut, Forester, will be the interdisciplinary team leader.

Public participation will be especially important at several points during the analysis. The first point is the scoping process (40 CFR 1501.7). The Forest Service will be seeking information, comments, and assistance from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preparation of the draft environmental impact statement.

Informal public meetings will be held at Russellville and Little Rock, Arkansas, in the early stages of the analysis to inform the public of the analysis process and to provide for public participation and involvement. Additional meetings may be held in other locations. Federal, State, and local agencies, user groups, and other organizations who may be interested in the study will be invited to participate in scoping the issues that should be considered.

Richard E. Lyng, Secretary of Agriculture, is the responsible official.

The draft environmental impact statement is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by September 1988. At that time the EPA will publish a notice of availability of the draft EIS in the **Federal Register.**

The comment period on this draft environmental impact statement will be 90 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register.** It is very important that those interested in the suitability of these twelve rivers for inclusion in the National Wild and Scenic River System participate at this time. To be most helpful, comments on the draft EIS should be as specific as possible and may address the adequacy of the statement and the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions, *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978), and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement.

After the comment period ends on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final Environmental Impact Statement. The final environmental impact statement is scheduled to be completed by June 1989. The Secretary will consider the comments, responses, environmental consequences discussed in the EIS, and applicable laws, regulations, and policies in making his recommendation to the President regarding the suitability of these rivers for inclusion in the National Wild and Scenic Rivers System. The decision on inclusion of a river in the National Wild and Scenic Rivers System rests with the United States Congress.

Dated: September 23, 1987.

George M. Leonard,

Associate Chief.

BILLING CODE 3410-11-M

Soil Conservation Service

Finding of No Significant Impact; Dry Creek Watershed, AL

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Envrionmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Dry Creek Watershed, Marengo County, Alabama.

FOR FURTHER INFORMATION CONTACT: Ernest V. Todd, State Conservationist, Soil Conservation Service, 665 Opelika Road, Auburn, Alabama, 36830, telephone (205) 821-8070.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Ernest V. Todd, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for reducing excessive erosion (45 tons per acre annually) on sloping cropland and reducing flooding on 3,840 acres of agricultural land. The planned works of improvement include land use conversion on 690 acres of marginal cropland, accelerated conservation land treatment on 1,580 acres of cropland, and installation of 8 flood-water retarding structures.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Ernest V. Todd.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Dated: September 24, 1987.

Ernest V. Todd,

State Conservationist.

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 17-87]

Foreign-Trade Zone 50-Long Beach, California Request for Manufacturing for Daihatsu Off-Road Vehicle Assembly

The Port of Long Beach, grantee of FTZ 50, Long Beach, California, has requested manufacturing approval from the Foreign-Trade Zones Board to allow the use of zone procedures within FTZ 50 by Daihatsu America, Inc., for the assembly of off-road passenger vehicles. The request was filed on September 23, 1987.

Daihatsu is planning to assemble a small (1500 lbs., 30 horsepower) off-road "people-mover" passenger vehicle using a foreign-produced, motorized chassis which accounts for some 62 percent of the total material value of the vehicle. All remaining parts and material required to produce the cab and body, and to assemble the vehicle will be purchased domestically, such as fiberglass body panels, body electrical system, canopy, frame, soft top, windshield, seats and trim.

Zone procedures would allow Daihatsu to take advantage of the same duty rate available to importers of finished passenger vehicles. The duty rate on finished vehicles is 2.5 percent, whereas the rate on the motorized chassis is 25.0 percent (light truck rate). The application indicates that zone procedures will encourage Daihatsu to establish the operation in this country rather than import the finished vehicle, which would qualify for the 2.5 percent rate.

Comments on the proposed manufacturing operation are invited in writing from interested persons and organizations. They should be addressed to the Board's executive secretary at the address below and postmarked before October 30, 1987.

A copy of the application is available for public inspection at the office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, 14th and Constitution Avenue NW., Washington, DC 20230.

Dated: September 28, 1987.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

[A-475-401]

Antidumping; Certain Valves and Connections, of Brass, for Use in Fire Protection Systems From Italy

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On May 11, 1987, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on certain valves and connections, of brass, for use in fire protection systems from Italy. The review covers one manufacturer/exporter and one third-country reseller of this merchandise to the United States and the period July 10, 1984 through February 28, 1986.

We gave interested parties the opportunity to comment on our preliminary results. In addition, the Department accepted supplementary information from the manufacturer on July 1, 1987. The final results of review are unchanged form those presented in the preliminary results.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Chip Hayes or Maureen Flannery, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-3601/5255.

SUPPLEMENTARY INFORMATION:

Background

On May 11, 1987, the Department of Commerce ("the Department") published in the **Federal Register** (52 FR 17616) the preliminary results of its administrative review of the antidumping duty order on certain valves and connections, of brass, for use in fire protection systems from Italy (50 FR 8354, March 1, 1985). We have now completed the administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of certain valves and connections, of brass, suitable for use in interior fire protection systems from Italy. This merchandise consists of single and double clapper siamese fire department connections and pressure restricting valves, currently classifiable under items 680.1420 and 680.1440, respectively, of the Tariff Schedules of the United States Annotated ("TSUSA").

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. The petitioner, Badger-Powhatan, submitted comments.

Comment 1: Petitioner requests that the Department determine whether liquidation of entries transshipped by Ganbrook, Ltd. has been suspended and estimated dumping duties have been collected by the Customs Service. Petitioner alleges that merchandise may have been incorrectly classified according to TSUSA classification and/or country of origin.

Department's Position: The Department has contacted Customs to verify that liquidation has been suspended on all entries by Ganbrook of merchandise within the scope of the order. Should Customs determine that liquidation of entries was not suspended because entries were improperly classified, Customs will take appropriate corrective action.

Comment 2: Petition claims that cost of production data submitted by Giacomini, S.p.A. were unreliable and should be rejected in favor of the best information otherwise available for determining foreign market value. Specifically, petitioner claims that transfer prices for forged items from a related firm are suspect; that the transfer prices of stems from another supplier, possibly related to Giacomini, are suspect; that set-up time and idle time were not included in the cost of production; that labor costs were based on the minimum national hourly costs of labor rather than the firm's actual labor costs; and that depreciation and factory overhead were not included in Giacomini's cost data. Petitioner asserts that because of these deficiencies the respondent's data should be dismissed in favor of the petitioner's market research report as the best information available.

Department's Position: We disagree. After examining price and cost data from the respondent and its suppliers we have established that the data are reliable and adequate. In supplemental data submitted, the respondent explained that the price of forged components is established by the forging firm according to standard market prices, and that price is a function of weight. The respondent submitted invoices from the related forging firm and from other unrelated suppliers which showed that the per kilogram prices from the related firm were comparable to those of the unrelated suppliers. There is no evidence of the related firm selling to Giacomini at less than an arm's-length price. The invoices from the related firm reflect actual prices for forged items used in products exported to the U.S. Therefore we conclude that the respondent's transfer price data are reliable and accurate, and we consider these the most appropriate for use as the acquisition cost on a constructed value situation.

We have no evidence that the firm which supplies stems and the respondent are related within the meaning of section 733(e)(3) of the Tariff Act. Therefore we appropriately used the price from the supplier in calculating constructed value.

In supplemental data submitted to the Department, the respondent clarified that costs for setup and idle time, labor, and depreciation and factory overhead were included in its cost of production submission as elements of processing.

Processing costs were examined and verified during the fair value investigation and found to have included the elements in question. Labor costs were based on actual company wage rates. We therefore conclude that Giacomini's submitted cost data are complete, are a reflection of the firm's own costs, and are acceptable.

Final Results of the Review

We invited interested parties to comment on the preliminary results. Based on our analysis of the comments and data received, the final results of review are unchanged from those presented in the preliminary results. We determine that the following weighted-average margins exist for the period July 10, 1984 through February 28, 1986:

Manufacturer/Exporter	Margin (percent)
Rubinetterie A. Giacomini S.p.A.	0.00
Giacomini/Ganbrook Ltd.	85.54

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentage stated above for Giacomini/Ganbrook.

The Department will issue appraisement instructions directly to the Customs Service. Further, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required.

For any future entries of this merchandise from a new exporter not covered in this administrative review, whose first shipments occurred after February 28, 1986 and who is unrelated to either reviewed party, a cash deposit of 85.54 percent shall be required. These deposit requirements are effective for all shipments of certain Italian valves and connections, of brass, for use in fire protection systems, entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)), and 19 CFR 353.53a.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

Date: September 24, 1987.

BILLING CODE 3510-DS-M

[Docket Nos. 7104-01 and 7104-02]

Actions Affecting Export Privileges; Richard P. Boucher

Summary

Pursuant to the consent agreement reached by the Department of Commerce and Richard Paul Boucher in the above captioned proceeding, which agreement was approved by the Administrative Law Judge in his Recommended Decision and Order, Richard Paul Boucher, individually and doing business as Young Sales and Service, Inc., both with addresses at One Cotton Road, Nashua, New Hampshire 03063, is hereby denied all export privileges for a period of five (5) years from the date of this Order.

Order

On August 26, 1987, the Administrative Law Judge (ALJ) entered an order approving the consent proposal submitted by the parties in the above referenced matter. The Recommended Decision and Order was referred to me pursuant to the Export Administrative Amendments Act of 1985, 50 U.S.C. App. 2412, Pub. L. 99-64, 99 Stat. 120 (July 12, 1985) and 15 CFR 388.17(a), for final action.

I hereby modify the second sentence in paragraph two of the ALJ's Decision by deleting that sentence and inserting in lieu thereof the following:

Boucher admits that the facts as stated in the charging letter are true. I find that those allegations, admitted by Boucher to be true, constitute violations of the Export Administration Act of 1979, as amended by the Export Administration Amendments Act of 1985 and the Regulations promulgated thereunder. Boucher wishes to settle and dispose of all matters identified in the charging letter by entering into this consent agreement.

Paragraph II of the ALJ's Order is hereby modified by deleting that paragraph and inserting in lieu thereof the following:

II. All outstanding individual validated export licenses in which Boucher appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Boucher's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

Having examined the record and based on the facts adduced in this case, I affirm the Recommended Decision and Order of the ALJ as thus modified.

This constitutes final agency action in this matter.

Date: September 25, 1987.

Paul Freedenberg,

Assistant Secretary for Trade Administration.

Decision and Order Affirming Settlement Agreement

In the matter of Richard Paul Boucher, individually and doing business as Young sales and Service, Inc. Respondent; Docket Numbers 7104-01 and 7104-02.

An administrative proceeding was initiated against Richard Paul Boucher, individually and doing business as Young Sales and Service, Inc., (hereinafter collectively referred to as "Boucher"), pursuant to section 13(c) of the Export Administration Act of 1979 (50 U.S.C.A. app. 2401-2420), as amended by the Export Administration Amendments Act of 1985, Pub. L. 99-64, 99 Stat. 120 (July 12, 1985)) (the Act), and the Export Administration Regualtions (currently codified at 15 CFR Parts 368-399 (1986)), (the Regulations). The Office of Export Enforcement issued a charging letter on April 23, 1987, alleging that between May 15, 1981 through May 8, 1982, Boucher violated §§ 387.45, 385.5 and 387.6 of the Regulations, in that:

(a) Between May 15, 1981 and May 8, 1982, Boucher exported U.S.-origin computer equipment from the United States through Canada to Switzerland, as well as directly from the United States to Switzerland, without the validated export licenses which Boucher knew of had reason to know were required by § 372.1 of the Regulations and that Boucher made false and misleading statements of material fact on export control documents;

Pursuant to 15 CFR 388.17, the Agency and Boucher, individually and doing business as Young Sales and Service, Inc. have agreed to and submitted a consent proposal to this office whereby Agency counsel and Respondent have agreed to settle this matter. Respondent Boucher admits that he violated the regulations as alleged in the charging letter and that this matter is being settled by a denial to Boucher of all export privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving the export of U.S.-origin commodities or technical data from the United States or abroad for a period of five years following the effective date of this Order.

I find that these terms are sufficient to achieve effective enforcement of the Act and the Regulations. Therefore, pursuant to the authority delegated to me by Part 388 of the Regulations,

It is ordered:

I. For a period of 5 years from the date that this Order becomes final,

Respondent Richard Paul Boucher, individually and doing business as Young Sales and Service, Inc., One Cotton Road, Nashua, New Hampshire 03060, any successors or assignees, officers, partners, representatives, agents and employees hereby are denied all privileges of participating directly or indirectly in any manner of capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the regulations.

II. All outstanding validated export licenses in which Boucher or any related party appears or participates, in any manner or capacity, are hereby revoked and shall be returned to the Office of Export Licensing for cancellation.

III. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity:

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported; and

(v) In the financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities or technical data which are subject to the Act and the Regulations.

IV. After notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which any Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services.

V. No person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Administration, shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any Respondent or any related party, or whereby any Respondent or related party may obtain any benefit therefrom or have interest or participation therein, diectly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for any Respondent or related party denied export privileges; or (b) order, buy, receive, use sell deliver, store, dispose of, forward, transport, finance or otherwise service or participate in any export, reexport, transshipment or diversion of any commodity or technical data exported or to be exported from the United States.

VI. This Order shall become effective upon entry of the Secretary's action in this proceeding pursuant to the Export Administration Act (50 U.S.C.A. app. 2412(c)(1)).

Date: August 26, 1987.

Hugh J. Dolan

Administrative Law Judge.

[FR Doc. 87-22649 Filed 9-30-87; 8:45 am]

BILLING CODE 3510-DT-M

[Docket Nos. 7689-01 and 7689-02]

Actions Affecting Export Privileges; Klaus Franz Josef Talleur

Summary

Pursuant to the consent agreement reached by the Department of Commerce and Klaus Franz Josef Talleur, in the above captioned proceeding, which agreement was approved by the Administrative Law Judge in his Recommended Decision and Order, Klaus Franz Josef Talleur, individually and doing business as Contacta Project Engineering and Consulting GmbH, both with addresses at Kleiststrausse 29, D-6024 Taunusstein 1, Federal Republic of Germany, is hereby denied all export privileges for two (2) years from the date of this Order. As authorized by § 388.16(c) of the Export Administration Regulations (15 CFR Parts 368-399(1986)) (Regulations), the denial period is suspended for one year from the date of this Order, provided Talleur has provided to the Department of Commerce any and all assistance requested by the Department in connection with any other administrative proceeding initiated by the Department against any other party with respect to the matters identified in the Charging Letter. The denial period will be waived at the end of the one-year suspension period provided that during the period of suspension Talleur has: (1) Complied with the terms of this Order; and (2) committed no violation of the Act or any regulation, order or license issued under the Act.

Order

On August 26, 1987, the Administrative Law Judge (ALJ) issued his Recommended Decision and Order approving the consent proposal submitted by the parties in the above referenced matter. The Recommended Decision and Order was referred to me pursuant to the Export Administration Amendments Act of 1985, 50 U.S.C. App. 2412, Pub. L. 99-64, 99 Stat. 120 (July 12, 1985) and 15 CFR 388.17(a) (the Act), for final action.

I hereby modify paragraph seven of the ALJ's Decision by deleting that paragraph and inserting in lieu thereof the following:

Talleur admits that the facts as stated in the charging letter are true. I find that these allegations, admitted by Talleur, constitute violations of the Act and the Regulations. Talleur wishs to settle and dispose of all matters identified in the charging letter by entering into this consent agreement.

Paragraph VI of the ALJ's Recommended Order is hereby modified by inserting at the end of that paragraph:

The provisions of Paragraph VI of this Order are also suspended during the one year suspension period.

Having examined the record and based on the facts adduced in this case, I affirm the Recommended Decision and Order of the ALJ as thus modified.

This constitutes final agency action in this matter.

Dated: September 25, 1987.

Paul Freedenberg,

Assistant Secretary for Trade Administration.

Decision and Order Affirming Settlement Agreement

In the matter of Klaus Franz Josef Talleur Contacta Project Engineering and Consulting GmbH, respondent; Docket Nos. 7689-01 and 7689-02.

Appearance for Respondent: Klaus Franz Josef Talleur, Kleiststr. 29, D-6204 Taunusstein 1, Federal Republic of Germany.

Appearance for Agency: Thomas C. Barbour, Esq., Office of Deputy Chief Counsel, Department of Commerce, 14th & Constitution Ave., Washington, DC 20230.

A proceeding was initiated on July 11, 1986 against Klaus Franz Josef Talleur,

VOL
52
ISS
190
OC
1
1987
UMI

individually and doing business as Contacta Project Engineering and Consulting GmbH (hereinafter collectively referred to as "Talleur"), Kleiststrasse 29 D–6204 Taunusstein 1, Federal Republic of Germany, by the issuance of a charging letter by the Director, Office of Export Enforcement (OEE), International Trade Administration, United States Department of Commerce (the Agency). The Respondent was charged with violating the provisions of §§ 387.3, 387.5 and 387.6 of the Export Regulations, codified at 15 CFR Parts 368 through 399 (the Regulations), issued pursuant to 50 U.S.C.A. app. 2401–2402 (the Act).

In the charging letter, OEE alleged that Respondent violated the Act and the Regulations during the period from October 30, 1981 through March 25, 1982, by:

Conspiring with Anna Landau (a/k/a Anna Wellems, a/k/a Anna Wellems-Landau), Jeannette Wellems and Guenther Nachtrab to bring about acts that constitute violations of the Act and the Regulations, misrepresenting material facts on export control documents, and reexporting U.S.-origin commodities from the Federal Republic of Germany to Austria without the required reexport authorizations from the Department.

Implementing the conspiracy through involvement in the following overt acts; Talleur signed a Form ITA–6052P, Statement by Foreign Consignee in Support of Sepcial License Application, which Nachtrab submitted to the Agency in support of Nachtrab's application for a distribution license. The Form ITA–6052P signed by the Respondent contained false and misleading statements of material fact concerning Talleur's prior business relationships with The Electronics Exchange, a company owned by Nachtrab, in violation of § 387.5 of the Regulations.

The Respondent also reexported four shipments of U.S.-origin goods, identified in Schedule A which is attached hereto and incorporated herein by this reference, from the Federal Republic of Germany to Landau and Wellems in Austria, without the required reexport authorization from the Agency, in violation of § 387.6 of the Regulations.

The Agency alleges that the Respondent committed a total of six violations of the Act and the Regulations, each of which involves U.S.-origin commodities controlled under Section 5 of the Act for national security reasons.

Pursuant to 15 CFR 388.17, the Agency and the Respondent have submitted a timely consent proposal to this Office whereby Klaus Franz Josef Talleur, individually and doing business as Contacta Project Engineering and Consulting GmbH, has agreed to settle these matters by admitting the above allegations as true and agreeing to a denial to Talleur of all export privileges for a period of two years following the date of entry of this Order.

I find that these terms are sufficient to achieve effective enforcement of the Act and the Regulations. Therefore, pursuant to the authority delegated to me by Part 388 of the Regulations, it is ordered:

I. For a period of two years from the date that this Order becomes effective, Respondent Klaus Franz Josef Talleur, individually and doing business as Contacta Project Engineering and Consulting GmbH, Kleiststrasse 29, D–6204 Taunusstein, Federal Republic of Germany, any successors or assignees, officers, partners, representatives, agents and employees hereby are denied all privileges of participating directly or indirectly in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the regulations.

II. The two year denial period set forth above is hereby suspended for 1-year from the date on which this Order becomes final in accordance with § 388.16(c) of the regulations and will be remitted withut further action at the end of that period provided Respondent has committed no further violations of the Act, the Regulations, or the final Order entered in this proceeding. During the one year suspension period, Respondent may participate in transactions involving the export of the U.S.-origin commodities or technical data from the United States or abroad in accordance with the requirements of the Act and regulations. The provisions of Paragraph III of this Order are also suspended during the 1-year period.

III. All outstanding validated export licenses in which Talleur or any related party appears or participates, in any manner or capacity, are hereby revoked and shall be returned to the Office of Export Licensing for cancellation.

IV. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity:

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported; and

(v) In the financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities or technical data which are subject to the Act and the Regulations.

V. After notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which any Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services.

VI. No person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Administration, shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any Respondent or any related party, or whereby any Respondent or related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for any Respondent or related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance or otherwise service or participate in any export, reexport, transshipment or diversion of any commodity or technical data exported or to be exported from the United States.

VII. Respondent shall, to the extent he has not already done so, provide to the Agency any and all assistance requested by the Agency in connection with any other administrative proceeding

initiated by the Agency against any other party with respect to the matters indentified in the charging letter.

VIII. This Order shall become effective upon entry of the Secretary's action in this proceeding pursuant to the Export Administration Act (50 U.S.C.A. app. 2412(c)(1)).

Date: August 26, 1987.

Hugh J. Dolan,

Administrative Law Judge.

BILLING CODE 3510-DT-M

Short-Supply Review on Certain Pipe; Request for Comments

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-EC Pipe and Tube Arrangement, Article 8 of the U.S.-Spain Arrangement Concerning Trade in Certain Steel Products, and Paragraph 8 of the U.S.-Japan Arrangement Concerning Trade in Certain Steel Products, with respect to certain seamless hot-finished alloy steel pipe.

DATE: Comments must be submitted no later than October 13, 1987.

ADDRESS: Send all comments to Nicholas C. Tolerico, Acting Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, N.W., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, (202) 377-0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-EC Pipe and Tube Arrangement, Article 8 of the U.S.-Spain Arrangement Concerning Trade in Certain Steel Products, and Paragraph 8 of the U.S.-Japan Arrangement Concerning Trade in Certain Steel Products provide that if the U.S. determines that because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product or products.

We have received a short-supply request for seamless hot-finished alloy steel pipe meeting ASTM specification A335, grades P11, P22, P5 and P9, in wall thicknesses ranging from 0.203 to 1.312 inches and diameters ranging from 2 to 16 inches.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than October 13, 1987. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly so label the business proprietary portion of the submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B-099, Import Administration, U.S. Department of Commerce, at the above address.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

September 25, 1987.

Short-Supply Review on Certain Steel Plate; Request for Comments

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice and Request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for short-supply determination under Article 8 of the U.S.-EC Arrangement Concerning Trade in Certain Steel Products, with respect to certain steel plate used in the manufacture of pipe.

DATE: Comments must be submitted on or before October 13, 1987.

ADDRESS: Send all comments to Nicholas C. Tolerico, Acting Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230, (202) 377-0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-EC Arrangement Concerning Trade in Certain Steel Products provides that if the U.S. "* * * determines that because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product * * *"

We have received a short-supply request for structural and API 5LX grades of steel plate, 0.25 to 1.50 inches in thickness, 72 inches or more in width, for use in producing large diameter pipe.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than October 13, 1987.) Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly so label the business propriety portion of the submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B-099, Import Administration, U.S. Department of Commerce at the above address.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

September 25, 1987.

BILLING CODE 3510–22–M

DEPARTMENT OF DEFENSE

Meeting; Defense Acquisition Regulatory Council

AGENCIES: Department of Defense (DoD), National Aeronautics and Space Administration (NASA).

ACTION: Notice of meetings.

SUMMARY: The Defense Acquisition Regulatory (DAR) Council will travel to Huntsville, Alabama, and San Francisco, California, during the week of October 26, 1987. The Council will conduct joint Government/Industry meetings at both locations and will discuss acquisition topics of mutual interest. The Council will be available for questions on specific DAR cases and issues.

DATES: October 27, 1987 and October 29, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council.

SUPPLEMENTARY INFORMATION: The U.S. Army Missile Command, RedStone Arsenal, Huntsville, Alabama 35899–5280, will host the Council's meeting on Tuesday, October 27, 1987, from 8 a.m. to 4:30 p.m. The point of contact for additional information is Randy Nevels, (205) 876–5373 (AV 746–5373).

The NASA/Ames Research Center will host the Council's meeting on Thursday, October 29, 1987, from 8 a.m. until 4:30 p.m., at the new Westin Hotel adjacent to the San Francisco airport. Advance registration for the meeting is required. Contact the conference coordinator, (415) 694–5800 on or before close of business on October 15, 1987 to register. The registration fee is $25.00.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

BILLING CODE 3710–08–M

National Security Agency

Privacy Act of 1974; Amended Record Systems

AGENCY: National Security Agency (NSA), DOD.

ACTION: Notice for public comment of amended record systems subject to the Privacy Act.

SUMMARY: The National Security Agency proposes to amend the systems notices for two systems of records subject to the Privacy Act of 1974, as amended (5 U.S.C. 552a).

DATE: These system notices shall be amended as proposed without further notice on or before November 2, 1987, unless comments are received that would result in a contrary determination.

ADDRESS: Send any comments to Patricia Schuyler, Office of Policy, National Security Agency, Fort George G. Meade, MD, 20755–6000. Telephone: 301–688–6527.

FOR FURTHER INFORMATION CONTACT: Vito T Potenza, Assistant General Counsel (Litigation), Office of General Counsel, National Security Agency, Fort George G. Meade, MD, 20755–6000. Telephone 301–688–6054.

SUPPLEMENTARY INFORMATION: The National Security Agency Systems of Records Notices subject to the Privacy Act of 1974 have been published in the **Federal Register** on May 29, 1985, FR Doc. 85–10237 (50 FR 22584) (Compilation).

The specific changes to the record systems being amended are set forth below followed by the system notices, as amended, published in their entirety.

These proposed amendments are not within the purview of the provisions of 5 U.S.C. 552a(o) which requires the submission of new or altered systems reports.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

September 28, 1987.

AMENDMENTS

GNSA 04

System Name:

NSA/CSS Cryptologic Reserve Mobilization Designee List (50 FR 22588) May 29, 1985

Changes:

System Name: Delete entry; substitute therefore: "NSA/CSS Military Reserve Personnel Data Base."

System location: After Decentralized Segments; substitute therefore: "Each staff, line, field element and military service as authorized and appropriate."

Categories of individuals covered by the system: After "duty military"; substitute therefore: "reserve personnel assigned to NSA mobilization billets, requesting to perform on-the-job training in NSA work centers, or scheduled to attend formal and resident courses of instruction under the auspices or sponsorship of NSA."

Categories of records in the system: Delete entry; substitute therefore: "File contains correspondence, papers, and forms relating to individual's service extracted from his/her military personnel records including but not limited to military service, enlistment or related service agreement/extension/orders, active duty records; duty status, reserve status; qualifications for active military duty assignments; clearance data; applications/nominations for assignments; pictures; military check-in/our sheets; military skill specialty evaluation data; active duty training; service record brief, military personnel utilization survey; correspondence courses, educational/academic records; application for ID; efficiency or fitness records; application/prior service enlistment documents; work experiences; professionalization documentation; achievement certificates, suggestions; personnel screening and evaluation records; acknowledgement of service requirements; temporary disability record; change of name; documents relating to promotion or non-selection, transfers, leave, pay entitlements, financial records, awards, health or medical records, reports of proceedings of physical fitness boards, birth certificates, citizenship statements and status; passport, questionaire/records of security clearances, language capability, language proficiency questionaire; flight record, aviator flight record, instrument certification papers; reduction in grade release, retirement, temporary duty, record of retirement points; correspondence and/or orders relating to dependents, service action, federal recognition orders, correspondence relating to badges, medals, and unit awards, including foreign decorations; correspondence/letters/administrative reprimands/censures/admonitions relating to apprehensions/confinement and discipline."

Purpose(s): Delete entry; substitute therefore: "To maintain current and accurate listings of reserve personnel designated to mobilize with the National Security Agency offered as nominees for NSA Mobilization billets, requesting formal and resident training courses, or seeking on-the-job training in NSA work centers. To determine professional and technical qualifications of reservists to analyze their training needs and to ascertain the eligibility of reservists for promotions, awards, special duty assignments, and similar reasons."

Storage: Delete entry; substitute therefore: "Computer magnetic tapes, discs, electronic files, other automated storage media, computer listings and other paper records."

Retrievability: Delete entry; substitute therefore: "By name, social security numbers, mobilization billet, courses of training, and other professional qualifications."

Retention and Disposal: In second sentence after "They are reviewed," delete remainder of sentence and add: "periodically and updated at least annually for changes and correction."

Record Sources Categories: Delete entry; substitute therefore: "Individual reservists and service reserve personnel files."

GNSA 09

System Name:

NSA/CSS Personnel File (50 FR 22592) May 29, 1985

Change:

Categories of records in the system: After "letters of reprimand," delete "employee record card,"

GNSA 04

SYSTEM NAME:

NSA/CSS Military Reserve Personnel Data Base.

SYSTEM LOCATION:

Primary System-National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755–6000.

Decentralized Segments-Each staff, line, field element and military service as authorized and appropriate.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Inactive duty military reserve personnel assigned to NSA mobilization billets, requesting to perform on-the-job training in NSA work centers, or scheduled to attend formal and resident courses of instruction under the auspices or sponsorship of NSA.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains correspondence, papers, and forms relating to individual's service extracted from his/her military personnel records including but not limited to military service, enlistment or related service agreement/extension/orders, active duty records; duty status, reserve status; qualifications for active military duty assignments; clearance data; applications/nominations for assignments; pictures; military check-in/out sheets; military skill specialty evaluation data; active duty training; service record brief, military personnel utilization survey; correspondence courses, educational/academic records; application for ID; efficiency or fitness records; application/prior service enlistment documents; work experiences; professionalization documentation; achievement certificates, suggestions; personnel screening and evaluation records; acknowledgement of service requirements; temporary disability record; change of name; documents relating to promotion or non-selection, transfers, leave, pay entitlements, financial records, awards, health or medical records, reports of proceedings of physical fitness boards, birth certificates, citizenship statements and status; passport, questionnaire/records of security clearances, language capability, language proficiency questionnaire; flight record, aviator flight record, instrument certification papers; reduction in grade release, retirement, temporary duty, record of retirement points; correspondence and/or orders relating to dependents, service action, federal recognition orders, correspondence relating to badges, medals, and unit awards, including foreign decorations; correspondence/letters/administrative reprimands/censures/admonitions relating to apprehensions/confinement and discipline."

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Security Agency Act of 1959, 50 U.S.C. section 402 note (Pub. L. 86–36); and Title 10 U.S.C.

PURPOSE(S):

To maintain current and accurate listings of reserve personnel designated to mobilize with the National Security Agency, offered as nominees for NSA Mobilization billets, requesting formal and resident training courses, or seeking on-the-job training in NSA work centers. To determine professional and technical qualifications of reservists to analyze their training needs and to ascertain the eligibility of reservists for promotions, awards, special duty assignments, and similar reasons.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See "Blanket Routine Uses" at the beginning of NSA's listing of the record system notices.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computer magnetic tapes, discs, electronic files, other automated storage media, computer listings and other paper records

RETRIEVABILITY:

By name, social security numbers, mobilization billet, courses of training, and other professional qualifications.

SAFEGUARDS:

Secure limited access facilities and within those facilities lockable containers. Records are accessible only to authorized personnel.

RETENTION AND DISPOSAL:

Records are permanent. They are reviewed periodically and updated at least annually for changes and correction. Superseded records are destroyed when no longer useful for reference purposes.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NSA.

NOTIFICATION PROCEDURE:

Requests from individuals for notification shall be in writing addressed to the Chief, Office of Policy, National Security Agency/Central Security Service, FT. George G. Meade, Md. 20755–6000.

RECORD ACCESS PROCEDURE:

Requests from individuals for access shall be in writing addressed to the Chief, Office of Policy, National Security Agency/Central Security Service, FT. George G. Meade Md. 20755–6000

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to the Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755–6000.

RECORD SOURCE CATEGORIES:

Individual reservists and service reserve personnel files.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Individual records in this file may be exempt pursuant to 5 U.S.C. section 552a(k)(1) and (k)(5). For additional information see agency rules contained in 32 CFR Part 299a.

GNSA09

SYSTEM NAME:

NSA/CSS Personnel file.

SYSTEM LOCATION:

Primary System-National Security Agency/Central Security Service, FT. George G. Meade, Md. 20755–6000.

Decentralized Segments-Each staff, line, contract and field element and supervisor as authorized and appropriate.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Civilian employees, personnel under contract, military assignees, dependents of NSA/CSS personnel assigned to field elements, individuals integrated into the cryptologic career development program, custodial and commerical services personnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains personnel papers and forms including but not limited to applications, transcripts, correspondence, notices of personnel action, performance appraisals, personnel summaries, professionalization documentation and correspondence, training forms, temporary duty, letters of reprimand, special assignment documentation, letters of commendation, promotion documentation, field assignment preference, requests for transfers, permanent change of station, passport, transportation, official orders, awards, suggestions, pictures, complaints separation, retirement, time utilization scholarship/fellowship or other school appointments, military service, reserve status, military check in/out sheets, military orders, security appraisal, career battery and other test results, language capability, military personnel utilization survey, work experience, notes and memoranda on individual aspects of performance, productivity and suitability, information on individual eligibility to serve on various boards and committees, emergency loan records, other information relevant to personnel management, housing information where required.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Security Agency Act of 1959, 50 U.S.C. section 402 note (Pub. L. 86–36); 5 U.S.C. and certain implementing Office of Personnel Management regulations in the Federal Personnel Manual; 10 U.S.C. section 1124; 44 U.S.C. section 3101, and Executive Order 11222.

PURPOSE(S):

To support the personnel management program; personnel training and career development; personnel planning, staffing and counseling; administration and personnel supervision; workforce study and analysis, manpower requirements studies; emergency loan program; and training curricula planning and research.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To gaining employers or to financial institutions when individual has applied for credit; to contractor employees to make determinations as noted in the purpose above; to hearing examiners; the judicial branch or to other gaining government organization as required and appropriate; biographical information may be provided to the White House as required in support of the Senior Cryptologic Executive Service awards program. See "Blanket Routine Uses" at the beginning of NSA's listing of the record system notices.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders, file cards, machine-readable cards, computer printouts, computer magnetic tapes, disks and other computer storage media, and microfilm.

RETRIEVABILITY:

By name, social security number and other items of relevant information.

SAFEGUARDS:

For paper, computer printouts and microfilm-Secure limited access facilities within those facilities secure limited access rooms and within those rooms lockable containers. Access to information is limited to those individuals authorized and responsible for personnel management or supervision. For records stored on magnetic tape, disk or other computer storage media within the computer processing area-additional secure limited access facilities, specific processing requests accepted from authorized persons only, specific authority to access stored records and delivery granted to authorized persons only. Where data elements are derived from the Personnel File, remote terminal inhibitions are in force with respect to access to complete file or data relating to persons not assigned to requesting organization using a remote terminal. Remote terminals are secured, are

available to authorized persons only, and certain password and other identifying information available to authorized users only is required.

RETENTION AND DISPOSAL:

Primary System-Those forms, notices, reports and memoranda considered to be of permanent value or required by law or regulation to be preserved are retained for the period of employment or assignment and then forwarded to the gaining organization or retained indefinitely. If the action is separation or retirement, these items are forwarded to the Office of Personnel Management or retired to the Federal Records Center at St. Louis as appropriate. Those items considered to be relevant for a temporary period only are retained for that period and either transferred with the employee or assignee or destroyed either when they are no longer relevant or at time of separation or retirement. Computerized portion is purged and updated as appropriate. Personnel summary, training, testing and past activity segments retained permanently. All other portions deleted at end of tenure.

Decentralized System-Files are transferred to gaining organization or destroyed upon separation as appropriate. Computer listings of personnel assigned to an organization are destroyed upon receipt of updated listings.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NSA.

NOTIFICATION PROCEDURE:

Requests from individuals for notification shall be in writing addressed to the Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755–6000.

RECORD ACCESS PROCEDURE:

Requests from individuals for access shall be in writing addressed to the Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755–6000.

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to the Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755–6000.

RECORD SOURCES CATEGORIES:

Forms used to collect and process individual for employment, access or assignment, forms and memoranda used to request personnel actions, training awards, professionalization, transfers, promotion, organization and supervisor reports and requests, educational institutions, references, Office of Personnel Management and other governmental entities as appropriate, and other sources as appropriate and required.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Individual records in this file may be exempt pursuant to 5 U.S.C. section 552a (k)(1), (k)(4), (k)(5), and (k)(6). For additional information see agency rules contained in 32 CFR Part 299a.

BILLING CODE 3810–01–M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 87–47–NG]

Application To Import Natural Gas From Canada; Victoria Gas Corp.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for blanket authorization to import natural gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on August 31, 1987, of an application filed by Victoria Gas Corporation (Victoria) for blanket authorization to import Canadian natural gas for short-term and spot market sales in the United States. Authorization is requested to import up to 100 MMcf of natural gas per day and maximum of 72 Bcf of natural gas over a two-year term beginning on the date of the first delivery. The gas would be sold on a short-term or spot basis to U.S. purchasers, including pipelines, local distribution companies, electric utilities, and commercial and industrial end-users. Victoria, a privately owned corporation of Houston, Texas, would import gas for its own account or act as agent for U.S. purchasers as well as Canadian suppliers. The specific terms of each import and sale would be negotiated on an individual basis, including price and volumes. Victoria intends to utilize existing pipeline facilities for transportation of the volumes imported.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than November 2, 1987.

FOR FURTHER INFORMATION CONTACT:

Larine A. Moore, Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA–076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478

Diane Stubbs, Natural Gas and Mineral Leasing, Office of the General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion. All parties should be aware that if the ERA approves this requested blanket import, it may designate a total amount of authorized volumes for the term rather than a daily or annual limit, in order to provide the applicant with maximum flexibility of operation.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA–076, RG–23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478. They must be filed no later than 4:30 p.m. e.d.t., November 2, 1987.

The Administrator intends to develop a decisional record on the application

BEST COPY AVAILABLE

through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. A request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Victoria's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Firday, except Federal holidays.

Issued in Washington, DC, September 23, 1987.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 86-61-NG]

Order Granting Authorization To Import Natural Gas; Minnegasco, Inc.

AGENCY: Economic regulatory Administration, Department of Energy.

ACTION: Notice of order granting authorization to import natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order granting Minnegasco, Inc., A Company of Diversified Energies, Inc. (Minnegasco), an authorization to import Canadian natural gas. The import authorization allows Minnegasco to import up to 160,000 Mcf per day of Canadian natural gas over a ten-year term, beginning November 1, 1987, or such later date as the necessary regulatory approvals and required facilities are made available to Minnegasco. Minnegasco, a local distribution company, proposes to purchase the gas on a direct sale basis from TransCanada PipeLines Limited and to import up to 50,000 Mcf per day on a firm basis, and up to 110,000 Mcf per day on an interruptible basis to the extent that such volumes are both needed and available for Minnegasco's Minneapolis, Minnesota, service area.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, 20585, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, September 22, 1987.

[ERA Docket No. 87-33-NG]

Order Granting Blanket Authorization To Import Natural Gas; Semco Energy Services, Inc.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of order granting blanket authorization to import natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order granting Semco Energy Services, Inc. (SEMCO), blanket authorization to import natural gas. The order issued in ERA Docket No. 87-33-NG authorizes SEMCO to import up to 400 Bcf of natural gas over a two-year period beginning on the date of first delivery.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, September 23, 1987.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER87-639-000 et al.]

Electric Rate and Corporate Regulation Filings; Gulf States Utilities Co. et al.

Take notice that the following filings have been made with the Commission:

1. Gulf States Utilities Company

[Docket No. ER87-639-000]

September 23, 1987.

Take notice that on September 10, 1987, Gulf States Utilities Company tendered for filing, pursuant to Cajun Electric Power Cooperative, Inc.'s (CAJUN's) breach of the terms of Service Schedule CTOC, a Notice of Cancellation of Service Schedule CTOC. Pursuant to § 35.15 of the Commission's regulations, Gulf States requests an order terminating Service Schedule CTOC as of November 1, 1985, consistent with CAJUN's failure in November, 1985, to satisfy Gulf States' demand for payment of all past due amounts under Service Schedule CTOC.

Copies of this filing have been served upon each person designated on the official service list in this proceeding.

Comment date: October 7, 1987, in accordance with Standard Paragraph E at the end of this notice.

2. Southern California Edison Company

[Docket No. ER87-659-000]

September 25, 1987.

Take notice that on September 18, 1987, Southern California Edison Company (Edison) tendered for filing pursuant to § 35.15 of the Federal Energy Regulatory Commission's (Commission) Regulations (18 CFR 35.15) under the Federal Power Act a Notice of Cancellation of Rate Schedule FERC No 25.

Copies of this filing were served upon each person designated on the official service list in this proceeding.

Comment date: October 13, 1987, in accordance with Standard Paragraph E at the end of this notice.

3. Idaho Power Company

[Docket No. ES87–40–000]

September 25, 1987.

Take notice that on September 17, 1987, Idaho Power Company filed an application with the Federal Energy Regulatory Commission seeking authority, pursuant to Section 204 of the Federal Power Act, to issue not more than $150,000,000 of short-term debt or other evidence of indebtedness on or before December 31, 1988, with a final maturity no later than December 31, 1989.

Comment date: October 15, 1987, in accordance with Standard Paragraph E at the end of this notice.

4. Boston Edison Company

[Docket No. ER87–662–000]

September 25, 1987.

Take notice that on September 25, 1987, Boston Edison Company (Boston Edison) tendered for filing its voluntary compliance with Order No. 475, Docket No. RM87–4–000, dated June 26, 1987. These revisions are made pursuant to the abbreviated filing requirements and formula adjustment put forth in Order No. 475. The adjustments reflect the reduction in the federal income tax rate from 46% to 34%, pursuant to the Tax Reform Act of 1986.

Tendered for filing are three revised rate sheets:

(a) The Second Revised Sheet No. 19 of FERC Electric Tariff, Original Volume No. IV, for Firm Transmission Service;
(b) The Third Revised Sheet No. 2 of FPC Rate Schedule No. 46, for 14/24 kV Subtransmission Service to New England Power Company for its Quincy-Weymouth Service Area;
(c) The Eleventh Revised Sheet No. 1 of Exhibit B of FPC Electric Tariff Original Volume I, Contract Demand Service for Resale.

Boston Edison asks that the rate schedule changes be made effective as of July 1, 1987.

The affected customers for each rate are:

(a) Firm Transmission Service:
New England Power Company
Town of Norwood, Massachusetts
Town of Concord, Massachusetts
Town of Wellesley, Massachusetts
Massachusetts Municipal Wholesale Electric Company, Agent for the Towns of Belmont, Braintree, Hingham, Hull and Reading.
(b) 14/24 kV Subtransmission Service to the Quincy-Weymouth Area: New England Power Company
(c) Contract Demand Service for Resale Town of Reading, Massachusetts

Boston Edison states that this filing has been posted and that copies of the filing have been served upon the affected customers and the Massachusetts Department of Public Utilities.

Comment date: October 13, 1987, in accordance with Standard Paragraph E at the end of this notice.

5. Idaho Power Company

[Docket No. ER87–661–000]

September 25, 1987.

Take notice that on September 18, 1987, Idaho Power Company tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during July 1987, along with cost justification for the rate charged. The filing includes the following supplements:

Pacific Power & Light Co.—Supplement No. 21
Utah Power & Light Co.—Supplement No. 68
Montana Power & Light Co.—Supplement No. 53
Washington Water Power Co.—Supplement No. 51
Sierra Pacific Power Co.—Supplement No. 66
Puget Sound Power & Light Co.—Supplement No. 30
Pacific Gas & Electric Co.—Supplement No. 26
Sacramento Municipal Utility Distict—Supplement No. 4
Portland General Electric Co.—Supplement No. 55

Comment date: October 13, 1987, in accordance with Standard Paragraph E at the end of this notice.

6. Northern States Power Company (Wisconsin)

[Docket No. ER87–660–000]

September 25, 1987.

Take notice that on September 18, 1987, Northern States Power Company a Wisconsin corporation (NSPW), tendered for filing a new wholesale electric service agreement, dated July 1, 1987, between NSPW and the City of New Richmond, Wisconsin (City). NSPW states that it currently serves the City under a wholesale service agreement dated Ocober 8, 1973, which agreement will be terminated upon the effective date of the July 1, 1987 agreement. NSPW also states that the City has assigned both the October 8, 1973 agreement and the July 1, 1987 agreement to Wisconsin Public Power Inc. SYSTEM (SYSTEM) and that the SYSTEM has consented to the termination of the 1973 agreement and accepted the assignment of the 1987 agreement. NSPW further states that this filing does not propose any changes in rates currently in effect for NSPW's wholesale service to the City.

Finally, NSPW has requested that the new agreement be permitted to become effective on the date on which certain new substation facilities being constructed by the City are placed in service, which date is estimated to be on or about January 1, 1988.

Comment date: October 13, 1987, in accordance with Standard Paragraph E at the end of this notice.

7. Montana Power Company

[Docket No. EC87–15–000]

September 25, 1987.

Take notice that on September 18, 1987, Montana Power Company tendered for filing an amendment to its application seeking authority to acquire securities of other public utilities as part of a planned program of corporate investments. Montana Power states that it amends its application so as to have a one (1) percent limitation, rather than a five (5) percent limitation on the amount of stock or funded debt outstanding of any other public utility that Montana Power may acquire pursuant to this application.

Comment date: October 13, 1987, in accordance with Standard Paragraph E at the end of this notice.

8. Northern Indiana Public Service Company

[Docket No. EC87–25–000]

September 25, 1987.

Take notice that on September 18, 1987, Northern Indiana Public Service Company (Northern Indiana) tendered for filing an application for an order granting authorization under section 203 of the Federal Power Act to permit a planned corporate restructuring to go forward.

Northern Indiana conducts an electric generation, transmission and distribution business and a gas transmission and distribution business in the northern one third of the State of Indiana. Under the proposed corporate restructuring, Northern Indiana would become a direct wholly owned subsidiary of a newly formed holding company, NIPSCO Industries, Inc., an Indiana corporation (Holding). Holding would own three companies which are currently subsidiaries of Northern Indiana. The restructuring is to be accomplished through a plan of share exchange under the Indiana Business Corporation Law.

Northern Indiana states that the corporate restructuring is consistent with the public interest.

Comment date: October 13, 1987, in accordance with Standard Paragraph E at the end of this notice.

9. Public Service Electric and Gas Company

[Docket No. EC87-664-000]

September 25, 1987.

Take notice that on September 21, 1987, Public Service Electric and Gas Company (PSE&G) tendered for filing an initial Rate Schedule to provide transmission service to Camden County Energy Recovery Associates (Camden). The Rate Schedule provides for a monthly transmission service charge of $1.08 per kilowatt plus $.00037 per kilowatthour for the delivery of the net electric power output of Camden's qualifying solid waste recovery facility to be located in the City of Camden, Camden County, New Jersey Central Power and Light Company.

PSE&G requests, with the customer's consent, a waiver of the Notice Requirements of § 35.3(a) of the Commission's Regulations so that the Rate Schedule can be submitted for filing at this time and PSE&G further requests that the filing be made effective within sixty (60) days of the date of this filing.

PSE&G states that a copy of this filing has been served by mail upon the customer and the New Jersey Board of Public Utilities.

Comment date: October 13, 1987, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-22714 Filed 9-30-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP87-335-001 et al.]

Natural Gas Certificate Filings; Northwest Pipeline Corp. et al.

Take notice that the following filings have been made with the Commission:

1. Northwest Pipeline Corporation

[Docket No. CP87-335-001]

September 23, 1987.

Take notice that on September 16, 1987, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP87-335-001 an amendment to the pending application for a certificate of public convenience and necessity filed on April 30, 1987, in Docket No. CP87-335-000 pursuant to section 7(c) of the Natural Gas Act so as to reflect a revised facility design and an increase in the proposed level of firm transportation of natural gas for direct sale to Exxon Company U.S.A. (Exxon) for use during emergency shut-downs at Exxon's Black Canyon Dehydration Plant (referred to as the Dry Piney Dehydration Plant in Northwest's initial pleadings) and during facility malfunction at Mountain Fuel Resources, Inc.'s (MFR) Dry Piney Gas Conditioning Plant, both in Sublette County, Wyoming, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

By the pending application in Docket No. CP87-335-000, authorization is requested for the construction and operation of 4.53 miles of 6-inch buried pipeline, one meter station consisting of a 6-inch meter run, a 3-inch meter and a 2-inch meter, and miscellaneous facilities. It is explained that the proposed line would be constructed from the discharge side of Northwest's existing Big Piney compressor station and extend in a southwesterly direction to a point of interconnection with the proposed meter station located adjacent to Exxon's Black Canyon Dehydration Plant. Authorization is also requested for the firm transportation and delivery of up to 29,000 MMBtu per day through the proposed facilities to serve emergency shut down (ESD) requirements in Exxon's Black Canyon dehydration facility.

It is stated that Exxon notified Northwest that it wished to change the proposed pipeline diameter from 6-inch to 8-inch and to increase its maximum purchase volume from 29,000 to 50,000 MMBtu per day in order to provide additional safety and operational flexibility during ESD events. It is further stated that Exxon and Northwest entered into an amendment effective August 20, 1987, to the ESD Agreement whereby Northwest agreed to increase the proposed line size and increase the proposed level of transportation and delivery of the direct sales gas.

It is maintained that under the terms of the amended ESD Agreement, Northwest now proposes to construct and operate 4.35 miles of 8-inch buried pipeline and a meter station consisting of one 6-inch meter run and one 3-inch meter run. It is stated that the location of these facilities would not change from that set forth in the original pleadings. Northwest states that the revised estimated cost of the proposed facilities would be $797,940. Northwest further states that Exxon would reimburse Northwest for all costs associated with the construction of the proposed facilities.

In addition, it is maintained that under the terms of the amended ESD Agreement, Northwest now proposes to transport and deliver, on a firm basis, from its system supply up to 50,000 MMBtu per day of natural gas for direct sale to Exxon.

Comment date: October 8, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

2. Blue Dolphin Pipe Line Company

[Docket No. CP87-537-000]

September 25, 1987.

Take notice that on September 11, 1987, Blue Dolphin Pipe Line Company (BDPL), 11 Greenway Plaza, Suite 3100, Houston, Texas 77046, filed in Docket No. CP87-537-000 a request pursuant to Section 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 284.221) for authorization to transport natural gas on an interruptible basis for Apache Marketing, Inc., acting as shipper for an end-user in Brazoria County, Texas, under the certificate issued in Docket No. CP87-31-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

BDPL proposes to transport up to 8 MMcf on a peak day, 6 MMcf on an average day and 2,190 MMcf on an annual basis for Apache. It is stated that the gas would be transported approximately 40 miles from a subsea tap in the Galveston Area, Block 273, offshore Texas, to a meter at the Dow Chemical Company Plant A in Freeport, Brazoria County, Texas. It is asserted that BDPL filed an intial report on July 31, 1987, reporting that the service commenced on July 1, 1987, under the automatic authorization provisions of

the Commission's Regulations. BDPL states that no construction of facilities would be required to effect the transportation service. BDPL proposes to charge Apache a transportation rate of 6 cents per Mcf of gas redelivered. It is explained that the transportation service would have a primary term of 2 years with month-to-month extensions thereafter.

Comment date: November 9, 1987, in accordance with Standard Paragraph G at the end of this notice.

3. Eastern Shore Natural Gas Company

[Docket No. CP87–520–000]

September 25, 1987.

Take notice that on September 1, 1987, Eastern Shore Natural Gas Company (Eastern Shore), P. O. Box 615, Dover, Delaware 19903–0615, filed in Docket No. CP87–520–000 a request pursuant to §§ 157.205, 157.211(b) and 157.212(a) of the Regulations under the Natural Gas Act (18 CFR 157.205, 157.211 and 157.212) for authorization to construct and operate four sales taps for two utilities and to operate a delivery point for one of these customers, under the certificate issued in Docket No. CP83–40–000, pursuant to the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Eastern Shore proposes to operate the existing delivery point for its existing customer, the Citizens Gas Division of Chesapeake Utilities Corporation (Citizens Division) at Federalsburg, Maryland. It is stated that the volumes delivered would be within the certified entitlements of Citizens Division and that there would be minimal impact on Eastern Shore's peak day deliverability.

Eastern Shore proposes to construct and operate two additional sales taps for Citizens Division at Federalsburg Industrial Park, Maryland and at Naylor Mill Road in Wicomico County, Maryland. Eastern Shore further proposes to construct and operate two sales taps for another existing customer the Delaware Division of Chesapeake Utilities Corporation, near Bridgeville in Sussex County, Delaware, and at Salisbury Road in Kent County, Delaware. It is stated that the volumes to be delivered at these proposed delivery points would be within the certified entitlements of these customers and that there would be minimal impact to Eastern Shore's existing customers' annual and peak day deliveries.

Comment date: November 9, 1987, in accordance with Standard Paragraph G at the end of this notice.

4. K N Energy, Inc.

[Docket No. CP87–541–000]

September 25, 1987.

Take notice that on September 16, 1987, K N Energy, Inc. (Applicant), P.O. Box 15265, Lakewood, Colorado, 80215, filed in Docket No. CP87–541–000 a request pursuant to §§ 157.205 and 157.211 of the Regualtions under the Natural Gas Act (18 CFR 157.205 and 157.211) for authorization to construct and operate sales taps for the delivery of gas to end-users under the certificate authority granted in Docket Nos. CP83–140–000, CP83–140–001, and CP83–140–002 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant advises that the intended end-users are located in various counties within Kansas and Nebraska. Applicant states that the gas would be used to fuel irrigation equipment and to provide space heating for certain small commercial and residential structures. Peak day and annual deliveries at the proposed taps are estimated to be 208 Mcf and 6,140 Mcf, respectively (see attachment). Applicant states it does not expect such deliveries to have a significant impact on its total peak day and annual deliveries. The cost of installing the taps is estimated to be $6,200, it is asserted. Finally, Applicant states that the taps are not prohibited by any of its existing tariffs and that the gas would be sold in accordance with the currently filed rate schedules authorized by the applicable state or local regulatory body having jurisdiction.

Comment date: November 9, 1987, in accordance with Standard Paragraph G at the end of this notice.

EXHIBIT A

Customer	Location of tap	Approximate quantity to be sold (MCF)		End use of gas	Est. of cost facilities[1]
		Peak day	Annual		
Resident/Occupant 87–34, C.W. Kettlehut.	SE/4 Sec. 7–T1S–R3W, Republic Co., KS.	24	800	Irrigation	$850
Resident/Occupant 87–35, Bob Husband.	SW/4 Sec. 7–T26S–R30W, Gray Co., KS.	26	920	Domestic & Irrigation	850
Resident/Occupant 87–36, Ellen Kowalewski.	SW/4 Sec. 20–T9N–R16W, Buffalo, Co., NE.	2	120	Domestic	850
Resident/Occupant 87–37, Myron Baumgart.	NE/4 Sec. 1–T20N–R2W, Platte Co., NE.	36	300	Small Commercial	1,150
Resident/Occupant 87–38, Omega Land Company.	NE/4 Sec. 17–T31N–R14W, Holt Co., NE.	120	4,000	Irrigation	2,500

[1] Customers reimburse to K N a portion of these costs through imposition of a connection charge which varies by state as follows: Kansas—$250, Nebraska—$400 Colorado—$400, and Wyoming—$500.

5. Mountain Fuel Resources, Inc.

[Docket No. CP87–530–000]

September 25, 1987.

Take notice that on September 8, 1987, Mountain Fuel Resources, Inc. (MFR), 79 South State Street, Salt Lake City, Utah, 84147, filed in Docket No. CP87–530–000 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act (NGA) for permission and approval to (1) abandon one turbine compressor at its Coalville station in Summit County, Utah (Coalville compressor), (2) install the Coalville compressor at MFR's Coleman station to Storage Main Line No. 58, (3) use Coleman station and other facilities to transport and deliver gas to Colorado Interstate Gas Company (CIG) and (4) flexibly use MFR's Nightingale-Kanda-Coleman compressor complex to (a) receive gas from and deliver gas to MFR's transmission system and (b) receive gas from and deliver gas to the transmission systems of CIG and Wyoming Interstate Company, Ltd. (WIC), all as more fully

set forth in the application which is on file with the Commission and open to public inspection.

MFR proposes to abandon its Coalville compressor and relocate it at its Coleman station in order to more efficiently use this existing compressor and improve system deliverability and reliability. MFR also proposes to construct and operate a 20-inch diameter, 750-foot tie-line to connect Coleman station with MFR's Storage Main Line No. 58. This tie-line will permit MFR to use Coleman station to compress gas into its transmission system and increase deliverability to its Clay Basin Storage Field, it is stated.

MFR further proposes to use a soon-to-be installed 12 inch diameter, 3,500-foot tie-line, which will connect the Coleman and Kanda stations and will be constructed as a facility exempt from Commission jurisdiction under 18 CFR 284.3(c), to transport gas other than only under section 311 of the Natural Gas Policy Act of 1978 (NGPA). MFR alleges that this authority is needed to provide it with the flexibility to utilize Coleman station to compress both NGPA section 311 and NGA section 7(c) certificated volumes.

Finally, MFR requests authority to flexibly use its Nightingale-Kanda-Coleman compressor complex to (a) receive gas from and deliver gas to its transmission system and (b) receive gas from and deliver gas to the transmission systems of CIG and WIC. MFR explains that this operational flexibility will allow MFR to improve its ability to meet future demands for sales, transportation and storage services.

MFR estimates the cost to (a) retire, dismantle and remove the Coalville compressor, (b) reinstall the Coalville compressor at Coleman Station and (c) construct and operate the Coleman Station-to-Storage Main Line No. 58 tie-line will be $1,602,700. The Coleman station-to Kanda station tie-line construction is estimated at a cost of $224,600, it is indicated.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this notice.

6. Northern Natural Gas Company Division of Enron Corporation

[Docket No. CP87-538-000]

September 25, 1987.

Take notice that on September 14, 1987, Northern Natural Gas Company, Division of Enron Corporation, (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP87-538-000, an application pursuant to section 7(c) of the Natural Gas Act, requesting authorization for transportation of natural gas on an interruptible basis for the account of Amoco Production Company (Amoco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a gas transportation agreement dated August 14, 1987, Northern seeks authorization to transport up to 7,000 MMBtu of natural gas per day attributable to Amoco's production from Ship Shoal Block 84, offshore Louisiana. Further, if Amoco requests transportation of volumes in excess of 7,000 MMBtu per day, Northern states it has agreed to provide such service to the extent that capacity is available. It is indicated that the gas would be delivered to Northern by Amoco immediately upstream of the measurement facilities on the production platform and Northern would transport and redeliver thermally equivalent volumes for Amoco's account at (1) the existing subsea interconnection between Northern and Transcontinental Gas Pipe Line Corporation (Transco) located in both Ship Shoal Blocks 70 and 72 in Louisiana state waters or (2) at such other point(s) as Northern and Amoco mutually agree. Northern states Transco would provide downstream transportation pursuant to Part 284 of the Commission's Regulations. Northern proposes to initially charge Amoco the effective transportation rate set forth in Northern's Stipulation and Agreement of Settlement in Docket No. RP85-206-000 (S&A). Under the S&A, the maximum transportation rate is 6.43 cents per MMBtu, it is stated. Northern states that it proposes to provide the requested service for a primary term of five years and subsequent two-year terms upon mutual agreements of Amoco and Northern no later than 180 days prior to the expiration of the primary term.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this Notice.

7. Northern Natural Gas Company Division of Enron Corporation

[Docket No. CP85-636-005]

September 25, 1987.

Take notice that on September 14, 1987, Northern Natural Gas Company, Division of Enron Corporation (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed at Docket No. CP85-636-005, to petition the Federal Energy Regulatory Commission to amend its order issued February 4, 1987, in Docket No. CP85-636-000, *et al.*, to authorize under section 7(c) of the Natural Gas Act, the implementation of Phase I of Northern's contract demand turnback program (turnback program) retroactively to permit an effective date of March 27, 1985, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Northern indicates that Section VII of Northern's Stipulation and Agreement of Settlement at Docket No. RP82-71-000 *et al.*, provided for the turnback program, allowing Northern's firm entitlement customers to reduce firm entitlement by two percent in each of three phases.

Northern indicates that based on the issuance of a final Commission order on such settlement, Northern has accepted the order in Docket No. CP85-636-000, *et al.*, which authorizes Phase I retroactively to permit an effective date of October 27, 1985. Northern states that it is requesting authority granting Phase I retroactively to permit an effective date of March 27, 1985, because it is indicated that such effective date was an integral part of the settlement negotiated by all parties to the Docket No. RP82-71-000 settlement and results in greater benefit to Northern's firm entitlement customers in reduced demand charges.

No other changes are proposed.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this notice.

8. Southern Natural Gas Company

[Docket No. CP70-7-035]

September 25, 1987.

Take notice that on September 4, 1987, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP70-7-035 a petition to amend the order issued in Docket No. CP70-78-000, on October 29, 1969 pursuant to section 7(c) of the Natural Gas Act so as to authorize a decrease in the total contract demand volume of Chattanooga Gas Company (Chattanooga), distribute said decrease in contract demand to its other customers and transfer 200 Mcf of the contract demand of the Polaris Corporation (Polaris) to the contract demand of Atlanta Gas Light Company (Atlanta), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Southern states that it is currently authorized to sell and deliver to Chattanooga an aggregate contract demand of 30,000 Mcf per day. It is said that by letter dated April 15, 1987, Chattanooga formally notified Southern that it desires to reduce its contract

demand to 22,000 Mcf per day as permitted by Southern's FERC Gas Tariff.

Southern states further that it notified its customers, which did not require addition facilities, that they could obtain their pro rata portion of the 8,000 Mcf that Chattanooga made available. The eligible customers acknowledged their acceptance of the additional contract and aaximum delivery obligation, and Southern agreed, upon receipt of the necessary authorization, to make the reallocation of the contract demand, it is stated.

Southern states that is currently provides Polaris with a contract demand of 450 Mcf per day. It is said that by letter, dated February 5, 1987, Polaris informed Southern of its need to reduce its contract demand to 250 Mcf per day. Atlanta, it is asserted, has agreed to accept the additional 200 Mcf per day and has informed Southern of its intentions by letter dated, July 10, 1987.

Southern states that it can deliver the additional quantities of contract demand to all of the participating customers without the construction of additional facilities.

Comment date: October 16, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

9. United Gas Pipe Line Company

[Docket No. CP82–368–002]

September 25, 1987.

Take notice that on September 14, 1987, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP82–368–002 pursuant to section 7(c) of the Natural Gas Act a petition to amend the certificate of public convenience and necessity in Docket No. CP82–368–000, as previously amended, to extend for another five year period United's current authorization which expires April 8, 1988, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United requests that its current authorization be extended for another five year period to permit acquisition, by lease or purchase, and the operation of up to four portable compressor units, not exceeding 1,000 horsepower each, to be installed and moved as needed on United's system in its East Texas and North Louisiana area. United states that such compression is needed to insure a more adequate flow of gas and is the best method economically for solving operating problems which occasionally develop at points on United's East Texas and North Louisiana system.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this notice.

10. Southern Natural Gas Company

[Docket No. CP87–531–000]

September 25, 1987.

Take notice that on September 9, 1987, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202–2563, and South Georgia Natural Gas Company (South Georgia), P.O. Box 1279, Thomasville, Georgia 31792, hereinafter referred to as "Applicants" filed in Docket No. CP87–531–000 an application pursuant to section 7(c) of the Natural Gas Act for a limited-term certificate of public convenience and necessity authorizing the transportation of natural gas for ten Georgia municipalities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants request limited-term authorization to transport natural gas on behalf of the City of Adel (Adel), the City of Ashburn (Ashburn), the City of Blakely (Blakely), the City of Cairo (Cairo), the City of Cordele (Cordele), the Fitzgerald Water, Light and Bond Commission (Fitzgerald), the City of Montezuma (Montezuma), the City of Moultrie, the City of Nashville (Nashville), and the City of Tifton (Tifton), all Georgia municipalities, hereinafter referree to collectively as the "Municipalities". It is states that the Municipalities have each acquire the right to purchase gas from SNG Trading Inc., Consolidated Fuel Supply, Inc., Texican Natural Gas Company, and Panhandle Trading Company. It is further stated that in order to effectuate delivery of the gas, the Municipalities have entered into individual agreements with South Georgia (South Georgia Agreements), wherein South Georgia has agreed to transport each Municipality's gas and to act as its agent in arranging for the transportation of the gas through Southern's pipleline system. South Georgia, as agent for the Municipalities, and Southern entered into transportation agreements (Southern Agreements), which set forth the terms under which Southern would transport the gas purchase by the Municipalities. A list showing the specific term and dates of the individual Southern and South Georgia Agreements in shown in Appendix A attached hereto.

The Southern Agreements provide that South Georgia would cause gas to be delivered to Southern for transportation at the various existing points of delivery on Southern's contiguous pipeline system specified in Exhibit A to the Southern Agreements. Southern would redeliver to South Georgia at the South Georgia meter station location in Lee County, Alabama (South Georgia redelivery point), an equivalent quantity of gas less 3.25 percent of the volume transported for fuel use.

The South George Agreements provide that the Municipalities would cause gas to be delivered to South Georgia for transportation at the South Georgia redelivery point and would be redelivered to the Municipalities at the meter stations shown in Appendix A attached hereto. South Georgia would redeliver an equivalent volume less 0.5 percent of the volumes transported for fuel use.

The Southern Agreement provide that South Georgia shall pay Southern each month the following transportation rates:

(a) Where the aggregate of the volumes transported and redelivered by Southern on any day to South Georgia under any and all transportation agreements with Southern, when added to the volumes of gas deliverd under Southern's Rate Scheduled OCD of such day to South Georgia does not exceed to daily contract demand of South Georgia, the transportation rate will be 39.9 cents per MMBtu; and

(b) Where the aggregate of the volumes transported and redelivered by Southern on any day to South Georgia under and and all transportation agreements with Southern, when added to the volumes of gas delivered under Southern's Rate Schedule OCD on such day to South Georgia exceed the daily contract demand of South Georgia, the transportaton rate for the excess volumes will be 64.9 cents per MMBtu.

The South Georgia Agreements state that each Municipality has agreed to pay South Georgia each month the transportation rate of 28.33 cents per MMBtu redelivered by South Georgia. The Agreements also provide for collection of the applicable GRI surcharge.

Southern states that the transportation arrangement would enable the Municipalities to diversify their natural gas supply sources and to obtain gas at competitive prices. In addition, Southern would obtain take-or-pay relief on the gas the Municipalities may obtain from their suppliers.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this notice.

VOL 52 ISS 190 OC 1 1987 UMI

APPENDIX A

Municipality	Southern agreement date	South Georgia agreement date	Volumes MMBtu's	Location of redelivery point.
Adel	7-23-87	7-17-87	3,000	Adel Meter Station In Cook County, Georgia
Ashburn	7-29-87	7-24-87	1,500	Ashburn Meter Station in Cook County, Georgia
Blakely	7-29-87	7-28-87	2,000	Blakely Meter Stations Nos. 1 and 2 in Early County, Georgia
Cairo	7-29-87	7-28-87	3,000	Cairo Meter Station in Grady County, Georgia
Cordele	7-29-87	7-28-87	4,000	Cordele Meter Station in Crisp County, Georgia
Fitzgerald	7-17-87	7-16-87	3,000	Fitzgerald Meter Station in Ben Hill County, Georgia
Montezuma	7-22-87	7-20-87	4,000	Montezuma Meter Station in Sumter County, Georgia
Moultrie	7-17-87	7-16-87	4,000	Moultrie Meter Stations Nos. 1 and 2 in Colquitt County, Georgia
Nashville	7-29-87	7-28-87	2,000	Nashville Meter Station in Berrien County, Georgia
Tifton	7-17-87	7-16-87	4,000	Tifton Meter Station in Tift County, Georgia

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. G-16218-003 et al.]

Applications for Certificates, Abandonments of Service and Petitions to Amend Certificates Chevron U.S.A. Inc., et al.[1]

September 28, 1987.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before October 14, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

Docket No. and date filed	Applicant	Purchaser and location	Price per Mcf	Pressure base
G-16218-003, D, Aug. 31, 1987.	Chevron U.S.A. Inc., P.O. Box 7309, San Francisco, Calif. 94120-7309.	Transwestern Pipeline Company, Laverne Field, Beaver County, Oklahoma.	[1]

C187-907-000 (C178-1080), B, Sept. 16, 1987.	Enron Oil & Gas Company, P.O. Box 1188, Houston, Texas 77251.	United Gas Pipe Line Company, Billiams Creek Southeast Field, Tyler County, Texas.	[5]	
C187-908-000, B, Sept. 16, 1987.	Bogert Oil Company, 2601 N.W. Expressway—Suite 1000W, Oklahoma City, Okla. 73112.	ANR Pipeline Company, NE/4 SE/4 Sec. 30-23N-16W, Major County, Oklahoma.	[6]	
C187-913-000 (C169-581), B, Sept. 18, 1987.	ARCO Oil and Gas Company, Division of Atlantic Richfield Company, P.O. Box 2819, Dallas, Texas 75221.	Natural Gas Pipeline Company of America, East Laketon Field, Gray County, Texas.	[7]	
C187-901-000 (C160-330), B, Sept. 11, 1987.	Fina Oil and Chemical Company, P.O. Box 2159, Dallas, Texas 75221.	Glasscock Oil Company, Captain Lucey Field, Jim Wells County, Texas.	[8]	

[1] Acreage has been assigned to CMS Energy.
[2] Effective 1-1-87, Cities Service Oil and Gas Corporation assigned certain acreage to Helmerich & Payne, Inc.
[3] Union Oil Company of California assigned a certain lease under Docket No. CI68-894 to Meadowbrook Oil Corporation of Oklahoma, Inc.
[4] Frieden Lease is not capable of producing gas in commercial quantities.
[5] All wells on contract acreage have been plugged and abandoned.
[6] Applicant is requesting abandonment of NE/4 SE/4 Sec. 30-23N-16W, Major County, Oklahoma which is dedicated to ANR Pipeline under two gas contracts dated 10-23-62 and 8-25-60. The gas is NGPA section 104 flowing gas with the last production occurring in October 1975. The well was plugged and abandoned. The 10-23-62 gas contract has expired and the other contract has production outside the unit which makes up Applicant's drillsite. Applicant obtained new leases for the rest of Sec. 30-23N-16W. ANR is not involved in contracting the rest of this section. No gas was being sold in interstate commerce (or to ANR Pipeline) on 5-31-78, from Sec. 30-23N-16W, Major County, Oklahoma. Applicant is seeking an abandonment regarding these ANR contracts so that they can immediately drill a new well and market the gas to Union Texas Products Corporation through a low pressure gathering system.
[7] All acreage dedicated under contract dated 11-1-68 and Rate Schedule No. 616 was surrendered in February, 1982, due to minimal or unprofitable gas production.
[8] Applicant sold gas to C.V. Lyman, who was succeeded by Glasscock and Petroleum Management, Inc. The contract expired by its own terms in 1973. Glasscock resold the gas to Tennessee Gas Pipeline Company, a Division of Tenneco Inc. Beginning in 1975, gas was sold to Nue-Wells Pipe Line Company for lease fuel purposes pursuant to a letter agreement dated March 7, 1975. Nue-Wells could purchase up to 300 Mcf at a price of $1.00 per Mcf. A total of 75,291 Mcf was sold from 1975 until August 15, 1984, when the last well was shut in. Deliveries never exceeded 19,892 Mcf/year. The gas was NGPA Section 104 minimum rate gas. Applicant estimates that approximately $59,316 was collected in excess of the maximum lawful price and is prepared to refund such amount to the proper party.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

BILLING CODE 6717-01-M

[Docket No. TA87-12-20-001]

Proposed Change in FERC Gas Tariff; Algonquin Gas Transmission Co.

September 28, 1987.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on September 23, 1987, tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, six (6) copies each of the following tariff sheets:

Substitute Revised Thirteenth Revised Sheet No. 204
Substitute Fourteenth Revised Sheet No. 204

Algonquin states that such tariff sheets are being filed to reflect in its Rate Schedule F-3 changes in the underlying rates of National Fuel Gas Supply Corporation ("National Fuel") as set forth in National Fuel's August 31, 1987 compliance filing, proposed to be effective August 1, 1987.

Algonquin proposes the effective dates of Substitute Revised Thirteenth Revised Sheet No. 204 and Substitute Fourteenth Revised Sheet No. 204 to be August 1, 1987 and October 1, 1987, respectively.

Algonquin notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 5, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. CI87-910-000]

Application of Catamount Natural Gas, Inc. for Blanket Certificate of Public Convenience and Necessity and for an Order Permitting Pre-Granted Abandonment and for Expedited Consideration; Catamount Natural Gas, Inc.

September 28, 1987.

Take notice that on September 18, 1987, Catamount Natural Gas, Inc. (CNGI) pursuant to sections 4 and 7 of the Natural Gas Act and Part 157 of the regulations of the Federal Energy Regulatory Commission, filed for a blanket certificate of public convenience and necessity (1) authorizing sales for resale of natural gas in interstate commerce by CNGI (2) authorizing sales for resale of natural gas by the producer suppliers from which CNGI purchases natural gas, and (3) authorizing blanket pre-granted abandonment of such sales, all as more fully set forth in the application which is on file with the Commission and open for public inspection. CNGI states that the authority requested in its application is consistent with the Commission's recent holdings in *ANR Gathering Company*, 40 FERC ¶ _____ (September 2, 1987) and *Citizens Energy Corp. et al.*, 39 FERC ¶ 61,106 (1987).

Applicants are seeking authority to purchase and resell, with pre-granted abandonment, natural gas subject to the jurisdiction of the Commission under the NGA. Such authority will allow CNGI to trade in natural gas released under permanent or limited term abandonment authorizations, gas released pursuant to Order No. 451 (Section 270.201 of the Commission's regulations), and other natural gas subject to the Commission's NGA jurisdiction which is not presently required by certificate to be delivered to another purchaser, including contractually uncommitted gas from the Outer Continental Shelf that qualifies under section 102(d) of the Natural Gas Policy Act.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 13, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 382.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a motion to intervene in accordance with the Commission's rules. The applicant has requested treatment of the application pursuant to Rule 802 of the Commission's Rules of Practice and Procedure. Under the procedure herein provided for, unless otherwise advised it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-15-032]

Proposed Changes in FERC Gas Tariff, Columbia Gas Transmission Corp.

September 25, 1987.

Take notice that Columbia Gas Transmission Corporation (Columbia), on September 21, 1987, tendered for filing proposed changes to its FERC Gas Tariff, Original Volume No. 1, to be effective April 1, 1987:

First Revised Sheet No. 22E2
First Revised Sheet No. 22E3
First Revised Sheet No. 22P3
Third Revised Sheet No. 22Q

Columbia states that these changes are being filed in accordance with Ordering Paragraphs (B) and (D) of the Federal Energy Regulatory Commission's (Commission) September 4, 1987 Order Accepting Tariff Sheets for Filing Subject to Conditions in this proceeding.

Columbia states that these tariff sheets clarify that calculation of seasonal imbalances will be based on actual tendered quantities less Daily Scheduled Quantities. Columbia further states that the Daily Scheduled Quantities are those designated by Buyer, in accordance with subsection 6(a) of the appropriate Rate Schedule, but the sum of the Daily Scheduled Quantities can not on a monthly basis exceed the quantities actually delivered by Columbia at the delivery points specified in the service agreement.

Columbia points out that the First Revised Sheet No. 22P3 also contains a new section 6(c)(2)(c), with language identical to the language in section 6(c)(2)(c) of Original Sheet No. 22E3.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures. All such motions or protests must be filed on or before October 2 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Columbia's filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-14-032]

Proposed Changes in FERC Gas Tariff; Columbia Gulf Transmission Co.

September 25, 1987.

Take notice that Columbia Gulf Transmission Company (Columbia Gulf) on September 21, 1987, tendered for filing proposed changes listed in the attached Appendix A to its FERC Gas Tariff, Original Volume No. 1, to be effective April 1,1987.

Columbia Gulf states that these changes are being filed in accordance with Ordering Paragraph (C) of the Federal Energy Regulatory Commission's (Commission) September 4, 1987 Order Accepting Tariff Sheets for Filing Subject to Conditions in this proceeding.

Columbia Gulf states that these tariff sheets clarify that calculation of seasonal imbalances will be based on actual tendered quantities less Daily Scheduled Quantities. Columbia Gulf further states the Daily Scheduled Quantities are those designated by Shipper, in accordance with subsection 6(a) of the appropriate Rate Schedule, but the sum of the Daily Scheduled Quantities can not on a monthly basis exceed the quantities actually delivered by Columbia Gulf at the delivery points specified in the service agreement.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures. All such motions or protests should be filed on or before October 2, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Columbia Gulf filing are on file with

the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP87-147-000]

Proposed Changes in FERC Gas Tariff; Kentucky West Virginia Gas Co.

September 28, 1987.

Take Notice that on September 23, 1987, Kentucky West Virginia Gas Company ("Kentucky West"), tendered for filing proposed changes to its FERC Gas Tariff, Second Revised Volume No. 1, First Revised Volume No. 2, and Volume of Effective Service Agreements, to become effective October 1, 1987.

Kentucky West makes this filing for the purpose of setting forth various minor changes in order to clarify and update Volume Nos. 1 and 2 of Kentucky West's Tariff including substituting FERC for FPC where appropriate. Additionally, the filing includes an Annual Charges Adjustment Clause ("ACA") as permitted by the Commission's Order No. 472 series issued in Docket No. RM87-3-000. Kentucky West states that pursuant to the Order No. 472 series and § 154.38(d)(6) of the Commission's Regulations, Kentucky West proposes an Annual Charge Adjustment Clause to the General Terms and Conditions of Kentucky West's FERC Gas Tariff, Second Revised Volume No. 1.

Kentucky West is also including in this filing several superseding service agreements with various small GSS-1 customers, and in addition, is filing the effective service agreements for service being rendered by Kentucky West pursuant to Rule 284 of the Commission's Regulations. Kentucky West requests that the Commission grant such waivers as may be necessary for acceptance of its filing to become effective October 1, 1987, as previously described.

Copies of this filing were served upon the companies' jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests shall be filed on or before October 5, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. GP87-22-000]

Complaint Regarding Production-Related Costs, Reading & Bates Petroleum Co. v. Tennessee Gas Pipeline, Co. a Division of Tenneco Inc.

September 28, 1987.

On January 8, 1987, Reading & Bates Petroleum Company (Reading & Bates) filed a complaint pursuant to 18 CFR 271.1105(d)(3)(ii) and Rule 206 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206. Reading & Bates requests the Production-Related Costs Board (Board) to find that Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), is in violation of 18 CFR 271.1104 by refusing to reimburse Reading & Bates for production-related costs incurred under its contract with Tennessee.

Reading & Bates states that the contract, dated December 18, 1979, contains language constituting an area rate clause and therefore evidences Tennessee's agreement to compensate Reading & Bates for the cost of delivering natural gas to Tennessee's system. Reading & Bates indicates that it contacted Tennessee seeking reimbursement for production-related costs and that by letter dated July 23, 1986, Tennessee declined to pay such costs stating that the contract does not contain an area rate clause as defined by the regulations and thus does not satisfy the express contractual authorization provision of 18 CFR 271.1104(a)(3).

Under Rules 206(b) and 213(a), 18 CFR 385.206(b) and 385.213(a), Tennessee must file an answer to Reading & Bates' complaint with the Commission unless otherwise ordered by the Commission. Under Rule 213(e), 18 CFR 385.213(e), any person failing to answer a complaint may be considered in default, and all relevant facts stated in such complaint may be deemed admitted. Tennessee shall file its answer with the Commission not later than 15 days after publication of this notice in the **Federal Register**.

Any person desiring to be heard or to protest said filing should file a protest or a motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214, 18 CFR 385.211 and 385.214. All such protests or motions should be filed not later than 15 days after publication of this notice in the **Federal Register**. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-22713 Filed 9-30-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA88-1-43-000]

Proposed Changes in FERC Gas Tariff; Williams Natural Gas Co.

September 28, 1987.

Take notice that Williams Natural Gas Company (WNG) on September 22, 1987, tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, the following tariff sheets:

First Revised Sheet No. 2
Third Revised Sheet No. 6
Second Revised Sheet Nos. 7 and 8
First Revised Sheet Nos. 77-80
First Revised Sheet Nos. 90, 91 and 97
Alternate Third Revised Sheet No. 6

WNG states that pursuant to the Purchased Gas Adjustment in Article 21 of its FERC Gas Tariff, it proposes to decrease its rates effective October 23, 1987, to reflect:

(1) A 6.14¢ per Mcf decrease in the Cumulative Adjustment due to a decrease in WNG's projected gas purchase costs.

(2) A 3.99¢ per Mcf decrease in the Surcharge Adjustment (to a negative 3.05¢ per Mcf from a positive . 94¢ per Mcf) to amortize the Deferred Purchased Gas Cost Subaccount balance.

First Revised Sheet No. 2, Second Revised Sheet Nos. 7 and 8, First Revised Sheet Nos. 77-80 and First Revised Sheet Nos. 90, 91 and 97 are being filed to eliminate the Incremental Pricing provisions and references contained in WNG's FERC Gas Tariff, Original Volume No. 1. Order No. 478 issued July 27, 1987 in Docket No. RM87-28-000, *et al.*, revoked the Commission's incremental pricing rules effective

January 1, 1988. However, since WNG has no incremental surcharges currently outstanding nor projects any to be effective during the six-month PGA period effective October 23, 1987, WNG is requesting a waiver of the Commission's regulations to make such tariff sheets effective October 23, 1987.

WNG filed on August 31, 1987 in Docket No. RP87–118 to change its accounting and billing period, which starts the 23rd of one month and ends the 22nd of the next month, to a standard calendar month accounting and billing period. WNG asked for an effective date on the proposed tariff sheets of October 1, 1987. If these tariff sheets in Docket No. RP87–118 are accepted for filing to be effective October 1, 1987, WNG requests that Alternate Third Revised Sheet No. 6 be accepted to be effective November 1, 1987.

WNG states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Section 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 5, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87–22711 Filed 9–30–87; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TA88–1–44–000 and RP87–146–000]

Filing; Commercial Pipeline Co., Inc.

September 25, 1987.

Take notice that on September 22, 1987, Commercial Pipeline Co., Inc. ("Commercial") tendered for filing its 52nd Revised Sheet No. 3A, superseding 51st Revised Sheet No. 3A reflecting Purchased Gas Adjustment and Total Rate as shown below.

	Current adjustment	Cumulative adjustment	Surcharge adjustment	Total rate
(Base)	$(.6939)	$.6087	$.0777	$4.1568
(Excess)	(.7120)	.6022	.0777	4.2617

The proposed effective date of Commercial's filing is October 23, 1987.

Commercial states that this filing reflects adjustments in its purchased gas cost to provide for the tracking of a corresponding PGA adjustment by Commercial's sole supplier, Williams Natural Gas Company ("Williams"), which also is proposed to be effective October 23, 1987. Commercial's filing also reflects surcharge adjustments in accordance with its PGA.

Also take notice that Commercial tendered for filing its Second Revised Sheet No. 7B superseding Substitute First Revised Sheet No. 7B and First Revised Sheet No. 7C superseding Corrected Substitute Original Sheet No. 7C. Commercial states that these tariff sheets contain technical changes to Commercial's tariff to permit the effective operation of Commercial's PGA provision in the event Commercial purchases gas from more than one supplier, or from a supplier other than Williams. The proposed effective date of these tariff sheets also is October 23, 1987.

Commercial further states its understanding that Williams, with its PGA adjustment, has filed a second set of tariff sheets which reflect an effective date of November 1, 1987. Commercial understands that this second set of tariff sheets relates to a filing by Williams in another proceeding (Docket No. RP87–118–000) of revised tariff sheets to convert Williams' fisal month accounting and billing period, which starts on the 23rd of one month and ends on the 22nd of the next month, to a standard calendar month accounting and billing. Accordingly, Commercial also submitted to the Commission on September 22, 1987, Alternate 52nd Revised Sheet No. 3A, Alternate Second Revised Sheet No. 7B, and Alternate First Revised Sheet No. 7C, each of which reflect an effective date of November 1, 1987, and which are proposed by Commercial to be accepted should the Commission accept Williams' PGA filing and related tariff sheets effective November 1, 1987. Commercial's alternate tariff sheets also would change the effective dates of its PGA adjustments from October 23 and April 23 to November 1 and May 1 of each year. If needed, Commercial requests waiver of the Commission's Regulations to accept the effective date of November 1, 1987, and permanent waiver of § 154.38(d)(iv)(a) of the Regulations.

Copies of the filings were served on Commercial's FERC jurisdictional customers, the Kansas Corporation Commission and the Missouri Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before October 2, 1987. Protestants will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. RP78–37–019 et al]

Filing of Pipeline Refund Reports; Lawrenceburg Gas Company et al.

September 28, 1987.

Take notice that the pipelines listed in the Apprendix hereto have submitted to the Commission for filing proposed refund reports. The date of filing and docket number are also shown on the Appendix.

Any person wishing to do so may submit comments in writing concerning the subject refund reports. All such comments should be filed with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC. 20426, on or before October 13, 1987. Copies of the respective filings are on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01

[Docket No. RP87-141-000 and RP87-141-001]

Amended Filing; Natural Gas Pipeline Company of America

September 25, 1987.

Take notice that on September 15, 1987, Natural Gas Pipeline Company of America (Natural) tendered for filing certain tariff sheets to be a part of its FERC Gas Tariff, Third Revised Volume No. 1. This filing was noticed on September 17, 1987, with comments due September 24, 1987, in Docket No. RP87-141-000.

On September 21, 1987, Natural filed an amended filing to correct Daily and Monthly Entitlement volumes for several of its customers. These corrections do not change any of the other previously filed information. This amended filing is docketed in RP87-141-001.

Any person desiring to be heard or to protest the amended filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214. All such motions or protests must be filed on or before October 5, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies for this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-22706 Filed 9-30-87; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. TA87-3-17-002]

Proposed Changes in FERC Gas Tariff; Texas Eastern Transmission Corp.

September 25, 1987.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on September 21, 1987 tendered for filing as a part of its FERC Gas Tariff, Fourth Revised Volume No. 1, six copies each of the following tariff sheets:

Second Substitute Eighty-fifth Revised Sheet No. 14
Second Substitute Eighty-fifth Revised Sheet No. 14A
Second Substitute Eighty-fifth Revised Sheet No. 14B
Second Substitute Eighty-fifth Revised Sheet No. 14C
Second Substitute Eighty-fifth Revised Sheet No. 14D

Texas Eastern states that the above tariff sheets are being issued in substitution for tariff sheets filed on July 1, 1987 and July 23, 1987 in Docket Nos. TA87-3-17 and TA87-4-17, respectively, consisting of Texas Eastern's Semiannual PGA tracking filing to be effective on August 1, 1987. Texas Eastern further states that the sole change included in these second substitute tariff sheets is a decrease in the cost of gas purchased from ProGas Limited.

In the July 1, 1987 filing Texas Eastern calculated and included total annual demand payments to ProGas Limited of $6,525,000 as being in conformance with Opinion Nos. 256 and 256A. Texas Eastern states that such calculation was based upon data available to Texas Eastern at the time of the filing. In the July 23, 1987 filing, Texas Eastern filed substitute tariff sheets supported by work papers furnished by ProGas Limited showing that the correct calculation of the total annual demand payments to ProGas Limited in conformance with Opinion Nos. 256 and 256A was $8,612,100. The Commission's order dated August 21, 1987 accepted the substitute tariff sheets to be effective August 1, 1987 subject to condition. The Commission deemed the supporting work papers furnished by Texas Eastern on July 23, 1987 to be insufficient to verify conformance to Opinion Nos. 256 and 256A and required Texas Eastern to file such sufficient work papers.

Texas Eastern states that it has been unable to obtain workpapers deemed sufficient to support the $8,612,100 as the Opinion Nos. 256 and 256A conforming annual demand payment. Therefore, Texas Eastern has calculated and the tariff sheets filed in this filing reflects ProGas Limited annual demand charges calculated using Texas Eastern's modified fixed variable factor based upon Texas Eastern's settlement cost of service in Docket No. RP85-177 which conforms with Opinion Nos. 256 and 256A. The above second substitute tariff sheets include total annual demand payments to Progas Limited of $8,013,690, effecting a further decrease in the Demand-1 component of Texas Eastern sales rates of $.016/dth.

The proposed effective date of the above tariff sheets is August 1, 1987.

Texas Eastern has respectfully requested waiver of any of the Commission's Regulations deemed necessary to accept the above second substitute tariff sheets to be effective on August 1, 1987, in substitution for those corresponding substitute tariff sheets filed on July 23, 1987.

Texas Eastern has earlier filed tariff sheets with the Commission proposed to be effective September 15, 1987 (Docket No. CP76-57) and October 1, 1987 (Docket No. RP87-128) which do not reflect the rate impact proposed in this filing. Texas Eastern states that it will refile such tariff sheets to reflect any impact of the Commission's decision in this filing.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 2, 1987. Protests will be considered by the Commission in determining the appropriate action to be take, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Submitted to Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: Extension of 3067-0139
Title: Federal Regional Reconstitution Area (FRRA) Survey

Abstract: Data collectors will perform on-site surveys of potential reconstitution sites in order to confirm, upgrade or expand information now stored in FEMA's data base on Federal Regional Reconstitution Areas.
Type of Respondents:
State or local governments,
Businesses or other for-profit
Federal agencies or employees
Non-profit institutions
Small businesses or organizations
Number of Respondents: 250
Burden Hours: 1,000
Frequency of Recordkeeping or Reporting: Other—One Time Report

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646–2634, 500 C Street, SW., Washington, DC 20472.

Comments should be directed to Francine Picoult, (202) 395–7231, Office of Management and Budget, 3235 NEOB, Washington, DC 20503, within two weeks of this notice.

Dated: September 28, 1987.

Wesley C. Moore,

Director, Office of Administrative Support.

BILLING CODE 6718–01–M

FEDERAL MARTIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Martime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.03 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200040.
Title: Virgin Islands Port Authority Terminal Agreement.
Parties:
Virgin Islands Port Authority (Authority)
TMT Sand Company, Inc. (TMT)

Synopsis: The proposed agreement provides that TMT will lease from the Authority premises, Parcel No. 18 Crown Bay Fill, No. 7B Southside Quarter, St. Thomas, Virgin Islands, consisting of approximately 42,689 square feet. The term of the lease is for a period of ten years.

Agreement No.: 224–200041.
Title: Virgin Islands Port Authority Terminal Agreement.
Parties:
Virgin Islands Port Authority (Authority)
Tropical Shipping and Construction Co., Ltd., (Tropical)

Synopsis: The proposed agreement provides that Tropical will lease from the Authority premises located at THIRD PORT FACILITY, Limetree Bay, St. Croix, Virgin Islands for an initial term of ten years with a 5-year renewal option.

Agreement No.: 224–200039.
Title: Virgin Islands Port Authority Terminal Agreement.
Parties:
Virgin Islands Port Authority
Virgin Islands Maritime Services

Synopsis: The proposed agreement provides for the twenty-year lease of 84,000 square feet of unimproved land located at Crown Bay Fill, St. Thomas Virgin Islands, to be used for a marine terminal facility.

By Order of the Federal Maritime Commission.

Tony P. Kominoth,

Assistant Secretary.

Dated: September 28, 1987.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies; Alabama National Bancorporation, et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 20, 1987.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. Alabama National Bancorporation, Ashland, Alabama; to acquire 100 percent of the voting shares of Gulf National Bank, Orange Beach, Alabama, a *de novo* bank.

2. Eastern Bankshares Corp., Hialeah, Florida; to become a bank holding company by acquiring 100 percent of the voting shares of Eastern National Bank, Miami, Florida.

3. Eastern Overseas Bank, Ltd., Georgetown, Grand Cayman; to become a bank holding company by acquiring 100 percent of the voting shares of Eastern Bankshares Corp., Hialeah, Florida, a *de novo* bank.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. A&P Bank Holding Company, North Branch, Minnesota; to become a bank holding company by acquiring at least 80 percent of the voting shares of Community National Bank, North Branch, Minnesota.

Board of Governors of the Federal Reserve System, September 25, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Applications To Engage de Novo in Permissible Nonbanking Activities; First Agency of Leoti, Inc., et al.

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo,* either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to

banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 16, 1987.

A. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. First Agency of Leoti, Inc., Leoti, Kansas; to engage *de novo* through its subsidiary, First Insurance of Leoti, Leoti, Kansas, in the sale of general insurance in a town of less than 5,000 in population pursuant to § 225.25(b)(8)(iii)(A) of the Board's Regulation Y. This activity will be conducted in Wichita County, Kansas.

Board of Governors of the Federal Reserve System, September 25, 1987.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 87-22589 Filed 9-30-87; 8:45 am]

BILLING CODE 6210-01-M

Acquisitions of Companies Engaged in Permissible Nonbanking Activities; First Bancorp of Tonkawa, Inc., et al.

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than October 19, 1987.

A. Federal Reserve Bank of Kansas City (Thomas M. Hoening, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. First Bancrop of Tonkawa, Inc., Tonkawa, Oklahoma; to retain ownership of Burton Insurance Trust, Tonkawa, Oklahoma, and thereby indirectly acquire Burton Insurance Agency, Inc., Tonkawa, Oklahoma, and thereby engage in general insurance agency activities in a town of less than 5,000 in population; and continue to engage in the sale of credit-related life and accident and health insurance pursuant to § 225.25(b)(8) of the Board's Regulation Y. The general insurance agency activities will be conducted in the town of Tonkawa, Oklahoma and the immediate vicinity.

B. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. Bancrop Hawaii, Inc., Honolulu, Hawaii; to acquire Bancorp Life Insurance Company of Hawaii, Inc., Phoenix, Arizona, and thereby engage in the reinsurance of credit life and credit accident and health insurance issued in connection with mortgage lending pursuant to § 225.25(b)(8) of the Board's Regulation Y. These activities will be conducted in the Hawaiian Islands, Guam, Yap, Koror, American Samoa, Pohnpei and the Marshall Islands. Comments on this application must be received by October 14, 1987.

Board of Governors of the Federal Reserve System, September 25, 1987.

James McAfee,

Associate Secretary of the Board.

Meeting; Basic Behavioral Processes Research Review Committee

AGENCY: Alcohol, Drug Abuse, and Mental Health Administration, HHS.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of the forthcoming meeting of one of the agency's initial review committees in the month of October 1987. This committee will be open for discussion of administrative announcements and

VOL 52 ISS 190 OCT 1 1987 UMI

program developments. The Committee will be performing initial review of applications for Federal assistance. Therefore, portions of the meeting will be closed to the public as determined by the Administrator, ADAMHA, in accordance with 5 U.S.C. 552(b)(6) and 5 U.S.C. app. 2, 10(d). Notice of this meeting is required under the Federal Advisory Committee Act, Pub. L. 92–463.

Committee Name: Basic Behavioral Processes Research Review Committee, NIMH
Date and Time: October 22–23: 8:00 a.m.
Place: Linden Hill Hotel, 5400 Pooks Hill Road, Bethesda, MD, 20814
Status of Meeting:
Open—8:00–9:00 a.m.
Closed—Otherwise
Contact: Doris East, Parklawn Building, Room 9C–26, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–3936
Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and research training activities relating to experimental and physiological psychology and comparative behavior, with recommendations to the National Advisory Mental Health Council for final review.

Substantive information, summaries of the meetings, and roster of committee members may be obtained from the contract person listed above.

Dated: September 25, 1987.

Peggy W. Cockrill,

Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160–20–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY–030–07–4333–10; Order WY–031–8701]

Off-Road Vehicle Designations; Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of off-road vehicle designation order WY–031–8701.

SUMMARY: Notice is hereby given in relation to the use of off-road vehicles on public lands in accordance with the authority and requirements of Executive Orders 11644 and 11989 and regulations contained in 43 CFR Part 8340. The following described lands under administration of the Bureau of Land Management are designated as open, limited or closed to off-road motorized vehicle use.

EFFECTIVE DATE: November 2, 1987, at 4:30 p.m.

FOR FURTHER INFORMATION: Contact either of the following Bureau of Land Management offices: District Manager, Rawlins District Office, P.O. Box 670, 1300 Third St., Rawlins, Wyoming 82301 (307) 324–7171; Area Manager, Lander Resource Area, P.O. Box 589, 125 Sunflower, Lander, Wyoming, 82520, (307) 332–7822.

SUPPLEMENTARY INFORMATION: The 1,400,000-acre area being designated is in the Lander Resource area, which includes most of Fremont County and portions of Natrona, Sweetwater, Hot Springs and Carbon Counties, Wyoming. These designations are a result of land use decisions made in the 1987 Resource Management Plan. Comments received during the planning process have influenced these designation decisions.

The Bureau recognizes the difference between off-road vehicles and over-snow vehicles (in terms of use and impact). Therefore, travel by over-snow vehicles will be permitted off existing routes, as specifically provided, only if they are operated in a responsible manner without damaging the vegetation or harming wildlife.

Designations

1. Open Designation

No areas were identified for open designation.

2. Limited Designation

a. Use is limited to existing roads and vehicle routes on 1,390,000 acres. Use is limited to those roads and vehicle routes in existence as of the date of this publication. Temporary excursions leaving existing vehicular routes are permitted only to accomplish necessary tasks and only if such travel does not result in resource damage. Necessary tasks involve work requiring the use of a motor vehicle. Examples include picking up big game kills, repairing range improvements, managing livestock and locatable mineral operations that are covered under the casual use or the notice levels outlined in the 43 CFR Part 3809 Surface Management Regulations, etc. Resource damage is defined as leaving long-term signs of vehicle use (ruts), causing erosion or water pollution or creating undue degradation of other vegetative or wildlife resources.

Random or unnecessary travel from existing vehicle routes is not allowed. Creation of new routes or extension and/or widening of existing routes is not allowed without prior written agency approval.

This designation is determined to be appropriate for a majority the public lands by accommodating access needs while providing resource protection.

b. Use is limited to designated roads and vehicle routes on 4,500 acres. Vehicle travel is permitted only on roads and vehicle routes designated as open by the BLM. Until final publication of maps and brochures and sign installation is accomplished, vehicular travel is limited to existing roads and vehicle routes as designated under 2a above. Areas where vehicle use is permitted only on roads and vehicle routes designated by the Bureau and identified with signs and on maps are as follows: Whiskey Mountain (4,500 acres) Dubois, Wyoming.

c. Use limited by the number and type of vehicles.

There are several vehicle routes identified by signs and maps as suitable for four-wheel-drive vehicles.

d. Use limited to time or season.

Several roads and vehicle routes are closed seasonally to protect the roadbed and surrounding watershed values (approximate dates of closure are indicated on signs and maps). Where specialized restrictions are necessary to meet other resources management objectives, other limitations may also be developed.

3. Closed Designation

Two areas are identified for ORV closure to protect natural and cultural values. These are:

Castle Gardens (80 acres) east of Riverton, Wyoming.

Dubois Badlands (4,500 acres) east of Dubois, Wyoming.

Access

ORV designations apply to all off-road vehicles regardless of their purpose. However, emergency vehicles in emergency situations are excluded from these designations.

The use of closed roads or areas will be by permit only. Mineral prospectors and explorers under the Mining Law of 1872 must obtain authorization from BLM pursuant to the 43 CFR Part 3809 regulations to operate a motor vehicle on a closed road or in a closed area.

Any person(s) having special access needs may apply to the authorized officer for a permit to enter the area. Any constructed areas will require a right-of-way under 43 CFR Part 2800.

Richard Bastin,

District Manager.

[FR Doc. 87–22615 Filed 9–30–87; 8:45 am]

BILLING CODE 4310–22–M

Proposed Reinstatement of a Terminated Oil and Gas Lease; Alaska

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97–451), a petition for reinstatement of oil and gas lease AA–48538 has been received covering the following lands:

Fairbanks Meridian, Alaska

T. 17 S., R. 1 E.,
Sec. 31.
(605 acres)

The proposed reinstatement of the lease would be under the same terms and conditions of the original lease, except the rental will be increased to $5 per acre per year, and royalty increased to 16⅔ percent. The $500 administrative fee and the cost of publishing this notice have been paid. The required rentals and royalties accruing from April 1, 1987, the date of termination, have been paid.

Having met all the requirements for reinstatement of lease AA–48538 as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective April 1, 1987, subject to the terms and conditions cited above.

Kay F. Kletka,
Chief, Branch of Mineral Adjudication.

Dated: September 25, 1987.

Realty Action; Arizona

AGENCY: Bureau of Land Management Interior.

ACTION: Notice.

SUMMARY: This notice is to inform the public of the completion of an exchange of mineral estates between the United States and the State of Arizona that resulted in the consolidation of ownership of the surface and mineral estates by the State and Federal Governments. The United States acquired the mineral estate in 57,980.39 acres of land in Cochise, Graham, Greenlee, Pima and Pinal Counties. The State of Arizona acquired the mineral estate in 57,517.52 acres of land in Cochise, Graham, Greenlee, Pima and Pinal Counties.

FOR FURTHER INFORMATION CONTACT: Marsha Luke, Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011. Telephone (602) 241–5534.

SUPPLEMENTARY INFORMATION: On July 30, 1987, the Bureau of Land Management issued Patent No. 02–87–0038 and Deed No. AZ–87–007 to the State of Arizona transferring ownership of the mineral estate on the following described land pursuant to section 206 of the Federal Land policy and Management Act of 1976:

Sec. 12, N½, SW¼, N½SE¼, SW¼SE¼, N½SE¼SE¼, SW¼SE¼SE¼. (surface only)
T. 21 N., R. 15 W.,
Sec. 36, all.

Comprising 11,748.60 acres in Mohave County.

The purpose of this notice is to inform the public and interested Government officials of the exchange of public and State land.

DATE: At 9 a.m. on November 2, 1987 the land acquired by the United States will be open to the operation of the public lands laws, the general mining laws and to applications and offers under the mineral leasing laws. Appropriation under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal laws. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determination in local counts.

John T. Mezes,

Chief, Branch of Lands and Minerals Operations.

Proposed Continuation of Withdrawals; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service proposes that all or portions of five separate land withdrawals continue for an additional 20 years and requests that the lands

involved remain closed to mining and, where closed, be opened to surface entry.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503–231–6905.

The Forest Service proposes that the following identified land withdrawals be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The following described lands and projects are involved:

Deschutes National Forest

1. OR 21317–A, Secretarial Order of November 17, 1906, Allingham Administrative Site, 65 acres, Located in Jefferson County, approximately 36 miles northwest of Bend,
   T. 13 S., R. 9 E., W.M., sec. 3.

Fremont National Forest

2. ORE 013871, Public Land Order No. 3363 of April 7, 1964, East Bay Recreation Area, 50 acres, Located in Lake County, approximately 64 miles northwest of Lakeview,
   T. 30 S., R. 14 E., W.M., sec. 28.
   Deep Creek Recreation Area, 20 acres, Located in Lake County, approximately 13 miles southeast of Lakeview,
   T. 40 S., R. 22 E., W.M., sec. 31.
   Mud Creek Recreation Area, 10 acres, Located in Lake Country, approximately 10 miles northeast of Lakeview,
   T. 38 S., R. 21 E., W.M., sec. 11.
3. ORE 05743, Public Land Order No. 1787 of February 3, 1959, Shoe String Creek Administrative Site, 33.55 acres, Located in Lake Country, approximately 18 miles northwest of Lakeview,
   T. 37 S., R. 18 E., W.M., sec. 4.
4. ORE 06585, Public Land Order No. 2298 of March 14, 1961, Sprague River Recreation Area, 60 acres, Located in Klamath County, approximately 33 miles northwest of Lakeview,
   T. 37 S., R. 15 E., W.M., sec. 8.
   Warner Canyon Recreation Area, 84.39 acres, Located in Lake County, approximately 5 miles northeast of Lakeview,
   T. 38 S., R. 21 E., W.M., secs. 30 and 31.
   Drews Creek Recreation Area, 30 acres, Located in Lake County, approximately 8 miles southeast of Lakeview,
   T. 40 S., R. 21 E., W.M., sec. 10.
   Loften Lake Recreation Area, 154. 94 acres, Located in Lake County, approximately 25 miles northwest of Lakeview,
   T. 38 S., R. 16 E., W.M., sec. 22.
   Marster Springs Recreation Area, 20 acres, Located in Lake County, approximately 7 miles southwest of Paisley,
   T. 34 S., R. 18 E., W.M., sec. 16.
   Lee Thomas Recreation Area, 40 acres, Located in Lake County, approximately 16 miles southwest of Paisley,
   T. 34 S., R. 16 E., W.M., sec. 28.
   Thompson Reservior Recreation Area, 40 acres, Located in Lake County, approximately 12 miles south of Silver Lake,
   T. 30 S., R. 14 E., W.M., sec. 20.
   Deadhorse and Campbell Lakes Recreation Area, 340.45 acres, Located in Lake County, approximately 17 miles southwest of Paisley,
   T. 35 S., R. 16 E., W.M., sec. 1 and T. 35 S., R. 17 E., W.M., sec. 6.
   Warner Administrative Site, 40 acres, Located in Lake County, approximately 10 miles east of Lakeview,
   T. 39 S., R. 21 E., W.M., sec. 3.
   Aspen Cabin Administrative Site, 10 acres, Located in Lake County, approximately 10 miles northeast of Lakeview,
   T. 38 S., R. 21 E., W.M., sec. 12.
   Willow Creek Administrative Site, 40 acres, Located in Lake County, approximately 10 miles southeast of Lakeview,
   T. 40 S., R. 21 E., W.M., secs. 13 and 14.
   Ingram Administrative Site, 20 acres, Located in Lake County, approximately 12 miles southwest of Paisley,
   T. 34 S., R. 17 E., W.M., sec. 30.
5. OR 21598, Secretarial Order of January 7, 1908, Currier Administrative Site, 10 acres, Located in Klamath County, approximately 20 miles west of Paisley,
   T. 33 S., R. 15 E., W.M., sec. 14.

The withdrawals currently segregate the lands from operation of the mining laws, but not the mineral leasing laws and some of the lands are closed to operation of the public land laws generally. The Forest Service requests no changes in the purpose or segregative effect of the withdrawals except that the lands be opened to operation of the public land laws generally where they are presently closed.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal continuations may present their views in writing to the undersigned officer at the address specified above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and their resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawals will be continued and if so, for how long. The final determination on the continuation of the withdrawals will be published in the **Federal Register.** The existing withdrawals will continue until such final determination is made.

Robert E. Mollohan,

Acting Chief, Branch of Lands and Minerals Operations.

Dated: September 22, 1987.

Proposed Continuation of Withdrawal; Washington

ACTION: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service proposes that all or portions of seven separate land withdrawals continue for an additional 20 years and requests that the lands involved remain closed to mining and, where closed, be opened to surface entry.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503-231-6905.

The Forest Service proposes that the following identified land withdrawals be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The following described lands and projects are involved:

Mt. Baker National Forest

1. OR 22107(WASH), Secretarial Order of October 24, 1908. French Creek Administrative Site, 30 acres. Located in Snohomish County, 17 miles northeast of Arlington.
T. 32 N., R. 8 E., W.M.,
24 Sec. 15.

2. OR 22108(WASH), Secretarial Order of November 23, 1906. Station 43, 40 acres. Located in Snohomish County, 20 miles southeast of Arlington.
T. 30 N., R. 8 E., W.M.,
Sec. 23.

Snoqualmie National Forest

3. WASH 01220-A, Public Land Order No. 1710 of August 6, 1958. Snoqualmie Pass-Denny Creek Recreation Areas, 1,322.12 acres. Located in King and Kittitas Counties, 55 miles northeast of Tacoma.
T. 22 N., R. 11 E., W.M.
Sec. 4, 5, and 8 and T. 23 N., R. 11 E., W.M.,
Sec. 34.

4. OR 1295(WASH), Public Land Order No. 4568 of January 16, 1969. South Fork Snoqualmie (Alpental) Recreation Area, 2,679.56 acres. Located in King County, 50 miles northeast of Tacoma.
T. 23 N., R. 10 E., W.M.,
Sec. 24; and T. 23 N., R. 11 E., W.M.,
Secs. 19, 20, 21, and 28 through 33 inclusive.

5. OR 5049(WASH), Public Land Order No. 4840 of June 1, 1970. Snoqualmie Pass-Denny Creek Recreation Area Addition, 264.78 acres. Located in King County, 55 miles northeast of Tacoma.
T. 22 N., R. 11 E., W.M.,
Secs. 5 and 8.

Kaniksu National Forest

6. WASH 04290, Public Land Order No. 3202 of August 19, 1963. South Skookum Lake Campground, 50 acres. Located in Pend Oreille County, 20 miles northwest of Newport.
T. 33 N., R. 44 E., W.M.,
Sec. 1.

7. OR 1293(WASH), Public Land Order No. 4319 of November 14, 1967. Pioneer Park Campground, 37.10 acres. Located in Pend Oreille County, 3 miles north of Newport.
T. 31 N., R. 45 E., W.M.,
Sec. 1.

The withdrawals currently segregate the lands from operation of the mining laws, and some of the lands are closed to operation of the public land laws generally. The Forest Service requests no changes in the purpose or segregative effect of the withdrawals except that the lands be opened to operation of the public land laws generally where they are presently closed.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions or objections in connection with the proposed withdrawal continuations may present their views in writing to the undersigned officer at the address specified above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and their resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine

Meeting; Ukiah, CA, District Advisory Council

AGENCY: Bureau of Land Management. Interior.

ACTION: Notice of meeting, Ukiah, California, District Advisory Council.

SUMMARY: Pursuant to Pub. L. 94–579 and 43 CFR Part 1780, the Ukiah District Advisory Council will meet in Arcata, Monday, October 26, 1987. The meeting will include a field trip to public lands on the Samoa Peninsula.

DATE: The meeting will begin at 9:00 a.m. and adjourn at 4:00 p.m. Monday, October 26, 1987.

ADDRESS: The meeting will be held at the Bureau of Land Management Office, 1125 16th Street, Arcata, California.

FOR FURTHER INFORMATION CONTACT: Barbara Taglio, Ukiah District Office, Bureau of Land Management, 555 Leslie Street, Ukiah, California 95482, (707) 462–3873.

SUPPLEMENTARY INFORMATION: The Samoa Peninsula is an area of public land currently being studied by BLM in the Arcata Resource Management Plan. An off-road vehicle use area is proposed within this 300-acre area. Approximately 40 acres of rare plant habitat and 90 acres of wetlands are also found here.

The meeting is open to the public. Individuals may submit oral or written comments for the Council's consideration. Opportunity for oral comments will be provided at 1:30 p.m. Summary minutes of the meeting will be maintained by the Ukiah District Office and will be available for inspection and reproduction within 30 days of the meeting.

Date: September 23, 1987.

Alfred W. Wright,

District Manager.

Sec. 29, Lots 1 thru 12, SE¼SW¼, SW¼SE¼.

639.09 acres.
County—Mariposa.
Mineral Reservation—All.

Upon publication of this Notice of Realty Action in the *Federal Register* as provided in 43 CFR 2720.1-1(b), the mineral interests owned by the United States in the private lands covered by the application shall be segregated to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. The segregative effect of the application shall terminate by publication of an opening order in the **Federal Register** specifying the date and time of opening; upon issuance of a patent or other document of conveyance to such mineral interests; or two years from the date of filing of the application, whichever occurs first.

Date: September 23, 1987.

Nancy J. Alex,

Chief, Lands Section Branch of Adjudication and Records.

BILLING CODE 4310-40-M

[U-55673; U-61448; UT-040-7-4212-14]

Realty Action; Sale of Public Lands in Beaver County, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Under section 203 of the Federal Land Policy and Management Act of 1976 (43 USC 1713), two parcels of public land described as S½ SE¼ NW¼ Sec. 23, T. 29 S., R. 8 W., SLM, Utah containing 20 acres more or less (Parcel 1, U-61448) and SW¼ SE¼, SE¼ SW¼, Sec. 14 and NE¼ NW¼, N½ SE¼ NW¼ Sec. 23, T. 29 S. R 8 W., SLM, Utah containing 140 acres more or less (Parcel 2, U-55673) are proposed for sale by competitive bidding at no less than the appraised fair market value of $5,000.00 for Parcel 1 and $21,000.00 for Parcel 2. The lands described are hereby segregated from all forms of appropriation under the public land laws, including the mining laws, pending disposition of this action.

SUMMARY: The purpose of the sale is to dispose of public land that is difficult and uneconomical to manage by a government agency.

DATES: Comments should be submitted by November 17, 1987. The sale will be held on December 1, 1987 at 10:00 a.m.

ADDRESS: Detailed information concerning the sale, including bidding procedures, is available at the Beaver River Resource Area Office, 444 South Main Street, Cedar City, Utah 84720, (801) 586-2458. The Beaver River Resource Area Office is also the location of the sale and the address to which comments should be sent.

SUPPLEMENTARY INFORMATION: The terms and conditions applicable to the sale are:

1. The mineral estate shall be retained in Federal ownership, with the right to prospect for, mine, and remove the same under applicable law and such regulations as the Secretary may prescribe.

2. A right-of-way thereon shall be reserved for ditches and canals constructed by authority of the United States, Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

3. An access right-of-way 66 feet in width shall be reserved along the east boundary of Parcel 1 from the Utah Highway 21 north to Parcel 2.

4. Title transfer will be subject to valid existing rights, including oil and gas lease U-52973 on both parcels and rights-of-way U-0147757 and U-037441 on Parcel 1

Unsold parcels will be offered competitively on a continuing basis until sold or withdrawn from the market at the Beaver River Resource Area Office. Sale will be by sealed bid. Sealed bids will be opened on the first and third Tuesdays of each month at 10:00 a.m. All bids must be received at the office no later than 4:30 p.m. on the day before the sale

Any comments received during the comment period will be evaluated and the State Director may vacate or modify this realty action. In the absence of any objections, this realty action notice will be the final determination of the Department of the Interior.

Date: September 21, 1987.

Paul W. Swapp,

Acting District Manager

BILLING CODE 4310-DQ-M

[MT-920-07-4111-11; MTM 64858]

Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Pub. L. 97-451, a petition for reinstatement of oil and gas lease MTM 64858, Petroleum County, Montana, was timely filed and accompanied by the required rental accruing from the date of termination.

No valid lease has been issued affecting the lands. The lessee has agreed to new lease terms for rentals and royalties at rates of $5 per acre and 16⅔% respectively. Payment of a $500 administration fee has been made.

Having met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective as of the date of termination, subject to the original terms and conditions of the lease, the increased rental and royalty rates cited above, and reimbursement for cost of publication of this Notice.

Dated: September 24, 1987.

Karen L. Skauge

Acting Chief Fluids Adjudication Section

[FR Doc. 87-22597 Filed 9-30-87; 8:45 am]

BILLING CODE 4310-DN-M

[ID-010-07-4212-14; I-20590, I-20598, I-20599]

Realty Action; Sale of Public Land in the Boise and Gem Counties, ID

AGENCY: Bureau of Land Management, Idaho.

ACTION: Notice of action—Amendment of the Black Canyon Managment Framework Plan (MFP), and the McCall Unit Resource Analysis (URA)/Notice of Realty Action, Sale of Public Land in Boise and Gem Counties, Idaho.

NOTICE: Notice is hereby given that the BLM has amended the Black Canyon MFP to allow for sale of certain public lands in Gem County, Idaho. Notice is further hereby given that the BLM has amended the McCall Unit Resource Analysis to allow for sale of certain public lands in Boise County, Idaho.

SUMMARY: The following-described parcels have been examined and through the public-supported land use planning process have been determined to be suitable for direct sale under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at not less than the appraised fair market value as determine by an appraisal:

Parcel	Legal description	Offered to	Fair market value
I-20590	T. 8 N., R. 4 E., B.M., sec. 15, lot 2. (.03 acres)	Mrs. Virginia Hamilton-Durland	$150.00
I-20598	T. 6 N., R. 3 W., B.M., sec. 14, lots 8, 9. (3.47 acres)	Joseph & Patricia Bennie	1,040.00
I-20599	T. 6 N., R. 3 W., B.M., sec. 10, lot 1. (1.67 acres)	Toivo W. Makela	500.00

DATES: The sale offering will be held on Tuesday, December 1, 1987, at 10:00 a.m.

The previously-described lands are hereby segregated from appropriation under the public land laws including the mining laws for a period of 270 days or until patent is issued, whichever comes first.

ADDRESS: The sale of offering will be held at the BLM Boise District Office, 3948 Development Avenue, Boise, Idaho 83705.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning the conditions of the sale can be obtained by contracting Delores Blom or Dick Geier at (208) 334-1582.

SUPPLEMENTARY INFORMATION: When patented, the lands will be subject to the following reservations:

Parcel and Reservations

I-20590
1. Ditches and canals

I-20598, I-20599
1. Ditches and canals
2. Oil and gas resources.

Sale parcel I-20590 is being offered directly to Mrs. Virginia Hamilton-Durland as a result of inadvertent unauthorized use of public land on which a portion of a cabin sits.

Sale parcel I-20598 is being offered directly to Joseph and Patricia Bennie and sale parcel I-20599 is being offered directly to Toivo W. Makela because of inadvertent unauthorized use of public land between private land and the Black Canyon Canal and also the lack of legal access.

Each bid deposit must be at least 30 percent (30%) of fair market value. Acceptance of the direct sale offer will constitute an application for conveyance of the mineral estate. An additional $50.00 non-returnable mineral conveyance processing fee is required. The filing fee and deposit must be paid by certified check, money order, bank draft, or cashier's check. Offers will be rejected if accompanied by a personal check.

The remainder of the full price shall be paid within 180 days of the date of the sale. Failure to pay the full price within the 180 days shall disqualify the purchaser and cause the bid deposit to be forfeited to the BLM.

It has been determined that sale parcel I-20590 contain no known locatable or saleable mineral values The parcel is considered to be potentially valuable for geothermal resources, but due to its small size these resources have no additional value other than that of the land. Conveyance of the mineral estate will occur simultaneously with the sale of the land.

It has been determined that sale parcels I-20598 and I-20599 contain no known locatable or saleable mineral values. Conveyance of the mineral estates of no known value will occur simultaneously with the sale of the land.

Planning Protest

Any party that participated in the plan amendment and is adversely affected by these amendments may protest this action only as it affects issues submitted for the record during

the planning process. The protest shall be in writing and filed with the Director (760), Bureau of Land Management, 1800 C Street, NW., Washington, DC 20240, within 30 days of the date of publication of this notice in the **Federal Register**.

Sale Comment

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments regarding the sale to the District Manager, Bureau of Land Management, 3948 Development Avenue, Boise, Idaho 83705. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any planning protests or objections regarding the sale, this realty action will become the final determination of the Department of the Interior and the planning amendments will be effective.

Dated: September 16, 1987.

BILLING CODE 4310-JB-M

Fish and Wildlife Service

Receipt of Applications for Permits

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, et seq.):

PRT-719658

Applicant: Cedar Grove Farm, Stillwater, MN

The applicant requests a permit to import one female snow leopard (*Panthera uncia*) from the Assiniboine Zoo, Winnipeg, Manitoba, Canada, for captive breeding.

PRT-721273

Applicant: National Zoo, Washington, DC

The applicant requests a permit to import one male maned wolf (*Chrysocyon brachyurus*) born in the wild in Brazil and now held in captivity at Curitiba Zoo, Curitiba, Parana, Brazil. The import would introduce a new bloodline into the United States population and enhance the propagation of the species.

PRT-721599

Applicant: San Diego Zoological Society, San Diego, CA

The applicant requests a permit to import two male and three female captive born North China sika deer (*Cervus nippon mandarinus*) from the Chengdu Zoo, People's Republic of China, for the purpose of establishing a captive breeding population in North America.

PRT-721784

Applicant: James R. Grimm, Paradise Valley, AZ

The applicant requests a permit to import a sport-hunted trophy of a bontebok (*Damaliscus dorcas dorcas*), culled from the captive herd of Mr. F.W.M. Bowker, Jr., Grahamstown, Republic of South Africa, for the purpose of enhancement of survival of the species.

PRT-721703

Applicant: San Antonio Zoological Gardens and Aquarium, San Antonio, TX

The applicant requests a permit to purchase in interstate commerce one captive born male jaguarundi (*Felis yagouaroundi*) from the Woodland Park Zoological Gardens, Seattle, Washington, for the purpose of captive propagation and exhibition.

PRT-721795

Applicant: Lowery Park Zoological Gardens, Tampa, FL

The applicant requests a permit to import one female captive-born Malayan tapir (*Tapirus indicus*) from the Metropolitan Toronto Zoo, Toronto, Ontario, Canada, for enhancement of the propagation of the species through captive breeding.

PRT-721706

Applicant: Marine World Foundation, Vallejo, CA

The applicant requests a permit to import one male and two female Asian elephants (*Elephas maximus*) from the Timber Corporation, Rangoon, Burma, for the purpose of enhancment of propagation of the species through captive breeding and enhancement of survival of the species through conservaton education. All of these elephants were born in captivity in a Timber Corporation logging camp.

PRT-721707

Applicant: International Animal Exchange, Ferndale, MI

The applicant requests a permit to import two female white Bengal tigers (*Panthera tigris tigris*) from the Nandankanan Biological Park, Bhubneshwar, Orissa, India, for the purpose of enhancement of the propagation and survival of the species through captive propagation, public exhibition and education.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 611, 1000 North Glebe Road, Arlington, Virginia 2201, or by writing to the Director, U.S. Fish and Wildlife Service of the above address.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate applicant and PRT number when submitting comments.

Dated: September 25, 1987.

Larry LaRochelle,

Acting Chief, Branch of Permits, Federal Wildlife Permit Office.

Minerals Management Service

Meeting; Outer Continental Shelf Advisory Board, North Atlantic Regional Technical Working Group

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of Meeting of North Atlantic Regional Technical Working Group Committee.

SUMMARY: The Atlantic Outer Continental Shelf (OCS) Region has scheduled a meeting of its North Atlantic Regional Technical Working Group (NARTWG) Committee. The

VOL 52 ISS 190 OCT 1 1987 UMI

committee will provide input to the Regional Director, Atlantic OCS Region on the focus of the draft environmental impact statement (DEIS) for proposed Oil and Gas Lease Sale 96 (North Atlantic). The roundtable discussion will include topics such as area to be analyzed in the DEIS, leasing alternatives, Georges Bank moratorium, Canadian portion of Georges Bank, Fisheries Training Program, and the Environmental Studies Program.

DATE: October 29, 1987.

ADDRESSES: The meeting will begin at 9 a.m. at the following location: Town Room, Holiday Inn—Albany—Central, 1614 Central Avenue, Albany, New York 12205.

The Atlantic OCS Region is at the following location: Minerals Management Service, Atlantic OCS Region, 1951 Kidwell Drive, Suite 601 Vienna, Virginia 22180.

FOR FURTHER INFORMATION CONTACT: Marsha Polk, RTWG Coordinator, Atlantic OCS Region, at the Virginia address above, telephone (703) 285–2165 or FTS 285–2165.

SUPPLEMENTARY INFORMATION: The NARTWG is part of the OCS Advisory Board and was established to advise the Minerals Management Service Director on technical matters of Regional concern regarding offshore prelease and postlease sale activities in the North Atlantic. The NARTWG membership consists of representatives from Federal Agencies, the Coastal States of Maine through New Jersey, the petroleum industry, and other private interests.

Federal Advisory Committee Act (Public Law 92–463)

Dated: September 25, 1987.

Bruce G. Weetman,

Regional Director, Atlantic OCS Region.

BILLING CODE 4310–MR–M

Development Operations Coordination Document; Odeco Oil and Gas Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that ODECO Oil and Gas Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 8749, Block 106, Main Pass Area, offshore Mississippi. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from and onshore base located at Venice, Louisiana.

DATE: The subject DOCD was deemed submitted on September 22, 1987. Comments must be received within 15 days of the date of this Notice of 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules govering practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: September 23, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

National Park Service

Availability of Final Environmental Impact Statement; Sequoia-Kings Canyon National Parks, CA and NV

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act, the National Park Service, Department of the Interior has prepared a final environmental impact statement for the Development Concept Plan for the Grant Grove and Redwood Mountain areas of Sequoia-Kings Canyon National Parks in Fresno and Tulare Counties, California.

Four alternatives have been examined ranging from no action (health and safety measures only) to developing low-profile units or a hotel or combination of hotel and dispersed units. The proposed action recommends rehabilitation of some existing units, construction of new one and two story units removed from the Grant Grove meadow; relocation of other visitor support facilities away from the meadow; consolidation and upgrading of employee housing; expanding administrative and maintenance space; improving access, circulation and visitor facilities at several critical sites; and leaving Redwood Mountain essentially undeveloped.

DATES: The 30 day no action period following the Environmental Protection Agency's notice of availability of the final EIS will end on or about November 9, 1987.

ADDRESSES: Inquiries on the FEIS should be directed to: Superintendent, Sequoia-Kings Canyon National Parks, Three Rivers, California 93271.

Copies of the FEIS are available for inspection at the park headquarters in Three Rivers, the Grant Grove Visitor Center and in libraries in the park vicinity. Copies are also available at the following addresses: Western Regional Office, National Park Service, Attn: Division of Planning, Grants, and Environmental Quality, P.O. Box 36063, 450 Golden Gate Avenue, Room 14033, San Francisco, California 94102.

Date: September 11, 1987.

Stanley T. Albright,

Regional Director, Western Region, National Park Service.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-343 (Final)]

Tapered Roller Bearings and Parts Thereof, and Certain Housings Incorporating Tapered Rollers From Japan

Determination

On the basis of the record [1] developed in the subject investigation, the Commission unanimously determines, pursuant to section 735(b)(1) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)(1)), that an industry in the United States is materially injured by reason of imports from Japan of tapered roller bearings and parts thereof, and certain housings incorporating tapered rollers, all the foregoing provided for in items 680.3040, 680.3932, 680.3934, 680.3938, 680.3940, 681.1010, or 692.3295 of the Tariff Schedules of the United States annotated, that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).

Background

The Commission instituted this investigation effective March 23, 1987, following a preliminary determination by the Department of Commerce that imports of the subject merchandise from Japan are being sold at LTFV within the meaning of section 731 of the Act (19 U.S.C. 1673). Notice of the institution of the Commission's investigation and a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of April 8, 1987 (52 FR 11347). The hearing was held in Washington, DC, on May 12, 1987, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on September 23, 1987. The views of the Commission are contained in USITC Publication 2020 (September 1987), entitled "Tapered Roller Bearings and Parts Thereof, and Certain Housings Incorporating Tapered Rollers from Japan: Determination of the Commission in Investigation No. 731-TA-343 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

Issued: September 23, 1987.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 87-22650 Filed 9-30-87; 8:45 am]

BILLING CODE 7020-02-M

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[Investigation No. 337-TA-253]

Import Investigations; Certain Electrically Resistive Monocomponent Toner and "Black Powder" Preparations Therefor

AGENCY: U.S. International Trade Commission.

ACTION: Decision to grant in part a request for an extension of time in which to certify the record in this investigation to the Commission and to file with the Commission an initial determination as to whether there is a violation of section 337 of the Tariff Act of 1930.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to grant in part a request, made by Order No. 49 of the presiding administrative law judge (ALJ), to extend the deadline for issuance of the ALJ's final initial determination in this investigation. The deadline is extended by 21 days, to November 10, 1987.

FOR FURTHER INFORMATION CONTACT: Edwin J. Madaj, Jr., Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0148.

SUPPLEMENTARY INFORMATION: This investigation had previously been declared "more complicated" and the deadline for completion of the investigation extended to the full 18 months permitted by statute. On September 16, 1987, the presiding administrative law judge (ALJ) issued an order, Order No. 49, requesting leave to issue his final initial determination (ID) on November 20, 1987, 31 days after the deadline contemplated by Commission rule 210.53(a), which is October 20, 1987. The bases for the request were essentially that the ALJ had erroneously believed the deadline had been extended by the Commission, and that the investigation had proceeded to a point where it would be virtually impossible to issue a well-reasoned ID by the existing deadline, October 20, 1987. Because the statutory deadline had already been extended to the full 18 months permitted by statute for more complicated cases, any extension of time to issue the ID would come at the expense of the Commission's time to review the ID. The Commission has

VOL 52 ISS 190 OCT 1 1987 UMI

determined to grant the request in part, extending the deadline 21 days to November 10, 1987, for reasons stated in its Action and Order and Opinion.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and Part 210 of the Commission rules (19 CFR Part 210).

Copies of the Commission's Action and Order, Opinion, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161.

Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

By order of the Commission.

Kenneth R. Mason

Secretary.

Issued: September 25, 1987.

BILLING CODE 7020–02–M

NATIONAL SCIENCE FOUNDATION

Meeting; Advisory Committee for Astronomical Sciences

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Astronomical Sciences.

Date and Time: October 22, 1987, 9:00 am–5:00 pm; October 23, 1987, 9:00 am–4:00 pm.

Place: National Science Foundation, Room 540.

Type of Meeting: October 22, 1987, 9:00 am–5:00 pm, Open; October 23, 1987, 9:00 am–11:00 am, Closed; 11:00 am–4:00 pm, Open.

Contact Person: Dr. Laura P. Bautz, Director, Division of Astronomical Sciences, Room 615, National Science Foundation, Washington, DC 20550 (202/357–9488).

Summary Minutes: May be obtained from the contact person at the above address.

Purpose of Committee: To provide advice and recommendations concerning research programs, proposals, and projects in NSF-funded astronomy with the objective of achieving the highest quality forefront research for the funds allocated. To provide advice and recommendations concerning short-range and long-range plans in astronomy, including a recommendation of relative priorities

Agenda:

Thursday, October 22

9:00 am–5:00 pm—Status of FY 88 budget, Report of Subcommittee for Oversight Review of the Astronomy Centers Section, Science and Technology Centers, FY 88 Programs and Impacts for the Research Section and the National Astronomy Centers.

Friday, October 23

9:00 am–11:00 pm—Closed: Review of a Proposal.

11:00 am–4:00 pm—Report on the Status of the Future of NOAO. Continuation of Discussions from Previous Day.

Reason for Closings: The proposal being reviewed includes information of a proprietary or confidential nature, including technical information: financial data, such as salaries: and personal information concerning individuals associated with the proposal. These matters are within exemptions (4) and (6) of the Government in the Sunshine Act.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

Advisory Panel for Biochemistry; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Biochemistry.

Date: Monday and Tuesday, October 19 and 20, 1987 from 9:00 am to 5:00 pm.

Place: St. James Hotel, Washington, DC.

Type of Meeting: Closed.

Contact Person: Harold L. Segal, H. T. Huang, Program Directors and Estella K. Engel, Associate Program Director, Biochemistry Program, Room 325, Telephone (202) 357–7945.

Purpose of Advisory Panel: To provide advice and recommendations concerning support for Biochemistry research proposals.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b (c), Government in the Sunshine Act.

September 28, 1987.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

Advisory Panel for Cellular Physiology; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Cellular Physiology.

Date and Time: October 19, 20, 21, 1987—8:30 a.m. to 5 p.m. each day.

Place: Room 1242, National Science Foundation, 1800 G St., NW., Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Maryanna P. Henkart, Program Director, Cellular Physiology Program, (202) 357–7377, Room 321, National Science Foundation, Washington, DC 20550.

Purpose of Advisory Panel: To provide advice and recommendations concerning support for research in Cellular Physiology.

Agenda: To review and evaluate research proposals and projects as part of the selection process of awards.

Reason for Closing: The proposals being reviewed include information of a proprietary of confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Rebecca Winkler,

Committee Management Officer.

[FR Doc. 87–22690 Filed 9–30–87; 8:45 am]

BILLING CODE 7555–01–M

Committee on Equal Opportunities in Science and Engineering; Meeting

Name: Committee on Equal Opportunities in Science and Engineering.

Place: Room 540, National Science Foundation, 1800 G Street NW., Washington, DC 20550.

Date: October 19, 20 and 21, 1987.

Time:

October 19: Subcommittee on Disabled, 1:30–4:30 p.m.

October 20: Subcommittee on Minorities, 9:00–11:30 a.m.

Full Committee Meeting, 1:30–4:30 p.m.

October 21: Full Committee Meeting, 9:00–11:30 a.m.

Subcommittee on Women, 1:30–4:30 p.m.

Type of Meeting: Open.

Contact: Mary M. Kohlerman, Executive Secretary of the CEOSE, National Science Foundation, Room 635, Telephone: 202/357–7066.

Purpose of Meeting: To provide advice to the Foundation on policies and activities to encourage full participation of groups currently underrepresented in scientific, engineering, professional and technical fields.

Summary Minutes: May be obtained from Executive Secretary.

Agenda: To review progress by the subcommittees and to meet with the Director and other NSF staff.

September 28, 1987.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 87–22687 Filed 9–30–87; 8:45am]

BILLING CODE 7555–01–M

Advisory Panel for Integrative Neural Systems Program; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Integrative Neural Systems Program.

Date and Time: October 21–23, 1987, 9:00 a.m.–5:00 p.m. each day.

Place: National Science Foundation, 1800 G Street NW., Washington, DC, Room 543.

Type of Meeting: Part Open—Closed 10/21—9:00 a.m. to 5:00 p.m.; Closed 10/22—9:00 a.m. to 5:00 p.m.; Open 10/23—9:00 a.m. to 11:00 a.m.; Closed 10/23—11:00 a.m. to 5:00 p.m.

Contact Person: Dr. Nathaniel G. Pitts, Program Director, Integrative Neural Systems Program, Room 320, National Science Foundation, Washington, DC 20550, Telephone (202) 357–7040.

Minutes: May be obtained from contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning support for research integrative neural systems.

Agenda: Open—General discussion of the current status and future plans of the Integrative Neural Systems Program.

Closed—To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions 4 and 6 of the Government Sunshine Act.

September 28, 1987.

BILLING CODE 7555–01–M

Advisory Committee for Ocean Sciences (ACOS); Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Ocean Sciences (ACOS).

Date and Time: October 19–20, 1987—1:00am to 5:00pm—October 19, 1987; 8:30am to 5:00pm—October 20, 1987.

Place: Main Conference Room—American Institute of Architects, 1735 N.Y. Avenue NW., Washington, DC 20006.

Type of Meeting: Open.

Contact Person: Dr. M. Grant Gross, Director, Division of Ocean Sciences, Room 609, National Science Foundation, Washington, DC, Telephone: 202/357–9639.

Summary Minutes: May be obtained from the contact person.

Purpose of Committee: To provide advice and recommendations concerning oceanographic research and its support by the NSF Division of Ocean Sciences.

Agenda: The Committee will hold sessions as noted above. It will hear presentations and status reports on various topics of current interest from officials and representatives from NSF, other Departments and Agencies and, as appropriate, from other organizations active in ocean science research as well as from subcommittees and/or working groups. Topics to be presented and discussed include: Overview and update of FY–87 program activities; Profile of FY–88 Ocean Sciences budget and prospects for FY–89; Global Geosciences and the Global Change Program; Long-Range Planning activities; Reports on other GEO Advisory Committees—by liaison members; GEO Quarterly Review; Oversight Review Schedule for OCE activities; Presentation on TOGA Program activities. The Committee will take appropriate action on these and other matters as may be required and also conduct necessary administrative functions with respect to: approval of minutes of the previous meeting; determination of time and place for the next meeting as well as other appropriate business.

September 28, 1987.

M. Rebecca Winkler,
Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–272–OLA and 50–323–OLA]

Reconstitution of Atomic Safety and Licensing Appeal Board; Pacific Gas & Electric Co. (Diablo Canyon Nuclear Power Plant Units 1 and 2)

Notice is hereby given that, in accordance with the authority conferred by 10 CFR 2.787(a), the Chairman of the Atomic Safety and Licensing Appeal Panel has reconstituted the Atomic Safety and Licensing Appeal Board for this operating license amendment proceeding. As reconstituted, the Appeal Board for this proceeding will consist of the following members:

Alan S. Rosenthal, Chairman
Thomas S. Moore
Howard A. Wilber.

C. Jean Shoemaker
Secretary to the Appeal Board.

Dated: September 25, 1987.

[FR Doc. 87–22668 Filed 9–30–87; 8:45 am]
BILLING CODE 7590–01–M

[Docket Nos. 50–387 and 50–388]

Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity For Hearing; Pennsylvania Power & Light Co. and Allegheny Electric Cooperative Inc.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF–14 and NPF–22 issued to Pennsylvania Power and Light Company, and Allegheny Electric Cooperative Inc., for operation of Susquehanna Steam Electric Station (SSES), Units 1 and 2, located in Luzerne County, Pennsylvania.

The proposed amendments would revise the SSES Technical Specifications to permit changes to 125 volt dc battery profile contained in the Technical Specifications. The proposed changes were previously published in bi-weekly **Federal Register** Notice dated July 15, 1987 (52 FR 26595), and September 23, 1987 (52 FR 35802) in accordance with the licensee's application for amendment dated June 10, 1987, and as revised by a letter dated September 1, 1987. By a letter dated September 23, 1987, the licensee has again revised its request for an amendment and has confirmed that the required battery load profiles can be met with the existing 125 volt dc batteries. The licensee has had difficulty in obtaining qualified new batteries of a larger capacity and has therefore withdrawn its proposal to install two new batteries.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's revised request and concurs with the following basis and conclusion provided

by the licensee in its September 23, 1987 submittal.

The proposed change does not:

(1) Involve an increase in the probability or consequences of an accident previously evaluated. Final Safety Analysis Report (FSAR) Subsection 8.3.2.1.1.4 states that the station batteries have sufficient capacity without the charger to independently supply the required loads for four hours. The Technical Specifications require that the batteries be surveilled to dummy loads which are greater than the design loads. An assessment has been performed by our engineering department which verifies that the batteries have adequate capacity to power the actual loads on the 125 V DC system. The new load Specifications envelop the actual loads(;)

(2) Create the possibility of a new or different kind of accident from any previously evaluated. As stated in Part (1), the batteries have sufficient capacity to power the actual battery loads thus enabling them to perform their intended function. Any postulated accident resulting from this change is bounded by previous analysis(; and)

(3) Involve a reduction in the margin of safety. IEEE 485 requires that the related battery capacity include a margin for aging of the battery and the temperature of the batteries' environment at the beginning of battery life. This margin allows replacement of the battery when its capacity is decreased to 80% of its rated capacity (100% design load). As * * * if the battery capacity is corrected for a temperature of 65°F (the lowest observed electrolyte temperatures), the batteries currently have at least a 25% margin in accordance with IEEE 485. Also, based upon the vendor's aging curves it is not expected that the batteries will significantly deteriorate during the next 3–4 years. With the increased battery loads and the installation of the ATWS ARI System it can be concluded that the overall margin of safety of the plant is improved.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By November 2, 1987, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to inervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission,

Washington, DC 20555, Att: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Walter R. Butler, Director, Project Directorate I–2, Division of Reactor Projects I/II: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i) through (v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated June 10, 1987, as amended and supplemented September 1 and 23, 1987, which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Dated at Bethesda, Maryland, this 25th day of September.

For The Nuclear Regulatory Commission.

Walter R. Butler,

Director, Project Directorate I–2, Division of Reactor Projects I/II.

[FR Doc. 87–22675 Filed 9–30–87; 8:45 am]

BILLING CODE 7590–01–M

OFFICE OF MANAGEMENT AND BUDGET

Cost of Hospital and Medical Care and Treatment Furnished by the United States; Certain Rates Regarding Recovery From Tortiously Liable Third Persons

By virtue of the authority vested in the President by section 2(a) of the Act of September 25, 1962, (76 Stat. 593; 42 U.S.C. 2652), and delegated to the Director of the Office of Management and Budget by Executive Order No. 11541 of July 1, 1970, (35 FR 10737), the following three sets of rates are established for use in connection with the recovery, as authorized by such Act, from tortiously liable third persons of the cost of hospital and medical care and treatment furnished by the United States (Part 43 of Chapter I of Title 28 of the Code of Federal Regulations) through three separate Federal agencies. These rates have been established in accordance with the requirements of OMB Circular A–25, requiring reimbursement of the full cost of all services provided. This has been determined as follows:

(a) For the Department of Defense—historical costs and workload data developed through the Medical Expense and Performance Reporting System (MEPR) provide an operating cost base to which are added systemwide costs and allowances for actual inflation and pay raises to obtain the estimates for the fiscal year under review. The costs added are those items required by OMB Circular A–25: (1) Retirement costs for civilian personnel; and (2) an asset charge in lieu of a specific depreciation cost of fixed assets.

(b) For the Veterans Administration—the actual costs and per diem rates by type of care for the previous year are added to the estimated costs for depreciation of buildings and equipment, administrative overhead, interest on capital investment, and Government employee retirement and disability charges. These computed rates are then adjusted by the budgeted percentage change to arrive at the estimated rates for the fiscal year under review.

(c) For the Department of Health and Human Services—the sum of obligations for each cost center providing medical services is broken down into amounts attributable to inpatient care on the basis of the proportion of staff devoted to each. Total inpatient costs and outpatient costs thus determined are divided by the relevant workload statistic (inpatient day, outpatient visit) to produce the inpatient and outpatient rates. In calculating the rates, the Department's unfunded retirement liability costs, and capital and equipment depreciation costs were incorporated to conform to requirements contained in OBM Circular A–25. In addition, cost centers' obligations include all costs from all accounts—such as Medicare and Medicaid collections, and Contract Health funds used to support direct operations. Inclusion of these funds yields a more accurate indication of the cost of care in HHS facilities.

These rates represent the reasonable cost of hospital, nursing home, medical, surgical, or dental care and treatment (including prostheses and medical appliances) furnished or to be furnished:

(a) For such care and treatment furnished by the United States in Federal hospitals, nursing homes, and outpatient clinics, administered by any of the three Federal agencies—Department of Defense, Veterans Administration or Department of Health and Human Services.

(b) For such care and treatment furnished at Government expense in a facility not operated by the United States, the rates shall be amounts expended by the United States for such care and treatment.

	Effective October 1, 1987 and thereafter		
	DOD	VA	HHS
Hospital care per inpatient day:			
General medical care	$466	$473	$691
Surgical care		611	
Psychiatric care		236	
Intermediate care		190	
Neurology		393	
Rehabilitation medicine		372	
Blind rehabilitation		465	

	Effective October 1, 1987 and thereafter		
	DOD	VA	HHS
Alcohol and drug treatment		197	
Prescription		14	
Nursing home care		168	
Spinal cord injury care		524	
Burn Center, U.S. Army Institute of Surgical Research, Brooke Army Medical Center, Fort Sam Houston, Texas	1,891		
Outpatient medical and dental treatment:			
Outpatient visit	60	127	86

For 1988, the cost of separate clinic stops during the course of a single visit to a VA outpatient facility is consolidated into a single charge. Consistent with previous practice, the Department of Defense and Department of Health and Human Services rates do not consolidate all clinic stops.

For the period beginning October 1, 1987, the rates prescribed herein supersede those established by the Director of the Office of Management and Budget on September 27, 1986 (51 FR 35709).

Date: September 24, 1987.

James C. Miller III,

Director, Office of Management and Budget.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) Collection title: Employer's Quarterly or Annual Report of Contributions Under the RUIA
(2) Form(s) submitted: DC-1
(3) Type of request: Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection
(4) Frequency of use: Quarterly or annually
(5) Respondents: Businesses or other for-profit, Small businesses or organizations
(6) Annual responses: 2,387
(7) Annual reporting hours: 835
(8) Collection description: Railroad employers are required to make contributions to the RUI fund quarterly or annually equal to a percentage of the creditable compensation paid to each employee. The information furnished on the report accompanying the remittance is used to determine correctness of the amount paid.

Additional Information or Comments: Copies of the proposed forms and supporting documents may be obtained from Pauline Lohens, the agency clearance officer (312-751-4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Elaina Norden (202-395-7316), Office of Management and Budget, Room 3002, New Executive Office Building, Washington, DC 20503

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) Collection title: Application to Act as Representative Payee.
(2) Form(s) submitted: AA-5, G-478.
(3) Type of request: Revision of a currently approved collection.
(4) Frequency of use: On occasion.
(5) Respondents: Individuals or households, Businesses or other for-profit, Small businesses or organizations.
(6) Annual responses: 26,500.
(7) Annual reporting hours: 22,167.
(8) Collection description: Section 12 of the Railroad Retirement Act provides for the payment of benefits to a representative payee when an employee, spouse or survivor annuitant is incompetent or a minor. The collection obtains information used by the Board for selection of a representative payee and verification of an annuitant's capability to manage benefit payments.

Additional Information or Comments

Copies of the proposed forms and supporting documents can be obtained from Pauline Lohens, the agency clearance officer (312-751-4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Elaina Norden (202-395-7316), Office of Management and Budget, Room 3002, New Executive Office Building, Washington, DC 20503.

BILLING CODE 7905-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-24943; File No. SR-NASD-87-33]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.;

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on August 31, 1987, the National Association of Securities Dealers, Inc. ("NASD") filed with the

Securities and Exchange Commission ("Commission") the proposed rule change described in Items I, II, and III below, which have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD hereby files a proposed rule change, pursuant to section 19(b)(1) of the Act and Rule 19b–4 thereunder, to allow non-member banks to access the Municipal Bond Acceptance and Reconciliation Service ("MBARS"). MBARS, which was approved by the Commission on Jaunary 21, 1987 (Release No, 34–24022), is an extension of the NASD's Trade Acceptance and Reconciliation Service ("TARS") to accommodate over-the-counter ("OTC") transactions in municipal debt instruments that are eligible for processing through a registered national clearing agency. Currently, subscription to MBARS is limited to NASD member firms that are members of a registered clearing agency and have the requisite equipment to access the service.

II. Self-Regulatory Organization's Statement of the Propose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis For, the Proposed Rule Change

The purpose of the proposed rule change is to allow non-member banks to subscribe to MBARS on the same terms currently available to NASD member firms. This proposed rule change will not affect any of the operational features of MBARS which are detailed in the *MBARS User Guide*. That document was previously filed with the Commission as an exhibit to File No. SR–NASD–87–2, which the Commission approved to enable introduction of the MBARS enhancement to TARS.

Presently, member firms subscribing to TARS can receive MBARS at no additional cost. However, subscribers wishing only to receive MBARS must pay the prescribed fees for TARS plus the applicable equipment charges. The service fees for TARS and the relevant equipment charges are contained in Part IX of Schedule D to the NASD By-Laws. This aproach recognizes the fact that MBARS is merely an adaptation of TARS to a different class of securities eligible for processing through a clearing corporation. Hence, banks subscribing to MBARS would pay the same fees as member firms that subscribe exclusively to the MBARS service. As of August 1, 1987, approximately five NASD member firms were utilizing nine terminals as "MBARS-only" subscribers. Banks wishing to subscribe must still satisfy the existing MBARS requirement of membership in a clearing corporation for purposes of clearing municipal bond trades.

It should be recalled that MBARS was designed to support the clearance of municipal bond trades and to assist subscribers by providing on-line entry of trade date respecting transactions cleared through a registered clearing agency. In this way, MBARS introduced a greater degree of automation to the process of clearing OTC transactions in municipal bonds, particularly the process of resolving uncompared trades. Collectively, the various features of MBARS serve to expedite comparison and provide a cost-effective mechanism for processing OTC transactions in municipal bonds eligible for clearance through a clearing agency.

Commission approval of the instant filing will expand the universe of potential MBARS subscribers to non-member banks that are active in municipal bonds. Thus, more entities will be able to realize the efficiencies that result from subscription to MBARS. This serves to advance the public policy goals articulated in the statutory provisions that supported the Commission's approval of MBARS earlier this year. Accordingly, statutory support for the proposed broadening of access to MBARS can be found in sections 17A(a)(1)(A), (B), and (C) of the Act.

These provisions under section 17A contain the Congressional findings respecting a national system for clearance and settlement of securities transactions:

> [that] the prompt and accurate clearance and settlement of securities transactions, including the transfer of record ownership and the safeguarding of securities and funds related thereto, are necessary for the protection of investors and persons facilitating transactions by and acting on behalf of investors; [that] inefficient procedures for clearance and settlement impose unnecessary costs on investors and persons facilitating tansactions by and acting on behalf of investors; [and that] new data processing and communications techniques create the opportunity for more efficient, effective, and safe procedures for clearance and settlement.[1]

Additionally, expanded access to MBARS is supported by Section 15A(b)(6) of the Act and Municipal Securities Rulemaking Board ("MSRB") Rule G–12, subparagraphs (f) and (h). Section 15A(b)(6) requires national securities associations, such as the NASD, to promulgate rules designed to foster cooperation with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in, municipal securities. In that connection, subparagraph (f) of MSRB Rule G–12 concerns the use of automated comparison, clearance and settlement systems; subparagraph (h) concerns the resolution of open interdealer transactions.[2] Expanded access to MBARS will foster achievement of the statutory goals expressed in section 15A(b)(6) of the Act[3] and promote compliance with MSRB Rule G–12, particularly subparagraphs (f) and (h). Lastly, the NASD notes that section 19(g)(1)(B) of the Act mandates, among other things, that the NASD enforce compliance by its members with the rules of the MSRB.

The NASD submits that the foregoing provisions constitute adequate statutory bases for Commission approval of this filing.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that no competitive burden will arise from allowing non-member banks to access MBARS. A bank's decision to subscribe will be based upon an assessment of the costs/benefits of MBARS in relatin to the volume of its municipal bond transactions. Banks electing access to MBARS would be subject to the same terms, conditions, and fees that apply to NASD member firms subscribing only to MBARS. Hence, implementation of this

---

[1] Section 3(a)(12) of the Act defines the term "exempted securities" to include municipal securities. This provision also specifies that municipal securities shall not be deemed to be "exempted securities" for purposes of section 17A of the Act.

[2] *See, e.g.*, Securities Exchange Act Release No. 20365 (November 14, 1983), 48 FR 52531, which approved proposed changes to MSRB Rules G–12 and G–15 establishing a timetable for integrating municipal securities brokers and dealers into the National Clearance and Settlement System.

[3] Section 15B(b)(2)(C) of the Act establishes a parallel requirement respecting the rules promulgated by the MSRB.

proposal would assure fair treatment of all authorized subscribers.

C. Self-Regulatory Oraganization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received respecting this proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The NASD requests the Commission to find good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of the filing. This request is grounded upon several factors. First, the NASD desires to expedite realization of the benefits that MBARS will offer to banks that are active in municipal bonds. Second, the filing does not contemplate any modification in operational procedures or in any festures previsously described in the *MBARS User Guide*. Third, the NASD believe that there is no policy question raised by the prospect of expanded access subject to the same terms, conditions and fees that currently apply to NASD member firm subscribers. Fourth, the NASD points out that the Commission has previously reviewed and approved not only MBARS, but the automated comparison services for municipal securities transactions offered by the National Securities Clearing Corporation, Midwest Clearing Corporation, Pacific Clearing Corporation, the Depository Trust Company, and the Stock Clearing Corporation of Philadelphia.[4] In light of the foregoing factors, the NASD believes that accelerated approval is appropriate to promote achievement of the statutory goals articulated in sections 17A(a)(1)(A)-(C), 15A(b)(6), and 19(g)(1)(B) of the Act.

The Commission finds that the proposed rule change is conistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of sections 17A(a)(1)(A)-(C), 15A(b)(6), and 19(g)(1)(B). In addition, the Commission agrees that the proposed rule change promotes compliance with MSRB Rule G–12. The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after publication of the notice of filing in the **Federal Register** in that expansion of access to MBARS to non-member banks will allow those banks to realize the benefits of an automated comparison system for municipal securities transactions. The NASD has advised the Commission that 33 non-member banks that are clearing corporation participants are interested in subscribing to MBARS.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and coyping get the principal office of the NASD. All submissions should refer to File No. SR–NASD–87–33 and should be submitted by October 22, 1987.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Dated: September 25, 1987.

Shirley E. Hollis,

Assistant Secretary.

[4] *See* Securities Exchange Act Release Nos. 20976 (May 18, 1984), 49 FR 22428; 21120 (July 6, 1984), 49 FR 28490; 21279 (August 31, 1984), 49 FR 35456; and 21315 (September 12, 1984) 49 FR 36726, respectively.

[Rel. No. IC–16005; 812–6769]

Fidelity Deutsche Mark Fund, L.P. et al.

Application;

September 25, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: Fidelity Deutsche Mark Fund, L.P., Fidelity Pound Fund, L.P., Fidelity U.S. Investments Bond Fund, L.P., Fidelity U.S. Investments Government Securities Fund, L.P., Fidelity Yen Fund, L.P., Fidelity New Jersey Tax-Free Portfolio, L.P. (the "Funds") and Fidelity Management & Research Company ("FMR") (collectively "Applicants").

Relevant 1940 Act Sections: Exemption requested under section 6(c) from the provisions of Section 2(a)(19) of the 1940 Act.

Summary of Application: Applicants seek an order exempting the Funds and certain of its proposed general partners (and any person who may become a successor or additional general partner) from the provisions of section 2(a)(19) of the 1940 Act to the extent that those general partners would be deemed "interested persons" of the Funds or their investment advisor, solely because of their status as general partners.

Filing Date: The application was filed on June 24, 1987 and amended on September 25, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 1:00 p.m., on October 16, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Service the Applicants with the request, either personally or by mail, and also sent it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicants, 82 Devonshire Street Boston, Massachusetts, 02109.

FOR FURTHER INFORMATION CONTACT: Curtis R. Hilliard, Special Counsel (202) 272–3030 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a free from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Each Fund is an open-end management investment company registered under the 1940 Act. Each Fund is organized as a limited partnership under the laws of the State of Delaware. Each Fund has filed with the Commission (1) a Notification of Registration on Form N–8A under

section 8(a) of the 1940 Act, and (2) a Registration Statement on Form N–1A under the 1940 Act and the Securities Act of 1933, as amended (the "Registration Statement"). Additional information concerning the Funds is contained in their respective Registration Statements.

2. FMR serves as the Funds' investment advisor and will be primarily responsible for the selection of the Funds' investments and the administration of the Funds. FMR, a wholly-owned subsidiary of FMR Corp., is a Massachusetts corporation and a registered investment advisor with the Securities and Exchange Commission. Fidelity Distributors Corporation, a wholly owned subsidiary of FMR, acts as the distributor of shares representing the Funds' partnership interests ("Shares").

3. Each Fund has two classes of partners: general partners ("General Partners") and limited partners ("Limited Partners"). The General Partners ultimately will include up to twelve individuals (the "Managing General Partners") and one corporate General Partner, FMR (the "Non-Managing General Partner"). At least a majority, except as provided in section 10 of the 1940 Act, anticipated to be nine of twelve (three of four in the case of Fidelity U.S. Investments Bond Fund, L.P. and Fidelity U.S. Investments Government Securities Fund, L.P.), of the Managing General Partners (the "Independent General Partners") will be unaffiiated with the Fund and FMR. Certain provisions of section 10 of the 1940 Act permit a registered investment company to have a board of directors less than a majority of which are not "interested persons" of such company, including section 10(d) of the 1940 Act (relating to certain open-end companies) and section 10(e) of the 1940 Act (relating to temporary vacancies in boards of directors). The Managing General Partners will perform the same directions for the Funds as do the Trustees of other mutual funds managed by FMR organized as Massachusetts business trusts and will consist of the same individuals serving as Trustees of such funds; the Managing General Partners will have complete and exclusive control over the management, conduct and operation of the Funds' business. Under the terms of each Fund's Agreement of Limited Partnership (the "Agreement") FMR, as the Non-Managing General Partner, is permitted to participate in the management of the Fund as a General Partner, only in the event that no Managing General Partner remains to elect to continue the business of the Fund and then only for the limited period of time (not in excess of 90 days) necessary to convene a meeting of the partners for the purpose of making such an election.

4. The Agreement provides that the General Partners shall not be personally liable for the repayment of any amounts standing in the account of a Limited Partner or holder of Shares including, but not limited to, contributions with respect to such Shares. Any such payment shall be solely from the Fund's assets. The General Partners shall not have any personal liability to any holder of Shares or to any Limited Partner for any loss, damage or any other cost incurred by reason of (1) any failure to withhold income tax under Federal or state tax laws with respect to income allocated to Limited Partners, (2) any change in Federal or state income tax laws, or in interpretations thereof, as they apply to the Fund, the holders of Shares or the Limited Partners, whether such change occurs through legislative, judicial or administrative action, (3) any error of judgment or mistake of fact or law, or (4) any other matter, unless the result of willful misfeasance, bad faith, gross negligence or reckless disregard of their duties. Any such loss, damage or other cost shall be satisfied from the Fund's assets.

5. The Agreement's provisions dealing with the liability and indemnification of General Partners will be supplemented by FMR's obtaining a standard, commercially-available, liability insurance policy, which will cover the General Partners, including the Managing General Partners, against liabilities and expenses to which they may be subject in their capacity as General Partners, so long as the General Partners have not engaged in willful misfeasance, bad faith, gross negligence or reckless disregard of their duties and have acted in good faith in the reasonable belief that their actions were in the best interest of the Fund.

6. To preserve each Fund's tax status as a partnership, rather than as an association taxable as a corporation, the Managing General Partners and the Non-Managing General Partner will, as long as current law, regulations, and Internal Revenue Service policy or interpretations thereof, in the opinion of counsel, require, own as a group not less than 1% of the Shares outstanding. The Non-Managing General Partner is obligated to contribute to the Fund through the purchase of Shares from time to time amounts in the aggregate sufficient to enable the General Partners to meet the 1% requirement. Thus, for so long as the Non-Managing General Partner continues to serve in that capacity it may not redeem or assign Shares it holds as the Non-Managing General Partner or otherwise accept distributions in cash or property if that action would result in the failure of the General Partners to maintain such 1% interest in the Fund (provided such ownership is required as described above).

7. Under the Agreement a Managing General Partner may not assign Shares which he holds in his capacity as a General Partner to any party without the consent of a majority of the Managing General Partners (exclusive of such General Partner proposing to assign his Shares). Any assignee of such Managing General Partner for which such consent has been granted may not become a substituted Managing General Partner except if elected as such by the remaining Managing General Partners, and Limited Partners, if required by section 16(a) of the 1940 Act, as provided in the Agreement and shall otherwise hold such Shares as a Limited Partner.

8. The Agreement provides that the Limited Partners do not have the right to and shall not take part in the control of the Funds' business and shall have no right or authority to act for or bind the Funds, but they may exercise the rights and powers of Limited Partners under this Agreement and the Delaware Limited Partnership Act. Each of the Funds has, or will obtain, an opinion of counsel to the effect that exercise by Limited Partners to be liable for the obligations of the Funds by reason of being deemed to participate in the control of the Partnership's business.

9. No Limited Partner shall be liable for the debts or obligations of the Funds, provided, however, that the contribution of a Limited Partner (represented, in the case of the Funds, by the price paid by Limited Partners for their shares) shall be subject to the risks of the business of the Funds and subject to the claims of the Funds' creditors, and provided further that, after any Limited Partner has received the return of any part of his contribution, he will be liable to the Funds to the extent required by the Delaware Uniform Limited Partnership Act.

10. The Delaware Uniform Limited Partnership Act also requires that a limited partner that has received a return of any part of his contribution be liable for the amount of the returned contribution to the extent necessary to discharge the partnership's liabilities to creditors, or for the amount of the contribution wrongfully returned if such

returned contribution was in violation of the partnership agreement or the Delaware Uniform Limited Partnership Act. Each Fund intends to include in its contracts a provision limiting the claims of creditors to the Fund's assets (as permitted by Section XV(g) of the Agreement) and may carry insurance in such amounts as the Managing General Partners, in their judgment, consider reasonable to cover potential liabilities of the Fund. In addition, the Managing General Partners will periodically review the question of the appropriateness of obtaining errors and omissions insurance for each Fund. Thus, the risk of a limited partner incurring financial loss on account of his liability will be limited to circumstances in which the Fund itself would be unable to meet its obligations.

Applicant's Legal Analysis

1. Each of the Managing General Partners is a partner of the Funds and a co-partner of FMR and, thus, under section 2(a)(3), each may be deemed an affiliated person of the Funds and FMR. As an affiliated person of the Funds and FMR, each of the Managing General Partners, including each Independent General Partner, may be an interested person of the Funds and FMR under sections 2(a)(19)(A) and 2(a)(19)(B) of the 1940 Act. If all of the Managing General Partners were deemed interested persons of the Funds and FMR, the Funds would be precluded from meeting a number of requirements imposed on a registered investment company by the 1940 Act and various rules under the 1940 Act.

2. To enable the Funds to comply with the requirements of the 1940 Act relating to an investment company's non-interested directors, Applicants, in accordance with section 6(c), seek an exemption from section 2(a)(19) of the 1940 Act so that the Managing General Partners will not be considered interested persons of the Funds or FMR solely because of their position as General Partners (the "Exemption"). FMR agrees, as long as current law, regulations, and Internal Revenue Service policy or interpretations thereof, in the opinion of counsel requires the General Partners to own as a group not less than 1% of the shares of each Fund outstanding, as a condition of the Exemption, to fulfill its obligation under the Agreement to contribute to each Fund through the purchase of Shares from time to time an aggregate amount sufficient to enable the General Partners to meet such 1% limit.

3. Applicants submit that the Exemption is both in the public interest and consistent with the policies underlying the 1940 Act. The Exemption, if granted, will enable the Funds to operate as limited partnerships and thereby afford the Funds flexibility to meet their investment objectives. It likewise is consistent with the protection of investors because it will assure oversight of the Funds' affairs by the Independent Managing General Partners.

For the Commission, by the Division of Investment Management, under delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16004; 812-5940]

Application; 5600, Inc.

September 25, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: 5600, Inc.

Relevant 1940 Act Section: Exemption requested under section 6(c) from all the provisions of the 1940 Act.

Summary of Application: Applicant seeks an order exempting from all the provisions of the 1940 Act certain investment vehicles primarily owned or controlled by the Rockefeller family ("Exclusive Family Investment Vehicle").

Filing Date: The application was filed on September 17, 1984, and amended on October 14, 1986, and September 22, 1987. A letter will be submitted during the notice period the substance of which are contained herein.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 19, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, Suite 5600, Rockefeller Plaza, New York, New York 10112.

FOR FURTHER INFORMATION CONTACT: Sherry A. Hutchins, Staff Attorney (202) 272-3026, or Brion R. Thompson, Special Counsel (202) 272-3016 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland, (301) 258-4300).

Applicant's Representations:

1. Applicant is one of several corporations which were established by the Rockefeller Family (the "Family") in 1979 to provide a more permanent structure for the offering of the various services that had, prior to that time, been provided by an office maintained by the Family. These services include financial planning, asset management, investment advice, trust and estate administration, legal and accounting services and other miscellaneous services. Applicant, directly and through its subsidiaries, is the principal management vehicle for these services. Among the subsidiaries of Applicant is Rockefeller and Co., Inc. ("Rockefeller"), an investment adviser registered under the Investment Advisers Act of 1940. The stock of these corporations is all held, directly or indirectly, by a trust which was established in 1979 by senior Family members (the "Family Trust") and is administered by trustees who are not Family members for the benefit of descendants of the grantors' generation of the Family and their spouses (the beneficiaries of the Family Trust being referred to herein as "Family Trust Beneficiaries").

2. The grandchildren and great grandchildren of John D. Rockefeller, Jr. make up the overwhelming majority of individual adult clients of Rockefeller. Each generation elects representatives to an advisory committee (the "Advisory Committee") which advises the trustees of the Family Trust. The Advisory Committee is charged with the responsibility of advising the trustees with respect to matters affecting the Family Trust and the Family Trust Beneficiaries, but has no power to restrict the discretion granted the trustees by the trust indenture. The Advisory Committee also has the power to set the compensation for the trustees. In addition, nine of the eleven members of the Advisory Committee, currently serve as directors of Applicant, and all

of the directors of Applicant are Family members. Two of the six directors of Rockefeller are Family members. The office maintained by the Family, together with the Family Trust and the corporations owned, directly or indirectly by the Family Trust, are collectively referred to herein as the "Family Office".

3. Clients of the Family Office are comprised principally of the classes of persons listed below and several partnerships whose partners consist of such persons (the "Family Clients"):

A. Rockefeller Family

(1) *Individuals.* Descendants of John D. Rockefeller, Jr. and his cousin Margaret Strong de Larrain and their spouses (including former spouses and adopted children or step children);

(2) *Estates.* Estates of persons described in A(1);

(3) *Trusts.* Trusts created by or for the benefit of persons described in A(1) or A(2).

No Individual Family member shall be considered a Family Client unless such person has a continuing and substantial relationship with the Family and the Family Office, as determined by Applicant's Chief Executive Officer. In determining whether a person has such a relationship, the following factors will be considered:

(1) The extent to which such person regularly uses the services of the Family Office and seeks advice from the Family Office;

(2) Whether such person actively participates in selection of members to the Advisory Committee and in other aspects of control of the various Family organizations;

(3) The proportion of such person's assets available for investment which are under management of the Family Office; and

(4) The degree to which such person is dependent on other members of the Family or the Family Office for such person's financial well being.

If an Individual Family member has under management of the Family Office at least 50% of such person's assets available for investment, it will be conclusively presumed that such person has such a continuing and substantial relationship and is, therefore, a Family Client.

B. Charities

The Rockefeller University and The Colonial Williamsburg Foundation and other charitable or educational institutions which, at the time they make any investment in an Exclusive Family Investment Vehicle (as defined below), are controlled (as defined in Rule 405 under the Securities Act of 1933, as amended) by the Family. A charitable or educational institution which at some time in the future may no longer be controlled (as defined above) by the Family shall continue to be deemed to be a Family Client, but only with respect to its existing investments in Exclusive Family Investment Vehicles (i.e., it may not make any new investments in such vehicles), provided, however, that the Family continue to have an eleemosynary interest in or is represented in the governance of such institution. If at any time the conditions set forth in the immediately preceding proviso are no longer met with respect to an institution, then one year after such institution no longer meets such conditions, such institution shall no longer be deemed to be a Family Client for any purposes hereof, and each Exclusive Family Investment Vehicle in which such institution has invested must redeem the investment interest of such institution unless such institution would otherwise be allowed to invest in such Exclusive Family Investment Vehicle in the absence of its classification as a Family Client.

C. Business

Businesses in which the Family has a significant financial interest, defined as at least a 25% equity interest, and which are controlled (as defined in Rule 405 under the 1933 Act) by the Family.

D. Key Employees

Key managers, supervisors and professionals or former employees of the Family and its Charities, Businesses or Trusts for the benefit of such Key Employees or former Key Employees. The term "Key Employees" shall mean those persons who meet each of the following criteria as determined by Applicant's Chief Executive Officer:

(1) such Key Employee is compensated at a rate in excess of $50,000 per year;

(2) such Key Employee either (i) has a substantial business or professional background and has at least a college or professional degree or (ii) has substantial specific experience in financial matters;

(3) such Key Employee performs significant executive, professional or managerial functions;

(4) such Key Employee is involved with the Family's business and/or philanthropic activities and interrelates personally and directly with Family members and has regular access to Family members; and

(5) such Key Employee is a participant in a Key Employee investment program, under which in its present form Family members or entities affiliated with Family members make or arrange for loans to employees for the purpose of investing such loan proceeds in Exclusive Family Investment Vehicles or other investment vehicles managed by the Family Office.

The estate of a Key Employee who dies after the Key Employee subscribed to purchase an interest in an Exclusive Family Investment Vehicle but before such Investment Vehicle has started to make investments will be returned the money invested by such Key Employee. At present less than 8% of the employees of the Family, and its Charities, Businesses or Trusts are Key Employees. It is anticipated that this percentage will not change substantially.

Applicant's Legal Analysis

1. Several limited partnerships have been established by the Family Office as investment vehicles for the Family Clients. All of these existing investment limited partnerships are advised by Rockefeller except for one which is separately managed by its general partners who are employees of the Family Trust. Several other investment general or limited partnerships, corporations or investment trusts will be established in the future. To the extent each existing and future Exclusive Family Investment Vehicle can no longer avail itself of the exemption for a "private" investment company under section 3(c)(1) of the 1940 Act, Applicant requests that the SEC exempt such existing and future investment vehicles from all provisions of the 1940 Act. Applicant submits that the Exclusive Family Investment Vehicles will be Family-owned and/or controlled investment vehicles and, thus, the requested exemption is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

2. Substantially all of the investors in the Exclusive Family Investment Vehicles will be Family Clients. It is the intention of the Family Office that each existing investment vehicle and each investment vehicle which may be established by the Family Office either (i) will be exempt from registration under the 1940 Act as an investment company by reason of section 3(c)(1) thereof or by reason of some other exemption from registration or (ii) if it is not so exempt (a) will be at least 90% owned by or for the benefit of Family Clients, (b) will be at least 25% owned by or for the benefit of Individuals,

VOL 52 ISS 190 OCT 1 1987 UMI

Estates and Trusts of the Family and (c) any part of any such investment vehicle that is not held by or for the benefit of Family Clients will be held by not more than 35 persons and will not be publicly held. Each existing or future Family investment vehicle established by the Family Office having the characteristics set forth in the foregoing clause (ii) is herein referred to as an "Exclusive Family Investment Vehicle". There are eight investment limited partnerships that are currently managed by the Family Office which qualify as Exclusive Family Investment Vehicles.

3. The Family Office controls, and will continue to control, access to membership in all Exclusive Family Investment Vehicles. The partnership agreement of each existing Exclusive Family Investment Vehicle provides that no person may be admitted as a limited partner without the approval of the general partner. The partnership agreement, charter, by-laws or other organizational documents of each future Exclusive Family Investment Vehicle will obtain a comparable restriction on admission of investors. In each case the general partner, managing partner or other manager with the power to control the admission of investors will consist of one or more corporations or persons affiliated or associated with or employed by the Family Office.

4. In addition, each existing partnership agreement except one provides, and the organizational documents of each future Exclusive Family Investment Vehicle will provide, that no ownership interest in the investment vehicle may be assigned without the approval of the general partner, managing partner or manager. The one existing partnership agreement without this provision is intended to be amended promptly, and in any event prior to the time such partnership would qualify as an Exclusive Family Investment Vehicle under the requested exemptive order, to add such a provision.

Applicant's Conditions

In order to assure that the status of the Exclusive Family Investment Vehicles as Family enterprises will not change prospectively, Applicant agrees to the following undertakings being made conditions to any order granting the requested exemptive relief:

1. That, each Exclusive Family Investment Vehicle will continue to furnish annually to each investor financial statements for such vehicle audited by an accounting firm of recognized national standing.

2. That, each Exclusive Family Investment Vehicle shall neither admit as a new investor, nor permit the assignment or transfer of any interest in such investment vehicle to, any individual or entity if such admission, assignment or transfer would cause such Exclusive Family Investment Vehicle to fail to have the following characteristics: (a) Such Exclusive Family Investment Vehicle will be at least 90% owned by or for the benefit of Family Clients, (b) such Exclusive Family Investment Vehicle will be at least 25% owned by or for the benefit of Individuals, Estates or Trusts of the Family and (c) any part of such Exclusive Investment Family Vehicle that is not held by or for the benefit of Family Clients will be held by not more than 35 persons and will not be publicly held.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16003; (812-6844)]

Application; McKinley Allsopp, Inc. et al.

Date: September 25, 1987.

ACTION: Notice of Application for Exemption Under the Investment Company Act of 1940 ("1940 Act").

Applicants: McKinley Allsopp, Inc., B.C. Christopher Securities, Co., and Investment Corporation of Virginia.

Relevant 1940 Act Sections: Exemption requested pursuant to section 6(c) from the provisions of section 30(f).

Summary of Application: Applicants seek an order pursuant to section 6(c) of the 1940 Act exempting certain transactions from section 30(f) of the 1940 Act to the extent that it incorporates the provisions of Section 16 of the Securities Exchange Act of 1934 ("1934 Act").

Filing Date: The application was filed on August 21, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 20, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, DC 20549. Applicants, c/o McKinley Allsopp, Inc., 780 Third Avenue, New York, New York 10017.

FOR FURTHER INFORMATION CONTACT: Thomas Mira, Staff Attorney (202) 272-3033, or Brion R. Thompson, Special Counsel (202) 272-3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION

Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier at (800) 231-3282 in Maryland (301) 258-4300.

Applicants' Representations

1. Applicants, broker-dealers registered under the 1934 Act, are the underwriters of a proposed public offering of common stock of PCL Diversifund, Inc. ("Fund"), a registered, closed-end, diversified, management investment company. A registration statement relating to the offering was filed with the SEC on August 12, 1987.

2. In the proposed public offering the Fund will offer 3,000,000 shares of common stock to the public, plus 450,000 shares to cover Applicants' over-allotment option. The Fund shares are to be purchased by Applicants pursuant to an underwriting agreement ("Underwriting Agreement") to be entered into between applicants, the Fund and PCMA, Inc., the Fund's investment adviser ("Adviser"). It is also contemplated that one or more dealers will offer to sell some of the Fund shares, and in connection with such offer and sale, each dealer will execute a Selected Dealer Agreement. It is intended that Applicants will make a public offering of all the Fund shares which Applicants are to purchase under the Underwriting Agreement, at the price specified therein, as soon as or after the effective date of the Fund's registration statement as Applicants deem advisable. Although the Fund's registration statement covers 3,450,000 shares of common stock (including the shares to cover the over-allotment option), the number may be increased or decreased in the Fund's registration statement, as amended at the time it becomes effective, depending on the market conditions and other factors to be considered by Applicants and the Fund at that time.

3. The underwriting commitment of any one or more of the Applicants may exceed 10% of the aggregate number of common shares of the Fund to be outstanding upon completion of its initial public offering. In addition to purchases from the Fund and sales of common shares, Applicants may engage in other purchases or sales of shares incident to a distribution, such as stabilizing purchases, purchases to cover over-allotments, and sales of common shares purchased in stabilization. Because section 30(f) of the 1940 Act subjects every person who is directly or indirectly the beneficial owner of more than 10% of any class of outstanding securities of a registered investment company to the same duties and liabilities as those imposed by section 16 of the 1934 Act, any Applicant owning more than 10% of the Fund's common shares becomes subject to the filing requirements of section 16(a) of the 1934 Act, and upon sale of the shares purchased by them, subject to the liabilities imposed by section 16(b) of the 1934 Act.

4. Some or all of the Applicants may fail to meet the requirement for exemption from section 16(b) as stated in Rule 16b–2(a)(3), because one or more of the Applicants who, pursuant to the Underwriting Agreement, may be obligated to purchase more than 10% of the shares of the Fund, and/or may distribute more than 50% of the shares of the Fund being offered. Moreover, one or more of the Applicants, even though they are initially obligated under the Underwriting Agreement to purchase 10% or less of the aggregate number of shares of the common stock to be outstanding upon completion of the public offering, may, as a consequence of defaults by other Applicants, become obligated to purchase more than 10% of the aggregate number of shares of common stock to be outstanding, and such Applicant may distribute more than 50% of the shares of common stock being offered.

Applicants' Legal Analysis

Section 16 of the 1934 Act was designed essentially to discourage the unfair use by insiders of "inside information" in short-term trading of their company's shares. There is no inside information in existence concerning the Fund. In addition, prior to the initial distribution of the shares, the Fund will have no assets other than cash or cash equivalents, no business of any sort, and all material facts will be set forth in the Fund's registration statement pursuant to which the shares will be offered and sold. No officer or director of any Applicant is an officer or director of either the Fund or the Adviser, or any affiliate of the Adviser, and Applicants do not anticipate that any partner, director, or officer of any other underwriter will be a director or officer of the Fund, the Adviser or any such affiliate. Because there is no possibility of abuse of inside information, Applicants submit that an exemption from section 30(f) is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Informal Airspace Meetings

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of informal airspace meetings.

SUMMARY: This notice announces a series of two informal airpace meetings to discuss proposed revocation, realignment, and establishment of restricted areas in the vicinity of Albemarle Sound, Harvey Point, and Long Shoal Point, North Carolina.

DATES: Manteo, North Carolina: 7:00 p.m. on November 3, 1987, Hertford, North Carolina: 7:00 p.m. on November 4, 1987.

ADDRESSES: North Carolina Aquarium, P.O. Box 467, Airport Road, Manteo, North Carolina 27954.

Albermarle Regional Planning and Development Commission, 512 South Main Street, Hertford, North Carolina 27944.

FOR FURTHER INFORMATION CONTACT: Walter E. Denley, Acting Manager, Airspace and Procedures Branch, ASO–530, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320. Telephone: (404) 763–7415.

Issued in Atlanta, Georgia, on September 22, 1987.

Walter E. Denley,

Acting Manager, Airspace and Procedures Branch, Southern Region.

[FR Doc. 87–22471 Filed 9–30–87; 8:45 am]

BILLING CODE 4910–73–M

Federal Highway Administration

Environmental Impact Statement; Jackson County, MO

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmenal impact statement will be prepared for a proposed highway project in Jackson County, Missouri.

FOR FURTHER INFORMATION CONTACT: Mr. James Mullen, Federal Highway Administration, P.O. Box 1787, Jefferson City, MO 65102, Telephone No. 314–636–7104.

Mr. Jerry A. Page, Director of Public Works, Jackson County Department of Public Works, Courthouse Annex, 308 West Kansas Avenue, Independence, MO 64050, Telephone No. 816–881–4510.

Mr. Norman A. Schemmer, Mid-America Regional Council, 300 Rivergate Center, 600 Broadway, Kansas City, MO 64105–1536 Telephone No. 816–474–4240.

SUPPLEMENTARY INFORMATION:

(1) The South Riverfront Expressway is a proposed 12 mile roadway that passes through Kansas City, Independence, Sugar Creek, and unincorporated Jackson County, Missouri. The proposed expressway begins at the Front Street interchange on I–435 and proceeds easterly along the south side of the Missouri River to a major interchange with M–291. The corridor continues east of M–291 to the vicinity of the Missouri Pacific Railroad then turns south to an interchange with U.S. 24. The expressway is proposed as a four-lane, limited access roadway. The purposes of the proposed project are to remove truck traffic from residential streets, to improve access to the industrial areas and to the Missouri River riverfront, and to support proposed industrial development in the Little Blue River Valley.

(2) Three alternative alignments for the proposed expressway have been identified. A majority of the length of all three alignments is on new location. The alternatives all are routed on the alignment of existing local roads in some locations. However, because of discontinuities in the existing road system, upgrading the existing facilities does not offer a functional alternative to the proposed action. The fourth alternative is the no action alternative.

(3) Preliminary analysis of the proposed expressway has been directed by a project review team consisting of

staff representatives of the Cities of Independence, Kansas City, and Sugar Creek; Jackson County; the Mid-America Regional Council; and the Missouri Highway and Transportation Department. There have been three public meetings held on the proposed project. The first was a pre-location meeting held on December 10, 1986. Meetings were held on June 16 and 18, 1987, to present the alternatives under consideration and the findings of preliminary evaluations and to obtain individuals' view on the project.

(4) A technical memorandum describing the proposed action, alternatives, and a preliminary assessment of impacts will be sent to appropriate Federal, state, and local agencies. Public hearings will be held on dates to be determined.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of OMB Circular No. A-95 regarding state and local clearinghouse review of Federal and federally assisted programs and projects apply to this program.)

James M. Mullen,

District Engineer, Jefferson City.

Customs Service

[T.D. 87-122]

Cancellation of Approval of Global Consultants, Inc., To Gauge Imported Petroleum and Petroleum Products

AGENCY: U.S. Customs Service, Treasury.

ACTION: Notice of cancellation of approval.

SUMMARY: Pursuant to § 151.13, Customs Regulations (19 CFR 151.13), Global Consultants, Inc., a commercial gauger approved by Customs on April 16, 1984, under T.D. 84-87, notified Customs that it had transferred its gauging business to Seatran, Inc., of Houston, and requested cancellation of its own Customs gauger approval. Accordingly, the Customs approval of Global Consultants to gauge imported petroleum and petroleum products is hereby cancelled without prejudice.

EFFECTIVE DATE: September 1, 1987.

FOR FURTHER INFORMATION CONTACT: Roger J. Crain, Office of Technical Services, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229, (202-566-2446).

Dated: September 24, 1987.

[T.D. 87-119]

Approval of Petrospect To Gauge Imported Petroleum and Petroleum Products

AGENCY: U.S. Customs Service, Treasury.

ACTION: Notice of approval.

SUMMARY: Pursuant to § 151.13, Customs Regulations (19 CFR 151.13), Petrospect, Inc., 1002 Third Avenue, Honolulu, Hawaii 96816 has applied to Customs for approval to gauge imported petroleum and petroleum products. Customs has determined that Petrospect meets all of the requirements for approval.

Accordingly, Petrospect, Inc., is hereby approved to gauge imported petroleum and petroleum products in the Honolulu Customs District.

EFFECTIVE DATE: September 1, 1987.

FOR FURTHER INFORMATION CONTACT: Roger J. Crain, Office of Technical Services, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229, (202-566-2446).

Approval of Seatran, Inc., To Gauge Imported Petroleum and Petroleum Products

AGENCY: U.S. Customs Service, Treasury.

ACTION: Notice of approval.

SUMMARY: Pursuant to § 151.13, Customs Regulations (19 CFR 151.13), Seatran, Inc., 3701 Kirby, Suite 734, Houston, Texas 77098, notified Customs that it had assumed the gauging services of Global Consultants, Inc., a commercial gauger approved by Customs on April 16, 1984, under T.D. 84-87. Seatran then applied to Customs for approval to gauge imported petroleum and petroleum products in its own right. Customs has determined that Seatran, Inc., meets all of the requirements for approval.

Accordingly, Seatran, Inc., is hereby approved to guage imported petroleum and petroleum products in the Houston Customs District.

EFFECTIVE DATE: September 1, 1987.

FOR FURTHER INFORMATION CONTACT: Roger J. Crain, Office of Technical Services, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229, (202-566-2446).

Sunshine Act Meetings

Federal Register
Vol. 52, No. 190
Thursday, October 1, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL ELECTION COMMISSION

[Federal Register No. 87-22147]

PREVIOUSLY ANNOUNCED DATE AND TIME: Tuesday, September 29, 1987, 10:00 a.m.

CHANGE IN MEETING: The closed meeting scheduled for this date was cancelled.

DATE AND TIME: Tuesday, October 6, 1987, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC.

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. 437g.
Audits conducted pursuant to 2 U.S.C. 437g, 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration.
Internal personnel rules and procedures or matters affecting a particular employee.

DATE AND TIME: Thurday, October 8, 1987, 10:00 a.m.

PLACE: 999 E Street NW., Washington, DC. (Ninth Floor).

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Setting of Dates for Future Meetings.
Correction and Approval of Minutes.
Eligibility Report for Candidates to Receive Presidential Primary Matching Funds.
FY '88 Management Plan.
1984 Public Financing Reports to the Congress Prepared Pursuant to 26 U.S.C. 9009(a) and 9039(a).
Routine Administrative Matters.

PERSON TO CONTRACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, Telephone: 202-376-3155.

Marjorie W. Emmons,

Secretary of the Commission.

[FR Doc. 87-22801 Filed 10-29-87; 2:25 pm]

BILLING CODE 6715-01-M

FEDERAL RESERVE SYSTEM

TIME AND DATE: 10:00 a.m., Wednesday, October 7, 1987.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: September 29, 1987.

James McAfee

Associate Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: (52 FR 36494 September 29, 1987).

STATUS: Closed meeting.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: Tuesday, September 22, 1987.

CHANGE IN THE MEETING: Addition/Deletion.

The following additional item will be considered at a closed meeting on Wednesday September 30, 1987, following the 10:00 a.m. open meeting.

Litigation matter.

The following item will not be considered at a closed meeting on Wednesday, September 30, 1987, following the 10:00 a.m. open meeting.

Report of investigation.

Commissioner Grundfest, as duty officer, determined that Commission business required the above changes.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Kevin Fogarty at (202) 272-3195.

Jonathan G. Katz,

Secretary.

Proposed Establishment of Airport Radar Service Areas; Notice of Proposed Rulemaking

VOL 52 ISS 190 OCT 1 1987 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 87-AWA-26]

Proposed Establishment of Airport Radar Service Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish an Airport Radar Service Area (ARSA) at Lovell Field, Chattanooga, TN; Monterey Peninsula Airport, CA; Fresno Air Terminal, CA; and Huntsville-Madison County-Carl T. Jones Field, AL. With the exception of Fresno Air Terminal, each location is an airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of each ARSA would require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at each of the affected locations would promote the efficient control of air traffic and reduce the risk of midair collision in terminal areas.

DATES: Comments must be received on or before January 7, 1988. Informal airspace meeting dates are as follows: Lovell Field, Chattanooga, TN—December 3, 1987; Monterey Peninsula Airport, CA—December 3 and 7, 1987; Fresno Air Terminal Airport, CA—December 7, 1987; and Huntsville-Madison County-Carl T. Jones Field, AL—December 2, 1987.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC-204], Airspace Docket No. 87-AWA-26, 800 Independence Avenue SW., Washington, DC 20591.

The informal airspace meeting places are as follows:

Fresno Air Terminal, CA, ARSA
Date: December 7, 1987
Time: 7:00 p.m.
Location: Holiday Inn, 5090 East Clinton Avenue, Fresno, CA

Huntsville-Madison County-Carl T. Jones Field, AL, ARSA
Date: December 2, 1987
Time: 7:00 p.m.
Location: Alabama Space and Rocket Center, Government Drive and Bob Wallace Drive, Huntsville, AL

Lovell Field, Chattanooga, TN, ARSA
Date: December 3, 1987
Time: 7:00 p.m.
Location: Tennessee Air National Guard Building, Lovell Field, Chattanooga, TN

Monterey Peninsula Airport, CA, ARSA
Date: December 3, 1987
Time: 7:00 p.m.
Location: Ingersoll Hall, Room 122, Naval Post Graduate School, Third and Sloat Avenues, Monterey, CA

and

Date: December 7, 1987
Time: 7:00 p.m.
Location: Board of Supervisor's Chambers, Monterey County Court House, Second Floor, East Wing, Church and Alisal Streets, Salinas, CA

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

The informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Joe Gill, Airspace Branch (ATO-240), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9252.

SUPPLEMENTARY INFORMATION:

Comments Invited

This notice involves four locations. Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-AWA-26." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Meeting Procedures

In addition to seeking written comments on this proposal, the FAA will hold informal airspace meetings for the proposed ARSA locations in order to receive additional input with respect to the proposal. The dates, times, and places for these meetings are listed above. Persons who plan to attend the meetings should be aware of the following procedures to be followed:

(a) The meetings will be informal in nature and will be conducted by the designated representative of the Administrator. Each participant will be given an opportunity to make a presentation.

(b) There will be no admission fee or other charge to attend and participate. The meetings will be open to all persons on a space-available basis. The FAA representative may accelerate the agenda to enable early adjournment if the progress of the meetings is more expeditious than planned.

(c) The meetings will not be recorded. A summary of the comments made at these meetings will be filed in the docket.

(d) Position papers or other handout material relating to the substance of the meetings may be accepted. Participants submitting handout materials should present an original and two copies to the presiding officer. There should be an adequate number of copies provided for further distribution to all participants.

(e) Statements made by FAA participants at the meetings should not be taken as expressing a final FAA position.

Agenda

Presentation of Meeting Procedures
FAA Presentation of Proposal
Public Presentations and Discussion

Background

On April 22, 1982, the National Airspace Review (NAR) plan was published in the **Federal Register** (47 FR 17448). The plan encompassed a review of airspace use and procedural aspects of the ATC system. Among the main objectives of the NAR was the improvement of the ATC system by increasing efficiency and reducing complexity. In its review of terminal airspace, NAR Task Group 1–2 concluded that TRSA's should be replaced. Four types of airspace configurations were considered as replacement candidates, of which Model B, since redesignated ARSA, was the consensus recommendation.

In response, the FAA published NAR Recommendation 1–2.2.1, "Replace Terminal Radar Service Areas with Model B Airspace and Service" in Notice 83–9 (July 28, 1983; 48 FR 34286) proposing the establishment of ARSA's at the Robert Mueller Municipal Airport, Austin, TX, and the Port of Columbus International Airport, Columbus, OH. ARSA's were designated at these airports on a temporary basis by SFAR No. 45 (October 28, 1983; 48 FR 50038) in order to provide an operational confirmation of the ARSA concept for potential application on a national basis.

Following a confirmation period of more than a year, the FAA adopted the NAR recommendation and, on February 27, 1985, issued a final rule (50 FR 9252; March 6, 1985) defining an ARSA and establishing air traffic rules for operation within such an area. Concurrently, by separate rulemaking action, ARSA's were permanently established at the Austin, TX, and Columbus, OH, airports and also at the Baltimore/Washington International Airport, Baltimore, MD (50 FR 9250; March 6, 1985). The FAA has stated that future notices would propose ARSA's for other airports at which TRSA procedures were in effect.

Additionally, the NAR Task Group recommended that the FAA develop quantitative criteria for proposing to establish ARSA's at locations other than those which are included in the TRSA replacement program. The task group recommended that these criteria take into account, among other things, traffic mix, flow and density, airport configuration, geographical features, collision risk assessment, and ATC capabilities to provide service to users. This criteria has been developed and is being published via the FAA directives system.

The FAA has established ARSA's at 89 locations under a paced implementation plan to replace TRSA's with ARSA's. This is one of a series of notices to implement ARSA's at locations with TRSA's or locations without TRSA's which warrant implementation of an ARSA.

Related Rulemaking

This notice proposes ARSA designation at four locations identified as candidates for an ARSA in the preamble to Amendment No. 71–10 (50 FR 9252). Other candidate locations will be proposed in future notices published in the **Federal Register**.

The Current Situation at the Proposed ARSA Locations

A TRSA is currently in effect at three of the locations at which ARSA's are proposed in this notice. Fresno Air Terminal is a radar facility currently providing Stage II service. A TRSA consists of the airspace surrounding a designated airport where ATC provides radar vectoring, sequencing, and separation for all aircraft operating under instrument flight rules (IFR) and for participating aircraft operating under visual flight rules (VFR), Stage II service, with the exception of separation provides the same. TRSA airspace and operating rules are not established by regulation, and participation by pilots operating under VFR is voluntary, although pilots are urged to participate. This level of service is known as Stage III and is provided at all locations identified as TRSA's. The NAR task group recommended the replacement of most TRSA's with ARSA's.

A number of problems with the TRSA program were identified by the task group. The task group stated that because there are different levels of service offered within the TRSA, users are not always sure of what restrictions or privileges exist, or how to cope with them. According to the task group, there is a shared feeling among users that TRSA's are often poorly defined, are generally dissimilar in dimensions, and encompass more area than is necessary or desirable. There are other users who believe that the voluntary nature of the TRSA does not adequately address the problems associated with nonparticipating aircraft operating in relative proximity to the airport and associated approach and departure courses. There is strong advocacy among user organizations that terminal radar facilities should provide all pilots the same service, in the same way, and, to the extent feasible, within standard size airspace designations.

Certain provisions of FAR § 91.87 add to the problem identified by the task group. For example, aircraft operating under VFR to or from a satellite airport and within the airport traffic area (ATA) of the primary airport are excluded from the two-way radio communications requirement of § 91.87. This condition is acceptable until the volume and density of traffic at the primary airport dictates further action.

The Proposal

The FAA is considering an amendment to § 71.501 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish ARSA's at Lovell Field, Chattanooga, TN; Monterey Peninsula Airport, CA; Fresno Air Terminal, CA; and Huntsville-Madison County-Carl T. Jones Field, AL, which are public airports, at three of which nonregulatory TRSA's are currently in effect. The proposed locations are depicted on charts in Appendix 1 to this notice.

FAA regulations, 14 CFR 91.88, define ARSA and prescribe operating rules for aircraft, ultralight vehicles, and parachute jump operations in airspace designated as an ARSA.

The ARSA rule provides in part that, prior to entering the ARSA, any aircraft arriving at any airport in an ARSA or flying through an ARSA must: (1) Establish two-way radio communications with the ATC facility having jurisdiction over the area, and (2) while in the ARSA, maintain two-way radio communications with that ATC facility. For aircraft departing from the primary airport within the ARSA, two-way radio communications must be maintained with the ATC facility having jurisdiction over the area. For aircraft departing a satellite airport within the ARSA, two-way radio communications must be established as soon as practicable after takeoff with the ATC facility having jurisdiction over the area, and thereafter maintained while operating within the ARSA.

All aircraft operating within an ARSA are required to comply with all ATC clearances and instructions and any FAA arrival or departure traffic pattern for the airport of intended operation. However, the rule permits ATC to authorize appropriate deviations to any of the operating requirements of the rule when safety considerations justify the deviation or more efficient utilization of the airspace can be attained. Ultralight vehicle operations and parachute jumps in an ARSA may only be conducted

VOL 52 ISS 190 OCT 1 1987 UMI

under the terms of an ATC authorization.

The FAA adopted the NAR task group recommendation that each ARSA be of the same airspace configuration insofar as practicable. The standard ARSA consists of airspace within 5 nautical miles of the primary airport extending from the surface to an altitude of 4,000 feet above that airport's elevation, and that airspace between 5 and 10 nautical miles from the primary airport from 1,200 feet above the surface to an altitude of 4,000 feet above that airport's elevation. Proposed deviation from the standard has been necessary at some airports due to adjacent regulatory airspace, international boundaries, topography, or unusual operational requirements.

Definitions, operating requirements, and specific airspace designations applicable to ARSA may be found in 14 CFR Part 71, §§ 71.14 and 71.501, and Part 91, §§ 91.1 and 91.88.

For the reasons discussed under "Regulatory Evaluation," the FAA has determined that this proposed regulation is not a "major rule" under Executive Order 12291 and is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Regulatory Evaluation

The FAA has conducted a Regulatory Evaluation of the proposed establishment of these additional ARSA sites. The major findings of that evaluation are summarized below, and the evaluation is available in the regulatory docket.

a. Costs

Costs which potentially could result from the establishment of additional ARSA sites fall into the following categories:

(1) Air traffic controller staffing, controller training, and facility equipment costs incurred by the FAA.

(2) Costs associated with the revision of charts, notification of the public, and pilot education.

(3) Additional operating costs for circumnavigating or flying over the ARSA.

(4) Potential delay costs resulting from operations within the ARSA rather than a TRSA.

(5) The need for some operators to purchase radio transceivers.

(6) Miscellaneous costs.

It has been the FAA's experience, however, that these potential costs do not materalize to any appreciable degree, and when they do occur, they are transitional, relatively low in magnitude, or attributable to specific implementation problems that have been experienced at a very small minority of ARSA sites. The reasons for these conclusions are presented below.

FAA expects that the additional ARSA sites proposed in this notice can be implemented without requiring additional controller personnel above current authorized staffing levels, because participation at these TRSA locations is already quite high, and the reduced separation standards permitted in ARSA's will allow controllers to absorb the slight increase in participating traffic by handling all traffic much more efficiently. Further, because controller training will be conducted during normal working hours, and existing TRSA facilities already operate the necessary radar equipment, FAA does not expect to incur any appreciable implementation costs. Essentially, the FAA will modify its terminal radar procedures at the proposed ARSA sites in a manner that will make more efficient use of existing resources.

No additional costs are expected to be incurred because of the need to revise sectional charts to remove TRSA airspace depictions and incorporate the new ARSA airspace boundaries. Changes of this nature are routinely made during charting cycles, and the planned effective dates for newly established ARSA's are scheduled to coincide with the regular 6-month chart publication intervals.

This rulemaking proceeding and process will satisfy much of the need to notify the public and educate pilots about ARSA operations. The informal public meeting being held at each location where an ARSA is being proposed provides pilots with the best opportunity to learn both how an ARSA works and how it will affect their local operations. The expenses associated with these public meetings are considered costs attributable to the rulemaking process; however, any public information costs following establishment of a new ARSA are strictly attributable to the ARSA. The FAA expects to distribute a Letter to Airmen to all pilots residing within 50 miles of ARSA sites explaining the operating and configuration of the ARSA finally adopted. The FAA also has issued an Advisory Circular on ARSA's. The combined Letter to Airmen and prorated Advisory Circular costs have been estimated to be approximately $500 for each ARSA site. This cost is incurred only once upon the initial establishment of an ARSA.

Information on ARSA's following the establishment of additional sites will also be disseminated at aviation safety seminars conducted throughout the country by various district offices. These seminars are regularly provided by the FAA to discuss a variety of aviation safety issues and, therefore, will not involve additional costs strictly as a result of the ARSA program. Additionally, no significant costs are expected to be incurred as a result of the follow-on user meetings that will be held at each site following implementation of the ARSA which will allow users to provide feedback to the FAA on local ARSA operations. These meetings are being held at public or other facilities which are being provided free of charge or at nominal cost. Further, because these meetings are being conducted by local FAA facility personnel, no travel, per diem, or overtime costs will be incurred by regional or headquarters personnel.

FAA anticipates that some pilots who currently transit a TRSA without establishing radio communications or participating in radar services may choose to circumnavigate the mandatory participation airspace of an ARSA rather than participate. Some minor delay costs will be incurred by these pilots because of the additional aircraft variable operating cost and lost crew and passenger time resulting from the deviation. Other pilots may elect to overfly the ARSA, or transit below the 1,200 feet above ground level (AGL) floor between the 5- and 10-nautical mile rings. Although this will not result in any appreciable delay, a small additional fuel burn will result from the climb portion of the altitude adjustment (which will be offset somewhat by the descent.)

FAA recognizes that the potential exists for delay to develop at some locations following establishment of an ARSA. The additional traffic that the radar facilities will be handling as a result of the mandatory participation requirement may, in some instances, result in minor delays to aircraft operations. FAA does not expect such delay to be appreciable. FAA expects that the greater flexibility afforded controllers in handling traffic as a result of the reduced separation standards will keep delay problems to a minimum. Those that do occur will be transitional in nature, diminishing as facilities gain operating experience with ARSA's and learn how to tailor procedures and allocate resources to take fullest advantage of the increased efficiencies due to the implementation of the ARSA. This has been the experience at most of the locations where ARSA's have been in effect for the longest period of time and is the recurring trend at the

locations that have been more recently designated.

The FAA does not expect that any operator will find it necessary to install radio transceivers as a result of establishing the ARSA's proposed in this notice. Aircraft operating to and from primary airports already are required to have two-way radio communications capability because of existing airport traffic areas and, therefore, will not incur any additional costs as a result of the proposed ARSA's. Further, the FAA has made an effort to minimize these potential costs throughout the ARSA program by providing airspace exclusions, or cutouts, for satellite airports located within 5 nautical miles of the ARSA center where the ARSA would otherwise have extended down to the surface. Procedural agreements between the local ATC facility and the affected airports have also been used to avoid radio installation costs.

At some proposed ARSA locations, special situations might exist where establishment of an ARSA could impose certain costs on users of that airspace. However, exclusions, cutouts, and special procedures have been used extensively throughout the ARSA program to alleviate adverse impacts on local fixed base and airport operators. Similarly, the FAA has eliminated potential adverse impacts on existing flight training practice areas, as well as soaring, ballooning, parachuting, ultralight and banner towing activities, by developing special procedures to accommodate these activities through local agreements between ATC facilities and the affected organizations. For these reasons, the FAA does not expect that any such adverse impact will occur at the candidate ARSA sites proposed in this notice.

b. Benefits

Much of the benefit that will result from ARSA's is nonquantifiable and is attributable to simplification and standardization of ARSA configurations and procedures, which should eliminate much of the confusion currently experienced by pilots when operating in nonstandard TRSA's. Further, once experience is gained in ARSA operations, the air traffic controllers will gain greater flexibility in handling traffic within an ARSA which will enable them to move traffic more efficiently than under the current TRSA's. These expected savings may or may not offset the delay that some sites may experience after the initial establishment of an ARSA, but are expected to eventually provide overall time savings to all traffic, IFR as well as VFR, as both pilots and controllers become more familiar with ARSA operating procedures.

Some of the benefits of the ARSA cannot be specifically attributed to individual candidate airports, but rather will result from the overall improvements in terminal area ATC procedures realized as ARSA's are implemented throughout the country. ARSA's have the potential of reducing both near and actual midair collisions at the airports where they are established. Based upon the experience at the Austin and Columbus ARSA confirmation sites, FAA estimates that near midair collisions may be reduced by approximately 35 to 40 percent. Further, FAA estimates that implementation of the ARSA program nationally may prevent approximately one midair collision every 1 to 2 years throughout the United States. The quantifiable benefits of preventing a midair collision can range from less than $100,000, resulting from the prevention of a minor nonfatal accident between general aviation aircraft, to $300 million or more, resulting from the prevention of a midair collision involving a large air carrier aircraft and numerous fatalities. Establishment of ARSA's at the sites proposed in the notice will contribute to these improvements in safety.

c. Comparison of Costs and Benefits

A direct comparison of the costs and benefits of this proposal is difficult for a number of reasons. Many of the benefits of the rule are nonquantifiable, and it is difficult to specifically attribute the standardization benefits, as well as the safety benefits, to individual candidate ARSA sites.

FAA expects that any adjustment problems that may be experienced at the ARSA locations proposed in this notice will only be temporary, and that once established, the ARSA's will result in an overall improvement in efficiency in terminal area operations. This has been the experience at the vast majority of ARSA sites that have already been implemented. In addition to these operational efficiency improvements, establishment of the proposed ARSA sites will contribute to a reduction in near and actual midair collisions. For these reasons, FAA expects that establishment of the ARSA sites proposed in this notice will produce long term, ongoing benefits that will far exceed their costs, which are essentially transitional in nature.

International Trade Impact Analysis

This proposed regulation will only affect terminal airspace operating procedures at selected airports within the United States. As such, it will have no affect on the sale of foreign aviation products or services in the United States, nor will it affect the sale of United States aviation products or services in foreign countries.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. Small entities are independently owned and operated small businesses and small not-for-profit organizations. The RFA requires agencies to review rules that may have a significant economic impact on a substantial number of small entities.

The small entities that potentially could be affected by implementation of the ARSA program include the fixed-base operators, flight shools, agricultural operators and other small aviation businesses located at satellite airports within 5 nautical miles of the ARSA center. If the mandatory participation requirement were to extend down to the surface at these airports, where under current regulations participation in the TRSA and radio communication with ATC is voluntary, operations at these airports might be altered, and some business could be lost to airports outside of the ARSA core. FAA has proposed to exclude many satellite airports located within 5 nautical miles of the primary airport at candidate ARSA sites to avoid adversely impacting their operations and to simplify coordinating ATC responsibilities between the primary and satellite airports. In some cases, the same purposes will be achieved through Letters of Agreement between ATC and the affected airports that establish special procedures for operating to and from these airports. In this manner, FAA expects to eliminate any adverse impact on the operations of small satellite airports that potentially could result from the ARSA program. Similarly, FAA expects to eliminate potentially adverse impacts on existing flight training practice areas, as well as soaring, ballooning, parachuting, ultralight, and banner towing activities, by developing special procedures that will accommodate these activities through local agreements between ATC facilities and the affected organizations. FAA has utilized such arrangements extensively in implementing the ARSA's that have been established to date.

Further, because the FAA expects that any delay problems that may initially develop following implementation of an

ARSA will be transitory, and because the airports that will be affected by the ARSA program represent only a small proportion of all the public use airports in operation within the United States, small entities of any type that use aircraft in the course of their business will not be adversely impacted.

For these reasons, the FAA certifies that the proposed regulation, if adopted, will not result in a significant economic impact on a substantial number of small entities, and a regulatory flexibility analysis is not required under the terms of the RFA.

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.501 [Amended]

2. Section 71.501 is amended as follows:

Fresno Air Terminal, CA [New]

That airspace within a 5-mile radius of the Fresno Air Terminal (lat. 36°46'28" N., long. 119°42'58" W.), extending upward from the surface to and including 4,400 feet MSL; and that airspace within a 10-mile radius of the airport extending upward from 1,600 feet MSL to and including 4,400 feet MSL.

Huntsville-Madison County-Carl T. Jones Field, AL [New]

That airspace within a 5-mile radius of the Huntsville-Madison County-Carl T. Jones Field (lat. 34°38'28" N., long. 86°46'26" W.) extending upward from the surface to and including 4,600 feet MSL; and that airspace within a 10-mile radius of the airport from the 315° T (315° M) bearing from the airport clockwise to the 187° T (187° M) bearing from the airport extending upward from 2,000 feet MSL to and including 4,600 feet MSL; and that airspace within a 10-mile radius of the airport from the 187° T (187° M) bearing from the airport clockwise to the 315° T (315° M) bearing from the airport, extending upward from 1,800 feet MSL to and including 4,600 feet MSL.

Lovell Field, Chattanooga, TN [New]

That airspace within a 5-mile radius of Lovell Field (lat. 35°02'07" N., long. 85°12'15" W.), extending upward from the surface to and including 4,700 feet MSL; and that airspace within a 10-mile radius of the airport from the 350° T (351° M) bearing from the airport clockwise to the 058° T (059° M) bearing from the airport extending upward from 2,200 feet MSL to and including 4,700 feet MSL; and that airspace within a 10-mile radius of the airport from the 058° T (059° M) bearing from the airport clockwise to the 234° T (235° M) bearing from the airport extending upward from 2,600 feet MSL to and including 4,700 feet MSL; and that airspace within a 10-mile radius of the airport from the 234° T (235° M) bearing from the airport clockwise to the 350° T (351° M) bearing from the airport extending upward from 3,300 feet MSL to and including 4,700 feet MSL.

Monterey Peninsula Airport, CA [New]

That airspace within a 5-mile radius of the Monterey Peninsula Airport (lat. 36°35'19" N., long. 121°50'52" W.), extending upward from the surface to and including 4,200 feet MSL; and that airspace within a 10-mile radius of the airport beginning at the Pacific Ocean shoreline southwest of the airport clockwise to the 140° T (124° M) bearing from the airport extending upward from 1,500 feet MSL to and including 4,200 feet MSL; and that airspace within a 10-mile radius of the airport beginning at the 140° T (124° M) bearing from the airport clockwise to the Pacific Ocean shoreline, extending upward from 3,200 feet MSL to and including 4,200 feet MSL. The airspace contained within Restricted Area R-2511 is excluded when it is in use.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

Oversight of Radio and TV Rules

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This Order amends broadcast regulations in 47 CFR Part 73. Amendments are made to correct, clarify or update certain technical equations, formulas and tables in the broadcast regulations.

EFFECTIVE DATE: October 1, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 30554.

FOR FURTHER INFORMATION CONTACT: Steve Crane, Policy and Rules Division, Mass Media Bureau, (202) 632–5414.

SUPPLEMENTARY INFORMATION: In this Order, rule revisions are made to update, clarify and correct regulations in Title 47, Code of Federal Regulations. Adopted September 3, 1987; released September 15, 1987.

Order

Adopted: September 3, 1987.
Released: September 15, 1987.

In the matter of oversight of the Radio and TV Broadcast Rules.

By the Chief, Mass Media Bureau.

1. In this Order, the Commission focuses its attention on the oversight of its radio and TV broadcast rules. Modifications are made herein to update, clarify or correct certain equations, formulas and tables in the broadcast regulations as described in the following amendment summaries:

(a) In § 73.150, Directional antenna systems, paragraph (b)(1)(i) contains a number of errors and omissions in the equations and definitional text presented there. These discrepancies have been implanted or text has been lost through inadvertence or printing error. Corrections and restorations are made herein via the following amendments:

(i) Revising the incorrectly stated mathematical expressions for the theoretical radiation pattern and the standard radiation pattern;

(ii) Adding the missing definitional text pertaining to the method of computing Q;

(iii) Adding the missing Equation 3; and

(iv) Remedying certain discrepancies such as removing the square brackets in Equation 1 and replacing with vertical lines correctly signifiying "absolute value"; adding the entire horizontal line which establishes the extent of the "angle" portion of the vector in Equation 1; replacing the horizontal line which establishes the extent of the square root in Equation 2; returning the horizontal line to the square root symbol missing in the definition of Q and in Equation 4; and correcting the definition of E_{rss}, just preceding Equation $4E(\Phi,\Theta)_{th}$. (See rule amendment paragraph 2).

(b) There are three equations in paragraph (d) of § 73.184 which are corrected here. The designations Equation 1 and Equation 2 are repositioned to the right of the Equations instead of their present incorrect positioning, and the designation Equation 3, which is missing from the rule, is replaced and appropriately positioned to the right of that equation. Other corrections to this paragraph include adding ⅓ to the mileage formula 50/f, and revising field intensity to read field strength in the instructional text which follows the Equations. (See rule amendment paragraph 3).

(c) In the Report and Order in Mass Media Docket 84–752, Changes in Technical Rules to Reflect New International Agreements, a new paragraph (d) was adopted in § 73.190, Engineering charts and related formulas. In making the transposition from the document, as adopted by the Commission, to the Code of Federal Regulations, several inaccuracies were implanted into the new rule section. Amendments are made herein to correct these errors. (See rule amendment paragraph 4).

(d) Regulations pertaining to prediction of coverage for TV stations, § 73.684, require the use of certain field strength charts in predicting distances to the field strength contours. These charts are designated as Figures 9 and 10 in § 73.699, TV engineering charts. The rule states that "To use the charts for other powers, the sliding scale associated with the charts should be trimmed and used as the ordinate scale."

With the development of contemporary calculation procedures (i.e., calculators and computers), use of the sliding scale to predict TV coverage has come to an end. Also, the sliding scale, sometime in the past several years, has inadvertently been dropped from the Code of Federal Regulations. The lack of comment regarding its disappearance gives further proof that it is no longer used.

In using the charts to predict the distance to a given contour, we have prepared a new procedure to be used in the future. It may be used in place of the missing sliding scale directions.

Two other amendments are made to this rule via this Order: in paragraph (c), two references are made to millivolts per meter which are corrected to read microvolts per meter. And, the equation following paragraph (c)(1) is revised to include the square root sign over the letter H (Height of antenna). (See rule amendment paragraph 5).

(e) In an Order adopted September 10, 1985, the Commission amended its rules to clarify protection provisions for the Commerce Department's Table Mountain Radio Receiving Zone at Boulder County, Colorado. FCC 85–497; 50 FR 39000, September 26, 1985. Amendments were made to paragraph (b) of § 73.1030. This paragraph contains a Table of values of field strength and power flux densities as they pertain to certain frequency ranges. The power flux density values must be expressed in negative term (−), and each value should be shown with a negative sign preceding it. In printing the Order in the **Federal Register**, the negative signs were inadvertently dropped. As consequence, the Table also appeared in the Code of Federal Regulations without the negative signs. Correction is made herein to restore the negative signs to the power flux density values.

Also, in paragraph (c)(1) of this rule section, a parenthetical expression makes reference to "* * * a free space characteristic impedance of 120 Ohms." The symbol pi, which belongs between 120 and Ohms, is missing. It is inserted here so that the impedance is properly stated as "* * * impedance of 120 π Ohms * * *" (See rule amendment paragraph 6).

2. No substantive changes are made herein which impose additional burdens or remove provisions relied upon by licensees or the public. We conclude, for the reasons set forth above, that these revisions will serve the public interest.

3. These amendments are implemented by authority delegated by the Commission to the Chief, Mass Media Bureau. Inasmuch as these amendments impose no additional burdens and raise no issue upon which comments would serve any useful purpose, prior notice of rulemaking, effective date provisions and public procedure thereon are inapplicable pursuant to the Administrative Procedure Act. 5 U.S.C. 553(b)(3)(B).

(4) Since a general notice of rulemaking is not required, the Regulatory Flexibility Act does not apply.

(5) Accordingly, it is ordered, That pursuant to sections 4(i), 303(r) and 5(c)(1) of the Communications Act of 1934, as amended, and §§ 0.61 and 0.283 of the Commission's Rules, Part 73 is amended as set forth in the attached

Appendix, effective on the date of publication in the **Federal Register.**

(6) For further information on this Order, contact Steve Crane, Mass Media Bureau, (202) 632–5414.

Acting Chief, Mass Media Bureau.

Appendix

Rule Changes

47 CFR is amended to read as follows:

1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154 and 303.

2. Section 73.150 (b)(1)(i) is amended by revising introductory text for equation 1 and equation 1, introductory text for equation 2 and equation 2, introductory texts for equations 3 and 4, equations 3 and 4 and definitional terms to read as follows:

§ 73.150 Directional antenna systems.

* * * * *

(b) * * *

(1) * * *

(i) The standard radiation pattern shall be based on the theoretical radiation pattern. The theoretical radiation pattern shall be calculated in accordance with the following mathematical expression:

$$E(\phi,\theta)_{th} = \left| k \sum_{i=1}^{n} F_i f_i(\theta) / S_i \cos\theta \cos(\phi_i - \phi) + \psi_i \right| \quad \text{(Eq. 1)}$$

where: * * *

* * * * *

The standard radiation pattern shall be constructed in accordance with the following mathematical expression:

$$E(\phi,\theta)_{std} = 1.05 \sqrt{[E(\phi,\theta)_{th}]^2 + Q^2} \quad \text{(Eq. 2)}$$

where * * *

* * * * *

The method of computing Q will be by using the metric system. For all situations prior to January 4, 1982, Q is the greater of the following quantities:

$$0.025\ g(\theta)\ E_{rss}$$

or

$$6.0\ g(\theta)\sqrt{P_{kW}}$$

For all situations on or after January 4, 1982, Q is the greater of the following quantities:

$$0.025\ g(\theta)\ E_{rss}$$

or

$$10.0\ g(\theta)\sqrt{P_{kW}}$$

where,

$g(\theta)$ is the vertical plane distribution factor, $f(\theta)$, for the shortest element in the array (see Eq. 2, above; also see § 73.190, Figure 5). If the shortest element has an electrical height in excess of 0.5 wavelength, $g(\theta)$ shall be computed as follows:

$$g(\theta) = \frac{\sqrt{|f(\theta)|^2 + 0.0625}}{1.030776} \qquad \text{(Eq 3)}$$

E_{rss} is the root sum square of the amplitudes of the inverse fields of the elements of the array in the horizontal plane, as used in the expression for $E(\phi,\theta)_{th}$ (see Eq. 1, above), and is computed as follows:

$$E_{rss} = k\sqrt{\sum_{i=1}^{n} F_i^2} \qquad \text{(Eq. 4)}$$

P_{kw} is the nominal station power expressed in kilowatts, see § 73.14. If the nominal power is less than one kilowatt, $P_{kw} = 1$.

(ii) * * *

* * * * *

3. Section 73.184 is amended by revising the text in paragraph (d) to read as follows: (the note to paragraph (d) remains unchanged):

§ 73.184 Groundwave field strength graphs.

* * * * *

(d) Provided the value of the dielectric constant is near 15, the curves of Graphs 1 to 19 may be compared with experimental data to determine the appropriate values of the ground conductivity and of the inverse distance field strength at 1 kilometer. This is accomplished simply by plotting the measured fields on transparent log-log graph paper similar to that used for Graphs 1 to 19 and superimposing this chart over the graph corresponding to the frequency involved. The log-log graph sheet is then shifted vertically until the best fit is obtained with one of the curves on the graph; the intersection of the inverse distance line on the graph with the 1 kilometer abscissa on the chart determines the inverse distance field strength at 1 kilometer. For other values of dielectric constant, the following procedure may be used for a determination of the dielectric constant of the ground, conductivity of the ground and the inverse distance field strength at 1 mile. Before the results of such determinations are submitted to the FCC, they must be converted to equivalent metric units. Graph 20 gives the relative values of groundwave field strength over a plane earth as a function of the numerical distance p and phase angle b. On graph paper with coordinates similar to those of Graph 20, plot the measured values of field strength as ordinates versus the corresponding distances from the antenna in miles as abscissae. The data should be plotted only for distances greater than one wavelength (or, when this is greater, five times the vertical height of the antenna in the case of a single element, i.e., nondirectional antenna or 10 times the spacing between the elements of a directional antenna) and for distances of less than $50f^{1/3}/_{mHz}$ miles (i.e., 50 miles at 1 mHz). Then, using a light box, place the sheet with the data plotted on it over the sheet with the curves of Graph 20 and shift the data sheet vertically and horizontally (making sure that the vertical lines on both sheets are parallel) until the best fit with the data is obtained with one of the curves on Graph 20. When the two sheets are properly lined up, the value of the field strength corresponding to the intersection of the inverse distance line of Graph 20 with the 1 mile abscissa on the data sheet is the inverse distance field strength at 1 mile, and the values of the numerical distance at 1 mile p_1, and of b are also determined. Knowing the values of b and p_1 (the numerical distance at one mile), we may substitute in the following approximate values of the ground conductivity and dielectric constant.

$$\chi \cong \frac{\pi}{p} \cdot \left(R/\lambda\right)_1 \cdot \cos b \qquad \text{Eq. 1}$$

$\left(R/\lambda\right)_1 =$ Number of wavelengths in 1 mile.

$$\delta_{e.m.u.} = \frac{\chi f_{mHz}}{17.9731} \cdot 10^{-14} \qquad \text{Eq. 2}$$

$\delta_{e.m.u.}$ = Conductivity of the ground expressed in electromagnetic units.

f_{mHz} = frequency expressed in megahertz.

$$\epsilon \cong \chi \tan b - 1 \qquad \text{Eq 3}$$

ϵ = dielectric constant of the ground referred to air as unity.

First solve for χ by substituting the known values of p_1, $(R/\lambda)_1$ and cos b in Equation 1. Equation 2 may then be solved for δ and Equation 3 for ϵ. At distances greater than $50/f^{1/3}_{mHz}$ miles the curves of Graph 20 do not give the correct relative values of field strength since the curvature of the earth weakens the field more rapidly than these plane earth curves would indicate. Thus, no attempt should be made to fit experimental data to these curves at the larger distances.

$$\theta^{\circ} = \tan^{-1}\left(k_n \cot\frac{d}{444.54}\right) - \frac{d}{444.54}$$

Where:
d = distance in kilometers
n = 1 for 50% field strength values
n = 2 or 3 for 10% field strength values
and where
$K_1 = 0.00752$
$K_2 = 0.00938$
$K_3 = 0.00565$

Note: Computations using these formulas should not be carried beyond 0.1 degree.

* * * * *

5. Section 73.684 is amended by revising paragraphs (c) introductory text and (c)(1) to read as follows:

§ 73.684 Prediction of coverage.

* * * * *

(c) In predicting the distance to the field strength contours, the F (50,50) field strength charts (Figures 9 and 10 of § 73.699) shall be used. If the 50% field strength is defined as that value exceeded for 50% of the time, these F (50,50) charts give the estimated 50% field strengths exceeded at 50% of the locations in dB above 1 uV/m. The charts are based on an effective power of 1 kW radiated form a half-wave dipole in free space, which produces an unattenuated field strength at 1.61 kilometers (1 mile) of about 103 dB above 1 uV/m. To use the charts to predict the distance to a given contour, the following procedure is used: Convert the effective radiated power in kilowatts for the appropriate azimuth into decibel value referenced to 1 kW (dBu). If necessary, convert the selected contour to the decibel value (dBu) above 1 microvolt per meter (1 uV/m). Subtract the power value in dBk from the contour value in dBu. Note that for power less than 1 kW, the difference value will be greater than the contour value because the power in dBk is negative. Locate the difference value obtained on the vertical scale at the left edge of the chart. Follow the horizontal line for that value into the chart to the point of intersection with the vertical line above the height of the antenna above average terrain for the appropriate azimuth located on the scale at the bottom of the chart. If the point of intersection does not fall exactly on a distance curve, interpolate between the distance curves below and above the intersection point. The distance values for the curves are located along the right edge of the chart.

(1) In predicting the distance to the Grade A and Grade B field strength contours, the effective radiated power to be used is that radiated at the vertical angle corresponding to the depression angle between the transmitting antenna center of radiation and the radio horizon as determined individually for each azimuthal direction concerned. The depression angle is based on the difference in elevation of the antenna center of radiation above the average terrain and the radio horizon, assuming a smooth sperical earth with a radius of 8,495.5 kilometers (5,280 miles) and shall be determined by the following equation:

$$A = 0.0277\sqrt{H}$$

Where:
A is the depression angle in degrees.
H is the height in meters of the transmitting antenna radiation center above average terrain of the 3.2—16.1 kilometers (2–10 miles) sector of the pertinent radial.

This formula is empirically derived for the limited purpose specified here. Its use for any other purpose may be inappropriate.

Note. * * *

* * * * *

4. Section 73.190 is amended by revising paragraph (d) to read as follows:

§ 73.190 Engineering charts and related formulas.

* * * * *

(d) Figure 6a depicts angles of departure versus transmission range. These angles may also be computed using the following formulas:

6. Section 73.1030 is amended by revising paragraphs (b) introductory text and (c) introductory text to read as follows:

§ 73.1030 Notifications concerning interference to radio astronomy, research and receiving installations.

* * * * *

(b) *Radio receiving installations.* Protection for Table Mountain Radio Receiving Zone, Boulder County, Colorado: Applicants for a station authorization to operate in the vicinity of Boulder County, Colorado under this Part are advised to give due consideration, prior to filing applications, to the need to protect the Table Mountain Radio Receiving Zone from harmful interference. These are the research laboratories of the Department of Commerce, Boulder County, Colorado. To prevent degradation of the present ambient radio signal level at the site, the Department of Commerce seeks to ensure that the field strengths of any radiated signals (excluding reflected signals) received on this 1800 acre site (within the area bounded by 40 09 10 N Latitude on the north, 105 13 31 W Longitude on the east, 40 07 05 N Latitude on the south and 105 15 13 W Longitude on the west) resulting from new assignments (other than mobile stations) or from the modification of relocation of existing facilities do not exceed the following values:

Frequency range	Field strength [1]	Power flux density* [2]
Below 540 kHz	10	−65.8
540 to 1600 kHz..	20	−59.8
1.6 to 470 MHz....	10	**−65.8
470 to 890 MHz...	30	**−56.2
Above 890 MHz...	1	**−85.8

[1] (mV/m) in authorized bandwidth of service.

[2] (dBW/m^2) in authorized bandwidth of service.

*Equivalent values of power flux density are calculated assuming free space characteristic impedance of $376.7 = 120\pi$ ohms.

**Space stations shall conform to the power flux density limits at the earth's surface specified in appropriate parts of the FCC rules, but in no case should exceed the above

levels in any 4 kHz band for all angles of arrival.

* * * * *
